This position is for a Web Developer at the Cyber Innovation Center in Bossier City, LA and is responsible for a wide range of tasks, to include but not limited to; creating mockups, UI components, algorithms, and data structures to enable the delivery of complete minimally viable products for web applications. This position will work across the entire system architecture, from backend to front end; to design, develop, and support high quality and scalable products. This position requires the capability to translate concepts and requirements into user flows, wireframes, mockups, and prototypes that lead to intuitive user experiences. This position will work with relational and NoSQL databases, Linux and Windows operating systems, and modern UI frameworks. This position will create products that provide a quality user experience along with high performance, security, and stability. This position will work in an agile, collaborative environment to understand requirements, design, code, application testing, and support of innovative applications for our highly valued customers.

Required Attributes:

- Existing or eligible for SCI-DCID 6/4 Top Secret Clearance - US Citizenship required
- Ability to work across architecture - building both front end and backend web applications
- Advanced knowledge of either Angular or JavaScript
- Experience in developing responsive design websites
- Fluent with HTML, CSS and JSON
- Proficient in database development using SQL Server, MySQL, or Postgres
- Familiarity with Agile/Scrum concepts and experience working in an Agile environment
- Experience with version control systems like Git or similar type repositories
- Experience with authentication and authorization services like Auth0, Okta or similar type services
- Some C# or Java experience

Desired Attributes:

- Experience developing modeling and simulation software
- Familiarity with either AWS or Azure Cloud
- Experience with DevOps
- Experience with Docker Containers

Required Education:

Bachelor’s degree in Computer Science, Information Systems, Information Technology, or other relevant degree.
Work Requirements:

Hours: 8 a.m. to 5 p.m., Mon-Fri (typical).

Due to the nature of the business and depending on specific event schedules, the employee will be required to vary typical work hours. Occasional weekend work could be required. Occasional travel may be required.

Compensation:

Salary commensurate with ability and experience. Excellent employee benefits package.
