## Our Story

Bayou City Hemp was created to be a high-quality, dependable partner in a rapidly growing and evolving industry. We know how important it is to have consistent, reliable suppliers which is why we want to be your trusted source, and help you achieve your business aspirations.

## Ben & Jeremy CO-FOUNDERS

“We are incredibly proud of the amazing team we have at Bayou City Hemp. Our focus on quality begins at the farm and continues throughout the process. We invite you to connect with us so that you can experience our commitment to excellence for yourself.”

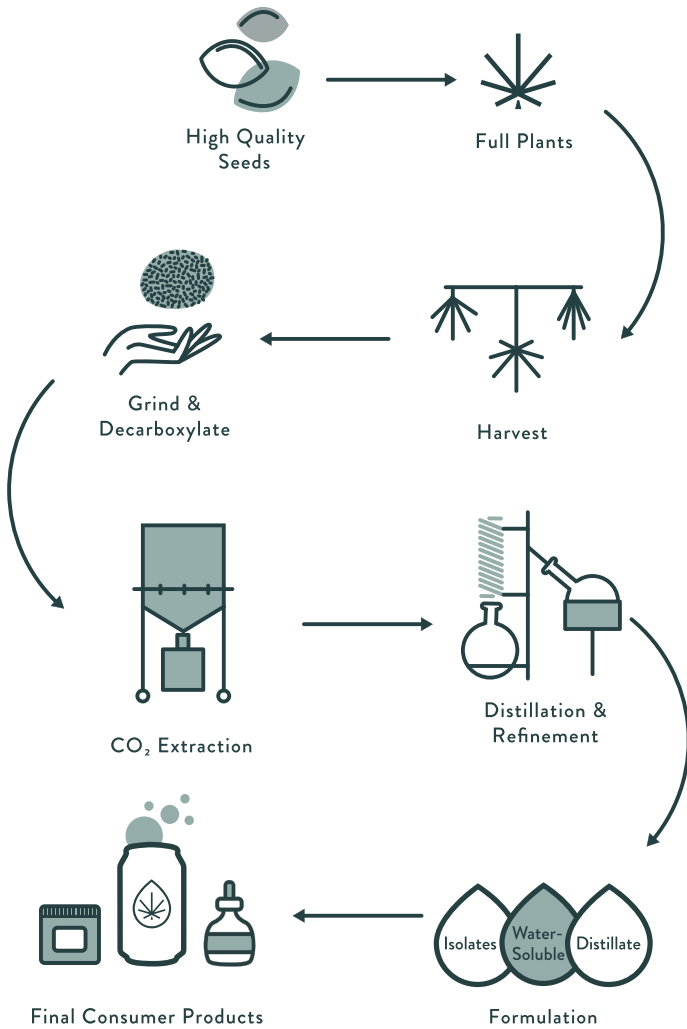

## Our Mission

To bring the best and most reliable cannabinoid products to the market; through a commitment to innovation, quality, and collaboration with our partners.

# LIFE CYCLE OF HEMP

From Seed To Shelf

## Bringing a Higher Standard to the Cannabis Industry

At Bayou City Hemp, we do whatever it takes to go above and beyond the requirements because we know that safety, compliance and consistency are essential to your business. We maintain a state-of-the-art laboratory with the capability to process, isolate and refine cannabinoids to numerous end products.

We have an in-house innovation team of chemistry experts specializing in formulations. Our internal testing procedures are extensive, as we test a minimum of 5 times throughout process to ensure quality and potency. We send all products for third-party testing at DEA certified facilities for COAs (Certificate of Analysis).

# Distillates, Isolates & Novel Cannabinoids

ALL OUR PRODUCTS ARE EXTRACTED  
WITH SUPERCRITICAL CO<sub>2</sub> AND FURTHER  
REFINED USING FILTRATION, MOLECULAR  
DISTILLATION, AND CHROMATOGRAPHY.

# Distillate

Distillate is a refined oil that offers a vast assortment of major and minor cannabinoids from the plant. We run our distillate through multiple passes of molecular distillation to ensure it is the highest potency and free from any impurities.

## Full Spectrum Distillate

80-90%  
POTENCY

<0.3% THC

Our Full Spectrum Distillate begins with meticulously selected hemp, which is ground and extracted using supercritical CO<sub>2</sub> extraction. From there it is filtered and further refined using molecular distillation and chromatography processes. Potency ranges from 80-90% and contains an array of minor cannabinoids.

Full Spectrum Distillate is a great option for customers looking to dilute the material into various formulations for finished products that offers a wide array of cannabinoids from the plant. Our process ensures our customers receive the highest quality and dynamically profiled distillate on the market.

