

Jayden Hovey

SUS Vice President External

Vote March 13 - 16

About Me

Hi, My name is Jayden, and I am a fourth year Political Science major. I am passionate about governance and policy and desire to make positive change for all students both on and off campus.

The COVID-19 restrictions hit UFV in only my second semester of university, where I then had to face the next two years of my time at UFV online, with only very little interaction with my professors and fellow students. Because of this experience, I am keen to get involved and work to strengthen that post-COVID community.

If I am elected VPE, I will strive to make UFV the best university in BC!

What I Care About

Safety.

I believe that the UFV campus should be a safe space in which all students feel free to study, work, socialize, and enjoy their time without fear of harassment, violence, or discrimination.

Transparency.

When it comes to managing SUS fees, it is important that all students be aware of the services and opportunities that they are paying for. I want to ensure that all SUS fees are spent equitably and are going towards services that benefit all students and work to make UFV a better institution.

Community.

One of the best parts of university is the connections and friendships that are made on campus. I am a strong proponent of campus culture and I would work alongside fellow executives to foster more campus activity and build a stronger post COVID community.

Flexibility.

I recognize and understand that many students have other obligations beyond their studies, and I would like to ensure that UFV be flexible, and listen to the needs of students to accommodate both time and location for the best learning experience.

My Goals

Lobbying and Government Aid

One goal of mine would be to be placed on the Canadian Alliance of Students Association (CASA) Board of Directors to project the voice of UFV students within federal affairs. I will also work to strengthen advocacy to the provincial government on behalf of UFV.

Open Education Resources (OER)

I will seek to enhance UFV's connection with OpenED BC and work with the University to provide students with more free and affordable classroom resources such as textbooks and learning aids.

Community Advocacy

I will work to be a voice for UFV within the community and to faithfully advocate on behalf of the best interests of students.

"Know Your Fees" Initiative

After the success of the "Know Your Rights" initiative that was brought by former executives, I would like to begin a similar series focused around understanding - down to the dollar - where student fees are being allocated by the Student Union Society.
