HANSTONE GOLD

HANS: TSX-V

Applying Modern Exploration to Historically Proven
Mineralized Zones in BC's Golden Triangle

Forward Looking Statements

INFORMATION CONTAINED IN THIS PRESENTATION

This presentation is a summary description of Hanstone Gold Corp. and does not purport to be complete. This presentation is not, and in no circumstances is to be construed as a prospectus, advertisement or a public offering of securities. No securities regulatory authority or similar authority has reviewed or in any way passed upon the document or the merits of the Company's securities and any representation to the contrary is an offence.

Except where otherwise indicated, the information contained in this presentation has been prepared by Hanstone and Axiom Exploration Group Ltd. ("Axiom" or "Axiom Group") and there is no representation or warranty by either party or any other person as to the accuracy or completeness of the information set forth herein. This presentation includes information on adjacent properties that was obtained from various publicly available sources referred to herein and the accuracy and completeness of such information has not been verified by Hanstone. Except as otherwise stated, information included in this presentation is given as of the date hereof. The delivery of this presentation shall not imply that the information herein is correct as of any date after the date hereof.

FORWARD-LOOKING INFORMATION

The information contained herein contains "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and "forward-looking information" within the meaning of applicable Canadian securities legislation. "Forward-looking information" includes, but is not limited to, statements with respect to the activities, events or developments that the Company expects or anticipates will or may occur in the future. Generally, but not always, forward-looking information and statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", or "believes" or the negative connotation thereof or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved" or the negative connotation thereof.

Forward-looking information and statements are based on the then current expectations, beliefs, assumptions, estimates and forecasts about Hanstone's business and the industry and markets in which it operates and will operate. Forward-looking information and statements are made based upon numerous assumptions, including among others, the results of planned exploration activities are as anticipated, the price of precious and base metals, the cost of planned exploration activities, that financing will be available if and when needed and on reasonable terms, that third party contractors, equipment, supplies and governmental and other approvals required to conduct Hanstone's planned exploration activities will be available on reasonable terms and in a timely manner and that general business and economic conditions will not change in a material adverse manner. Although the assumptions made by the Company in providing forward-looking information or making forward-looking statements are considered reasonable by management at the time, there can be no assurance that such assumptions will prove to be accurate.

Forward-looking information and statements also involve known and unknown risks and uncertainties and other factors, which may cause actual results, performances and achievements of Hanstone to differ materially from any projections of results, performances and achievements of Hanstone expressed or implied by such forward-looking information or statements, including, among others, negative operating cash flow and dependence on third party financing, uncertainty of the availability of additional financing, the risk that future assay results will not confirm previous results, imprecision of mineral resource estimates, the uncertainty of commodity prices, aboriginal title and consultation issues, exploration risks, reliance upon key management and other personnel, deficiencies in the Company's title to its properties, uninsurable risks, failure to manage conflicts of interest, failure to obtain or maintain required permits and licenses, changes in laws, regulations and policy, competition for resources and financing, or other approvals.

Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in the forward-looking information or implied by forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended.

There can be no assurance that forward-looking information and statements will prove to be accurate, as actual results and future events could differ materially from those anticipated, estimated or intended. Accordingly, readers should not place undue reliance on forward-looking statements or information. The Company undertakes no obligation to update or reissue forward-looking information as a result of new information or events except as required by applicable securities laws.

Share Structure

Share Structure as of April 20, 2021	
Shares Issued and Outstanding	29,182,014
Warrants/Options Issued and Outstanding	20,615,958
Fully Diluted Share Structure	49,797,972

Potential Warrant/Option Proceeds	
Private Placement Warrants	\$5,246,790
Finder's Warrants	\$60, 823
Stock Options	\$711,000
TOTAL	\$6,020,613

Share Capital	
Initial Share Capital	\$802,751
Capital Raised to Date	\$4,404,396
Current Share Capital	\$5,207,147
Potential Warrant/Option Proceeds	\$6,020,613
Potential Share Capital	\$11,227,760

Hanstone Corporate Leadership

BOB HANS

Executive Chairman & Director

- Entrepreneur with an investment background in real estate and industrial properties
- Founder of 'The Hans Group' comprising a collection of businesses operating in BC for 40 years including; mining and quarry extraction operations, sand & gravel supplies, gravel trucking, earth works, commercial real estate holding companies

RAYMOND MARKS

President, CEO & Director

- 50 + years experience as owner and operator in mining and logging industry
- Previously Vice President and Director for Tudor Gold Corp
- Seasoned prospector with history of discovering mineral deposits in the Golden Triangle

BOB QUINN

Vice President & Director

- 40+ years of diverse board, management and legal international mining industry experience
- Former General Counsel of Battle Mountain Gold
- Chairman of the Board of Mercator Minerals Ltd., North American Palladium Ltd., Great Western Minerals Group Ltd. and eCobalt Solutions Inc.
- Previously director of Tudor Gold Corp.

ANDRE DOUCHANE

Director

- Mining Engineer with 40 years of building, operating, & managing world-wide operations.
- 14 years with ASARCO, Manager of the Coeur Mine, in Idaho
- Former VP and GM of Round Mountain Gold Corp – increasing production from 160,000 to +400,000 ounces
- VP of Operations, Battle Mountain Gold
- Permitted & engineered Midas Mine to production for Franco-Nevada under budget & ahead of schedule
- CEO and Executive Director of BBX Minerals, Ltd

JAMES ENGDAHL

Director

- Served as officer and director of numerous public mining companies over the last 30 years.
- Heavily involved in developing mine-to-market strategies for strategic and critical metals
- Strong background in corporate finance, specializing in mergers and acquisitions; successfully financed many projects in Canada
- Currently Chairman of the Board of Aurex Energy Corp. and CEO of Mas Gold

DONG SHIM

CFO & Corporate Secretary

- CPA of British Columbia and a Certified Public Accountant registered in the State of Illinois, United States.
- Served as an audit partner on numerous engagements with a highly reputable mid-sized firm
- Worked with publicly traded companies, primarily focusing on mining, oil and gas, pharmaceutical, and high-tech industries

Hanstone Advisory & Technical Team

DOUG ENGDAHL, P.GEO.

President & CEO of Axiom Group

- Professional Geoscientist registered with the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS)
- President & CEO and Principal Geologist of Axiom Exploration Group
- 12 years + geological experience in junior and major exploration and mining sectors across North America and in Africa
- Focuses on data compilation and interpretation, drill target generation and drill program management
- Mining experience includes the SeaBee Gold Mine, Cameco's Cigar and McArthur River mine operations and multiple locations in Nevada

TYLER FIOLEAU, P.GEO.

Senior Geologist of Axiom Group

- Has been actively involved in mineral exploration for over 16 years in Gold, Uranium and VMS style deposits
- Has been involved in project management at various stages of exploration from greenfields to advanced brownfields projects
- Is a member in the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS)
- Experience includes geotechnical analysis, directional definition drilling, GIS, technical reporting and compilation

SHANE UREN

Technical Advisor for Mine Permitting

- Received B.Sc. in Ecology from the University of Western Ontario, 1996 and M.Sc. in Civil Engineering from the University of BC in 1998. Also registered as a Professional Biologist in BC
- 20 years experience in permitting and environmental assessments
- Multiple Sr. management and executive roles, including VP Safety Health & Environment for Avanti Kitsault Mine Ltd., and Vice President Environment and Permitting for Copper Fox Metals Inc. and technical advisor to both Carmax Mining Corp. and Atrum Coal NL

MATTHEW SCHWAB, P.GEO.

Senior VP of Axiom Group

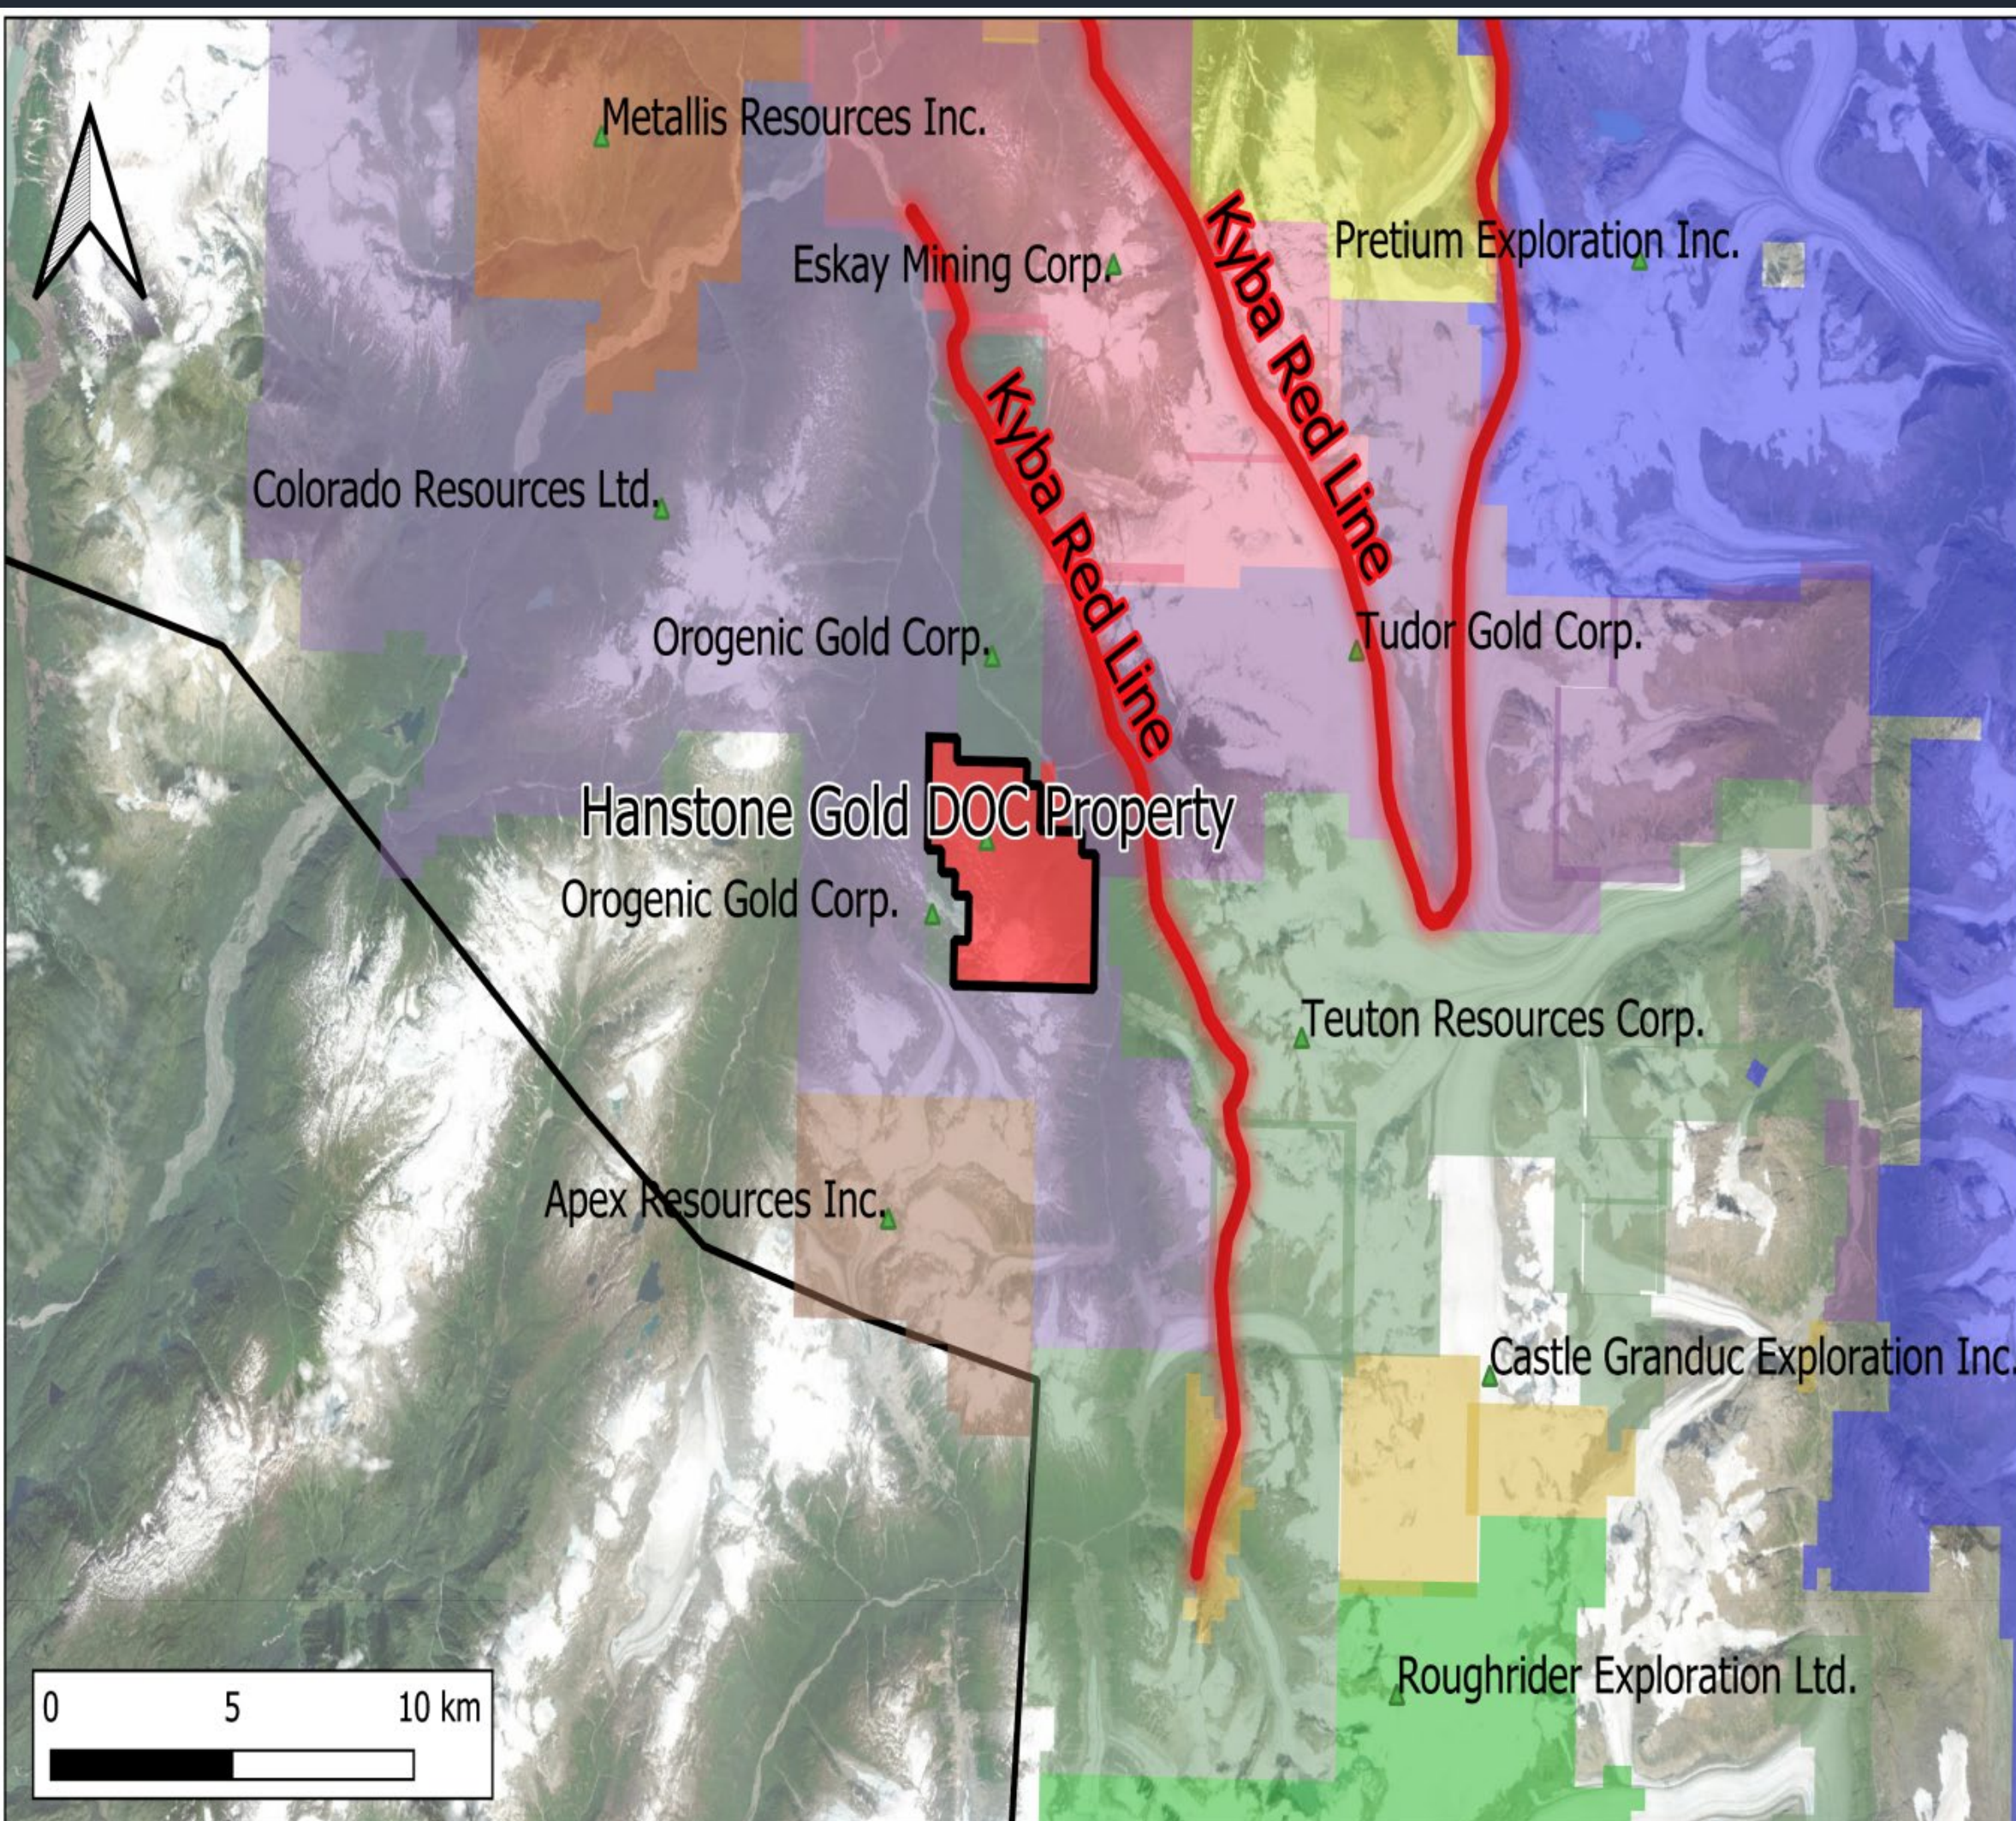

- Professional Geologist with 11+ years of operational supervision, resource exploration and business mgmt experience in natural resources industries
- Currently President and Sr. Geologist of Axiom Group
- B.Sc. in Geological Sciences from University of Saskatchewan (Honours)
- Member of the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS) and of Alberta (APEGA).
- North American and African experience in operational project management
- Instrumental in discovery of the NexGen Arrow uranium deposit in Saskatchewan

PETER DUECK, MBA, P.GEO.

VP & Chief Geophysicist of Axiom Group

- Chief Geophysicist for Hudbay Minerals Inc until 2018.
- Founder of Aerial Imaging Resources Inc. (AIR)
- President of Pioneer Aerial Surveys Ltd. in 2018 after AIR was acquired by Global UAV Technologies

Golden Triangle's Kyba Red Line

Kyba Red Line:

“World-class porphyry/intrusion related Au-Cu deposits occur within 2 km of KRL.”
(Northern Miner 2015)

