

Protect Freedoms

To the Editor:

Senate Republicans recently voted against a bill guaranteeing access to contraception, claiming such legislation is unnecessary. However, their recently released “Project 2025” document suggests otherwise. On page 455, it outlines plans to track pregnancies, miscarriages, and abortions.

This November, we have a chance to send a clear message: We don’t want the GOP intruding on our medical privacy or personal decisions. The right to contraception, a cornerstone of reproductive freedom, is at stake.

Don’t be complacent. It’s time to stand up for our rights and tell Republicans to stay out of our doctor’s offices and bedrooms. Protect your freedoms – vote.
