ADULT OCCUPANT PROTECTION

- GOOD
- ADEQUATE
- MARGINAL
- WEAK
- POOR

FIELD:
- DRIVER
- FRONT PASSENGER

The protection offered to the driver's and passenger's head and neck was good. The driver's chest showed marginal protection and the passenger's chest showed good protection. The driver’s and left passenger’s knees showed marginal protection as they could impact with dangerous structures behind the dashboard supported by the Tranfascia tube. The passenger's right knee showed good protection. The driver's and passenger's tibias showed adequate protection. The bodyshell was rated as stable. The footwell area was rated as stable. The car offers standard SBR for driver and passenger. All of the above explains the four stars for adult occupant protection.

CHILD OCCUPANT

The child seat for the 3 year old was installed FWF using the adult belt and could not prevent excessive forward movement of the head while offering poor protection to the chest. The 1.5 year old child seat was installed RWF with the adult belt while offering good protection to the head and poor protection to the chest. CRS marking was permanent. The recommended CRSs did not show incompatibility. The vehicle offers lapbelt in the rear centre position. The car does not offer ISOFIX anchorages. All of the above explains the two stars for child occupant protection.
