Compute Ontario Welcomes Jeff Moon as the Director of Data Strategy and Services

March 1, 2022

We’re delighted to welcome Jeff Moon to the Compute Ontario team. As Director, Data Strategy and Services, Jeff will lead data strategy development. He joins us on June 1.

Jeff comes to us from the Digital Research Alliance of Canada where he held the position of Director, Research Data Management. He was the Director of Portage, a library-based network for the coordination of RDM activities, prior to its merger with the Alliance. He also serves as Data Librarian at Queen’s University Libraries in Kingston, Ontario.

Jeff has worked with government information, data, and statistics his entire career. He was Academic Director of the Queen’s Research Data Centre from 2012 to 2017, and taught graduate-level Government Information and Research Data Management courses at Western University from 2016 to 2018. He also established and managed the Queen’s Research Data Management Service.

He has made lasting contributions to the evolution of data strategy and management in Canada. He is a founding member of the Ontario Council of University Libraries’ Data Community, and helped to create the successful ODESI data portal, hosted by Scholars Portal. Jeff also served on the Inter-university Consortium for Political and Social Research Council from 2008 to 2012 and chaired the Data Management Planning Expert Group for Portage, prior to becoming Director. Jeff has an Honours B.Sc. and M.Sc. in Biology from the University of Waterloo and an M.L.I.S. from McGill University.
