ReScape is a nonprofit that provides whole systems regenerative landscaping education, regulatory compliance and advocacy that addresses climate change and serves diverse communities. Our 8 Principles for Regenerative Landscapes foster soil health, sequester carbon, conserve water and protect habitat and valuable resources while reducing waste, greenhouse gas emissions and preventing pollution in our communities and watersheds.

Since 2005, ReScape has trained 3,600+ landscape professionals, employed by over 75 public agencies and hundreds of private businesses. Our regenerative principles are incorporated into municipal ordinances, permitting requirements, city general plans, regional stormwater permits, technical guidelines, and sanitary district resolutions.
