Sixth Semi-Annual Hospital Price Transparency Report
February 2024

The Sixth Semi-Annual Hospital Price Transparency Compliance Report
February 2024

The federal Hospital Price Transparency Rule,[1] which took effect on January 1, 2021, requires hospitals to post all prices online, easily accessible and searchable, in the form of (i) a single machine-readable standard charges file for all items, services, and drugs by all payers and all plans, the de-identified minimum and maximum negotiated rates, and all discounted cash prices, as well as (ii) prices for the 300 most common shoppable services either as a consumer-friendly standard charges display listing actual prices or, alternatively, as a price estimator tool.

Combined with requirements for disclosure of systemwide prices and historical claims in the Transparency in Coverage Rule (TiC)[2] and the Consolidated Appropriations Act of 2021 (CAA)[3], respectively, the Hospital Price Transparency Rule is intended to empower healthcare consumers – patients, employers, and unions as purchasers – with ease of access to compare prices.

Our latest review, conducted three years after the Hospital Price Transparency Rule took effect, analyzed the websites of 2,000 U.S. hospitals and found only 34.5% of them (689) to be fully compliant with all requirements of the rule. Although the majority of hospitals have posted files, the widespread noncompliance of 65.5% of hospitals is due to files being incomplete or not having prices clearly associated with both payer and plan. Eighty-seven of the hospitals reviewed for this report had no usable standard charges file.

Table 1: Hospital Compliance			
Report Date	Hospitals Reviewed	Compliant Hospitals	Percentage Compliant
Feb. 2024	**2,000**	**689**	**34.5%**
July 2023	2,000	721	36.0%
Feb. 2023	2,000	489	24.5%
Aug. 2022	2,000	319	16.0%
Feb. 2022	1,000	143	14.3%
July 2021	500	28	5.6%

Disclosure of all actual prices for all data fields, including all negotiated rates, minimums and maximums, and discounted cash prices, allows for both machine- and human-readable access for comparisons. These critical data empower consumers to spot wide price variations for the same care. Industry research identified vast price discrepancies, with the price of a Caesarian Section ranging from $6,241 to $60,584, within the same hospital.[4] Similarly, the price of an Emergency Room visit at Boston area hospitals can vary by thousands.[5] Our Price Variation Report validated such findings in a study comparing prices from 100 hospitals, finding that prices varied by 10x within the same hospital and 31x across hospitals within a region.[6] Also, discounted cash prices have been found to be 39 % lower than the lowest insured commercial rates.[7]

With full transparency, consumers can benefit from competition to make informed decisions, protect from overcharges, billing errors, and fraud, and lower their costs. Employer and union plans can use pricing and claims data to improve their plan designs and direct members to lower

cost, high-quality facilities. However, continued noncompliance impedes this ability. The majority of consumers are still blind to see upfront hospital prices, employer-sponsored healthcare premiums have increased 50% in the last decade[8], and 100 million Americans are in medical debt for charges they could not know in advance.[9]

Our report includes links to each hospital's own source file, as well as a file converted to comma separated values (csv) format where appropriate. These links enable access by consumers, purchasers, technology developers, researchers, and the government to analyze the pricing data and further measure and encourage compliance. Additionally, we provide free, searchable access to all U.S. hospital price files, both raw and converted, online at https://hospitalpricingfiles.org/.

Our findings reflect good-faith analysis and opinions regarding compliance with the full price transparency regulations based on our review of publicly available hospital websites from September 3, 2023, through January 13, 2024. This report is not intended to constitute legal advice. We welcome feedback on our analysis at info@PatientRightsAdvocate.org.

Summary of Findings: Of the 2,000 total hospitals reviewed for our Sixth Report, we found:

- Only 689 (34.5%) were complying with the rule.

- 1,311 hospitals (65.5%) were not in compliance with the rule. The most common reason for noncompliance was missing or significantly incomplete pricing data.

- 87 hospitals (4.4%) did not post a usable standard charges file.

- Compliance varied widely among the largest hospital systems we reviewed.

  o Substantial improvements since our last report include: 100% of hospitals owned by Community Health Systems, 93% of hospitals owned by Christus Health, and 84% of hospitals owned by Advocate Health were found to be in full compliance.

  o None (0%) of the hospitals we reviewed which were owned by HCA Healthcare, Tenet Healthcare, Providence, Kaiser Permanente, Avera Health, UPMC, Baylor Scott & White Health, and Mercy were found to be fully compliant.

  o While 98% of hospitals owned by Kaiser Permanente were found to be fully complying in our last report,

Table 2: Compliance of Largest Hospital Systems Reviewed				
Health System	**Compliant**	**Non-Compliant**	**# Reviewed**	**Percent Compliant**
HCA Healthcare	0	180	186	0%
CommonSpirit Health	110	19	129	85%
Ascension	10	91	101	10%
Community Health Sys.	74	0	74	100%

[9] June 16, 2022, 100 Million People in America Are Saddled With Health Care Debt

Kaiser now posts multiple files for each hospital, instead of a single file as required by the rule, so none (0%) of Kaiser's hospitals are now fully compliant.