## THC-Free Distillate

>90%  
POTENCY

0% THC

THC-Free Spectrum Distillate is extracted through supercritical CO<sub>2</sub> extraction and has the THC removed to non-detectable levels. Potency ranges exceed 90% and contains an array of minor cannabinoids.

THC-Free Distillate is a great option for customers looking for full plant profile but with no trace of THC.

# Crystal-Resistant Distillate

40-50%  
POTENCY

0-0.3% THC

Crystal-Resistant Distillate is a non-crystallizing version of our Distillate, designed for versatility and a wide variety of applications. The Crystal-Resistant Distillate is available in both full spectrum and THC-free.

Containing 40-50% potency, the oil maintains a low viscosity and is always ready to fill or formulate. Without the use of cutting agents, this is a great product for compliant manufacturers and a perfect solution for filling product components meant for direct use.

# Isolate

99-100%  
POTENCY

0% THC

Isolate is created by further refining our distillate to a single, pure cannabinoid. This creates a fine coarse powdered crystal that is flavorless and odorless and free from any other plant material. Popular isolates include CBD, CBG, CBN and CBDV.

# Water-Soluble Nanoemulsion

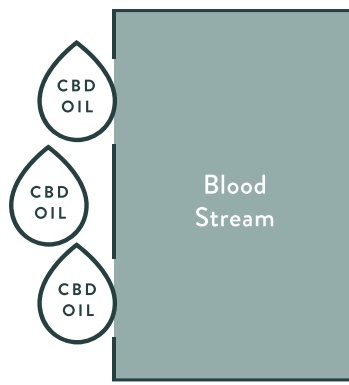

Bayou City Hemp utilizes nanotechnology to enhance our cannabinoids into much smaller molecules.

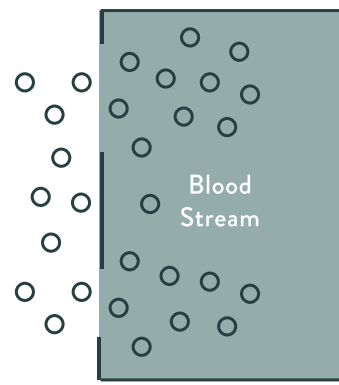

This creates a product that has better absorption and bioavailability, as well as creates better compatibility with beverages and other products.

Cannabinoid offerings and concentrations can be customized and used as a final product or an ingredient.

**Oil-Based  
CBD Molecules**  
15-20% Absorption

**Nanoemulsified  
CBD Molecules**  
>90% Absorption

# Our Program

We offer a wide variety of consumer products to fit your business needs. From ingestibles to topicals, we have products already formulated in inventory or can work to create custom products for your brand.

We differentiate ourselves in being able to provide full transparency in our products. They are made with cannabinoids extracted in our facility and grown from reputable farms.

# Private Label Program

## LOW MINIMUM ORDER

We proudly offer low minimum order quantities for better logistical flexibility

## EXTENSIVE PRODUCT OPTIONS

Choose from a wide variety of ingestible, topical and smokable products

Custom concentrations, blends and flavorings can be made specific for your brand

## COMPREHENSIVE PACKAGING CHOICES

Standard, custom packaging options and design services are available

## LARGE ORDER CAPABILITIES

Our state-of-the-art cGMP-certified facility can produce large-scale retail orders

## INDEPENDENT, THIRD-PARTY LAB TESTING

We send all products for third-party testing at DEA certified facilities for COAs (Certificate of Analysis)

## TINCTURES

Our oil-based tinctures contain additional beneficial components of the hemp plant, such as omega acids, flavonoids and terpenes. Together, these compounds help the body regulate itself and maintain homeostasis.

We combine organic essential MCT (coconut) oil or organic hemp seed oil in our formulation to reach the desired concentration. Each bottle comes with a child-proof, tamper-resistant graduated 1ml dropper so that the consumer can dose to desired amount.

- **Strengths:** 50-5,000mg/ bottle
- **Active Ingredients:** See cannabinoid offerings on page 13
- **Other Ingredients:** MCT Oil, Natural Flavoring, Terpenes
- **Flavors:** Nearly Unlimited Selection
- **Flavors for pets:** Peanut Butter, Bacon
- **Formula Appearance:** Clear, very slight yellow tint
- **Primary Packaging Dimensions:** 1.2" x 1.2" x 3.1"
- **Product Net Contents:** 1 fl oz (29.5mL)
- **Minimum Order Quantity:** 1000
- **Recommended Storage Temp:** 68-77° F (20-25° C)

## Gummies

Gummies offer a great way to take cannabinoids and there is no hotter item right now than quality gummies.

