EVERY MAINSTREAM MEDICAL AND MENTAL HEALTH ORGANIZATION REJECTS CONVERSION THERAPY.

THE AMERICAN PSYCHOLOGICAL ASSOCIATION HAS LINKED THESE PRACTICES TO:

- depression
- social withdrawal
- substance abuse
- homelessness
- suicide
- issues with intimate relationships
- high-risk sexual behaviors
- loss of faith

These outcomes are especially risky for young people.

PARENTS ARE VICTIMS, TOO

Often, parents who seek conversion therapy for their child have not been informed of its many potential harms.

LET'S JOIN THE MANY STATES AND U.S. TERRITORIES THAT HAVE PROTECTED YOUTH FROM CONVERSION THERAPY
