

**Fifth Semi-Annual
Hospital Price Transparency Compliance Report
July 2023**

The Fifth Semi-Annual Hospital Price Transparency Compliance Report July 20, 2023

The federal Hospital Price Transparency Rule,¹ which took effect on January 1, 2021, requires hospitals to post all prices online, easily accessible and searchable, in the form of (1) a single machine-readable standard charges file pricing for all items, services, and drugs by all payers and all plans, the de-identified minimum and maximum negotiated rates, and all discounted cash prices, as well as (2) prices for the 300 most common shoppable services either as a consumer-friendly standard charges display listing actual prices or, alternatively, as a price estimator tool.

Combined with requirements for disclosure of systemwide prices and historical claims in the Transparency in Coverage Rule (TiC)² and the Consolidated Appropriations Act of 2021 (CAA)³, respectively, the Hospital Price Transparency Rule is intended to empower healthcare consumers – patients, employers, and unions as purchasers – with ease of access to compare prices.

Our latest review, conducted two and a half years after the Hospital Price Transparency Rule took effect, analyzed the websites of 2,000 U.S. hospitals and found only 36% of them (721) to be fully compliant with all requirements of the rule. Although the majority of hospitals have posted files, the widescale noncompliance of 64% of hospitals is due to most hospitals’ files being incomplete or not having prices clearly associated with both payer and plan. In this report, 69 of the hospitals reviewed had no usable standard charges file.

Table 1: Hospital Compliance			
Report Date	Hospitals Reviewed	Compliant Hospitals	Percentage Compliant
July 2023	2,000	721	36.0%
Feb. 2023	2,000	489	24.5%
Aug. 2022	2,000	319	16.0%
Feb. 2022	1,000	143	14.3%
July 2021	500	28	5.6%

All prices listed in dollars and cents for all data fields allow for both machine readable and human readable ease of access to clear price comparisons. The display of minimum and maximum negotiated rates provides the immediate range for comparison to individual or competitive plan prices along with the discounted cash prices. These critical data enable consumers to appreciate the wide price variations within the same hospital for the same items, services, and drugs. Technology developers, search engines, employer and union purchasers, and even individuals can then use these data to compare prices across hospitals. All purchasers can then use prices to benefit from competition and be protected from overcharges, ultimately to drive down their costs of care and coverage.

Continued noncompliance impedes the ability of employer and union purchasers, patients, and technology developers to analyze and compare prices. Complete prices allow consumers to make informed decisions and protect patients and purchasers from errors, overcharges, and fraud. For the first time, our report now includes links to each hospital’s own source file, as well as a file converted to comma separated values (csv) format where appropriate. Including these links will

¹ Health and Human Services Department. ³ Consolidated Appropriations Act of 2021. Dec. 27, 2020.

allow ease of access by consumers, purchasers, technology developers, researchers, and the government to comparatively analyze the pricing data and further measure and encourage compliance.

The Health and Human Services (HHS) Department's Centers for Medicare and Medicaid Services (CMS) are responsible for enforcing the rule. In June of 2022 (eighteen months after the rule's inception), CMS imposed its first two civil monetary penalties (CMPs) on hospitals for not complying with the rule. Both hospitals immediately came into compliance with exemplary files to date. In February of 2023, CMS acknowledged in a blog post that 30% of hospitals (approximately 1,800) were still noncompliant.⁴ Yet, in April of 2023, only two more hospitals were fined. Both were still found to be noncompliant in this review.⁵ As of the time of this report, a total of four hospitals have been penalized, 0.2% of the hospitals that CMS recognized as noncompliant. Clearly, CMS is not strongly enforcing the rule.

For more than two and a half years, upfront hospital prices have now been the right of all purchasers, patients, and consumers, to unleash competition and substantially lower their costs. Yet, two-thirds of hospitals reviewed continue to hide their prices in various forms, causing financial harm to American patients, employers, unions, workers, and taxpayers every day.⁶

CMS prioritizing timely, robust, immediate enforcement with significant, meaningful penalties, especially toward the major hospital systems that our analysis found to be flouting the law, is desperately needed to enable a truly functional, competitive market in healthcare.