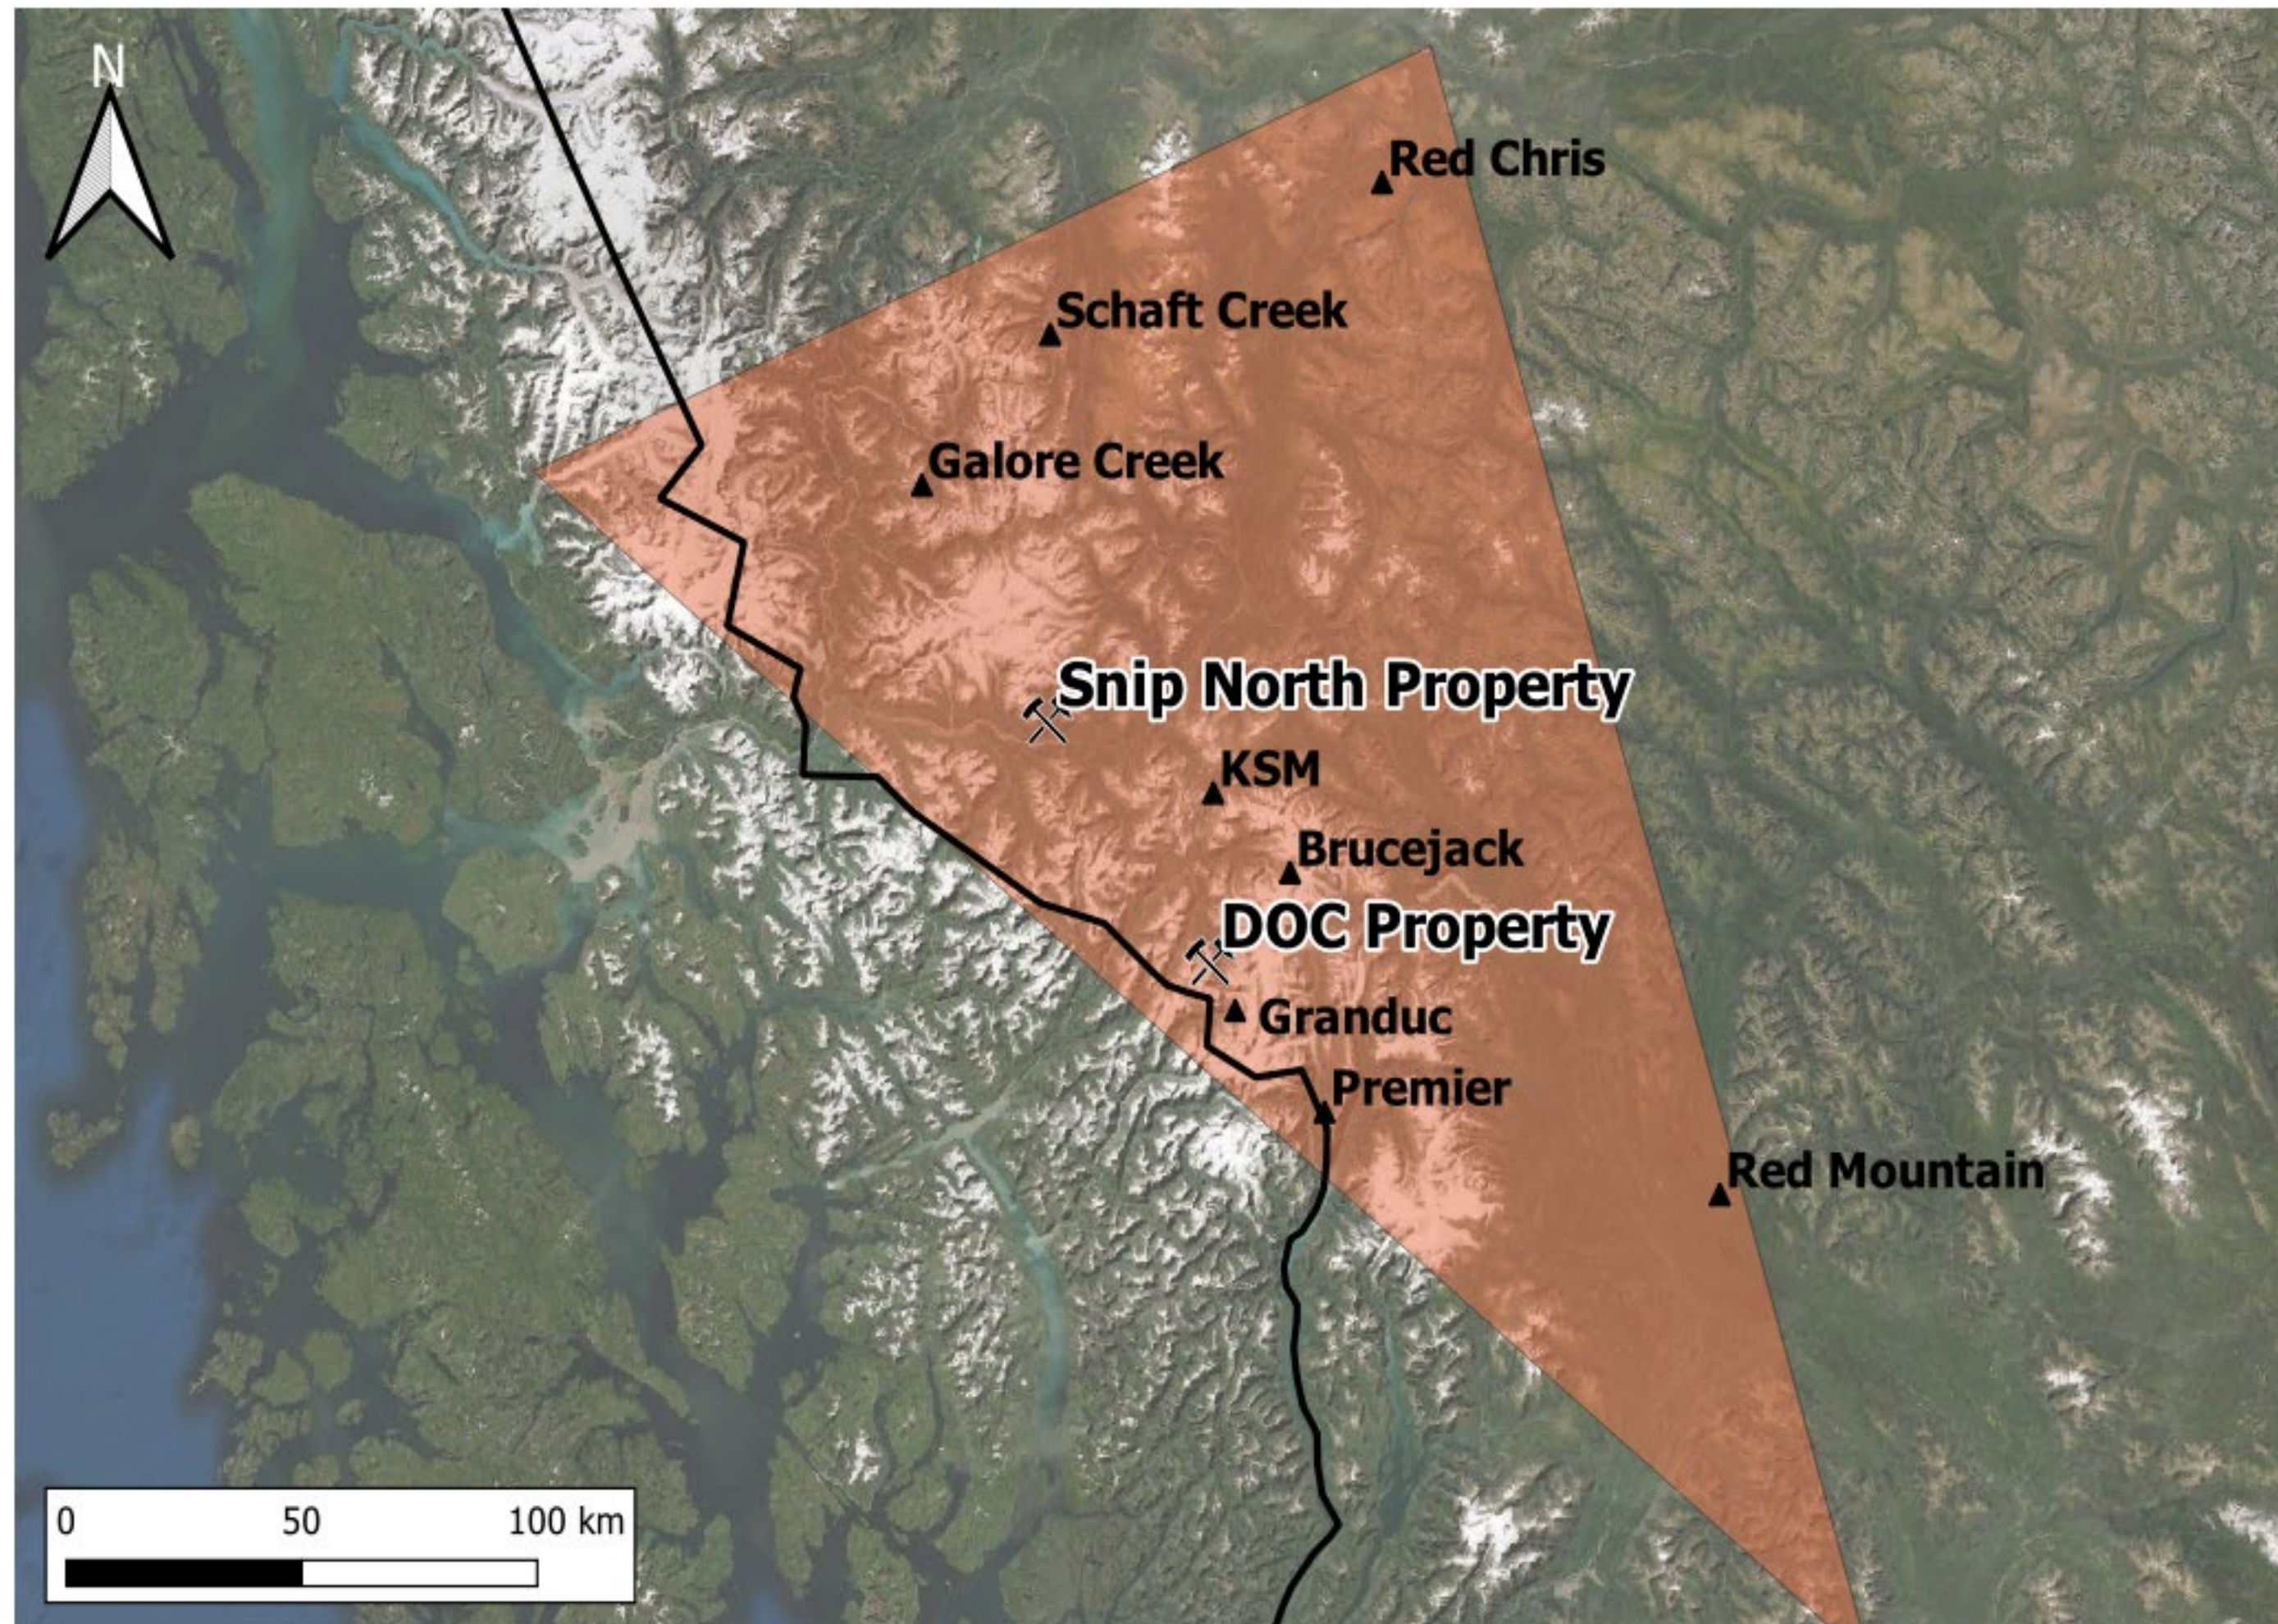

Hanstone DOC Property:

**Within 2km of Kyba Red Line
with very positive 2020 drill results**

- **Tudor Gold:** Treaty Creek - 19.4 M Oz AuEq M&I & 7.9 M Oz AuEq Inferred
- **Pretium Exploration:** BruceJack-prod 1.23 M Oz Au, 4.2 M Oz Au reserves
- **Teuton Res:** Potential NSR's on Pretium's Snowfield and Valley of Kings deposits: est. \$561M (Teuton website, 2021)

Kyba Red Line: After Geologists Jeff Kyba and Joanne Nelson the B.C. Geological Survey

Golden Triangle

Hanstone Gold is a junior mineral resource company engaged in the exploration of precious metal projects in the Golden Triangle of BC, Canada.

Projects include the historic Doc Property and Snip North Property, covering 5,040.82Ha.

First Class Explorer in Golden Triangle

Portfolio of Optimally-Situated Projects near Major Au/AG/Cu Deposits in Heart of the Golden Triangle

Doc Property

- One of Earliest Discoveries in Golden Triangle (circa 1900)
- Extensive Historical Evaluation of Multiple Mineralized Zones (assays to 241.89 g/t Au)
- Potential for **Near Term Production Opportunity**
- Medium / Long Term Exploration Upside Potential
- Modern Exploration Methods applied with greater results on historical drill holes
- **Existing Infrastructure**; Powerline Near Property, Readily Accessible Extensive Underground Workings, On-Site Exploration Roads

Snip North Property

- **Long Term Exploration Upside Potential**
- Multiple Mineralized Zones Spanning Property with both Historic & Recent Assays (Grades up to 9.94 g/t Au)

Doc Project History

Doc Property

- Early production commenced in 1890's included trenching and underground development of four adits & construction of small mill
- 1940's exploration led to discovery of numerous mineralized quartz veins in shear zones with Q17 and Q22 veins traced for 400 m
- Historic gold assays as high 241.89 g/t in outcrop sampling
- 1970's Q17 vein returned an average reported grade of 0.309 oz/ton gold across an average width of 2.47 m over 79.25 m strike
- 1990's activities ceased due to drop in commodity prices

Doc Mineralized Zones

Historic Resources*

- 100,851 tons Grading 8.85 g/t Au

Assay Highlights

Q32 Zone: 241.89 g/t Au, 526.1 g/t Ag

Q19 Zone: 202.0 g/t Au, 1,735.0 g/t Ag

Quinn Eskay Zone:

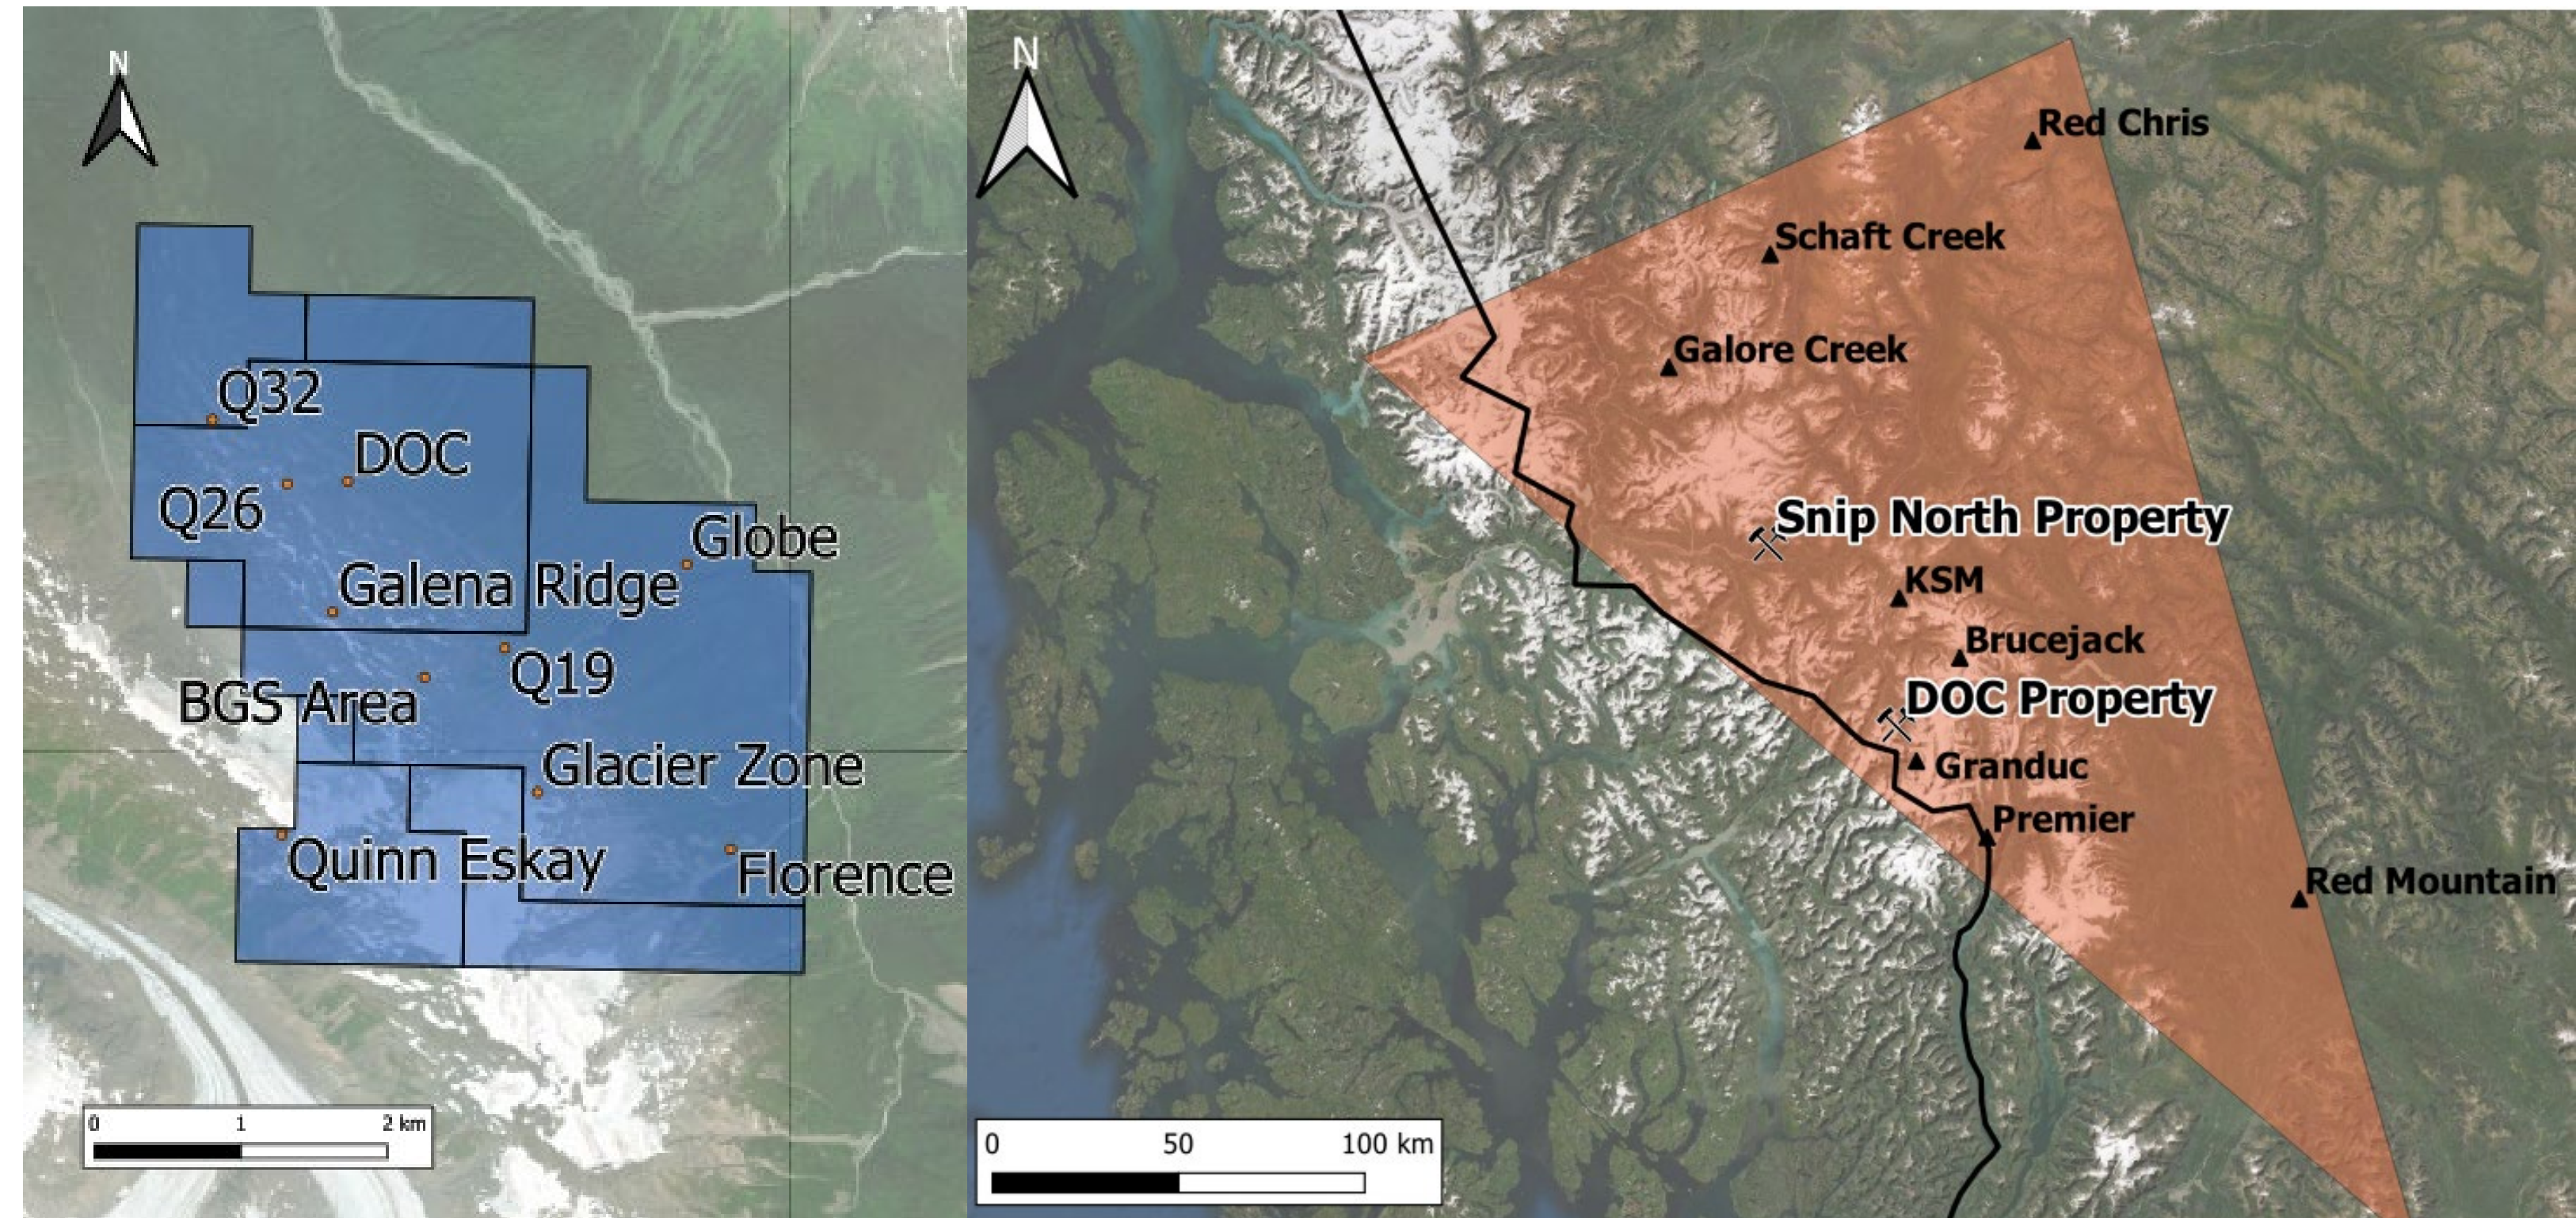

- 15.35 g/t Au, 2790.0 g/t Ag, 2.0% Cu

Doc Zone

- 126.85 g/t Au, 582.8 g/t Ag

Q25 Zone

- 69.60 g/t Au, 278.8 g/t Ag

*The resource estimate at the Doc Zone is an Inferred Mineral Resource and not considered to be an NI 43-101 compliant Mineral Reserve and there are no guarantees that further exploration will provide the necessary confidence to consider converting it as such.

