

**Fourth Semi-Annual Hospital Price Transparency Report
February 2023**

The Fourth Semi-Annual Hospital Price Transparency Compliance Report February 6, 2023

The federal Hospital Price Transparency Rule¹ was implemented on January 1, 2021, requiring hospitals to post all prices online, easily accessible and searchable, in the form of (1) a single machine-readable standard charges file for all items and services for all payers and all plans as well as all discounted cash prices, and (2) a standard charges display with actual prices or a price estimator tool for the 300 most common shoppable services.

Combined with newly enacted requirements for disclosure of systemwide prices and historical claims in the Transparency in Coverage Rule² and the Consolidated Appropriations Act of 2021³, this rule is intended to empower healthcare consumers with broad access to the previously undisclosed prices in healthcare, enabling them to see the wide price variations (both within the same hospital for the same services and across hospitals), benefit from competition, and drive down the costs of care and coverage.

Our latest review of hospital compliance, completed just over two years after the Hospital Price Transparency Rule’s implementation, analyzed the websites of 2,000 U.S. hospitals focusing on the nations’ largest health systems, and found only 24.5% of them (489) to be compliant with all the requirements of the rule. Though the majority of hospitals have posted files, the widescale noncompliance of 75.5% of hospitals is due to most hospitals’ files being incomplete, illegible, or not having prices clearly associated with both payer and plan. This noncompliance obstructs the ability of patients, employer and union purchasers, and technology developers to comparatively analyze prices, make informed decisions, and have evidence to remedy errors, overcharges, and fraud (See Table 1 for a summary of our four reports).

Table 1: Hospital Compliance			
Report Date	Hospitals Reviewed	Compliant Hospitals	Percentage Compliant
February 2023	2,000	489	24.5%
August 2022	2,000	319	16.0%
February 2022	1,000	143	14.3%
July 2021	500	28	5.6%

Since the rule’s inception more than two years ago, the Department of Health and Human Services (HHS) has only imposed civil monetary penalties (CMPs) on two hospitals out of the thousands that are likely noncompliant.⁴ While those two hospitals immediately came into exemplary compliance, HHS has not issued any additional penalties. Meaningful price comparisons are possible only with full compliance with price disclosure rules. An overwhelming three-quarters of the nation's largest hospital systems are noncompliant. Within these systems, 6% of the hospitals reviewed posted no usable pricing file. This blatant obfuscation of prices and flouting of the rule demonstrates that implementation and enforcement efforts must be rigorously examined and markedly strengthened to improve compliance, enable technology innovators to parse the pricing data, and empower American consumers with upfront prices.

⁴ CMS Enforcement Actions, <https://www.cms.gov/hospital-price-transparency/enforcement-actions>

Summary of Findings: Of the 2,000 total hospitals reviewed for our Fourth Report, we found:

- Only 489 (24.5%) were complying with the rule.
- 116 hospitals (5.8%) did not post any standard charges file and were in total noncompliance.
- Although 1,025 (51.3%) of hospitals posted negotiated prices clearly associated with payers and plans, 536 of the 1,025 (49.8%) still failed compliance because the majority of their pricing data was missing or incomplete.
- Compliance varied widely among the largest hospital systems we reviewed. See Table 2 for full details.
 - None (0%) of the hospitals we reviewed which were owned by HCA Healthcare, Tenet Healthcare, Christus Health, Providence, Bon Secours Mercy Health, UPMC, Mercy Health, UnityPoint Health, and Avera Health were found to be compliant.
 - Consistent with prior reports, none of the hospitals owned by the largest hospital system in the country, HCA Healthcare, were found to be in compliance, with a significant amount of its hospitals posting illegible, nonconforming files.
 - 58% of hospitals owned by CommonSpirit Health and 73% of hospitals owned by LifePoint Health were found to be in compliance.

Table 2: Compliance of Largest Hospital Systems Reviewed					
Health System	Compliant Hospitals	Noncompliant Hospitals	Hospitals Reviewed	Total Hospitals	Percent Compliance
HCA Healthcare	0	173	173	182	0%
CommonSpirit Health	77	55	132	140	58%
Ascension	4	101	105	139	4%
Trinity Health	2	59	61	88	3%
LifePoint Health	35	13	48	84	73%
Community Health Systems	18	61	79	79	23%
Advocate Health	32	6	38	67	84%
Tenet Healthcare	0	66	66	61	0%
Christus Health	0	29	29	60	0%
Providence	0	52	52	52	0%
Baylor Scott & White Health	9	32	41	51	22%
Bon Secours Mercy Health	0	39	39	48	0%
Sanford Health	2	25	27	47	7%
AdventHealth	28	14	42	46	67%
Prime Healthcare	14	29	43	45	33%
UPMC	0	33	33	40	0%
Mercy Health	0	28	28	40	0%
UnityPoint Health	0	22	22	39	0%
Kaiser Permanente	3	40	43	39	7%
Avera Health	0	38	38	37	0%

- 21 hospitals exhibited 'backsliding,' with an assessment of Noncompliant in the current report after having been assessed as Compliant in our prior report.
- There was a significant increase in the number of hospital pricing files that are onerously large (one gigabyte or larger), compared to our earlier reviews in which compliant files were

simple, substantially smaller, easily read by consumers, and downloadable into a spreadsheet format.