Meaningful price comparisons and substantial savings are possible only with full compliance with price disclosure rules. Implementation and enforcement efforts must be significantly improved to ensure full compliance with the letter and spirit of these critical pro-consumer regulations. Our analysis demonstrates the need for stronger, more robust enforcement; uniform, mandatory pricing data standards; required hospital executive attestation of pricing accuracy, accountability, and completeness; closure of the loophole that permits price estimates in place of actual prices; and expansion of price disclosure requirements to all providers, inclusive of ambulatory surgical centers, accountable care organizations, and all physicians. These improvements will increase compliance, enable technology innovators to parse the pricing data, and empower American consumers with upfront prices at every point of care to lower their costs and be protected from overcharges, errors, and fraud.

Our findings reflect good-faith analysis and opinions regarding compliance with the full price transparency regulations based on our review of publicly available hospital websites from May 9, 2023 through July 13, 2023. This report is not intended to constitute legal advice. We welcome feedback on our analysis at info@PatientRightsAdvocate.org.

⁶ 100 Million People in America Are Saddled With Health Care Debt, Kaiser Health News, June 16, 2022, <https://kffhealthnews.org/news/article/diagnosis-debt-investigation-100-million-americans-hidden-medical-debt/>

Summary of Findings: Of the 2,000 total hospitals reviewed for our Fifth Report, we found:

- Only 721 (36.0%) were complying with the rule.
- 1,279 hospitals (64.0%) were not in compliance with the rule.
- 69 hospitals (3.5%) did not post a usable standard charges file.
- Although 1,228 (61.4%) of hospitals posted negotiated prices clearly associated with payers and plans, 507 of the 1,228 (41.3%) still failed compliance because their pricing data was missing or significantly incomplete.
- Compliance varied widely among the largest hospital systems we reviewed.
 - None (0%) of the hospitals we reviewed which were owned by HCA Healthcare, Tenet Healthcare, Providence, Avera Health, UPMC, Baylor Scott & White Health, and Mercy were found to be fully compliant.
 - Consistent with prior reports, none of the hospitals owned by the largest hospital system in the country, HCA Healthcare, were found to be in full compliance, with a significant amount of its hospitals posting illegible, nonconforming files.
 - Substantial improvements since our last report include: 88% of hospitals owned by CommonSpirit Health, 97% of hospitals owned by Community Health Systems, and 98% of hospitals owned by Kaiser Permanente were found to be in full compliance.

Health System	Compliant	Noncompliant	Hospitals	Percent
HCA Healthcare	0	179	179	0%
CommonSpirit Health	113	15	128	88%
Ascension	1	103	104	1%
Community Health Systems	73	2	75	97%
Tenet Healthcare	0	66	66	0%
Trinity Health	2	59	61	3%
Providence	0	52	52	0%
LifePoint Health	40	8	48	83%
Kaiser Permanente	42	1	43	98%
Prime Healthcare	13	30	43	30%
AdventHealth	28	14	42	67%
Bon Secours Mercy Health	2	37	39	5%
Advocate Health	29	9	38	76%
Avera Health	0	38	38	0%
UPMC	0	32	32	0%
Baylor Scott & White Health	0	31	31	0%
Christus Health	2	28	30	7%
Mercy	0	28	28	0%
Sanford Health	1	26	27	4%
Universal Health Services	24	2	26	92%

- Forty hospitals exhibited 'backsliding,' with an assessment of Noncompliant in the current report after having been assessed as Compliant in our prior report.
- Consistent with the fourth report, a significant number of hospitals posted encoded, complex JSON-formatted files without user documentation, or complicated formats making them unusable in some cases.

This report considers the multiple, detailed criteria required by the rule and may differ from other reports, which may look only for the presence and categories of a hospital pricing file without regard to the completion of all required data fields.

