

Personalized support with patient follow-ups & recommended next best actions through a preventative care approach

Chronic diseases, such as heart disease, cancer, and diabetes are responsible for

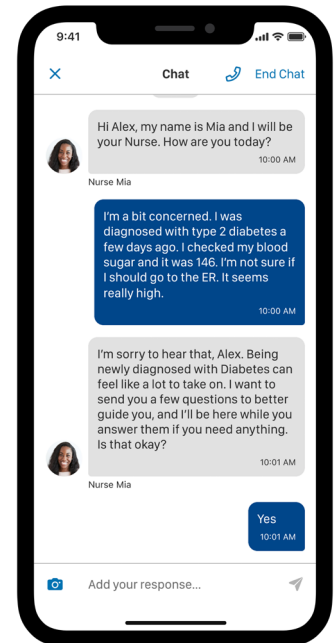

Researchers estimate that 75% of all healthcare costs stem from preventable chronic health conditions like type 2 diabetes, hypertension, obesity, and others¹. The time is now for Payers to transition from **reactive to preventative care** to keep their members healthier at a lower cost.

Pager's After Care solution enables that shift through capabilities that identify member risk factors and nudge "next best actions" to enable proactive health treatment.

WHY PAGER?

<p>87%</p> <p>member engagement rate in after care services</p>	<p>54%</p> <p>additional Rx questions or health concerns answered</p>	<p>89%</p> <p>symptoms reported improved within 2 days of after care</p>
<p>Personalized follow-ups to close gaps in care</p>	<p>Actionable steps and treatment plans provided</p>	<p>Proactive health solutions via integration with SDoH, wellness, and more</p>

“Nurse Mya asked good questions and understood my concerns. I liked the fact that they want to contact me in a couple of days to see how I’m doing.”