- A growing number of hospitals posted encoded, complex JSON-formatted files without user documentation, or complicated formats making them unusable in some cases.
- There was also an increased usage of 'N/A's in pricing files without any disclaimer or explanation.

This report considers the multiple, detailed criteria required by the rule and may differ from other reports, which may look only for the presence and categories of a hospital pricing file without regard to the completion of all required data fields.

Methodology: PatientRightsAdvocate.org reviewed the websites of a total of 2,000 of the more than 6,000 licensed hospitals in the United States. We placed an emphasis on the nation's largest hospitals and healthcare systems and included hospitals from each of the twenty largest hospital systems in the U.S. subject to the rule. We encourage the appropriate federal agencies to undertake and enforce full compliance audits and make related legal determinations. Our findings reflect good-faith analysis and opinions regarding compliance with the full price transparency regulations based on a review of publicly available hospital websites from December 10, 2022 through January 26, 2023. This report is not intended to constitute legal advice.⁵

A team of PatientRightsAdvocate.org research analysts assessed the websites for hospital compliance. Separately, an independent review and validation of the report using a substantial sample of the data were performed from January 4 to January 28, 2023, by FireLight Health LLC, an independent healthcare price data company with expertise in hospital price transparency data.

We analyzed each hospital website for inclusion of the required machine-readable file for all items and services, as well as the required price display of the 300 most common shoppable services (70 of which were mandated by the Centers for Medicare and Medicaid Services), either in a consumer-usable standard charges display or a price estimator tool. Within the required machine-readable files, we assessed the completeness of the required data posted including: all associated codes, description of each item or service, gross charges, discounted cash prices, de-identified negotiated minimum and maximum charges, and all payer-specific negotiated charges and clear identification of the negotiated charges with the name of the third-party payer and plan.

If a hospital posted a price estimator tool for the required minimum of 300 consumer shoppable services, we evaluated whether consumers with or without insurance could access negotiated rates and discounted cash prices using the tool. However, it was not practical to evaluate whether all 300 shoppable services were available in each of the price estimator tools. Widely varied tool structures and barriers limited or blocked access to price estimates, making price comparisons for the same codes and services across plans unattainable. We were also blocked by barriers such as the collection of personal information and specific plan identification needed for input to receive an estimate. The rule, however, mandates that hospitals enable access to prices without having to submit personally identifiable information.

We identified a hospital as noncompliant if it omitted any of the five standard charge criteria required by the rule, if it posted a majority of blanks or zeros in the data fields, if it did not provide

⁵ We welcome any feedback on our analysis at info@PatientRightsAdvocate.org

descriptions of each item or service, if it did not post all negotiated payer rates associated with specific plans, or if (in the absence of a compliant shoppable services display) the hospital's price estimator tool did not show both the negotiated rates and discounted cash prices to provide pricing for all healthcare consumers, including the uninsured and those desiring to pay cash directly.

Results: Based on our review, we estimate that only 24.5% of the 2,000 hospitals (489/2,000), are in compliance with all of the price transparency rule requirements. We estimate that 75.5% (1,511/2,000) are noncompliant, because one or more price transparency requirements were not met. Interestingly, 116 of the hospitals we found to be noncompliant in our August 2022 report are now compliant; however, 21 of the hospitals deemed compliant in the August 2022 report were found noncompliant in this report.

Among the 489 compliant hospitals, some posted exemplary files – easily accessible, downloadable, machine-readable, and including all negotiated rates by payer and plan:

- MetroHealth Medical Center, Cleveland, OH
- NorthSide Hospital Atlanta, Atlanta, GA⁶
- NorthSide Hospital Cherokee, Canton, GA⁷

See Appendix A for example screenshots of compliant and noncompliant hospital pricing files, Appendix B for a list of the 116 hospitals with no standard charges file, Appendix C for a list of the 489 compliant hospitals, and Appendix D for the full list of hospitals reviewed.