Doc 2020 Drill Program

- Completed NI 43-101
- Numerous mineralized zones in 1704.23 Ha requiring further exploration
- Hanstone outlined **Multiple High-Grade Mineralized Zones** with surficial sample results up to **202.0 g/t Au**, 2790.0 g/t Ag and **2.00% Cu**
- Modern diamond drilling (HQ) methods have been applied to historic drill targets confirming historical intercepts

Doc 2020 Drill Results Summary

Hole Number	Azimuth	Dip	Avg Grade Au (g/t)	Avg Grade Ag (g/t)	Cu (ppm)	Zn (ppm)	From Depth (m)	To Depth (m)	Interval (m)
DC-20-04	215°	-60°	6.35				69.48	77.60	8.12
including			10.58				71.00	74.50	3.50
and			53.10	198.90	416.00		72.90	73.50	0.60
and			17.68	76.90	920.90		76.30	77.00	0.70
DC-20-05	215°	-75°	11.51	42.00			129.83	137.00	7.17
including			50.12	176.70			133.23	134.40	1.17
DC-20-06	225°	-70°	2.78				61.10	61.55	0.45
			12.01	52.70	323.60	229.10	119.00	132.28	13.28
including			8.47				119.00	119.50	0.50
and			113.70	495.30	838.00	728.10	131.00	132.28	1.28

DC-20-05: 126 - 135 m

Doc Property 2020 Exploration

- 2,700 m of HQ diamond drilling
 - Focused on combination of new target tests & delineation of historic zones
 - Drone magnetics survey completed
- High resolution aerial magnetic survey has expanded current magnetic survey coverage
- Property scale satellite analysis, structural & alteration mapping

2020 Diamond Drilling

Doc 2020 Select Drill Results Highlights

Drill Hole	Interval (m)	Grade Au (g/t)
DC-20-04	8.12	6.35
<i>including</i>	0.60	53.10
DC-20-05	7.71	11.51
<i>including</i>	1.17	50.12
DC-20-06	13.28	12.01
<i>including</i>	1.28	113.70

DC-20-06: 129.2 - 134.75 m

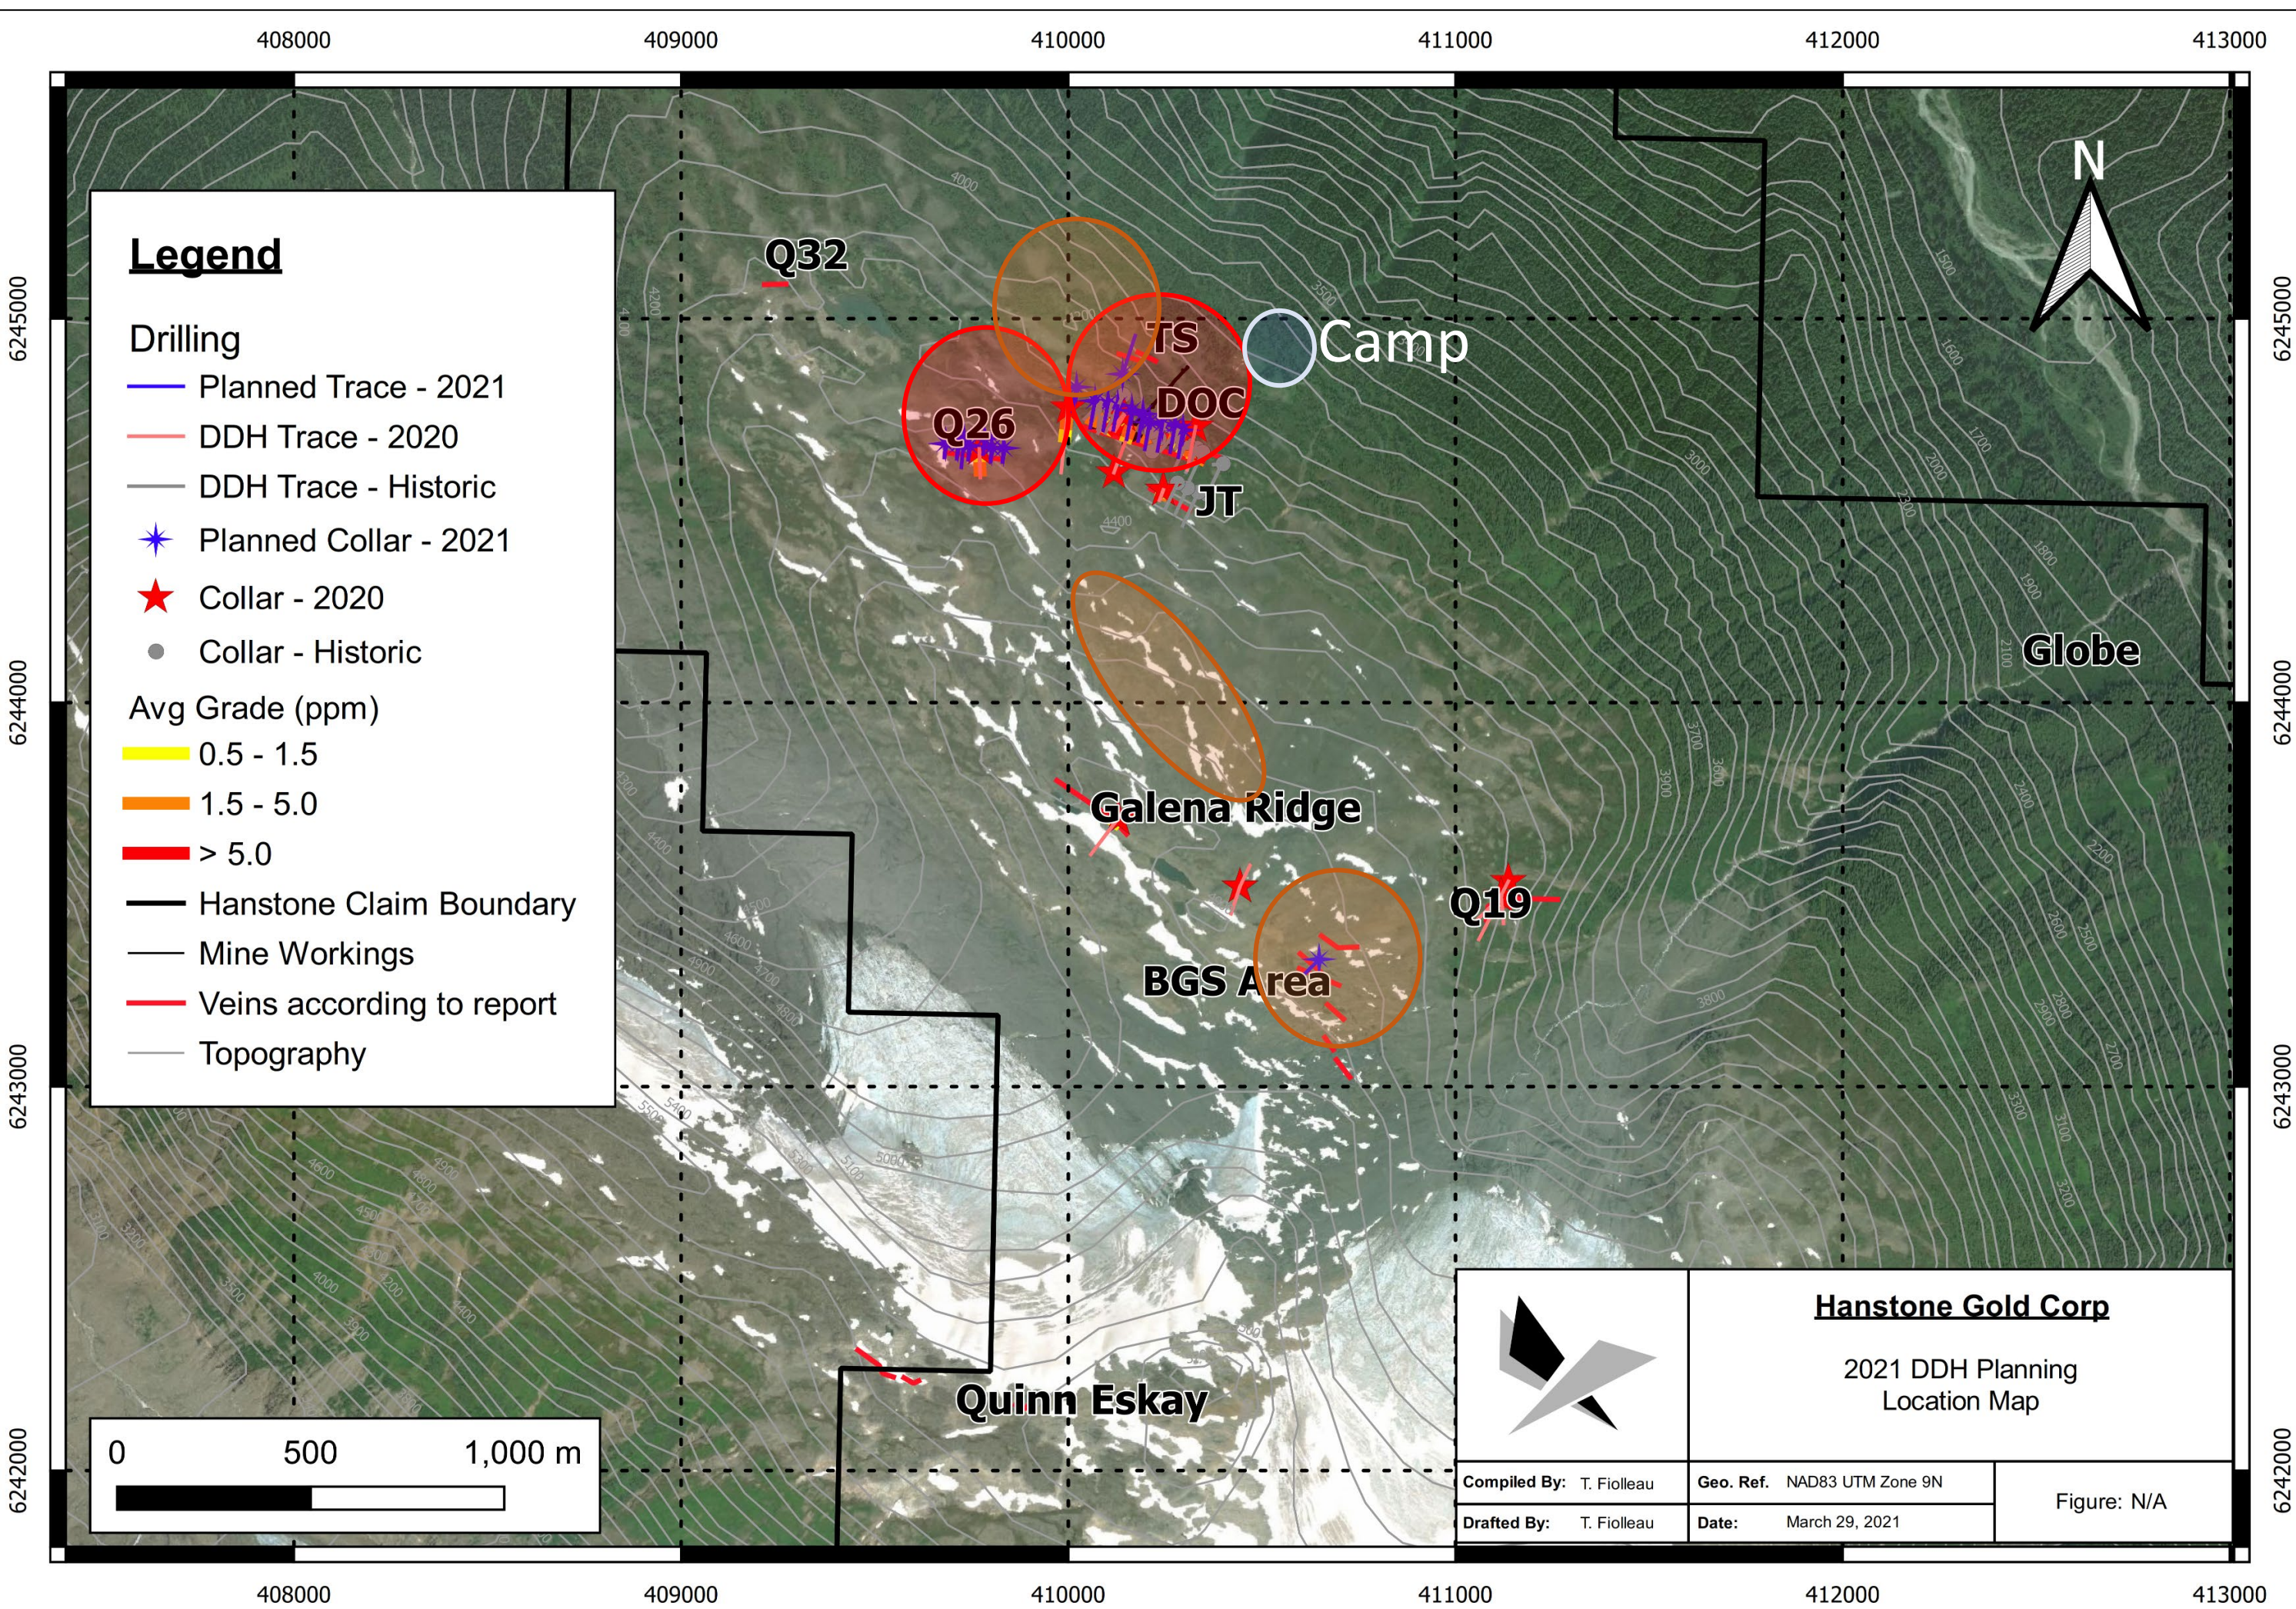

Exploration & Development 2021

- Focused on Doc Property Development and further exploration in Snip North Property
- Two Diamond Drill Rigs to be mobilized
- Plans for 5,000 m of HQ Diamond drilling on historical prospective and newly discovered targets
- Expand strike and down dip extensions of known mineralized zones
- Potential Deep hole on Quinn Eskay
- Explore interpreted DOC offset with 3-4 drillholes

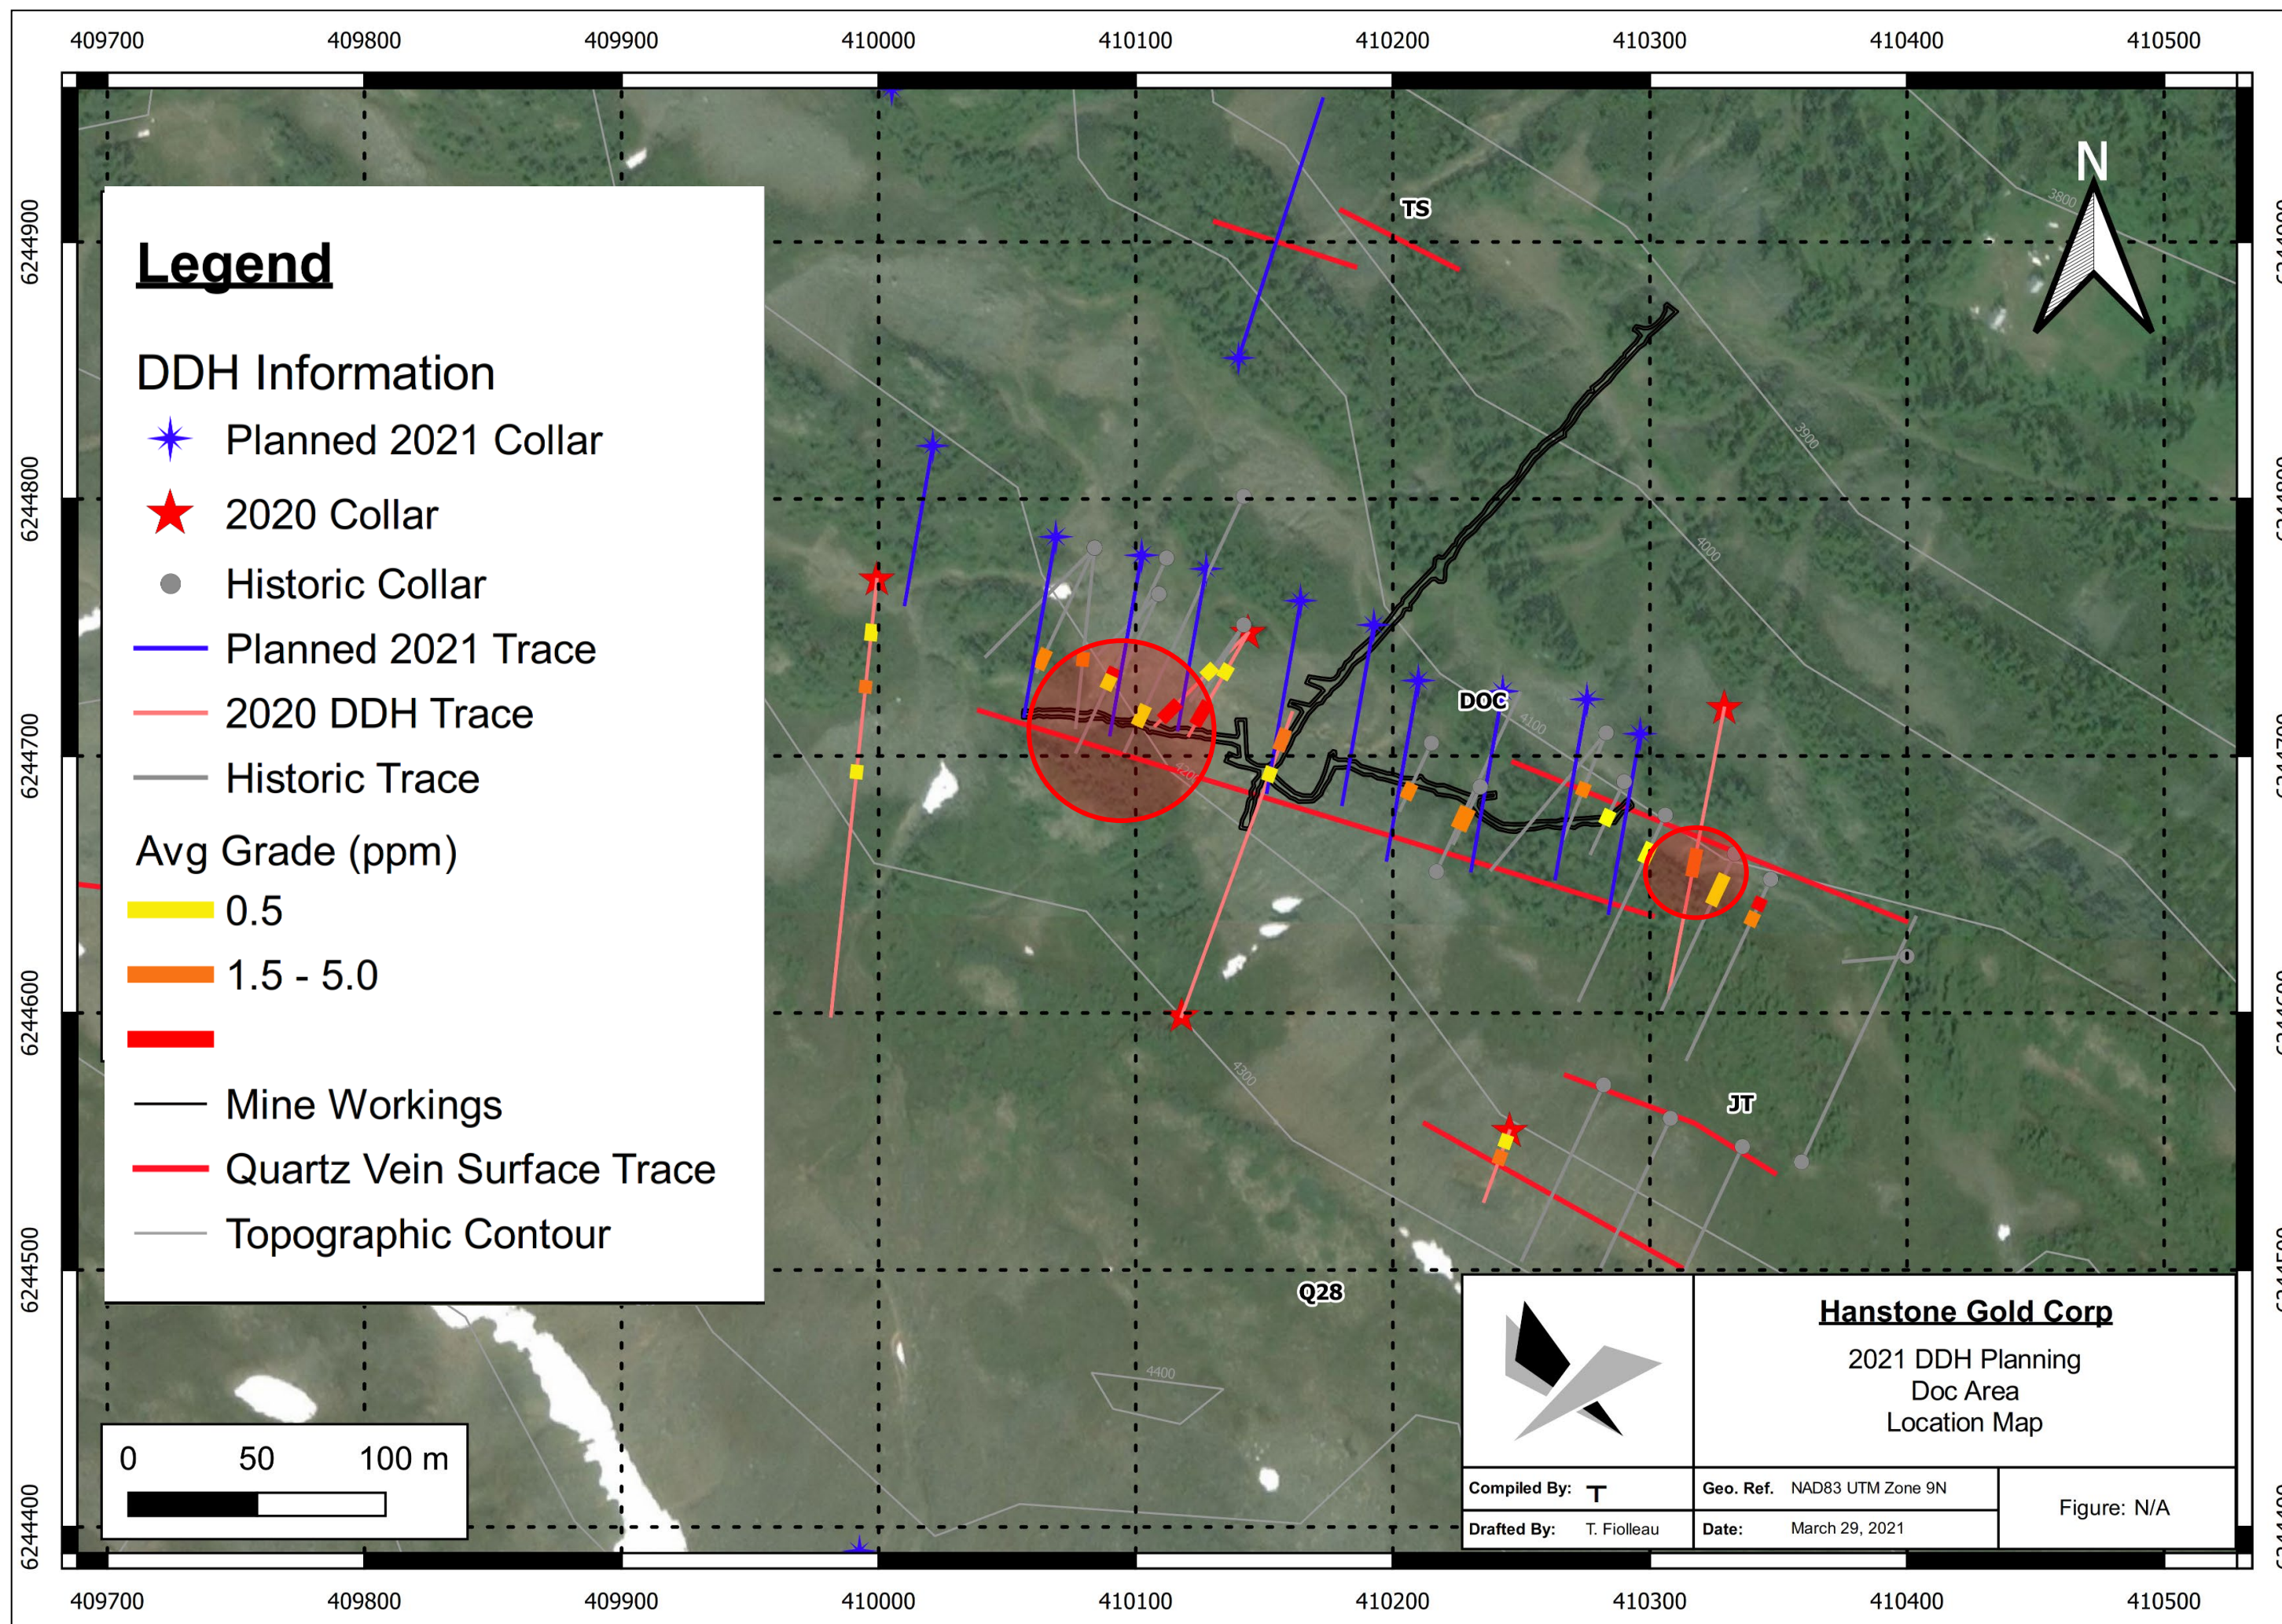

DC-20-04: 71.85 - 83.66 m

Property Scale

- Main summer program
- Drill testing both DOC and Q26 veins
 - Verify and extend known mineralized zones
- Potential testing in several other areas (orange)

2021 Exploration Program - DOC

- Historical holes in grey, 2020 drilling in red and planned 2021 holes in blue
- Deepest historical test ~138 m depth ~2.6 g/t over 1 m
- DC-20-03 also intersected mineralization below the quartz veins within shearing (2.27 g/t over 7.02 m)