- 135 hospitals exhibited 'backsliding,' with an assessment of Noncompliant in the current report after having been assessed as Compliant in our prior report.

- Consistent with the Fifth Report, a significant number of hospitals posted encoded, complex JSON-formatted files without user documentation, or files with complicated formats making them unusable in some cases.

- Analysis for this report found more hospitals posting multiple files, instead of the single file required by the rule.

- A significant number of hospitals have begun posting files in a 'tall' format, repeating the same item or service in multiple rows instead of one row per item or service ('wide'). 'Tall' files are less consumer-friendly than 'wide' files, as they contain large amounts of repetitive data and are difficult for human users to make price comparisons. 'Tall' files can also make omitted price data more difficult to detect.

Methodology: PatientRightsAdvocate.org reviewed the websites of a total of 2,000 of the more than 6,000 licensed hospitals in the United States. We placed an emphasis on hospitals subject to the rule that are owned by the nation's largest health systems in the U.S. We encourage the appropriate federal agencies to undertake and enforce full compliance audits and make related legal determinations.

A team of PatientRightsAdvocate.org research analysts assessed publicly available hospital websites from September 3, 2023, through January 13, 2024. Separately, an independent review and validation of the report using a substantial sample of the data was performed from December 14, 2023, to January 25, 2024, by FireLight Health LLC, an independent healthcare price data company with expertise in hospital price transparency data.

We analyzed each hospital website for inclusion of the required machine-readable file for all items and services, as well as the required price display of the 300 most common shoppable services (70 of which were mandated by the Centers for Medicare and Medicaid Services), either in a consumer-usable standard charges display or a price estimator tool. Within the required machine-readable files, we assessed the completeness of the required data posted including: all associated codes, description of each item or service, gross charges, discounted cash prices, de-identified negotiated minimum and maximum charges, and all payer-specific negotiated charges and clear identification of the negotiated charges by named payer and plan.

If a hospital posted a price estimator tool for the required minimum of 300 consumer shoppable services, then we evaluated whether consumers with or without insurance could access negotiated rates and discounted cash prices using the tool. However, it was not practical to evaluate whether all 300 shoppable services were available in each of the price estimator tools. Widely varied tool structures and barriers limited or blocked access to price estimates, making price comparisons for the same codes and services across plans unattainable. We were also blocked by barriers such as the collection of personal information, specific plan identification, or username and password in order to receive an estimate. The rule, however, mandates that hospitals enable access to prices without having to submit personally identifiable information, register, or submit a username and password.

We identified a hospital as noncompliant if it omitted any of the five standard charge criteria required by the rule, if it failed to provide adequate data fields with actual prices, if it did not provide descriptions of each item or service, if it did not post all negotiated payer rates associated with specific plans, or if (in the absence of a compliant shoppable services display) the hospital's price estimator tool did not show both the negotiated rates and discounted cash prices to provide pricing for all healthcare consumers, including the uninsured and those desiring to pay cash directly.

Results: Based on our review, we estimate that only 34.5% of the 2,000 hospitals (689/2,000) are in compliance with all of the price transparency rule requirements. We estimate that 65.5% (1,311/2,000) are noncompliant, because one or more price transparency requirements were not met. Interestingly, 103 of the hospitals we found to be noncompliant in our July 2023 report are now compliant; however, 135 of the hospitals deemed compliant in the July 2023 report were found to be noncompliant in this report.

Among the 689 compliant hospitals, some posted exemplary files – easily accessible, downloadable, machine-readable, and including all negotiated rates by payer and plan:

- Cape Cod Hospital, Hyannis, MA

- Christus Santa Rosa Medical Center, San Antonio, TX

- UW Health University Hospital, Madison, WI

See Appendix A for example screenshots of compliant and noncompliant hospital pricing files, Appendix B for a list of the 87 hospitals with no usable standard charges file, Appendix C for a list of the 689 compliant hospitals, and Appendix D for the full list of hospitals reviewed, including open-source links to each hospital's standard charges file if one was posted.

Machine-Readable, Standard Charges File Compliance

Consistent with our earlier reports, many hospitals identified only payer names and not the associated plan names. We frequently found that hospitals listed a far greater number of "accepted insurance plans" elsewhere on their websites than they showed in their standard charges file, implying that their standard charges file did not include all accepted plans. We deemed files noncompliant due to incomplete or missing data fields, formulas instead of actual dollar amounts as prices, or fields with zeros, blanks and asterisks for negotiated rates.