Machine Readable, Standard Charges File Compliance

Consistent with our earlier reports, many hospitals identified only payer names and not the associated plan names. We frequently found that hospitals listed a far greater number of “accepted insurance plans” elsewhere on their websites than they showed in their standard charges file, implying that their standard charges file did not include all accepted plans. We deemed files noncompliant due to incomplete or missing data fields, formulas instead of actual dollar amounts as prices, or fields with zeros, blanks and asterisks for negotiated rates. Also of note, a significant number of hospitals posted their files in obscure locations on their websites, and many posted multiple pricing files with incomplete data in each. These tactics of noncompliance prohibit consumers and technology developers from accessing, parsing, and comparing the pricing data.

Different forms of noncompliance include:

- 75.3% of the hospitals (1,506/2,000) did not post a complete machine-readable file of standard charges.
- 48.8% of the hospitals (975/2,000) did not publish all payer-specific negotiated charges “clearly associated with the names of each third-party payer and plan” as required.
- 46.2% of the hospitals (923/2,000) did not publish a sufficient amount of negotiated rates.
- 16.4% of the hospitals (327/2,000) did not publish any discounted cash prices.
- 5.8% of the hospitals (116/2,000) did not post any usable standard charges pricing file.

⁶ NorthSide Hospital Atlanta was issued a Civil Monetary Penalty on June 7, 2022, and came into compliance shortly thereafter.

⁷ NorthSide Hospital Cherokee was issued a Civil Monetary Penalty on June 7, 2022, and came into compliance shortly thereafter.

300 Shoppable Services Display Compliance

We reviewed each hospital for compliance with the requirement to publish 300 shoppable procedures and services displayed in either a consumer-friendly display or a price estimator tool.

We estimate that:

- 20.5% of the hospitals (411/2,000) presented 300 shoppable services in a consumer-friendly display for customary charges. However, 88.1% (362/411) of these hospitals remain noncompliant because their standard charges files were incomplete.
- 85.8% of the hospitals (1,716/2,000) published a price estimator tool, but 73.4% of them (1,259/1,716) were still noncompliant due to incomplete standard charges files.

Other Observations

We found a significant increase in the number of hospital pricing files that are one to seven gigabytes (GB) or larger, making it onerous for researchers, technology innovators, and consumers to download, although many large hospitals have successfully created compliant files less than 200 megabytes (MB) in size. We also observed an increased usage of 'N/A's in pricing files without any disclaimer or explanation, as well as a shift toward files that are complicated, irregular, or even corrupted, making them exceptionally difficult to parse.

Finally, we found a growing use of encoded, complex JSON-formatted files, without the customary user documentation to identify the schema or internal data structure, making it difficult for our researchers to assess.

Discussion: More than two years have passed since the Hospital Price Transparency Rule took effect. As of the date of this publication, our analysis suggests that the vast majority of hospitals remain noncompliant with the rule. These findings align with our previous reports and other recent reports indicating that hospitals continue to provide incomplete or inaccessible pricing information.⁸

Our data also implies that the lack of enforcement by the Department of Health and Human Services (HHS) has led hospitals to continue to disregard the rule, blocking technology developers and consumers from being able to compare prices and benefit from competition. However, for the two hospitals to which HHS did issue penalties, Northside Hospital Atlanta and Northside Hospital Cherokee, their pricing files are now complete and exemplary, demonstrating the efficacy of enforcement.

Our report findings, along with the continued inability for patients and consumers, including employers, to access meaningful, comparative price data, raise the need to address several important issues:

1. *Stronger, Timely, Transparent Enforcement of Noncompliant Hospitals:* The recent enforcement actions and subsequent full compliance of the penalized hospitals demonstrate

⁸ Loccoh, E.C., Khera, R., van Meijgaard, J. *et al.* Hospital Adherence to the Federal Price Transparency Mandate: Results from a Nationally Representative Sample. *J GEN INTERN MED* (2023). <https://doi.org/10.1007/s11606-023-08039-0>

the efficacy of issuing penalties. More timely, robust enforcement and transparent disclosure of the enforcement process are likely to positively impact compliance.