2021 DOC Cross Section

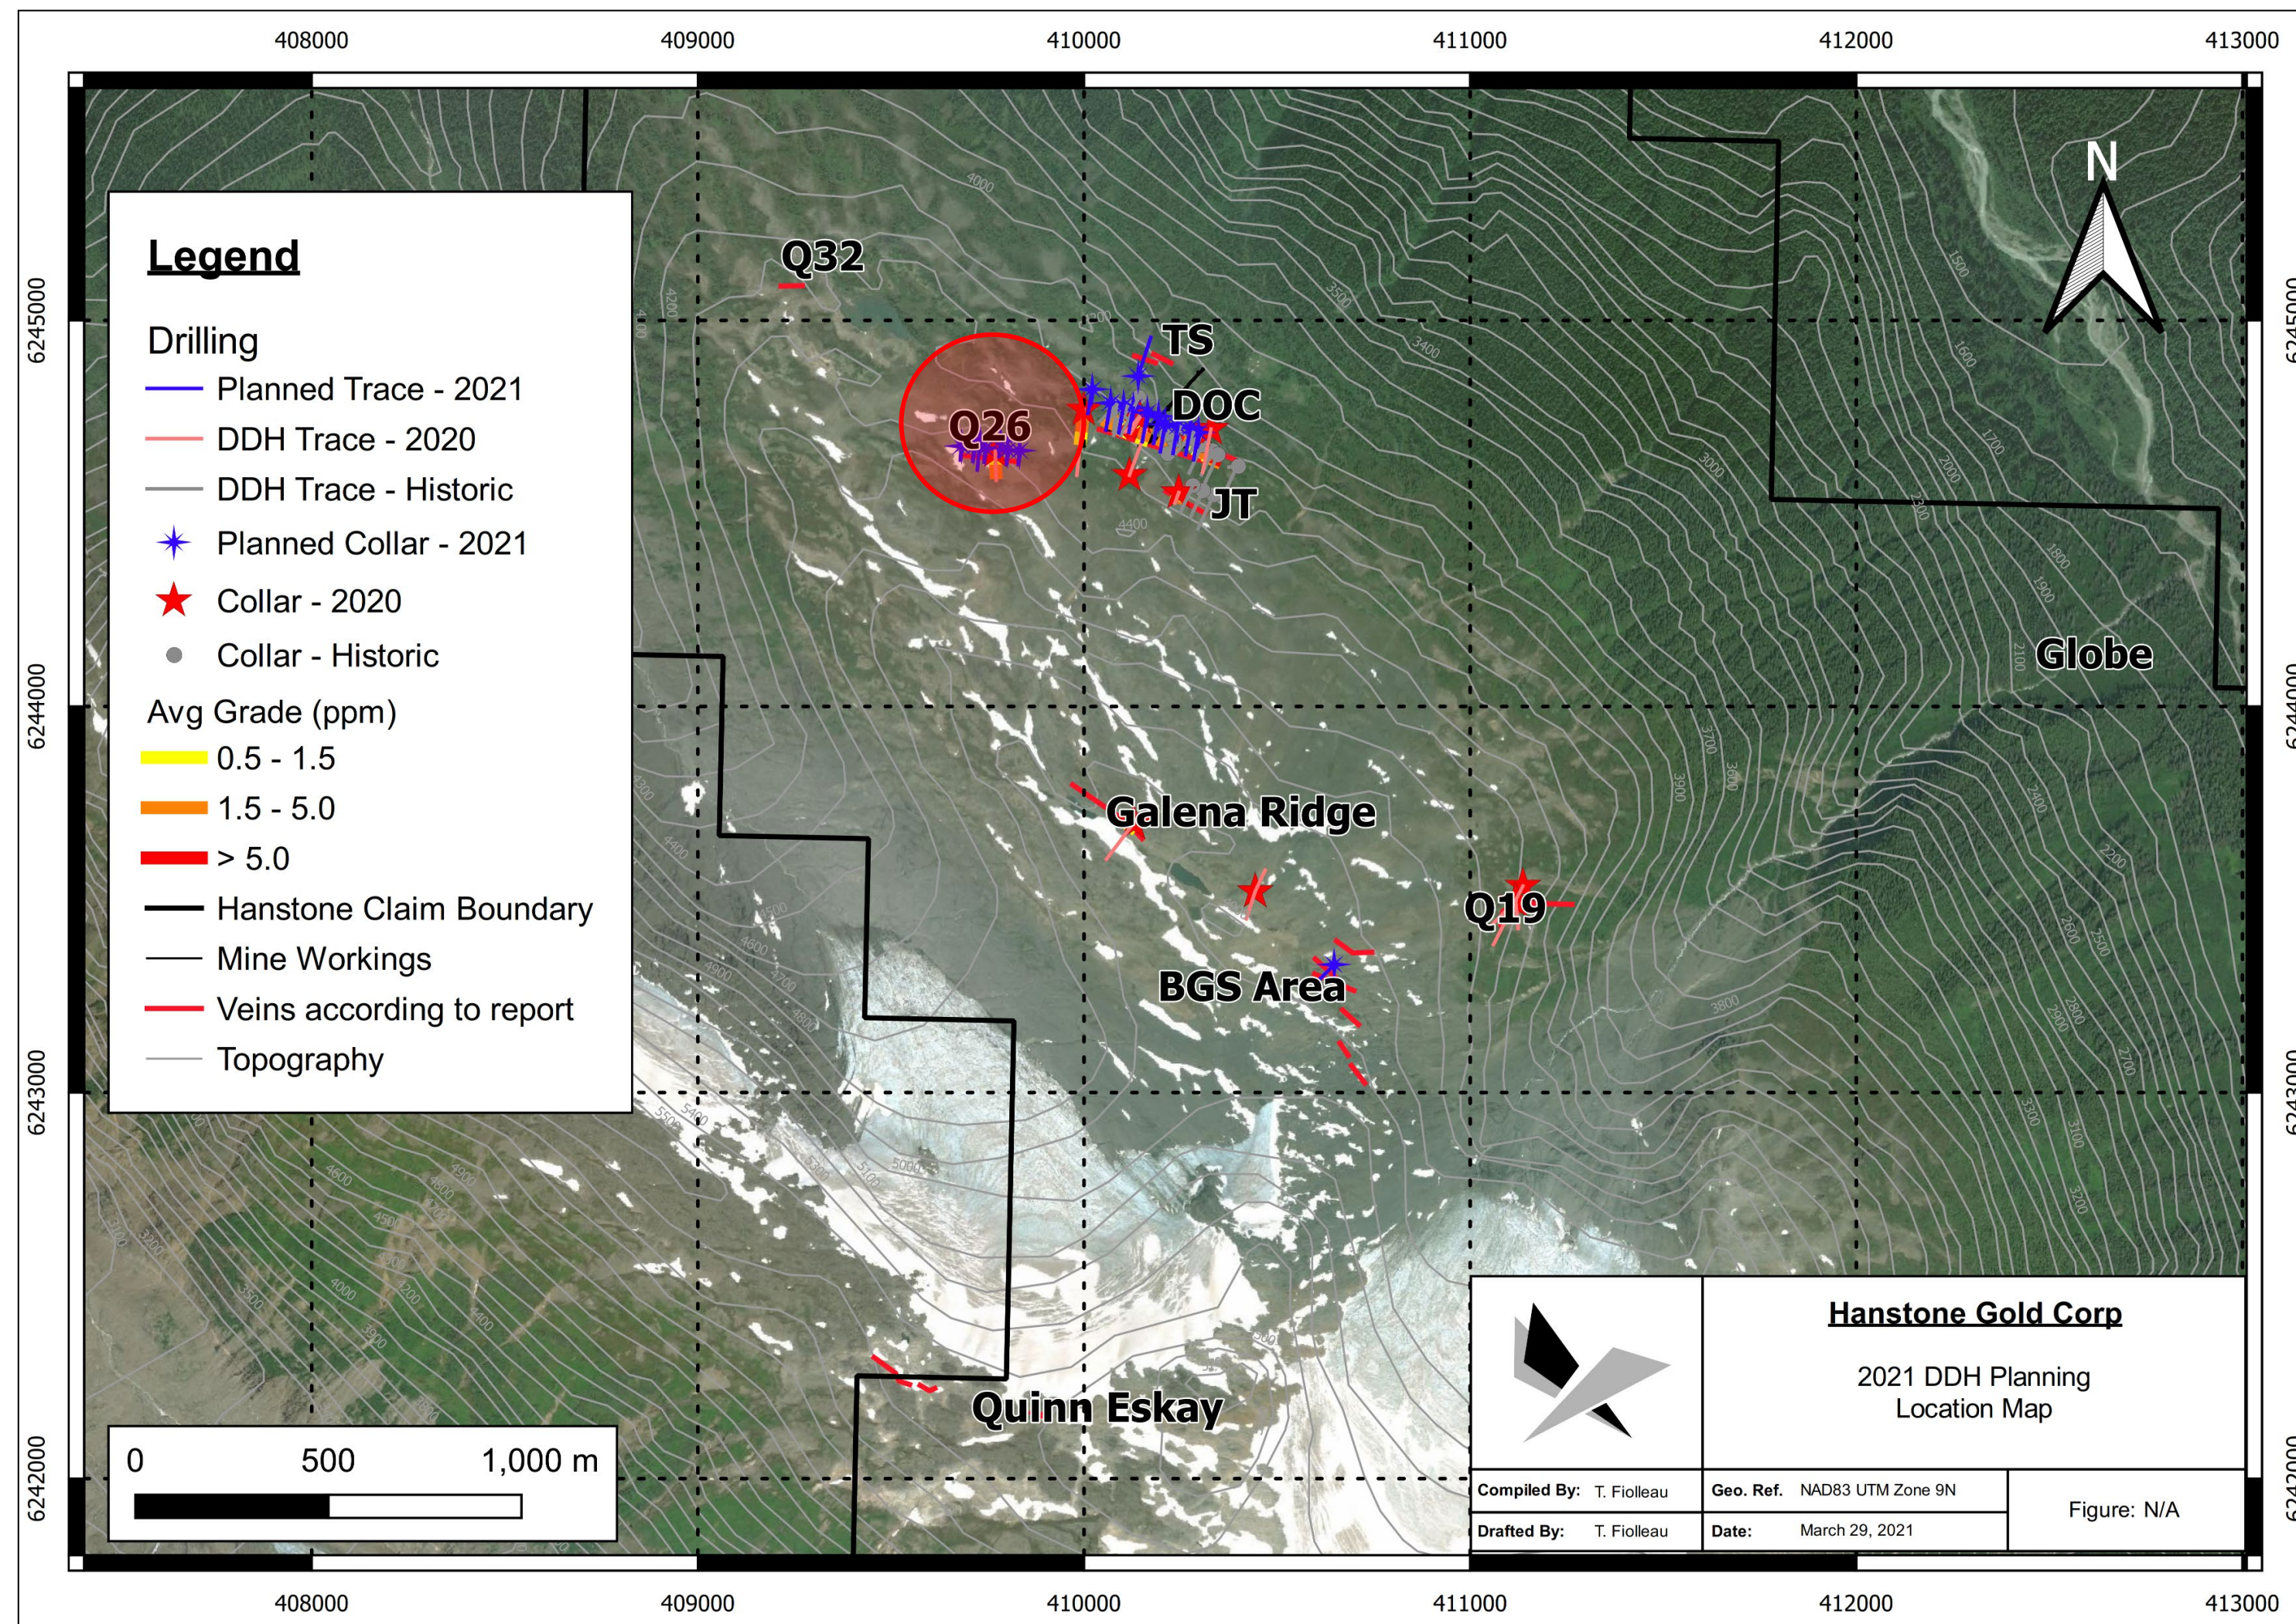

HANSTONE GOLD

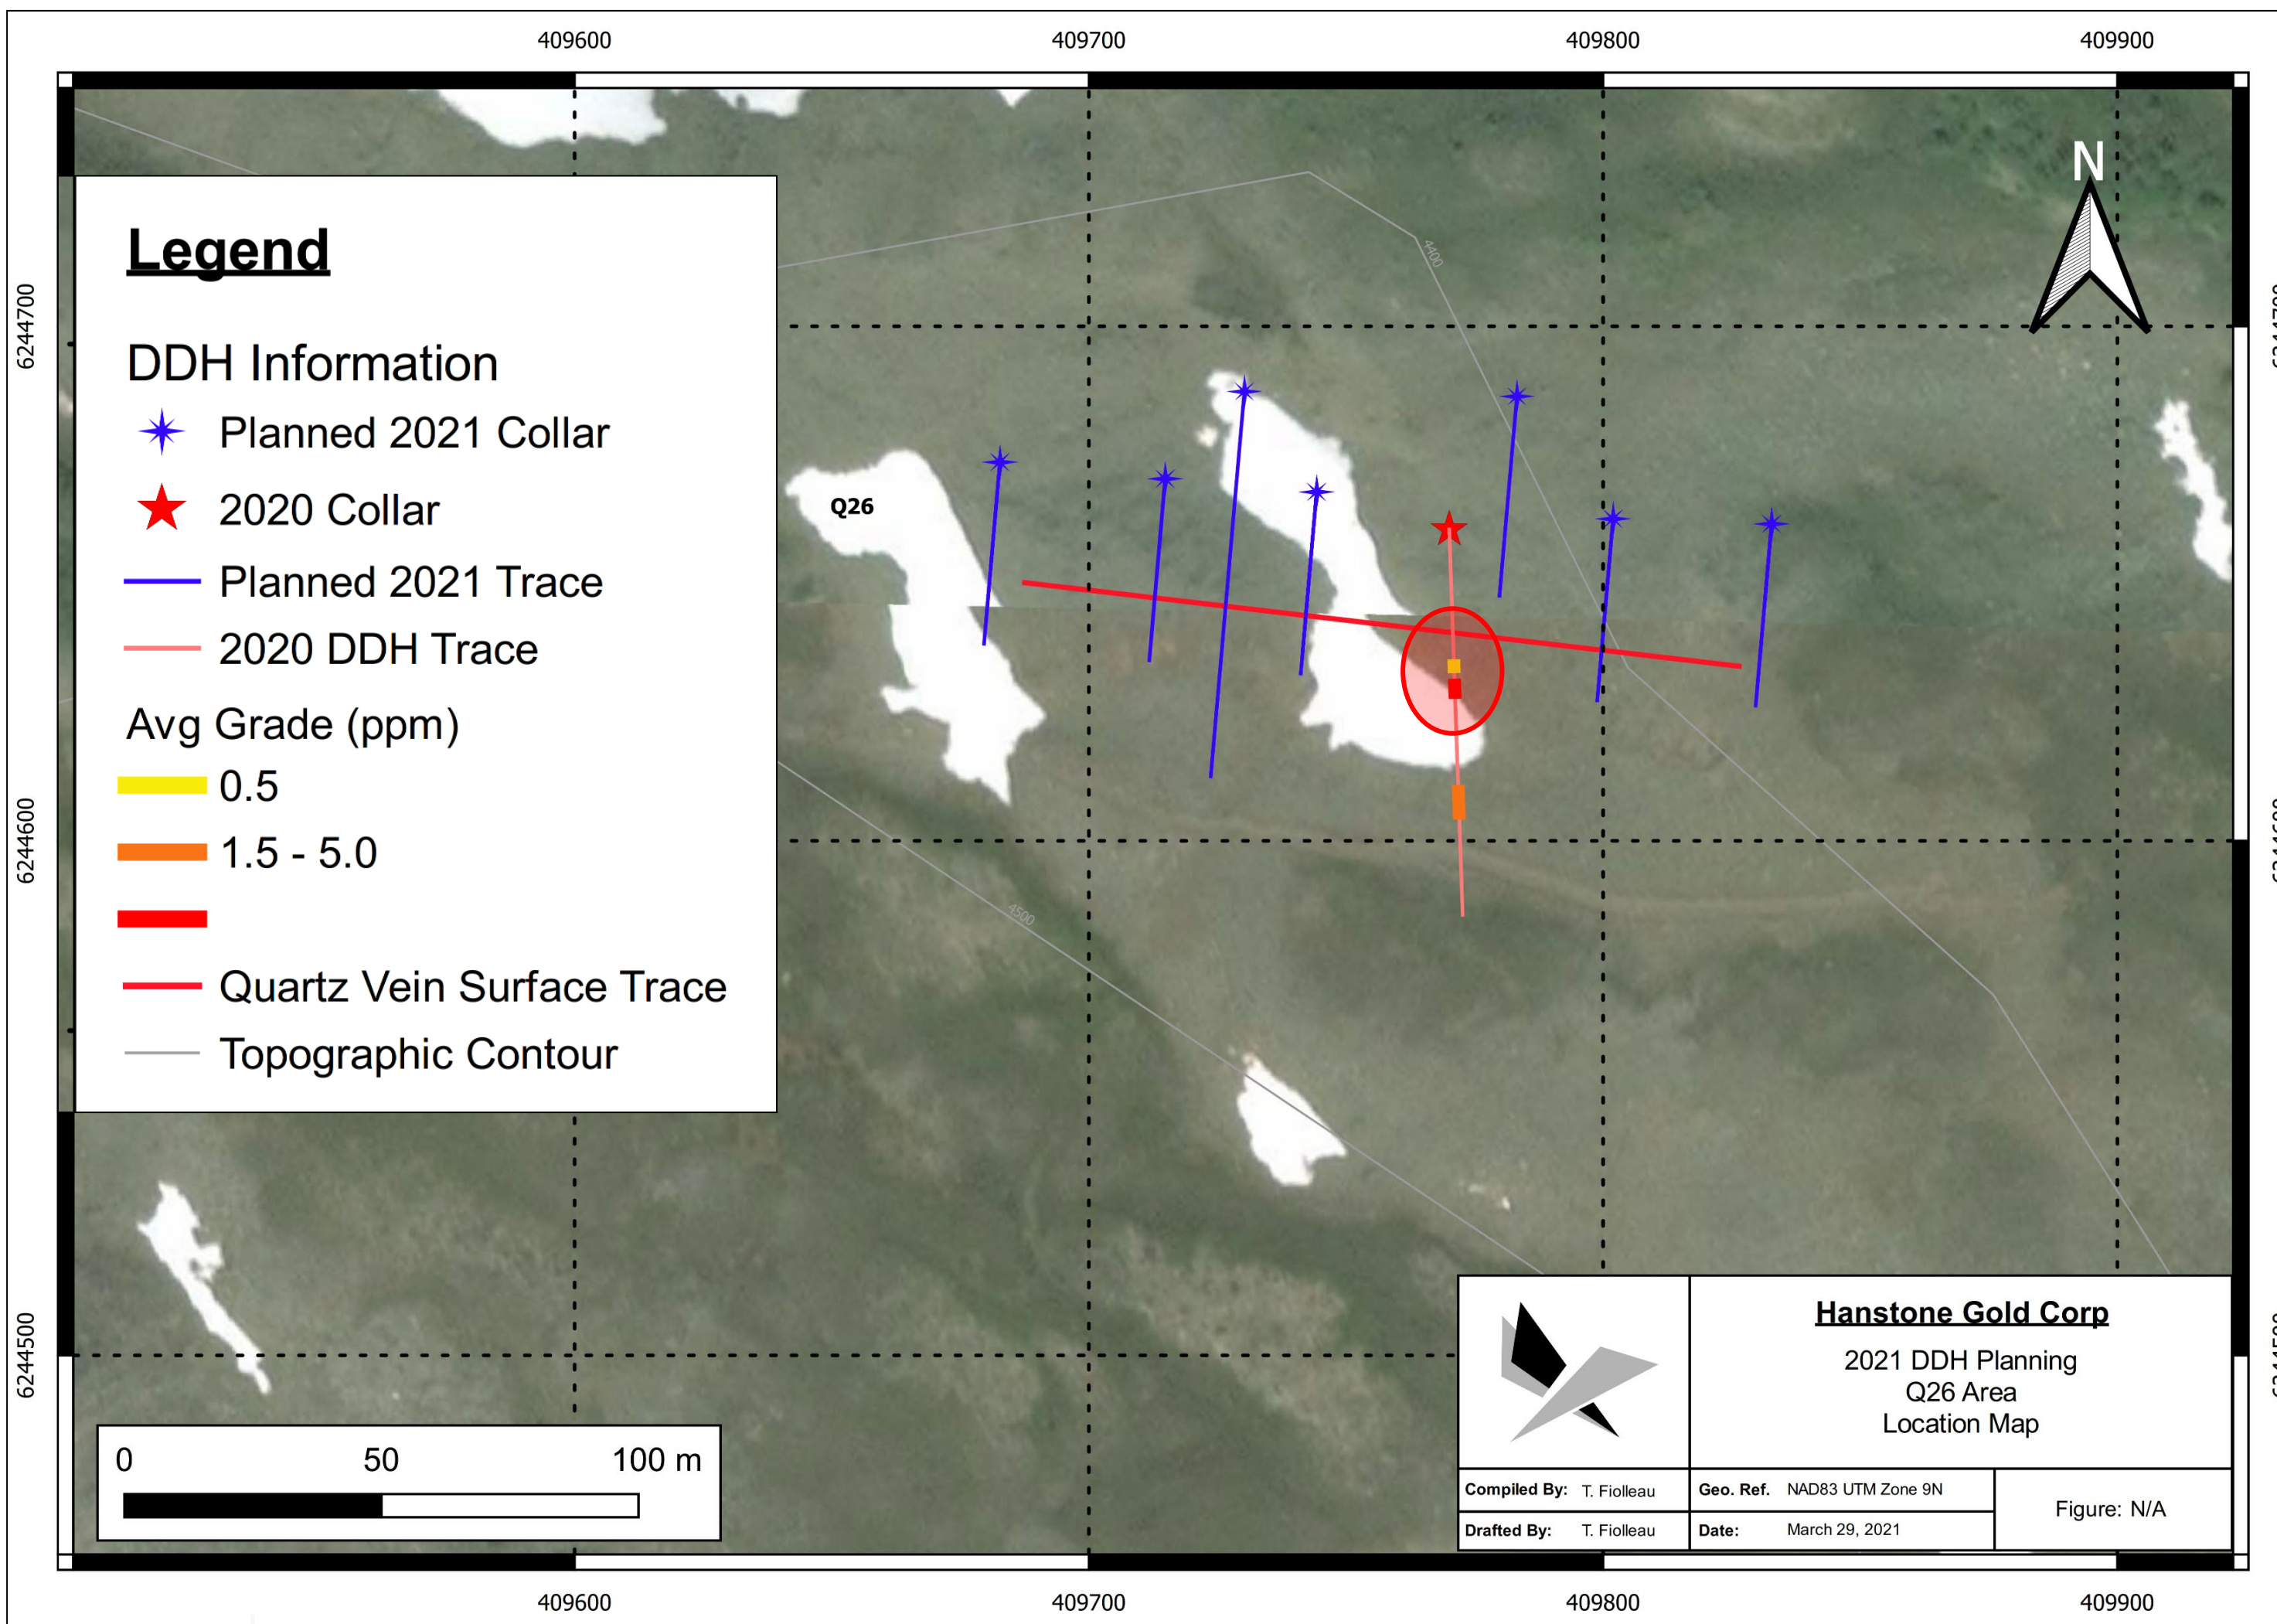

- Testing quartz vein at depth on each fence (deep hole plan will vary)
- Drilling will test the quartz vein ~ 100 m of dip extent on each fence

2021 Exploration Program

- Q26 area (west of DOC)

