ADULT OCCUPANT PROTECTION

Frontal offset deformable barrier test

12.3 p

Side movable deformable barrier test (car)

16 p

- GOOD
- ADEQUATE
- MARGINAL
- WEAK
- POOR

Bodyshell integrity (frontal) STABLE

Side impact protection doors (Structural) YES

Side pole impact test (pole)

OK

Comments

Frontal impact: the protection offered to the driver's and passenger's head and neck was good. Driver's and passenger's chest showed marginal protection. Driver's and passenger's knees showed good protection. Driver's tibias showed adequate protection and passenger's tibias showed adequate and marginal protection. Footwell area was rated as stable. The bodyshell was rated as stable and is capable of withstanding further loadings.

Side impact: head, chest, abdomen and pelvis protection was good.

Side pole impact: curtain airbags meet the fitment requirements and pole impact test was performed in a version with side head protection airbags, showing good protection to the head, abdomen and pelvis, and weak protection to the chest.

ESC: meets the fitment rate requirements and the performance shown in the test was acceptable according to Global NCAP's latest requirements.

## Comments

Frontal impact: the child seat for the 3 year old was installed rearward facing using the i-size anchorages and a support leg and it was able to prevent head exposure during the frontal impact offering full protection. The child seat for the 18 month old was installed rearward facing using the i-size anchorages and a support leg and it was able to prevent head exposure during the frontal impact offering full protection.

Side impact: both CRS's offered full side impact protection.

The car does not offers 3 point belts in all seating positions. The car offers the possibility to disconnect the passenger airbag in case a rearward facing CRS will be installed in this position. Most of the CRS installation passed for the assessed CRS.
