OVERVIEW ON

THE METRO DENVER HOMELESS INITIATIVE (MDHI)

 Leading and advancing collaboration to end homelessness in our region

MISSION

Dedicated to everyone in the metro region having a safe, stable place to call home

VISION

Adams, Arapahoe, Boulder, Broomfield, Denver, Douglas, and Jefferson

REGION

MDHI is the Continuum of Care (CoC), a regional system that coordinates services and housing for people experiencing homelessness. We work closely with our communities to build a homeless crisis response system aimed at getting people stably housed as quickly as possible.
What We Do.

Point-in-Time (PIT)

MDHI coordinates the annual point-in-time (PIT) count each year, an annual count that captures the number of individuals experiencing homelessness on a single night in January. This is required by HUD and is reported annually to help demonstrate need and progress in our region.

HMIS & Coordinated Entry

MDHI administers the region's Homeless Management Information System that collects client-level data on the housing and services to those experiencing homelessness, helping communities make data-driven decisions. We also oversee OneHome, the region's Coordinated Entry System that prioritizes and matches people with housing solutions.

Regional Coordination

We coordinate the annual award process to receive millions in funding from HUD to enhance the region's response to homelessness. Additionally, MDHI works across the region to assist in regional coordination of local planning to maximize impact and efficiency in the homeless response system.