Our gummies are made with pectin, non-GMO, organic and vegan ingredients and taste great, packed with flavor.

We can customize your dosage, color and flavor to meet your product specifications. Or inquire about our in-stock gummies for lower MOQ's and shorter lead times.

- **Strengths:** 5-100mg per Gummy
  - **Active Ingredients:** See cannabinoid offerings on page 13
  - **Other Ingredients:** Tapioca Syrup, Water, Sugar, Pectin (Trisodium Citrate, Sucrose), Citric Acid, Natural Organic Flavoring (Organic Ethyl Alcohol, Water and Natural Flavor), Natural Coloring
- (Plant Extractive), Purac (Sodium Hydrogen Malate, Malic Acid)
- **Flavors:** Nearly unlimited selection
  - **Product Net Contents:** 10-30 Gummies
  - **Custom MOQ:** Custom (500 units); Lower min. available for in-stock gummies
  - **Storage Temp:** 68-77° F (20-25° C)

## Tablets

Tablets are perfect for those who love edibles, but don't want all of the sugar. Our tablets are easy-to-use, portable and come in a child-proof, tamper-resistant bottle. Choose from a variety of flavors and concentrations.

- **Strengths:** 5-100mg per Tablet
- **Active Ingredients:** See cannabinoid offerings on page 13
- **Other Ingredients:** Dextrose, Natural Flavor Silicon Dioxide, Cottonseed Oil
- **Flavors:** Nearly unlimited selection
- **Product Net Contents:** 10-30 Tablets
- **Custom MOQ:** Custom (500 units)

## Soft Gels

A great option for a tasteless way to take CBD or other cannabinoids is in soft gel form. Softgels are one of the most convenient and portable methods of getting your daily dose of cannabis. This delivery method is an easy-to-use supplement that comes in a child-proof, tamper-resistant bottle.

- **Strengths:** 5-100mg per Soft Gel
  - **Active Ingredients:** See cannabinoid offerings on page 13
  - **Other Supporting Ingredients:** Curcumin, MCT Oil, Melatonin Organic MCT Oil, Caffeine Hemp Seed Oil, Taurine, Safflower Oil, Ashwagandha
- Extra Virgin Olive Oil, Vitamin B12  
Avocado Oil, Various Essential Oils  
Sweet Almond Oil
- **Product Net Contents:** 10-30 Soft Gels
  - **Custom MOQ:** Custom (500 units)

## Candy, Chocolate and Baked Goods

Our cannabis edibles are effective and taste GREAT! Choose from a variety of treats like rice krispy bars, cookies, brownies and chocolates. Our chef loves to innovate, so let us know what you are looking for and we can probably make it!

- **Strengths:** 5-100mg
- **Active Ingredients:** See cannabinoid offerings on page 13
- **Other Ingredients:** Depends on product
- **Product Net Contents:** Depends on product
- **Custom MOQ:** Custom (500 units)

# Water-Soluble Products

Cannabis-infused beverages are opening the floodgates to new audiences and provide benefits that rival other methods of ingestion:

- **Strengths:** 5-100mg per can
- **Active Ingredients:** See cannabinoid offerings on page 13
- **Other Ingredients:** Water, Natural Flavors
- **Product Net Contents:** 12 fl oz
- **Custom MOQ:** 280 cases

## Cannabis-Infused Beverages

Cannabis-infused drinks are being touted as the next innovation in the beverage industry. CBD (and other cannabinoids) are being added into ready-to-drink coffees, teas, juices, mixes, seltzers and more.

*Cannabinoids, blends, concentrations and flavorings can be customized*

### EASY TO DRINK

Beverages are seen as the healthier way to consume cannabinoids.

### MORE ACCESSIBLE

Water-soluble cannabinoids are becoming more readily available in restaurants, bars, supermarkets, and online sites.

### HIGHER PRECISION

Serving size is controlled and, much like alcohol, consumers will be able to determine how much CBD or other cannabinoids they want.

## Water-Soluble Beverage Additive

Make any drink better with our beverage additive. Our nanoemulsified beverage additive creates increased absorption and easier compatibility with beverages and ingestibles. Size matters - smaller is better with cannabinoid particle size, because it can make its way into our system easier - this means faster, more effective, more consistent relief.

Unlike with oil, the water-soluble mixes great with any item like coffee, cocktails, smoothies or sauces. Compared with other beverage additives our product has gone through extensive testing and is highly stable. Cannabinoid offerings, blends, concentrations and flavors can be customized.