Different forms of noncompliance include:

- 65.1% of the hospitals (1,303/2,000) did not post a complete machine-readable file of standard charges.

- 37.2% of the hospitals (744/2,000) did not publish all payer-specific negotiated charges "clearly associated with the names of each third-party payer and plan" as required.

- 48.6% of the hospitals (972/2,000) did not publish a sufficient amount of negotiated rates.

- 12.0% of the hospitals (239/2,000) did not publish adequate discounted cash prices.

- 4.4% of the hospitals (87/2,000) did not post any usable standard charges pricing file.

300 Shoppable Services Display Compliance

We reviewed each hospital for compliance with the requirement to publish 300 shoppable procedures and services displayed in either a consumer-friendly display or a price estimator tool. We estimate that:

- 15.7% of the hospitals (313/2,000) presented 300 shoppable services in a consumer-friendly display for customary charges. However, 85.0% of these hospitals (266/313) remain noncompliant because their standard charges files were incomplete.

- 90.0% of the hospitals (1,799/2,000) published a price estimator tool, but 63.0% of them (1,134/1,799) were still noncompliant due to incomplete standard charges files.

Discussion: More than three years have passed since the Hospital Price Transparency Rule took effect, and our analysis suggests that the majority of hospitals remain noncompliant with the rule. These findings align with our previous reports and other recent reports indicating that hospitals continue to provide incomplete or inaccessible pricing information.[10] These analyses imply that minimal, lenient enforcement by CMS has led most hospitals to continue to disregard the rule, blocking technology developers and consumers from being able to compare prices, benefit from competition, and be protected from overcharges.

The findings of this report are consistent with industry research, however, which identified significant hospital noncompliance with federal rules. For example, in January of 2024, Turquoise Health posted that 90% of hospitals had posted pricing data,[11] but analysts found that only 53% of hospitals were rated five stars as fully compliant with the rule.[12] Hospitals' failure to post cash prices or negotiated rates across the five major commercial insurers contributed to lower compliance scores.[13]

Our report findings, along with the continued inability of patients and consumers, including employers and unions, to access meaningful, comparative price data, raise the need to address several important issues:

1. *More Thorough, Timely, Transparent Enforcement of Noncompliant Hospitals*

In a February 2023 blog post, CMS acknowledged that 30% of hospitals (approximately 1,800) have not fully complied with the rule, but it admitted that its review "does not include all the requirements of the Hospital Price Transparency regulation."[14] To date, CMS has only issued civil monetary penalty notices to fourteen hospitals for noncompliance out of the 1,800 hospitals they claimed to be noncompliant, 0.8% of the hospitals that CMS recognized as noncompliant.[15] These data suggest that CMS is not strongly enforcing the rule.

[15] CMS Enforcement Actions, https://www.cms.gov/hospital-price-transparency/enforcement-actions

We encourage CMS to enforce more quickly and thoroughly, post the entire compliance process publicly, and utilize both the applicable payers' Transparency in Coverage disclosure and our Hospital Price File Finder tool to verify the accuracy and completeness of hospitals' price files.

2. *Elimination of Price Estimates in Favor of Actual Prices*

"Price estimator tools" provide non-binding estimates – including price ranges – accompanied by disclaimers that do not hold hospitals accountable and leave patients vulnerable to overcharges, billing errors, and fraud. Price estimator tools do not achieve the goals of price transparency policy and fundamentally undermine the intent of the regulations.

Actual, binding, upfront prices – not estimates – for each payer and plan as well as discounted cash prices are needed to allow technology developers to access meaningful price information and to empower consumers with financial certainty. We recommend that CMS close the estimator tool loophole and require a tool with real, binding prices.

3. *Required, Consistent Pricing Data Standards*

Hospitals' machine-readable files are inconsistent in formatting, incomplete, and, in many cases, prohibitively large. The inconsistencies among these files obstruct effective use by technology developers whose efforts could make this data more usable for patients.

We note that the 2024 the Hospital Outpatient Prospective Payment System (OPPS) Rule implements data file standards with an effective date of July 1, 2024. We are hopeful that the implementation and adoption of regulations will address the current issues surrounding data file inconsistencies.

We note several issues related to one of the three recommended file formats, referred to in CMS publications as the 'tall' format. While the 'tall' files reviewed for this report are not required to comply with the 'tall' format specifications due to be implemented on July 1, 2024, issues we found in this review are likely to be present even after the July 1 implementation date.