2021 Exploration Program – Q26

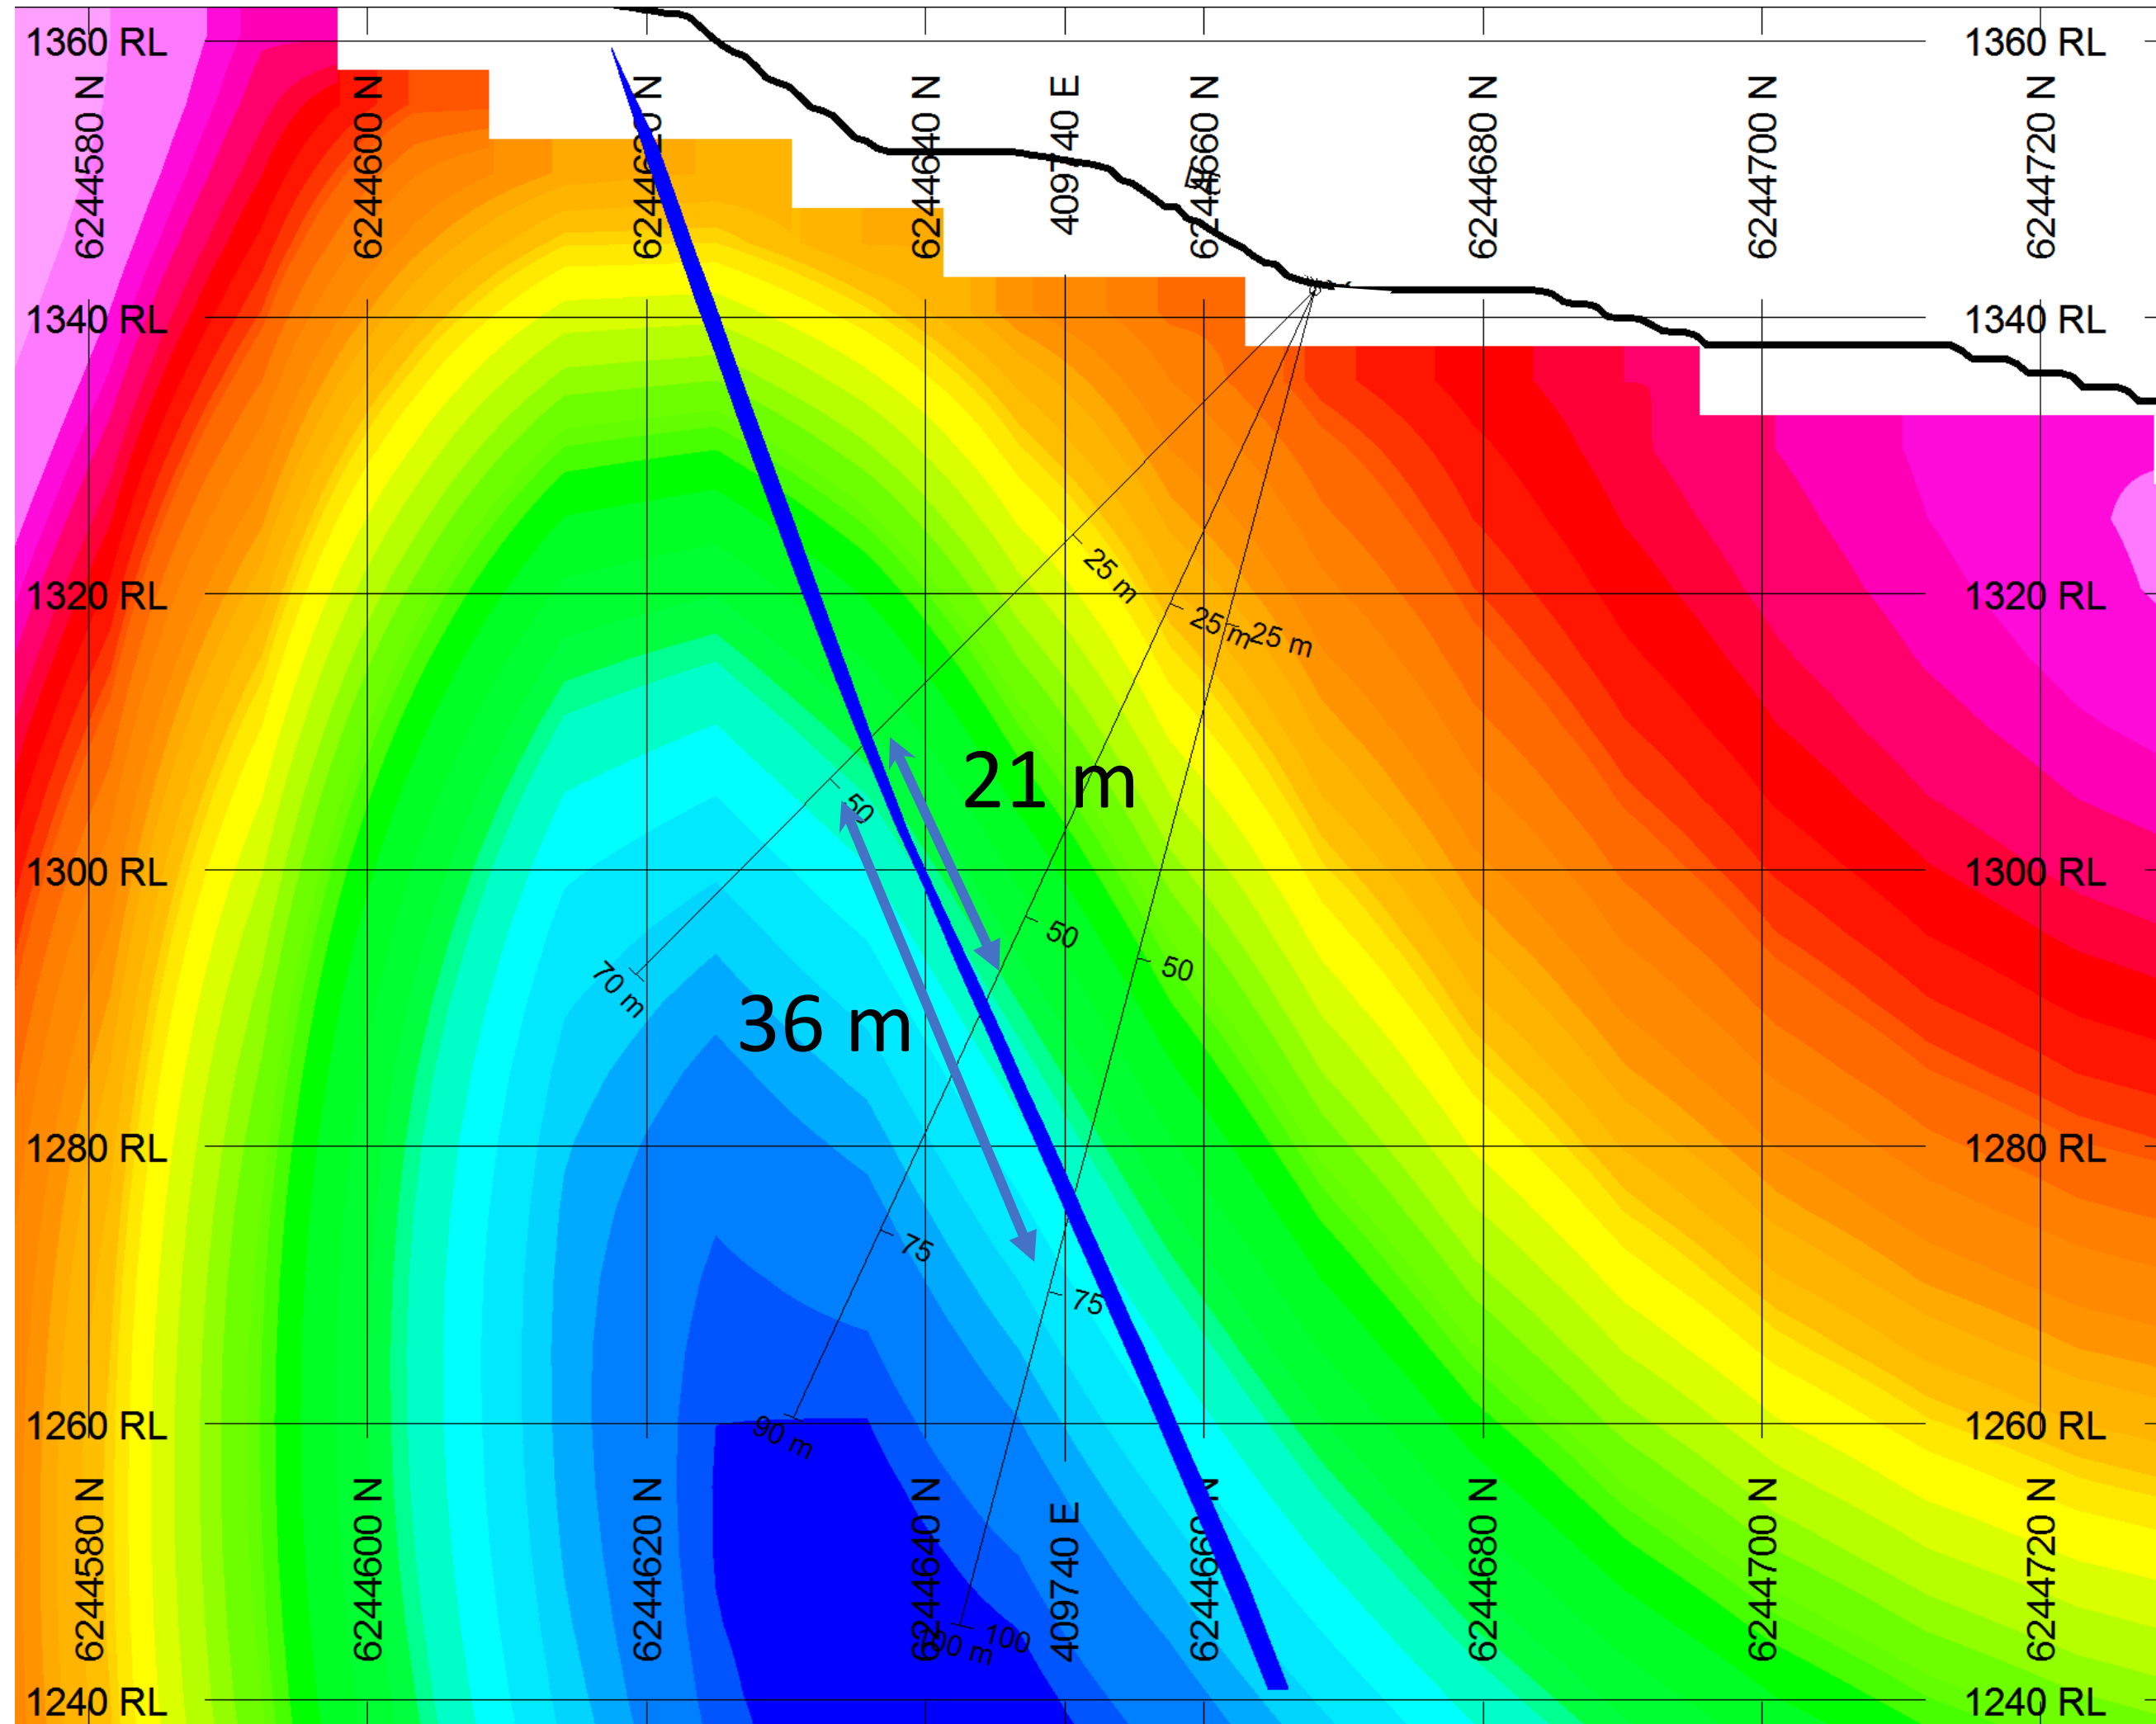

- Plan to systematically evaluate the Q26 quartz vein with ~5 – 3 hole fences (similar to DOC) and possibly two or more deep holes if necessary
- Deepest test from last year:
- 2.2 g/t over 6 m

2021 Q26 Cross Section

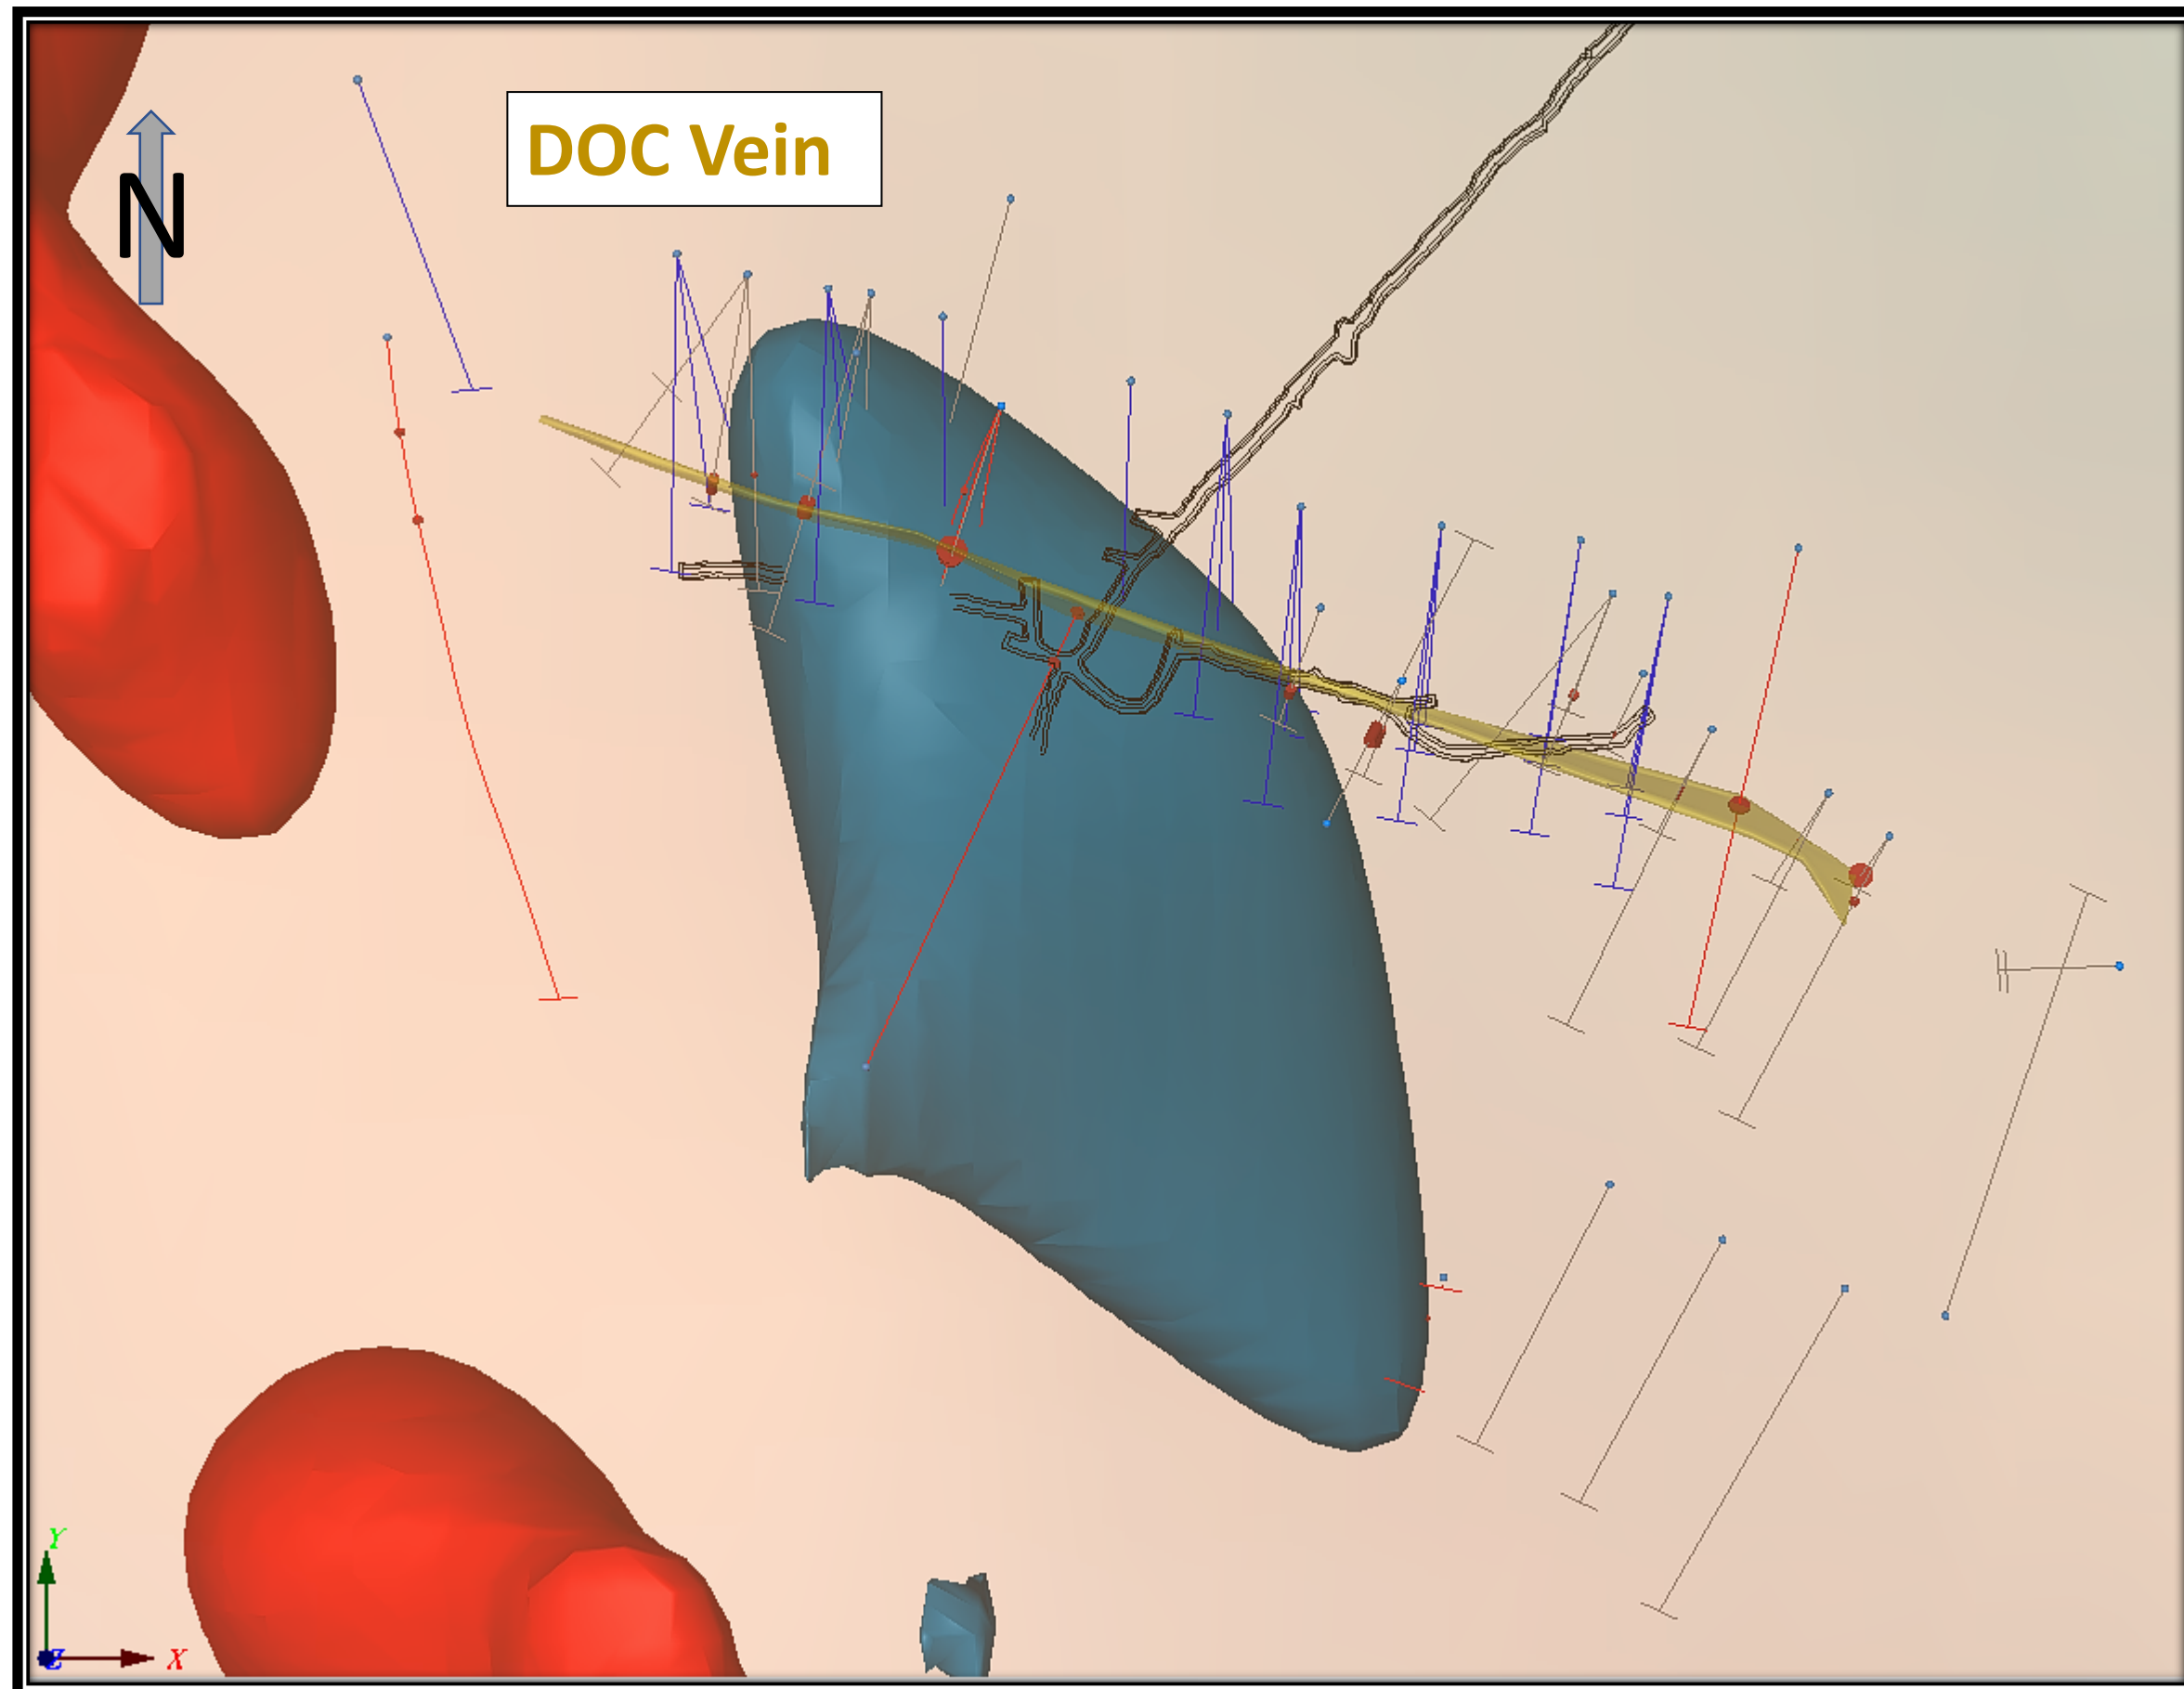

HANSTONE GOLD

- Q26 Typical Cross Section
- 3 hole fences testing existing vein
- Each fence will have 20 to 40 m separation (down dip)