2. *Actual Prices vs. Estimates.* “Price estimator tools” generally provide non-binding estimates (including price ranges) accompanied by disclaimers that do not hold hospitals accountable for final bills that don’t match the quoted estimate. Actual, binding prices – not estimates – for each payer and plan are needed upfront to allow technology developers to access meaningful price information and to empower consumers to understand the true cost of their care and ensure they are not overcharged.
3. *Clear Pricing Data Standards.* Implementing clear pricing standards, including uniform data file standards, will better serve the intent of the rule by enabling technology innovators and search engines to design online shopping tools and other services that will foster price comparison and competition:
 - Hundreds of hospitals are posting price files of one gigabyte or larger, although many large hospitals have successfully created compliant files at sizes of 200 megabytes or less. Mandating a single file standard will serve to address this issue.
 - Since our July 2021 report in which compliant hospitals posted simple files easily downloadable by consumers or technology developers, there has been a growing use of json-formatted files encoded with a level of complexity that is unnecessary to meet the requirements of the rule. We note that .json files typically generated in the technology industries are accompanied by user documentation that identify the schema, or internal data structure of the file. The rule neglected to require that hospitals provide this customary documentation, necessitating considerable additional time and resources on the part of users of these files. Again, a single file standard will alleviate this barrier.
 - Finally, we note that the Transparency in Coverage Rule has clear, specific, uniform data standards, and our initial review of files posted by insurance companies and employer plans finds much higher compliance, likely due to these mandated pricing data standards.
4. *Attestation of Quality and Completeness of Data.* Requiring an attestation from an appropriate hospital executive that the price data file is complete and accurate will strongly incentivize hospital compliance. Similar to the attestation required in submission of Medicare Cost Reports, CMS can require hospital executives to attest that the standard charge data they submit is accurate and complete.

Conclusion

Our review found that most hospitals are withholding crucial information from consumers by not releasing actual, complete pricing data or by making the data difficult to access. Further, many hospitals are obfuscating their data by creating unnecessarily large files or complex JSON formats without proper user documentation. Among the largest hospital systems, HCA Healthcare continued to show zero compliance and Ascension displayed only 4% compliance. CommonSpirit Health, however, is now found to be at 58% compliance, and LifePoint Health is at 73%.

Complete hospital pricing data, combined with data from the Transparency in Coverage Rule and the Consolidated Appropriations Act of 2021, will enable consumers to see actual, upfront prices,

lower the costs of their healthcare, allow for competition on quality and price, and prevent overcharges, errors, and fraud.

We commend the 489 hospitals that we estimated to be in compliance with the rule. We encourage the remaining 1,511 hospitals to post complete, simple, easily accessible pricing files.

To truly realize the transformative power of the rule and enable consumers to save, we recommend: (1) robust, timely, transparent enforcement by HHS, (2) elimination of price estimates in favor of real prices, (3) clear pricing data file standards, and (4) accountability of hospital executives to attest to the completeness and accuracy of their prices.

When full compliance with the transparency regulations is achieved, the widespread availability of pricing data systemwide in healthcare will unleash the benefits of competition and consumer choice, lowering the costs of care and coverage to patients, employers, and workers.

LEGEND

To be fully compliant, a Hospital must have:

- A Complete Machine-Readable Standard Charges File; and
- Either:
 - A consumer friendly '300 Shoppable Services List'; or
 - An online Price Estimator Tool

A Complete Machine-Readable Standard Charges File must meet the following criteria. Any hospital that failed to meet any one of the following criteria (with a 'no' answer to any of the questions) was found to have an incomplete machine-readable standard charges file and was found to be NONCOMPLIANT.

CRITERIA	DESCRIPTION
Codes	Did the hospital post one or more of the mandated codes used by the hospital for accounting or billing (e.g. CPT, HCPCS, DRG, NDC) for each of its items and services?
Gross Charge	Did the hospital post gross charges for at least 50 percent of the items and services identified?
Discounted Cash Price	Did the hospital post discounted cash prices for at least 50 percent of the items and services identified?
Negotiated Min	Did the hospital post the de-identified minimum negotiated charge for at least 50 percent of the items and services identified?
Negotiated Max	Did the hospital post the de-identified maximum negotiated charge for at least 50 percent of the items and services identified?
Negotiated Rates	Did the hospital post the payer-specific negotiated charge that applies to each item or service, for at least 60 percent of the items and services identified?
Payer and Plan	Did the hospital post all payer-specific negotiated charges (for all payers and plans at the hospital) in a manner clearly associated with the name of the third-party payer and specific plan, for at least two payers including Blue Cross Blue Shield, United, Cigna, Anthem, or Humana?

We also analyzed each hospital for the following criteria regarding 'shoppable services.' If a hospital's Standard Charges File satisfied each of the above criteria, but it did not also offer either a '300 Shoppable Service List' or an online Price Estimator Tool (PET), it was found to be NONCOMPLIANT.

CRITERIA	DESCRIPTION
300 Shoppable Service	Did the hospital post a 300 shoppable services list?
Price Estimator Tool (PET)	Did the hospital post a link to a functional price estimator tool?
PET Provides Cash Price	If the hospital has a price estimator tool, does it provide cash prices for items or services that are accessible by an uninsured person?

If a hospital was found to have both a complete machine-readable file of standard charges, and either a 300 Shoppable Service list or PET that provided a cash price, it was found to be COMPLIANT.