Methodology: PatientRightsAdvocate.org reviewed the websites of a total of 2,000 of the more than 6,000 licensed hospitals in the United States. We placed an emphasis on hospitals subject to the rule that are owned by the nation's largest health systems in the U.S. We encourage the appropriate federal agencies to undertake and enforce full compliance audits and make related legal determinations.

A team of PatientRightsAdvocate.org research analysts assessed publicly available hospital websites from May 9, 2023 through July 14, 2023. Separately, an independent review and validation of the report using a substantial sample of the data were performed from June 15, 2023 to July 13, 2023, by FireLight Health LLC, an independent healthcare price data company with expertise in hospital price transparency data.

We analyzed each hospital website for inclusion of the required machine-readable file for all items and services, as well as the required price display of the 300 most common shoppable services (70 of which were mandated by the Centers for Medicare and Medicaid Services), either in a consumer-usable standard charges display or a price estimator tool. Within the required machine-readable files, we assessed the completeness of the required data posted including: all associated codes, description of each item or service, gross charges, discounted cash prices, de-identified negotiated minimum and maximum charges, and all payer-specific negotiated charges and clear identification of the negotiated charges by named payer and plan.

If a hospital posted a price estimator tool for the required minimum of 300 consumer shoppable services, we evaluated whether consumers with or without insurance could access negotiated rates and discounted cash prices using the tool. However, it was not practical to evaluate whether all 300 shoppable services were available in each of the price estimator tools. Widely varied tool structures and barriers limited or blocked access to price estimates, making price comparisons for the same codes and services across plans unattainable. We were also blocked by barriers such as the collection of personal information, specific plan identification, or username and password in order to receive an estimate. The rule, however, mandates that hospitals enable access to prices without having to submit personally identifiable information, register, or submit a username and password.

We identified a hospital as noncompliant if it omitted any of the five standard charge criteria required by the rule, if it failed to provide adequate data fields with actual prices, if it did not provide descriptions of each item or service, if it did not post all negotiated payer rates associated with specific plans, or if (in the absence of a compliant shoppable services display) the hospital's price estimator tool did not show both the negotiated rates and discounted cash prices to provide pricing for all healthcare consumers, including the uninsured and those desiring to pay cash directly.

Results: Based on our review, we estimate that only 36% of the 2,000 hospitals (721/2,000), are in compliance with all of the price transparency rule requirements. We estimate that 64% (1,279/2,000) are noncompliant, because one or more price transparency requirements were not met. Interestingly, 256 of the hospitals we found to be noncompliant in our February 2023 report are now compliant; however, 40 of the hospitals deemed compliant in the February 2023 report were found to be noncompliant in this report.

Among the 721 compliant hospitals, some posted exemplary files – easily accessible, downloadable, machine-readable, and including all negotiated rates by payer and plan:

- Rush University Medical Center, Chicago, IL
- MetroHealth Medical Center, Cleveland, OH
- University Hospital, Madison, WI

See Appendix A for example screenshots of compliant and noncompliant hospital pricing files, Appendix B for a list of the 69 hospitals with no usable standard charges file, Appendix C for a list of the 721 compliant hospitals, and Appendix D for the full list of hospitals reviewed, including open-source links to each hospital’s standard charges file if one was posted.

Machine Readable, Standard Charges File Compliance

Consistent with our earlier reports, many hospitals identified only payer names and not the associated plan names. We frequently found that hospitals listed a far greater number of “accepted insurance plans” elsewhere on their websites than they showed in their standard charges file, implying that their standard charges file did not include all accepted plans. We deemed files noncompliant due to incomplete or missing data fields, formulas instead of actual dollar amounts as prices, or fields with zeros, blanks and asterisks for negotiated rates

Different forms of noncompliance include:

- 63.8% of the hospitals (1,275/2,000) did not post a complete machine-readable file of standard charges.
- 38.6% of the hospitals (772/2,000) did not publish all payer-specific negotiated charges “clearly associated with the names of each third-party payer and plan” as required.
- 43.7% of the hospitals (874/2,000) did not publish a sufficient amount of negotiated rates.
- 11.8% of the hospitals (236/2,000) did not publish any discounted cash prices.
- 3.5% of the hospitals (69/2,000) did not post any usable standard charges pricing file.