2021 Program 3D Plan View

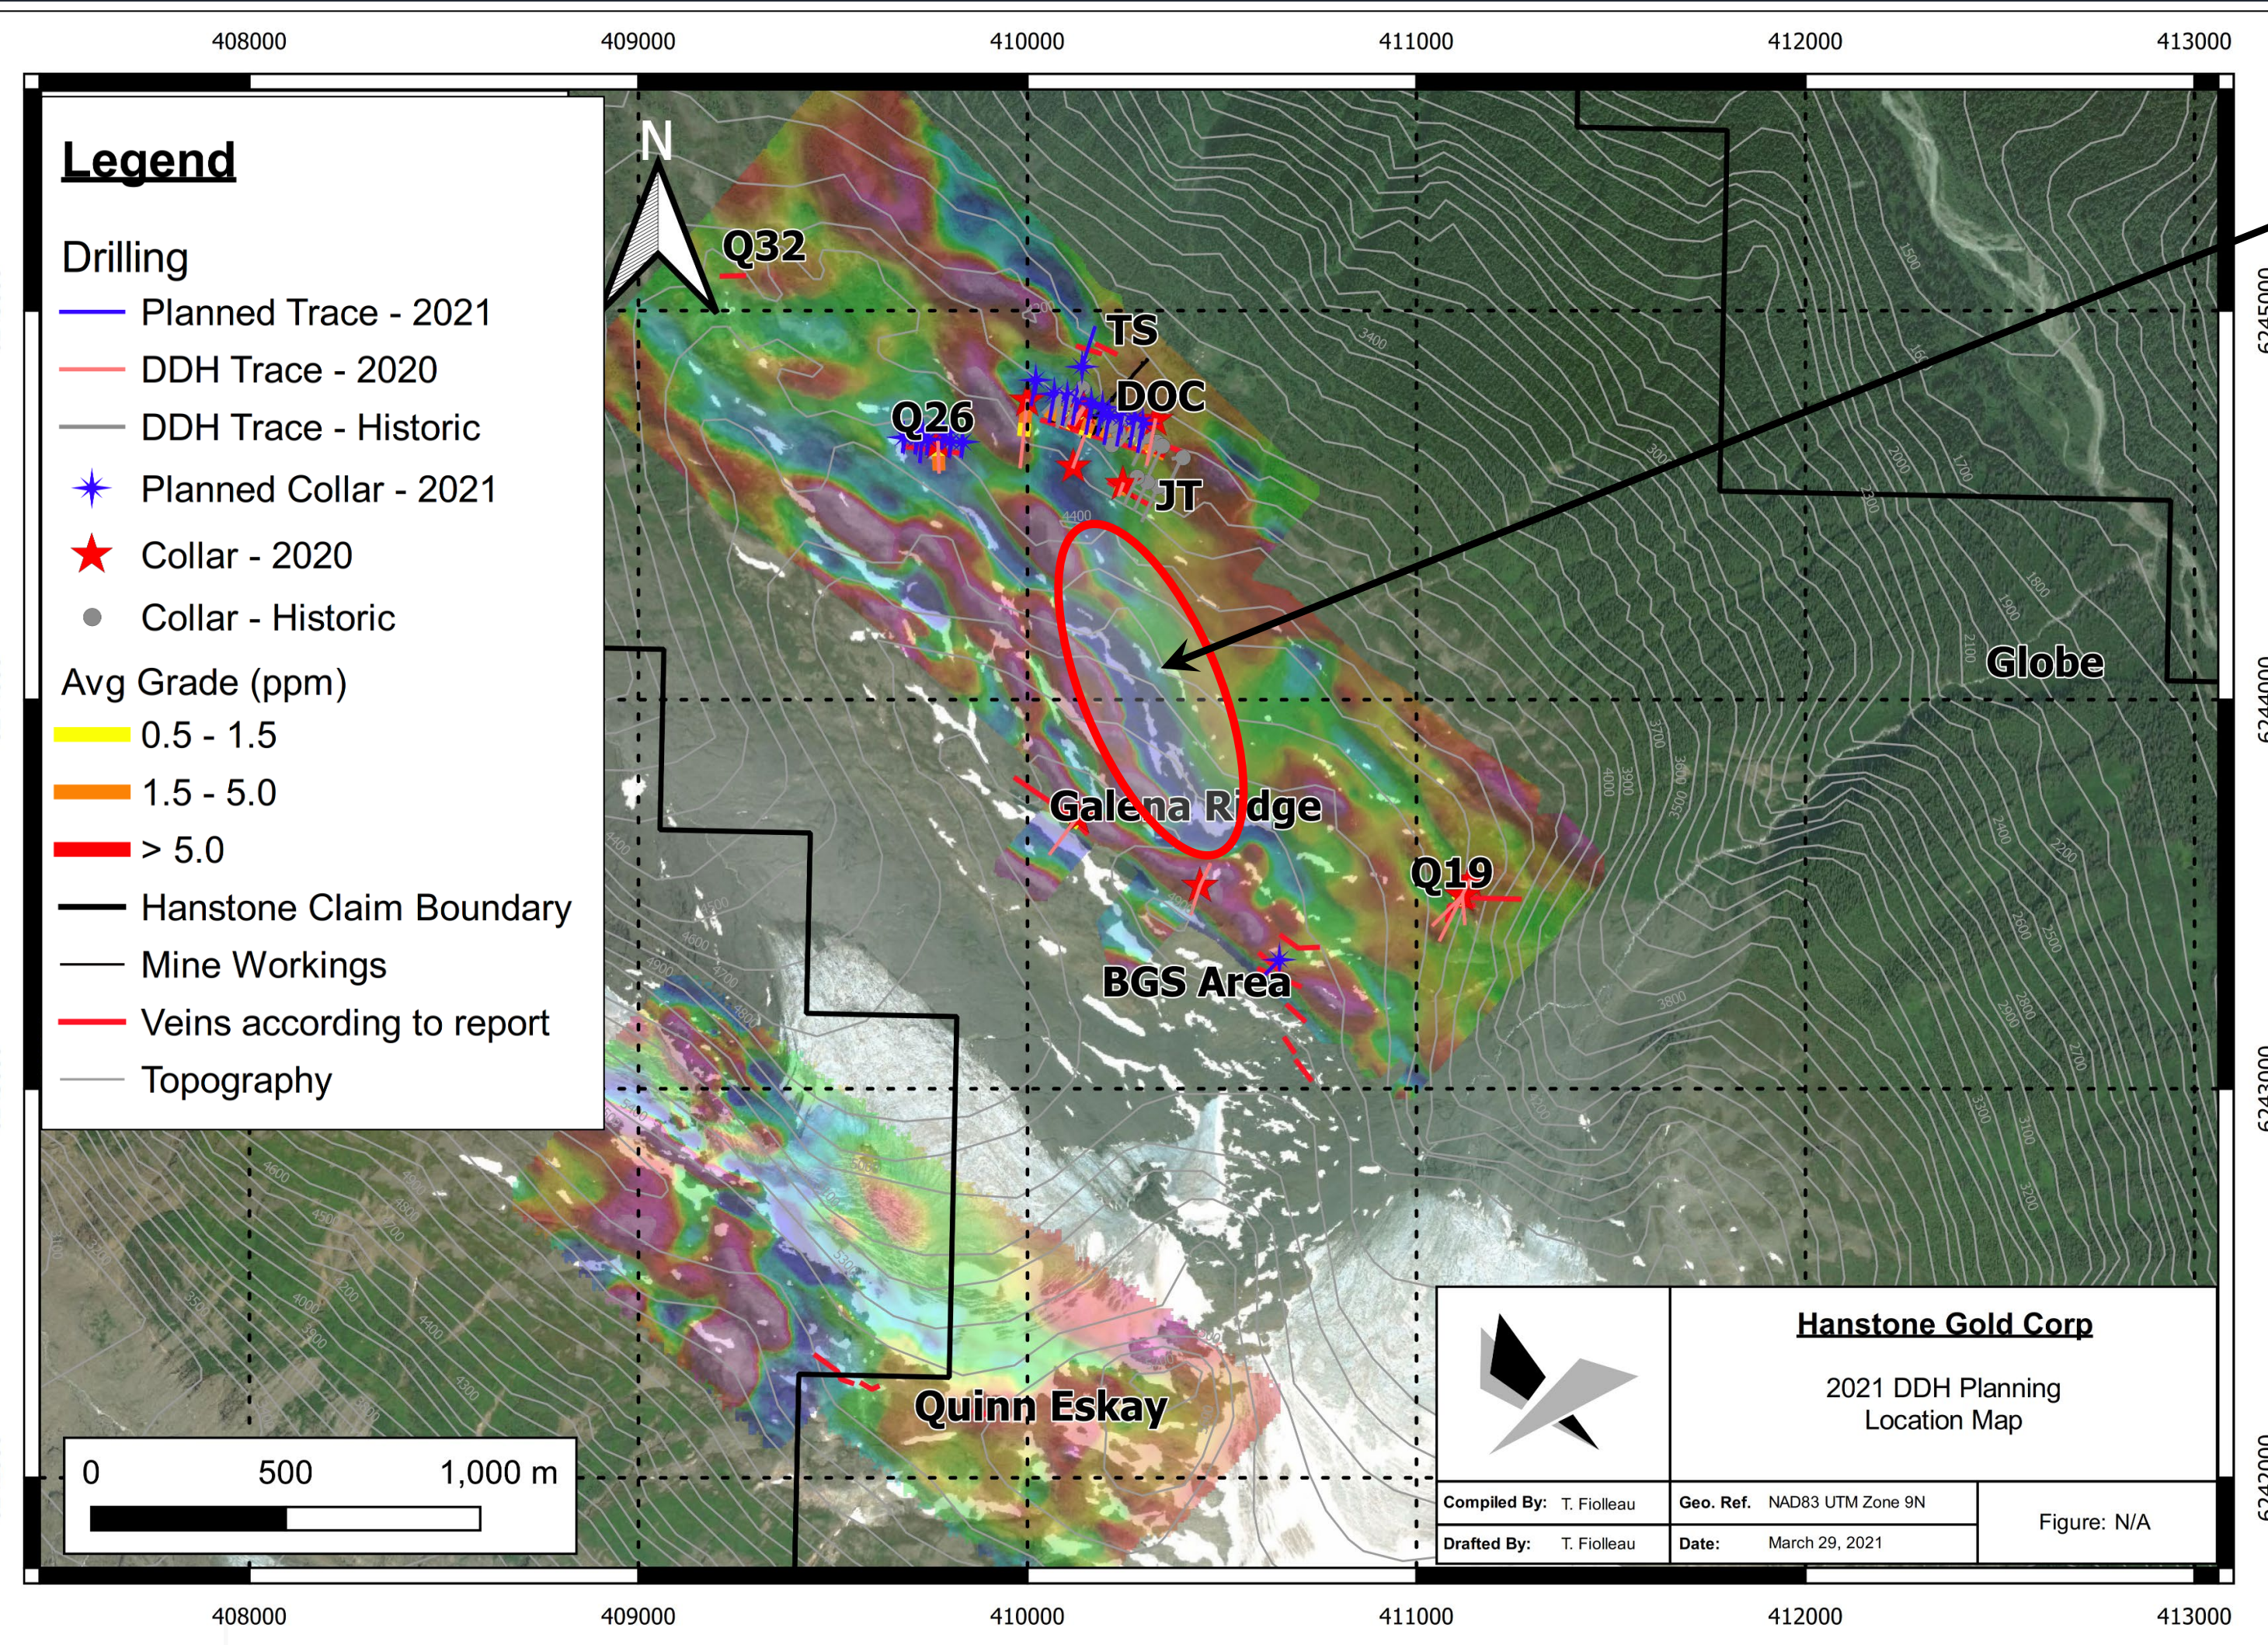

Drilling Trace Legend
Historical Drilling, 2020 Drilling, Planned 2021

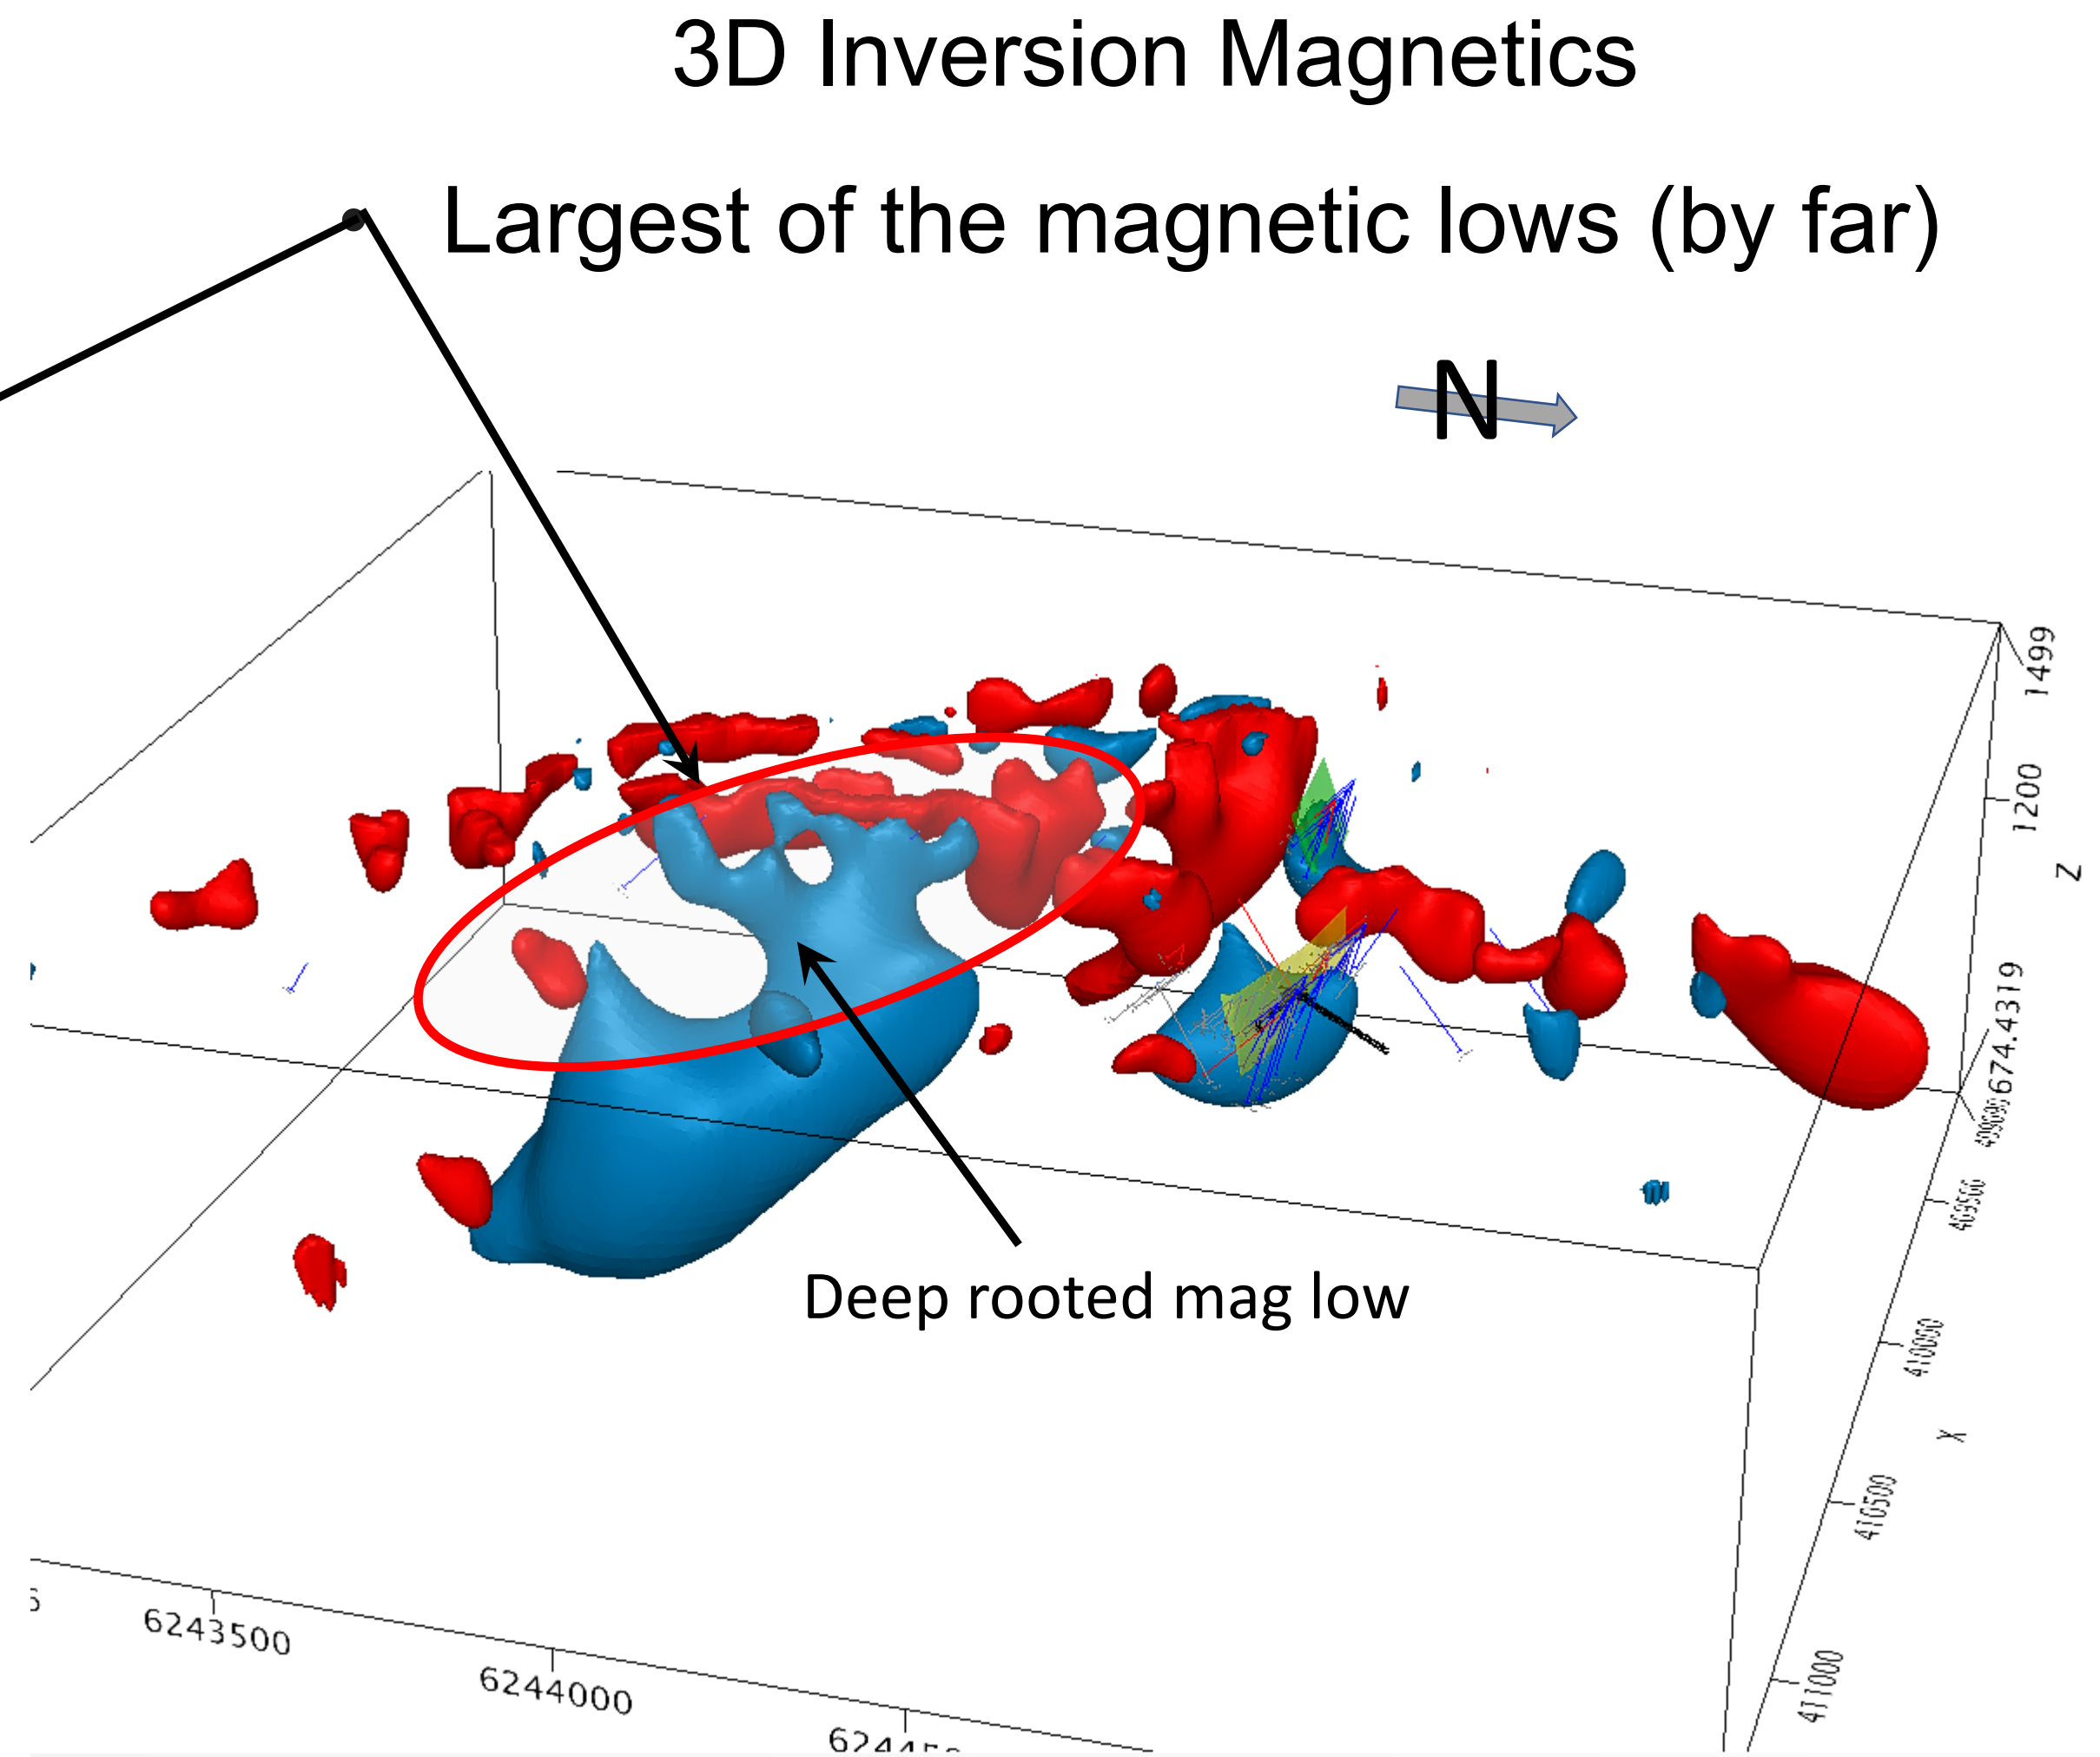

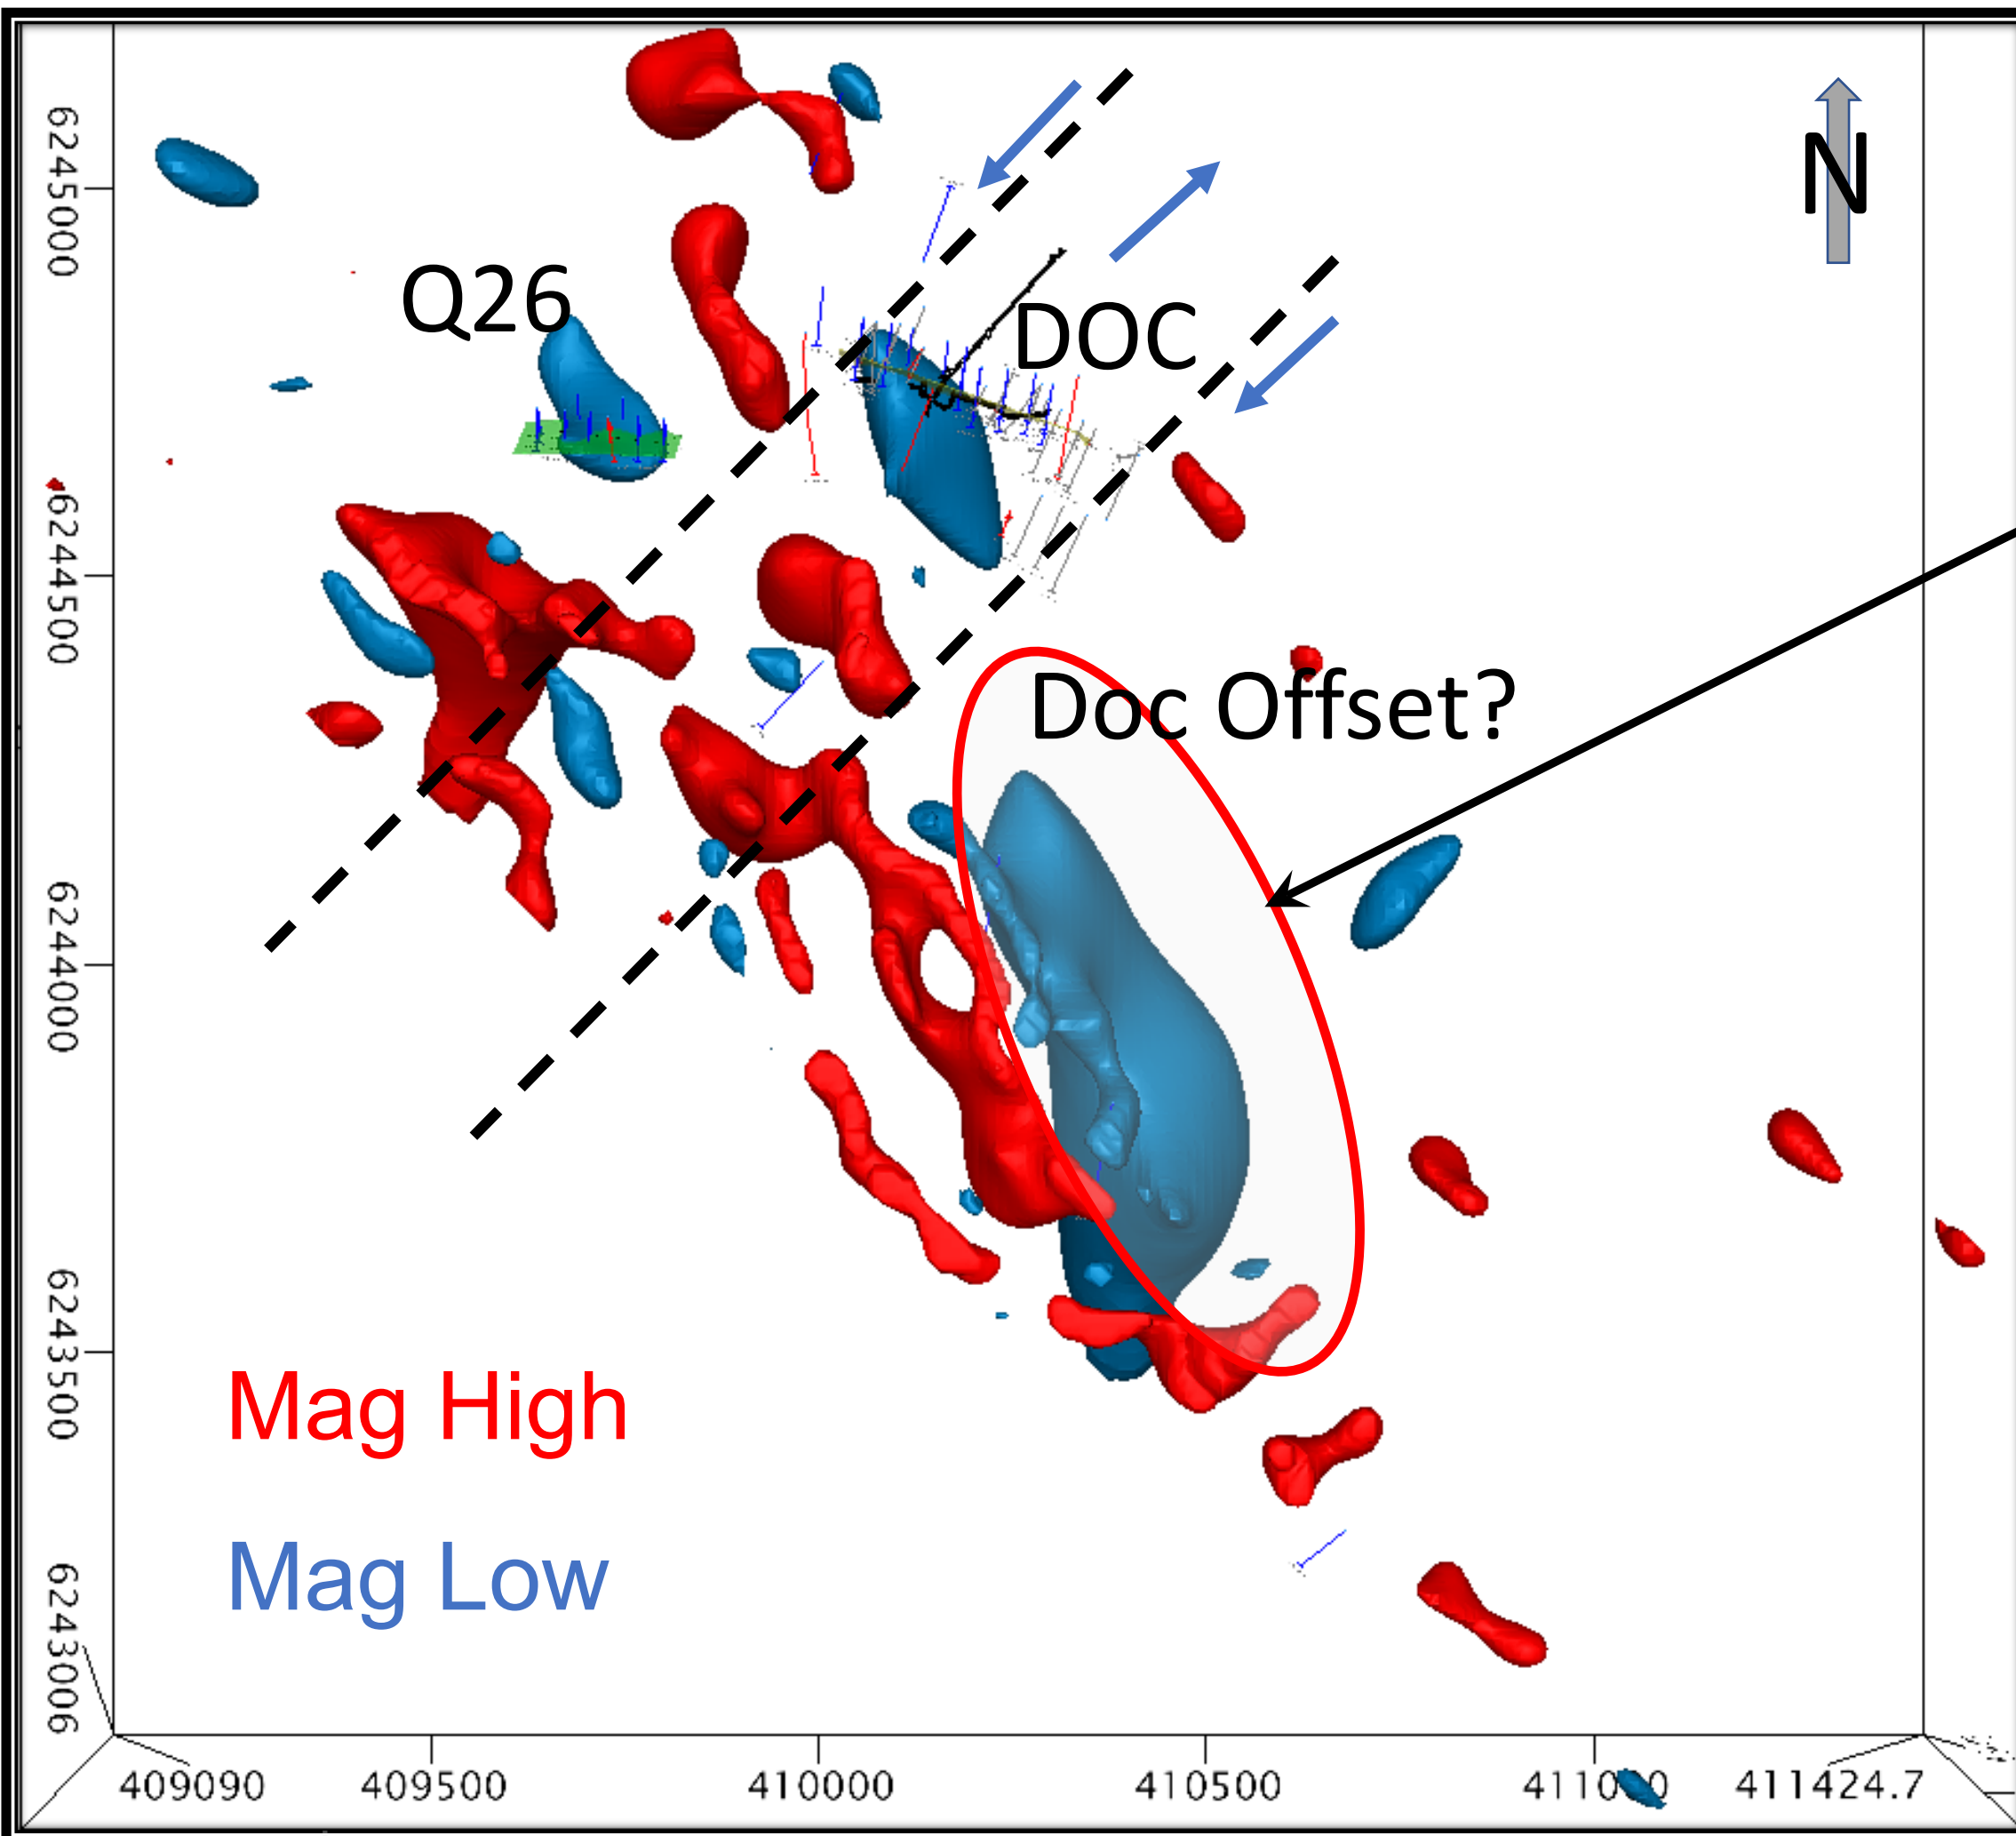

2021 Exploration Program

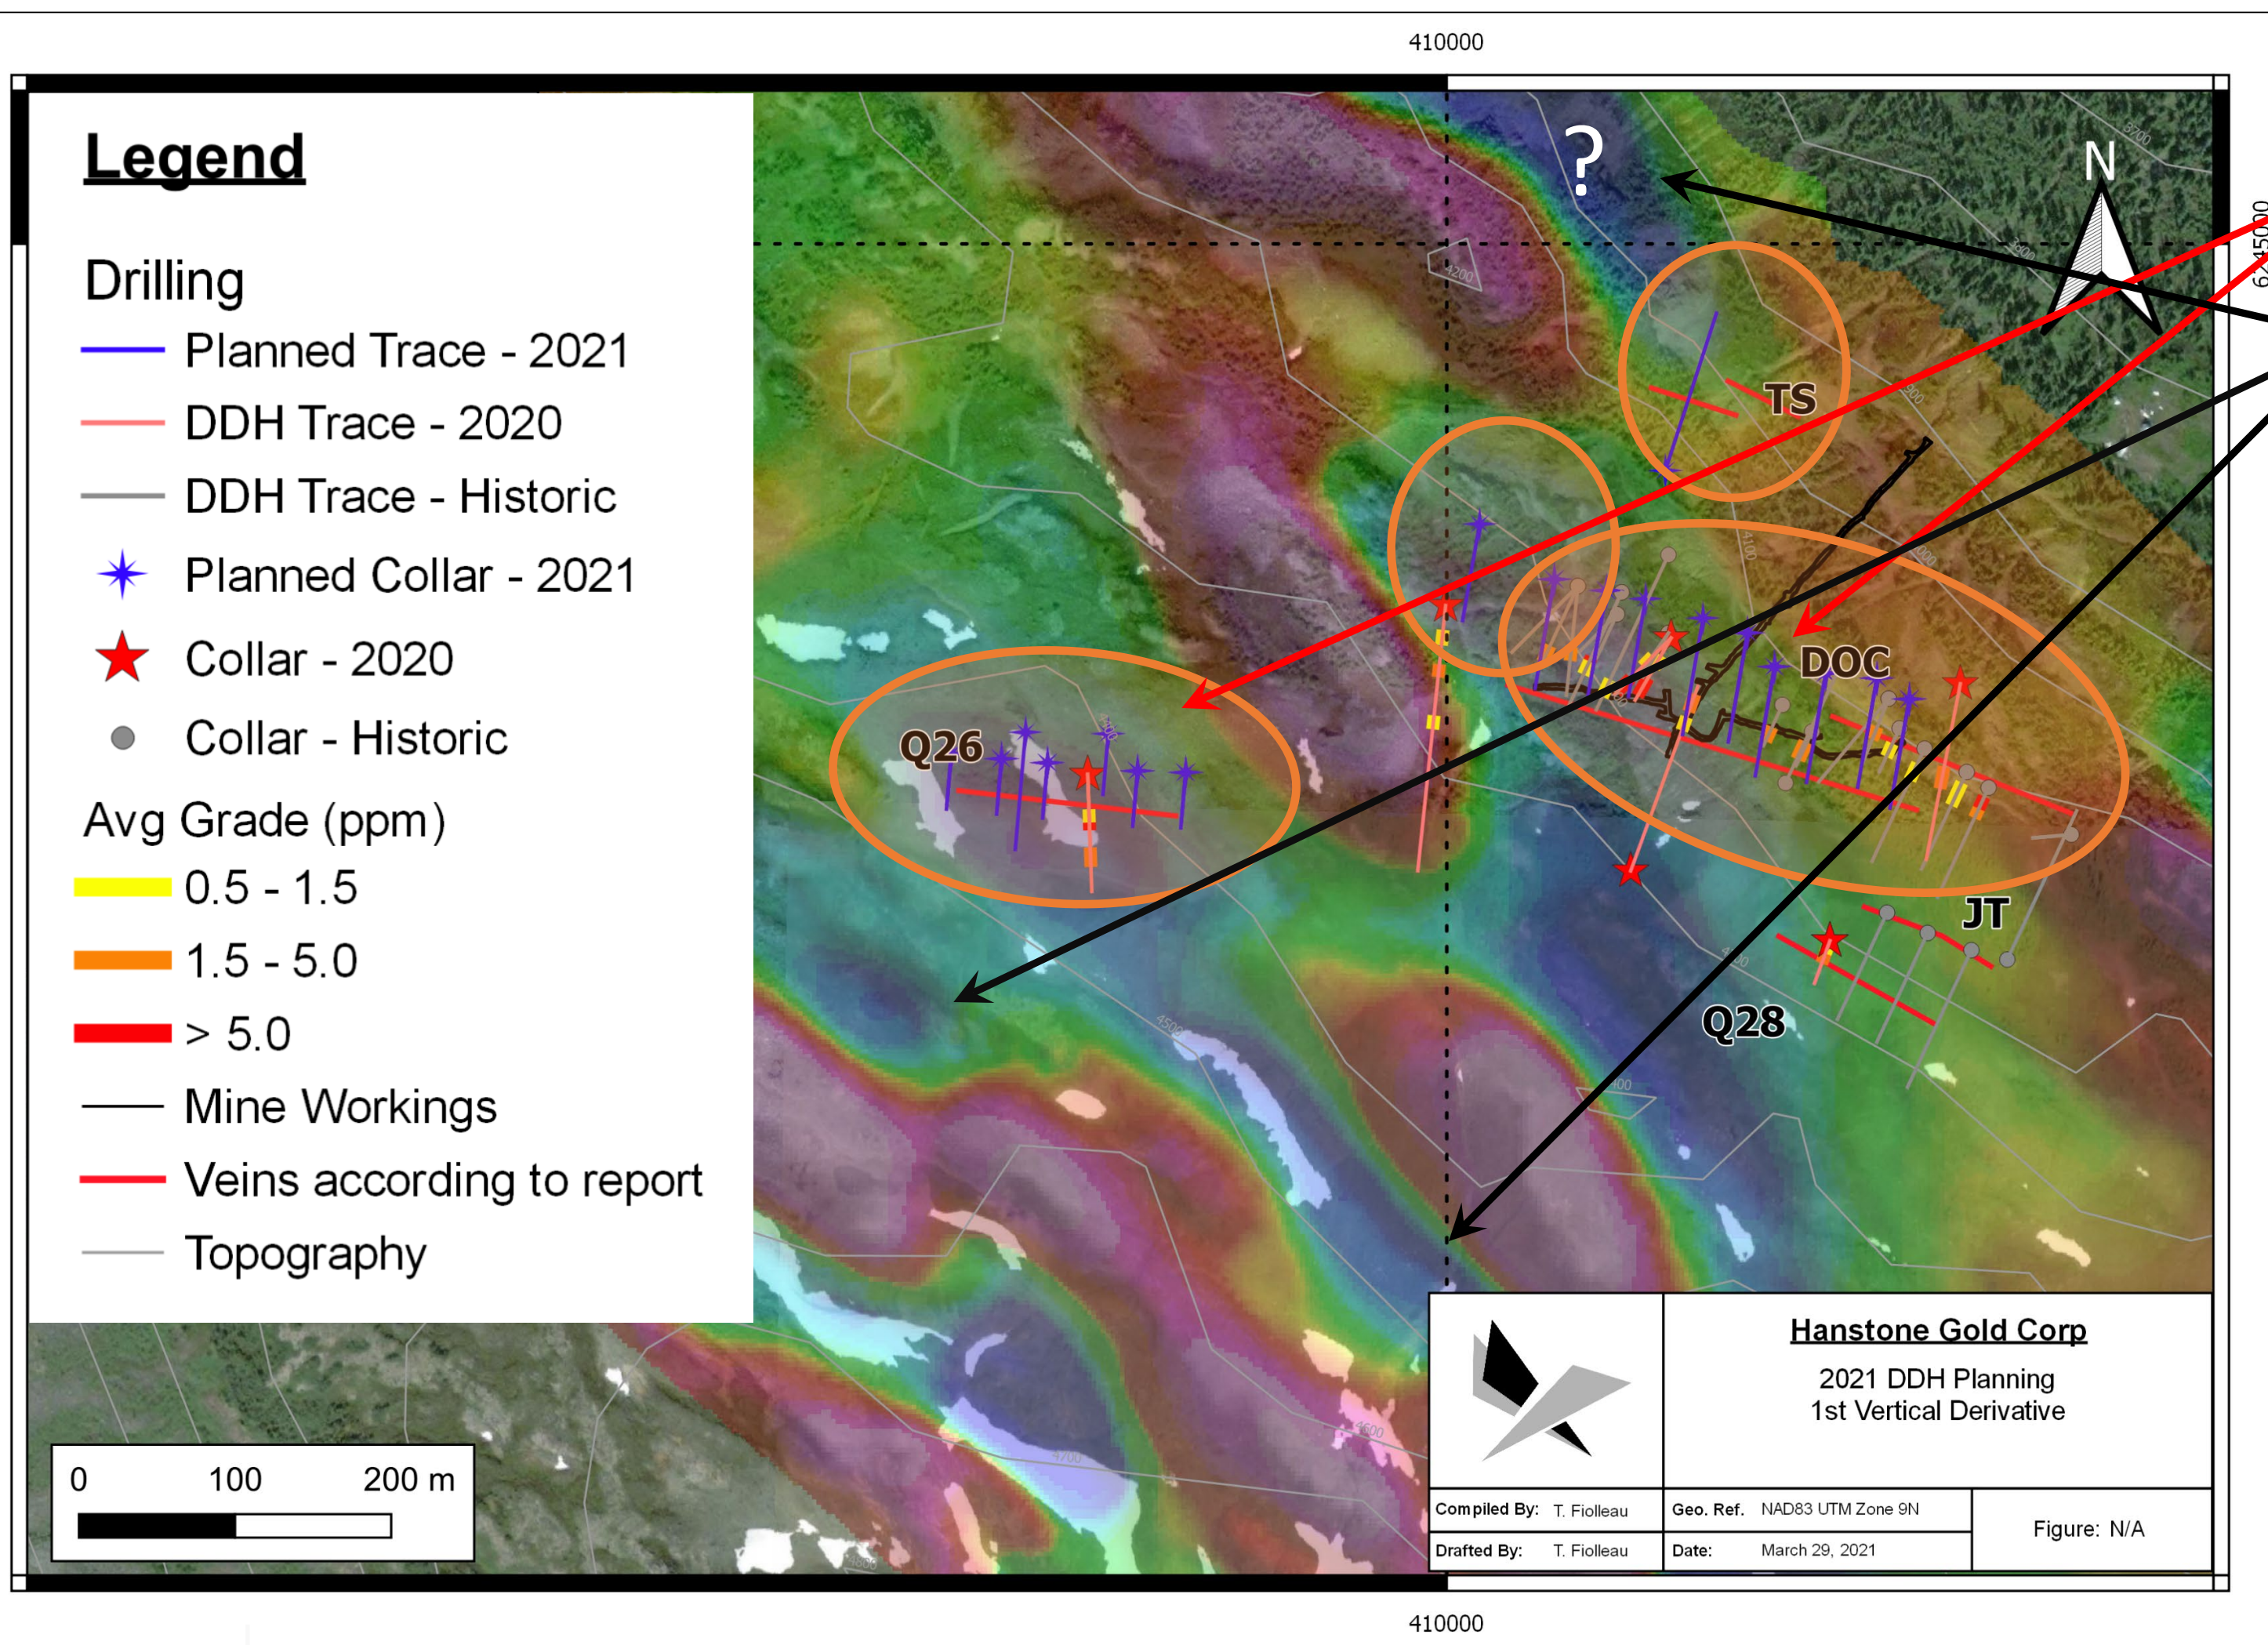

Potential extension of the DOC zone

2021 3D Interpretation

2021 Exploration Program Target Summary

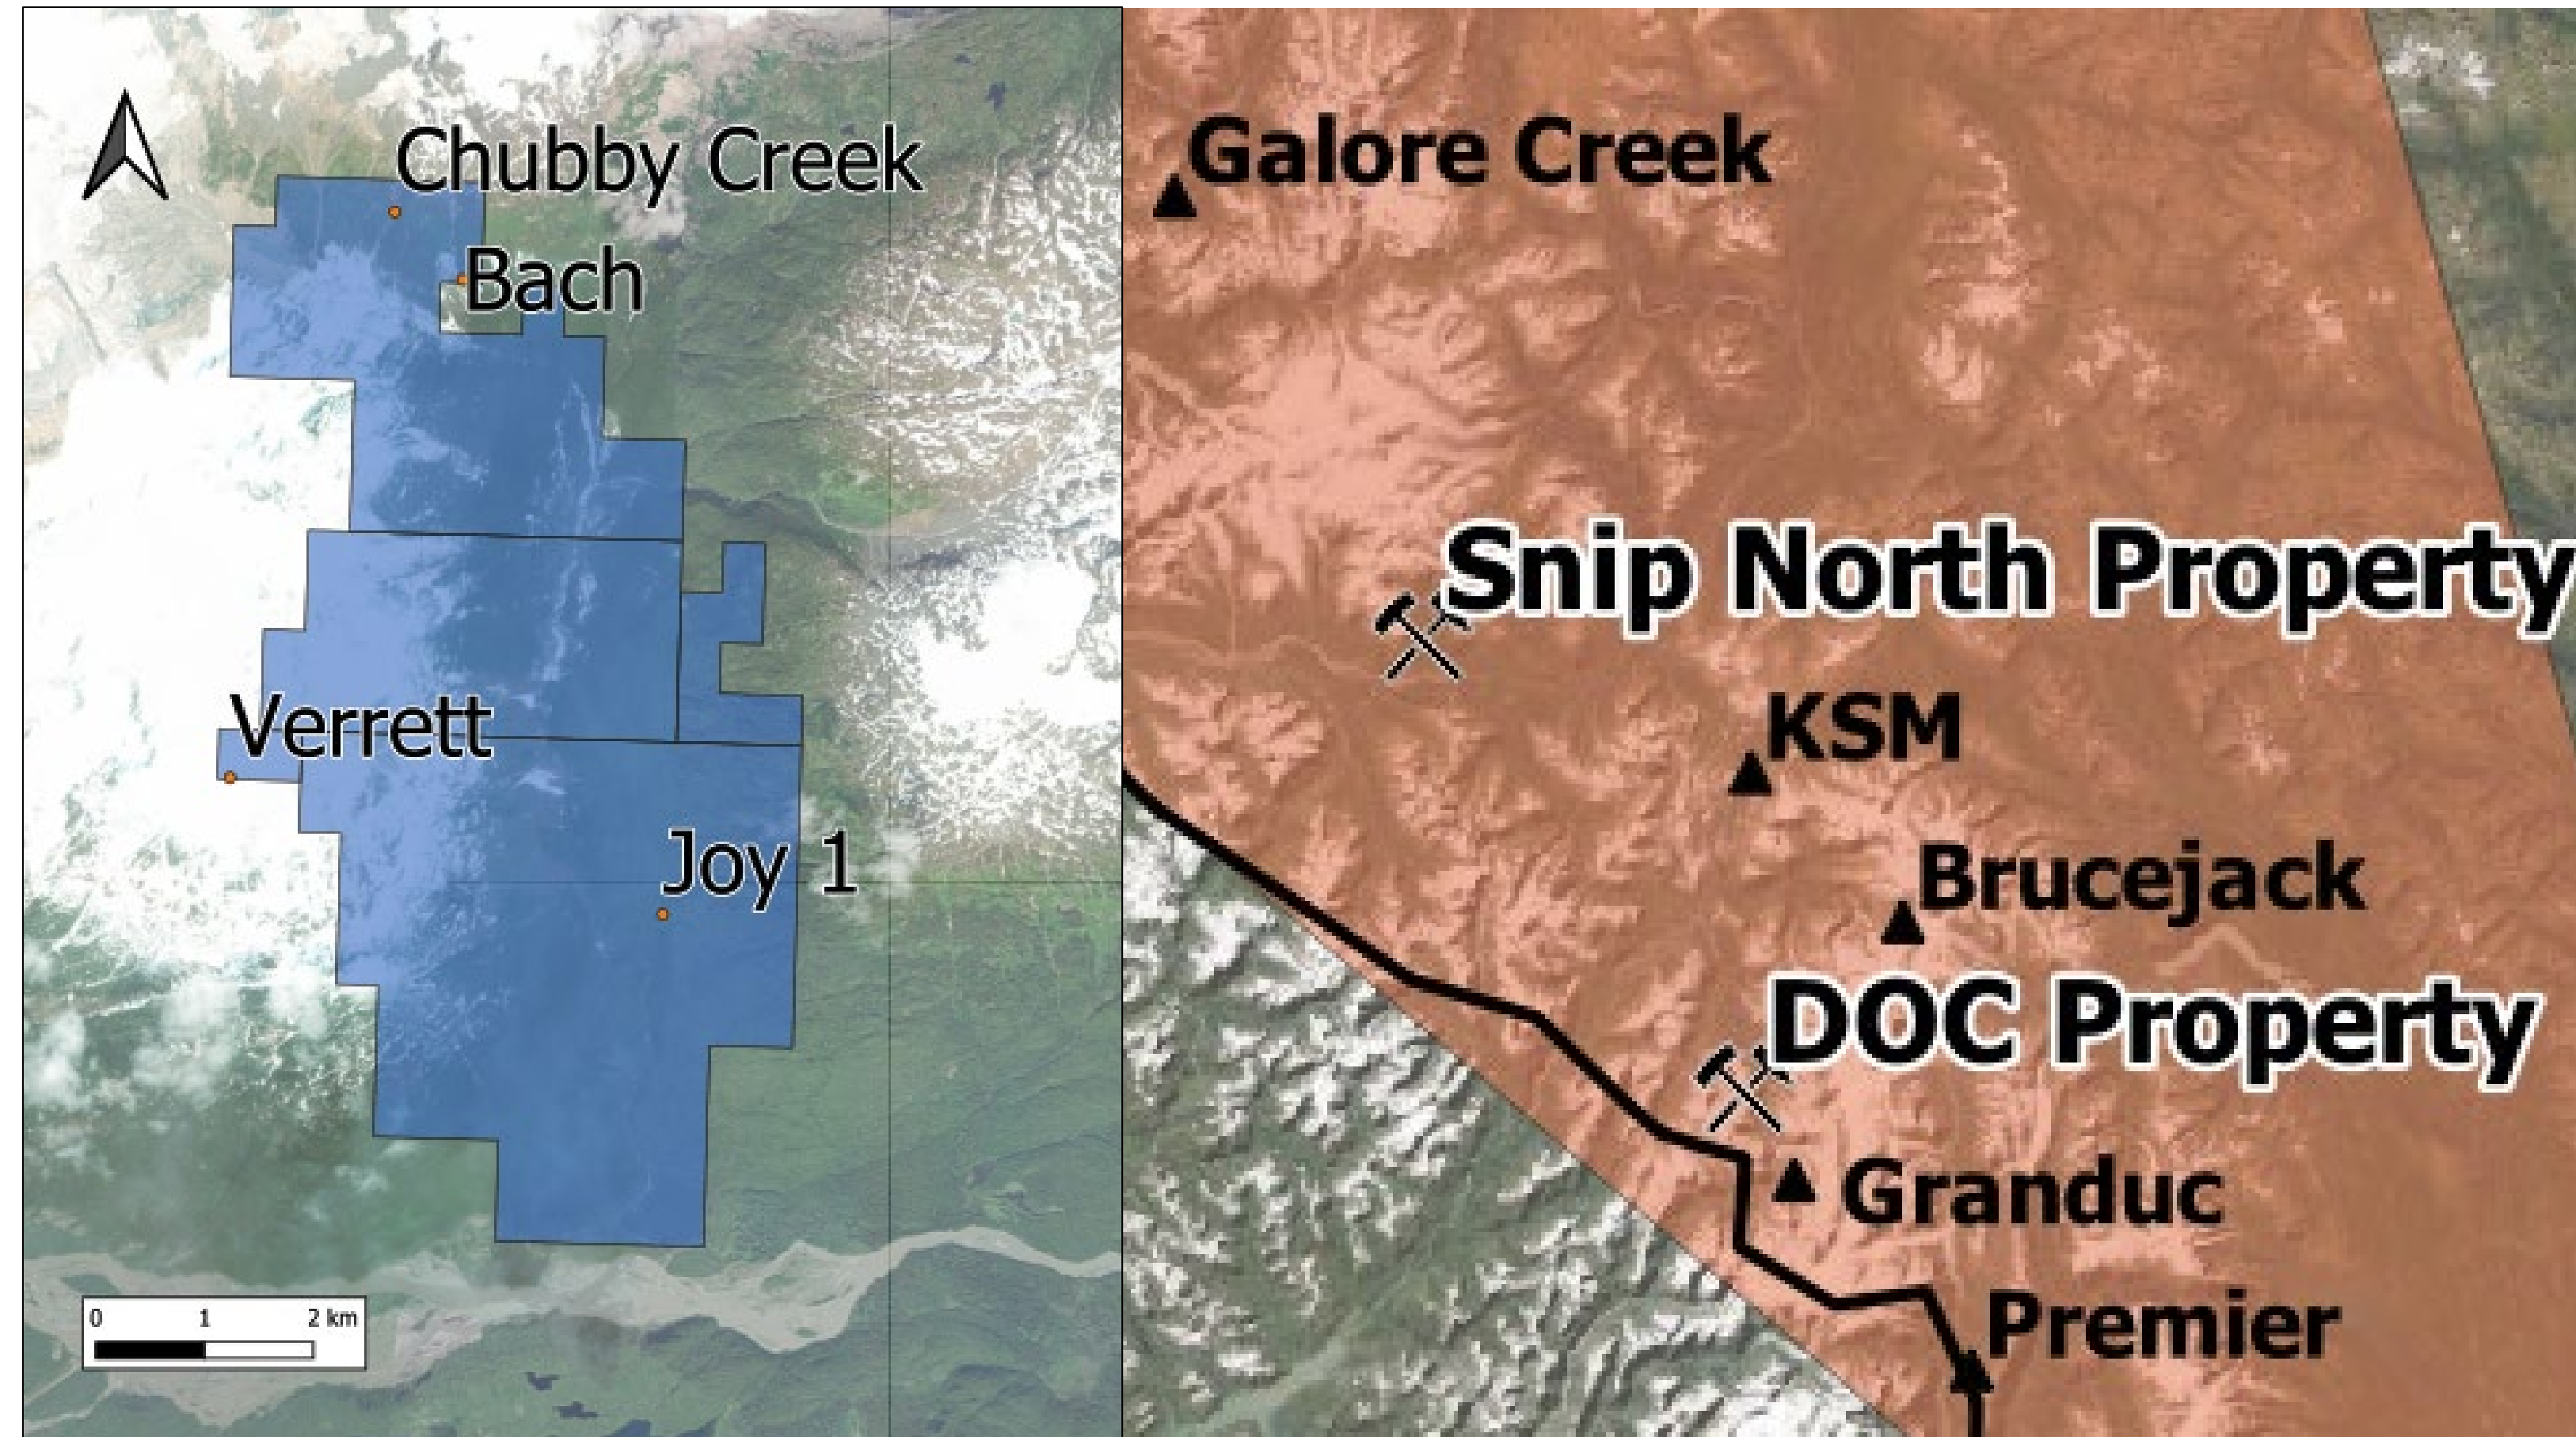

Both veins associated with mag lows
Other areas may be related but have no testing

- More work needed in these areas
 - Prospecting
 - Trenching
 - IP Survey?

Snip North Mineralized Zones

HISTORICAL Outcrop Assay Highlights

- Bach Zone
 - 9.94 g/t Au 17.5 g/t Ag
 - 1.03 g/t Au 8.9 g/t Ag 0.15% Cu
- Joy 1 Zone
 - 1.35 g/t Au
- Chubby Creek Zone
 - 4.58 g/t Au 1.80 g/t Au 9.35 g/t Au
- Verrett Zone
 - 2.38 g/t Au 226.0 g/t Ag 0.60% Cu

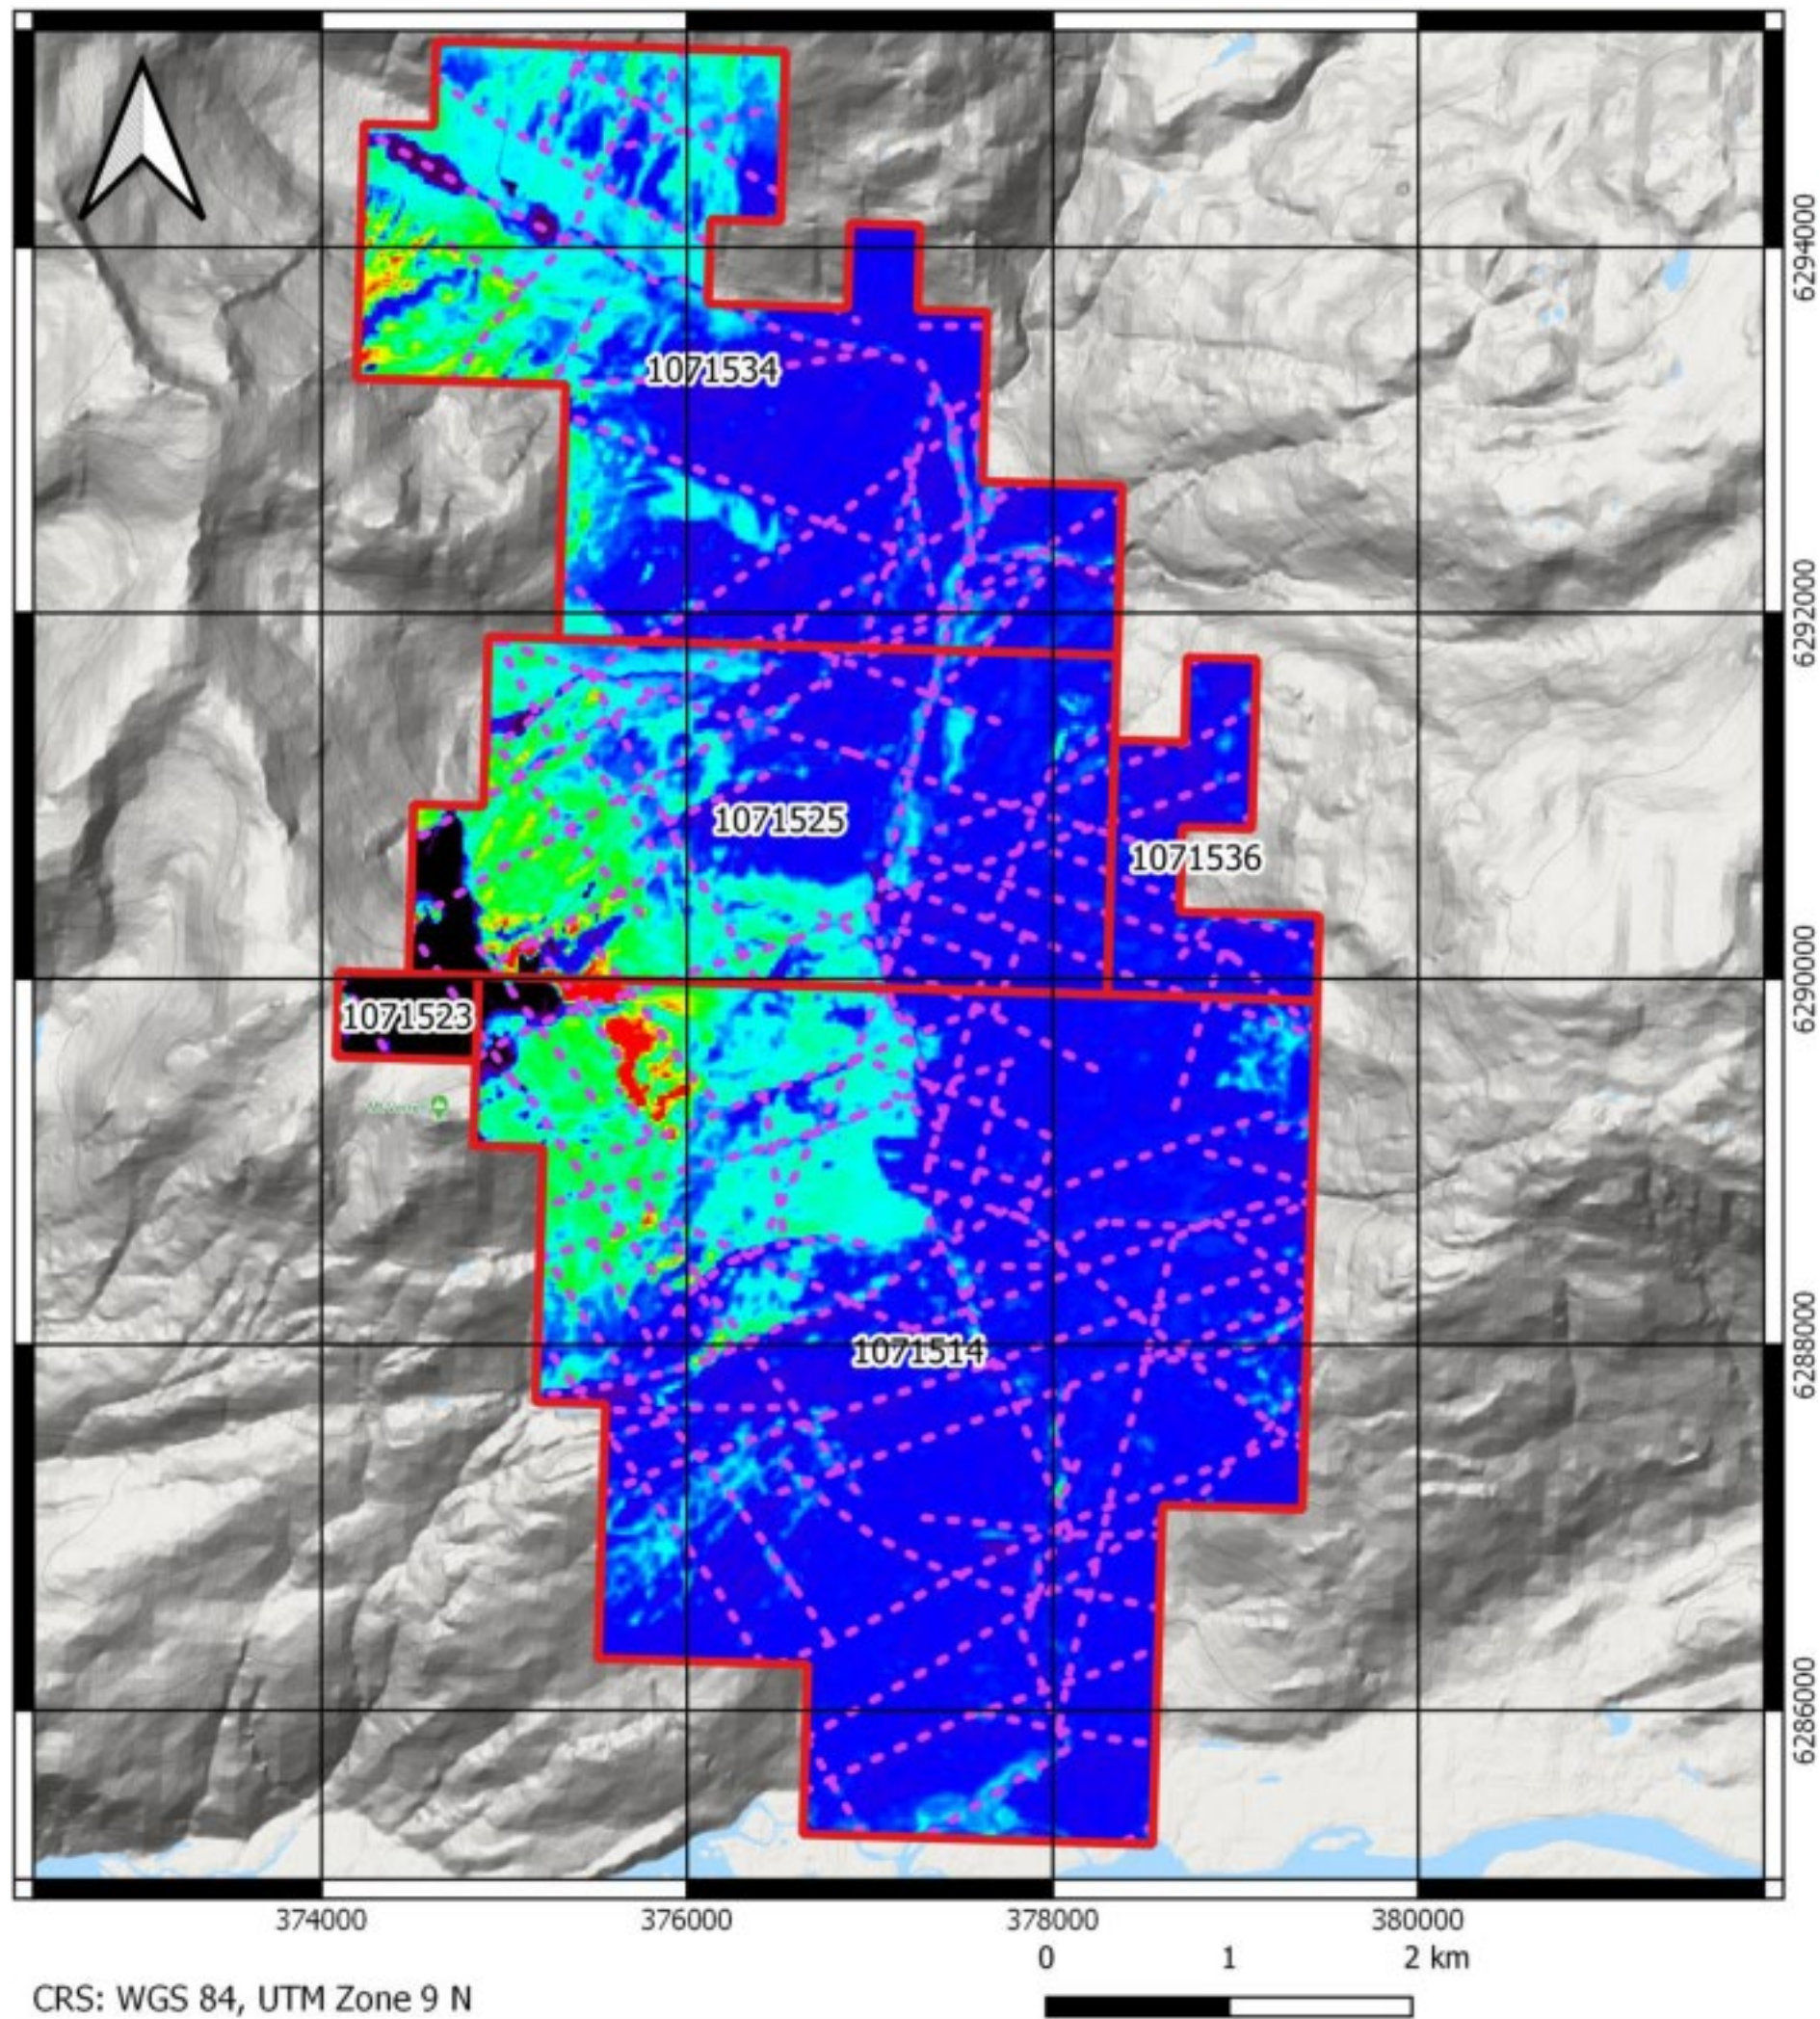

Snip North Property

Snip North Property

- Long Term Exploration Upside Potential
- Multiple Mineralized Zones Spanning Property with both
- Historic & Recent Assays (Grades up to 9.94 g/t Au)
- Snip North property covers 3,336.59 hectares in the heart of the Golden Triangle
