Forthcoming book (illustrations & contribution):
Overview of Adler’s Life & Theory Development

- Born in Vienna 1870; 2nd oldest son to Jewish family
- Experienced illness as a child and loss of brother
- Studied Ophthalmology and neurology in Medical School
- Served in WWI - first to recognize PTSD
  (“shell shock”), daughter Alexandra wrote on it
- Influenced by Aurelias, Epictetus, other philosophers
- Started Child Guidance Centers in Vienna
- Lectures in Europe and US
- Started International Journal of IP (2nd oldest prof journal devoted to psychology; Now JIP)
- Published several books
- Influenced many contemporary therapy approaches, but little to no credit given to him
Major Concepts
Family Constellation & Atmosphere
Family Constellation & Atmosphere

Family of Origin (FOO)
- Intergenerational Patterns: Genogram

Parents’ beliefs → child’s values
- Spoken & implicit messages
- Democracy → feelings of worth, efficacy, & competence

Roles in the Family Unit
Psychological Birth Order
Psychological Birth Order (PBO)

- Difference between ordinal position and psychological birth order
- Sibling relationships play large role in development of PBO
- We act out our PBO everywhere we go
Inferiority Feelings
Inferiority Feelings

- Develop as a result of interactions with family of origin
- Start as seed(s) of striving as we try to overcome them
- Always with us, but don’t need to overcome/paralyze us
Striving for Significance
Striving for Significance

- The direction of striving influenced by early childhood experiences
- Useful side or useless side (with people vs. without consideration for others)
- Never an end to the striving; influences us across lifespan
Lifestyle
Lifestyle

- Culmination of childhood experiences and interactions
- One’s unique view of self, others, and the world
- “I am______, others are ________, the world is ________, therefore in order to belong I must ______________”
Life Tasks
Social Interest & Social Justice

- Social Feeling / “Community Feeling”
- (Gemeinschaftsgefühl) begets Social Interest

- Social Interest begets Social Justice work.

- Responsibility for the impact of one’s actions upon others

- Striving for equity rather than equality
Social Interest & Social Justice
Life Tasks

1. Work
2. Friendship
3. Love/Intimacy
4. Self
5. Spirituality

*not all Adlerians support #4 or #5
Purposefulness of Behavior
Purposeful Behavior

- All behavior has meaning & motivation behind it (usually to belong)
- We are forward-striving, intentional, and we aim for goals
- This is especially great to understand with regard to children’s [mis]behavior

Use of Theory in Various Settings
Applications

- Adler’s ideas are applicable across multiple settings, but most widely known and used in therapeutic fields of counseling and therapy
- Coaching
- Business/Organizations in terms of Leadership and productivity
- Family Education
- Primary Education (K-12)