300 Shoppable Services Display Compliance

We reviewed each hospital for compliance with the requirement to publish 300 shoppable procedures and services displayed in either a consumer-friendly display or a price estimator tool. We estimate that:

- 17.0% of the hospitals (341/2,000) presented 300 shoppable services in a consumer-friendly display for customary charges. However, 70.4% of these hospitals (240/341) remain noncompliant because their standard charges files were incomplete.
- 89.0% of the hospitals (1,780/2,000) published a price estimator tool, but 62.9% of them (1,120/1,780) were still noncompliant due to incomplete standard charges files.

Discussion: More than two and a half years have passed since the Hospital Price Transparency Rule took effect, and our analysis suggests that the majority of hospitals remain noncompliant with the rule. These findings align with our previous reports and other recent reports indicating that hospitals continue to provide incomplete or inaccessible pricing information.⁷ These analyses imply that minimal, lenient enforcement by CMS has led most hospitals to continue to disregard the rule, blocking technology developers and consumers from being able to compare prices, benefit from competition, and be protected from overcharges.

Our report findings, along with the continued inability of patients and consumers, including employers and unions, to access meaningful, comparative price data, raise the need to address several important issues:

1. *More Thorough, Timely, Transparent Enforcement of Noncompliant Hospitals:*

In a February 2023 blog post, CMS acknowledged that 30% of hospitals (approximately 1,800) have not fully complied with the rule, but it admitted that its review “does not include all the requirements of the Hospital Price Transparency regulation.”⁸ While CMS says it has issued 500 warning notices and 230 requests for corrective action plans to hospitals, it has only fined only four hospitals for noncompliance out of the 1,800 hospitals they claimed to be noncompliant.⁹

We suggest that CMS enforce more quickly and thoroughly, post the entire compliance process publicly, and utilize the applicable payers’ Transparency in Coverage disclosure to verify the accuracy and completeness of hospitals’ price files.

2. *Elimination of Price Estimates in Favor of Actual Prices.*

“Price estimator tools” provide non-binding estimates – including price ranges – accompanied by disclaimers that do not hold hospitals accountable and leave patients vulnerable to overcharges, billing errors, and fraud. Price estimator tools do not work and fundamentally undermine the intent of price transparency requirements.

Actual, binding, upfront prices – not estimates – for each payer and plan as well as discounted cash prices are needed to allow technology developers to access meaningful price information and to empower consumers with financial certainty. We recommend that CMS close the estimator tool loophole and require a tool with real, binding prices.

3. *Clear, Required Pricing Data Standards.*

Hospitals’ machine-readable files are inconsistent in formatting, incomplete, and, in many cases, prohibitively large. The inconsistencies among these files obstruct effective use by technology developers whose efforts could make this data more usable for patients.

⁷ Henderson, M., Mouslim, M. Assessing Compliance with Hospital Price Transparency over Time. J GEN INTERN MED (2023). <https://doi.org/10.1007/s11606-022-08020-3>

⁸ Meena Seshamani, Douglas Jacobs, *Hospital Price Transparency: Progress And Commitment To Achieving Its Potential*, Health Affairs, February 14, 2023. <https://www.healthaffairs.org/content/forefront/hospital-price-transparency-progress-and-commitment-achieving-its-potential>

⁹ CMS Enforcement Actions, <https://www.cms.gov/hospital-price-transparency/enforcement-actions>

Implementing clear pricing standards, including uniform data file standards, will better serve the intent of the rule by enabling technology innovators and search engines to design online shopping tools and other services that will foster price comparison and competition. To achieve systemwide price transparency, these data standards must be mandatory, not merely suggested.

4. *Required Attestation by Hospital Executives of Quality and Completeness of Data.*

We encourage CMS to require hospitals' submissions of pricing data to include a certification or attestation from a senior hospital official, most appropriately the Chief Executive Officer (CEO). CMS routinely requires data submitted from regulated entities to include an attestation regarding compliance. Given our findings of ongoing failure to comply, we urge CMS to impose a requirement that hospital CEOs attest that the pricing data they submit are accurate and complete, in order to hold hospitals accountable to patients and employers' and unions' plans at the prices they post.