- Historic prospecting showing multiple high-grade mineralized zones with select assay results up to 9.94 g/t Au, 226.0 g/t Ag, 0.60% Cu
- Modern exploration methods to expand extent of current mineralization

Snip North Satellite Hydrothermal Alteration

-  Snip North claims
 -  Surface Structure
- Google Terrain Hybrid

Warm colors represent anomalous 10 m resolution hydrothermal alteration spectra.

Pink dashed lines represent interpreted structural displacement

Mineralization is often associated with active fault movement

Snip North Opportunities

- Satellite analysis completed in 2020 will be utilized for [structural & alteration mapping](#) (Property Scale)
- [Prospecting & sampling](#) for 2021 drill target generation
- Analysis, QA/QC & [interpretation/integration of regional & property geophysical datasets](#)
- [Potential diamond drilling](#) to evaluate high priority targets

Exploration Summary Recap 2021

- Focused on Doc Property Development and further exploration in Snip North Property
- Two Diamond Drill Rigs to be mobilized
- Plans for 5,000 m of HQ Diamond drilling on historical prospective and newly discovered targets
- Expand strike and down dip extensions of known mineralized zones
- Potential Deep hole on Quinn Eskay
- Explore interpreted DOC offset with 3-4 drillholes

DC-20-04: 71.85 - 83.66 m

2021 Exploration Program Summary

- **Camp to be expanded** to accommodate more personnel & exploration activities
- All historical and current **data is under review**
- The multiple known and documented showings possibly connected defining a **potentially much larger system**
- Very **few junior exploration companies** in the area with potential for large discoveries
- Golden Triangle companies **Pretium (2.65B), Seabridge (1.58B), Tudor (527M)** \$ market caps
- Current **management instrumental in developing Tudor Gold** from a penny stock to ½ billion \$ plus and established a successful resource company

WHY HANSTONE GOLD?

- Experienced Executive Management Team - Proven Success in the Golden Triangle
- Diversified & Proven Technical Team - Worldwide Experience & History of Significant Resource Discovery & Resource Expansion
- Extensive Historic Exploration on one of the Golden Triangle's Earliest Discoveries
- Multiple Established Zones with Significant Potential for Near Term High-Grade Production
- Longer Term Large Tonnage Discovery Potential on Both Doc and Snip North Properties
- Neighbors in District with Significant Established Resources & Production
- Extensive Modern Regional Infrastructure
- Robust Gold Price