- **Strengths:** 5-50mg / ml
- **Active Ingredients:** See cannabinoid offerings on page 13
- **Other Ingredients:** Water, Modified Coconut Oil, Vitamin E, Potassium Sorbate, Sorbic Acid, Sodium Citrate, Citric Acid
- **Flavors:** Can be added to fit specific profiles
- **Formula Appearance:** Clear or translucent liquid
- **Solubility:** 100%
- **Particle Size:** 30-50 nanometers
- **MOQ:** 100

## Ready-to-Drink Water-Soluble Shot

Take water-soluble to the next level by making a ready-to-drink shot. We use our nanoemulsified, water soluble additive and combine it with a custom blend of flavoring to create a single-serve beverage.

Cannabinoids and additional adaptogens, vitamins or nootropics can be customized to create unique formulas.

Available bottled in various sizes or in bulk.

- **Strengths:** 5-50mg / ml
- **Active Ingredients:** See cannabinoid offerings on page 13
- **Other Ingredients:** Water, Modified Coconut Oil, Vitamin E, Potassium Sorbate, Sorbic Acid, Sodium Citrate, Citric Acid , Other Natural Flavors
- **Flavors:** Can be added to fit specific profiles
- **Formula Appearance:** Clear or translucent liquid
- **Solubility:** 100%
- **Product Net Contents:** 2 fl oz
- **Particle Size:** 30-50 nanometers
- **MOQ:** 100

## Vapes

Our vape products are all compliant and can be offered with a wide variety of custom terpene profiles and flavors.

Our products are offered in cartridge or disposable pen form and can safely be heated time after time and can be customized with your logo.

All hardware has gone through third-party testing and is free of heavy metal contaminants.

## Additional Smokable Offerings

We offer a wide variety of smokable products from bulk flower, sprayed flower, pre-rolls, moonrocks, kief cones, dabs and more!

- **Volume:** Varies
  - **Active Ingredients:** See cannabinoid offerings on page 13
  - **MOQ:** 100
- Cannabinoids, blends, concentrations and flavorings can be customized*

- **Volume:** .5-2 grams
  - **Active Ingredients:** See cannabinoid offerings on page 13
  - **Construction:** Stainless steel center rod post with ceramic coil
  - **Operation:** Automatic draw, Easy to operate
  - **Color:** Black or white
  - **Flavor:** Nearly unlimited selection
  - **Size:** Fits in your palm, portable for easy daily use
  - **MOQ:** 100
- Cannabinoids, blends, concentrations and flavorings can be customized*

## Pain Cream

Cooling relief infused with up to 5000 mg of CBD from full spectrum hemp extract and essential oils soothe your muscles and joints with our proprietary blend of menthol, CBD, and essential oils.

This topical analgesic acts quickly to deliver relief right where you need it and is great for temporary relief of aches associated with backache, arthritis, strains, bruises, and sprains. The lotion pump applicator makes it easy to use anywhere, providing cooling relief so you can restore balance back to your life.

- **Volume:** 3oz pump
- **Active Ingredients:** Full Spectrum CBD, herbal analgesics
- **MOQ:** 250 units
- **Strength:** 500-5000mg

## Intimacy Enhancer

Level up your intimacy offerings with cannabis-infused massage oil, arousal oil or personal lubricant. Studies show that the addition of cannabinoids can relieve tension, increase bloodflow and enhance sensation.

- **Volume:** 1oz pump
- **Active Ingredients:** Organic mct oil, full spectrum hemp-derived delta 9 oil, natural flavorings
- **MOQ:** 250 units
- *Cannabinoids, blends, concentrations and flavorings can be customized*

# Beauty & Skincare

WITH CBD

Our beauty products are made from the highest quality ingredients, formulated to provide the finest skincare and haircare on the market.

## WHY USE CBD IN YOUR DAILY SKINCARE ROUTINE?

- **Reduces inflammation** and **boosts nutrients**
- **Taps into endocannabinoid system** by mimicking chemicals the body naturally produces. Skin is the largest organ and full of CBD receptors; applying topically immediately deposits benefits of cannabinoids
- **Anti-bacterial** and includes **antioxidants** and **anti-inflammatory** agents that counteract redness and irritation
- **Anti-Aging:** Prevents signs of aging as it protects against free radicals (radicals cause oxidative damage to the skin which leads to wrinkles)

PRODUCT DESCRIPTION	SIZE	CONCENTRATION
Face Cleanser	4oz	50mg CBD
Face Serum	30mL	250mg CBD
Face Moisturizer	50mL	100mg CBD
Eye Cream	15mL	100mg CBD
Shampoo	8oz/12oz	50mg CBD
Conditioner	8oz/12oz	50mg CBD