5. *Expansion of Price Disclosure Requirements to All Providers*

Oftentimes, outpatient care can be provided at a substantially lower cost at an outside facility or surgical centers than within hospital facilities. Expanding price transparency requirements to all providers – including ambulatory surgical centers, accountable care organizations, and all providers at all points of care – will allow patients and purchasers to compare prices and make informed healthcare decisions. Even in a value-based care model, the actual prices of goods and services rendered and quality data analytics need to be provided to the purchaser and patients to assess its value.

Conclusion

We commend the 721 hospitals that we estimated to be in compliance with the rule. We encourage the remaining 1,279 hospitals to post complete, simple, easily accessible pricing files, instead of withholding critical pricing information by publishing incomplete pricing data, making pricing files difficult to access, or obfuscating with unnecessarily large files or complex formats.

To increase compliance and realize the transformative power of the rule, we recommend: (1) more thorough, timely, transparent enforcement by CMS; (2) elimination of price estimates in favor of real prices; (3) clear, required pricing data standards; (4) required attestation by hospital executives of the quality and completeness of their prices; and (5) expansion of price disclosure requirements to all providers.

With full compliance, upfront prices systemwide in healthcare hold the promise of unveiling egregiously high healthcare prices and ultimately making healthcare more affordable. Price transparency will empower consumers, patients, employers, unions, and our government to drive down our healthcare costs by making informed healthcare decisions and protecting from overcharges.

LEGEND

To be fully compliant, a Hospital must have a complete machine-readable standard charges file; and either a consumer friendly '300 Shoppable Services List' or an online Price Estimator Tool.

A Complete Machine-Readable Standard Charges File must meet the following criteria. Any hospital that failed to meet any one of the following criteria (with a 'no' answer to any of the questions) was found to have an incomplete machine-readable standard charges file and was found to be NONCOMPLIANT.

CRITERIA	DESCRIPTION
Codes	Did the hospital post one or more of the mandated codes used by the hospital for accounting or billing (e.g. CPT, HCPCS, DRG, NDC) for each of its items and services?
Gross Charge	Did the hospital post gross charges for at least 40 percent of the items and services identified?
Discounted Cash Price	Did the hospital post discounted cash prices for at least 40 percent of the items and services identified?
Negotiated Min	Did the hospital post the de-identified minimum negotiated charge for at least 40 percent of the items and services identified?
Negotiated Max	Did the hospital post the de-identified maximum negotiated charge for at least 40 percent of the items and services identified?
Negotiated Rates	Did the hospital post the payer-specific negotiated charge that applies to each item or service, for at least 40 percent of the items and services identified?
Payer and Plan	Did the hospital post all payer-specific negotiated charges (for all payers and plans at the hospital) in a manner clearly associated with the name of the third-party payer and specific plan, for at least two payers including Blue Cross Blue Shield, United, Cigna, Anthem, or Humana?

We also analyzed each hospital for the following criteria regarding 'shoppable services.' If a hospital's Standard Charges File satisfied each of the above criteria, but it did not also offer either a '300 Shoppable Service List' or an online Price Estimator Tool (PET), it was found to be NONCOMPLIANT.

CRITERIA	DESCRIPTION
300 Shoppable Service	Did the hospital post a 300 shoppable services list?
Price Estimator Tool (PET)	Did the hospital post a link to a functional price estimator tool?
PET Provides Cash Price	If the hospital has a price estimator tool, does it provide cash prices for items or services that are accessible by an uninsured person?

If a hospital was found to have both a complete machine-readable file of standard charges, and either a 300 Shoppable Service list or PET that provided a cash price, it was found to be COMPLIANT.

Included in the following compliance data is a link to each hospital's original source file, as well as a file converted to a user-friendly comma separated values (csv) format where appropriate. The converted files have been zipped or g-zipped and can be uncompressed using commonly available tools.