Among the files that we reviewed and that are unnecessarily large (several GB in size), a significant percentage are 'tall' files. Unnecessarily large files present difficulties to all but the most sophisticated users when an attempt is made to download and open such files, and many require special software to 'split' them into multiple smaller files that can be accommodated by typical business computers and software. 'Tall' files are also less consumer-friendly as they contain large amounts of repetitive data and are more difficult for human users to make price comparisons among plans for any given item or service. 'Tall' files can also make omitted price data more difficult to detect.

We recommend that CMS set additional requirements for 'tall' files including a maximum number of rows consistent with the capacity of common spreadsheet applications, and a cap on file size (applicable to all files). Hospitals that do not wish to conform to these requirements have the option of using either of the two other permitted file formats, 'wide' and JSON.

4. *Required Attestation by Hospital Executives of Quality and Completeness of Data*

In a positive step, the 2024 OPPS Rule requires hospital price file submissions to include an affirmation that the pricing data is accurate and complete. Unfortunately, the rule merely requires

a box to be checked when the file is submitted, not an official certification by a senior hospital official. True attestation will hold hospitals accountable to consumers and their plans for the prices they post.

We encourage CMS to require the attestation be by a senior hospital official, most appropriately the Chief Executive Officer (CEO), and to deem such attestations as material to payment from the federal government to incorporate potential liability under the False Claims Act ("FCA") for hospitals that knowingly violate the rule and falsely attest to their files' accuracy and completeness.

5.   *Expansion of Price Disclosure Requirements to All Providers*

Oftentimes, outpatient care can be provided at a substantially lower cost at an outside facility or surgical centers than within hospital facilities. Expanding price transparency requirements to all providers – including ambulatory surgical centers, accountable care organizations, and all providers at all points of care – will allow patients and purchasers to compare prices and make informed healthcare decisions. Even in a value-based care model, the actual prices of goods and services rendered and quality data analytics need to be provided to the purchaser and patients to assess its value.

Conclusion

We commend the 689 hospitals that we estimated to be in compliance with the rule. We encourage the remaining 1,311 hospitals to post complete, simple, easily accessible pricing files, instead of withholding critical pricing information by publishing incomplete pricing data, making pricing files difficult to access, or obfuscating with unnecessarily large files, multiple files, or complex formats. We also encourage CMS to more strongly enforce the rule to compel greater compliance and enable true price discovery.

The goal of systemwide price transparency is to give all healthcare purchasers – consumers, employers, unions, and government payers – the ability to shop, compare prices, and protect from overcharges. True price transparency, with complete dollars and cents pricing information, across all payers and plans including the discounted cash price in a standardized format will enable a robust mobile app market, giving patients the ability to access upfront prices at their fingertips. Patients will be better informed, and providers will be incentivized to provide greater value. Placing price transparency into federal law will send a signal to consumers that we have reached the end of the era in which we are passive purchasers who have no choice but to pay whatever is charged for our care.

LEGEND

To be fully compliant, a Hospital must have a complete machine-readable standard charges file; and either a consumer friendly '300 Shoppable Services List' or an online Price Estimator Tool.

A Complete Machine-Readable Standard Charges File must meet the following criteria. Any hospital that failed to meet any one of the following criteria (with a 'no' answer to any of the questions) was found to have an incomplete machine-readable standard charges file and was found to be NONCOMPLIANT.

CRITERIA	DESCRIPTION
Codes	Did the hospital post one or more of the mandated codes used by the hospital for accounting or billing (e.g. CPT, HCPCS, DRG, NDC) for each of its items and services?
Gross Charge	Did the hospital post gross charges for at least 40 percent of the items and services identified?
Discounted Cash Price	Did the hospital post discounted cash prices for at least 40 percent of the items and services identified?
Negotiated Min	Did the hospital post the de-identified minimum negotiated charge for at least 40 percent of the items and services identified?
Negotiated Max	Did the hospital post the de-identified maximum negotiated charge for at least 40 percent of the items and services identified?
Negotiated Rates	Did the hospital post the payer-specific negotiated charge that applies to each item or service, for at least 40 percent of the items and services identified?
Payer and Plan	Did the hospital post all payer-specific negotiated charges (for all payers and plans at the hospital) in a manner clearly associated with the name of the third-party payer and specific plan, for at least two payers including Blue Cross Blue Shield, United, Cigna, Anthem, or Humana?

We also analyzed each hospital for the following criteria regarding 'Shoppable Services.' If a hospital's Standard Charges File satisfied each of the above criteria, but it did not also offer either a '300 Shoppable Services List' or an online Price Estimator Tool (PET), it was found to be NONCOMPLIANT.

CRITERIA	DESCRIPTION
300 Shoppable Services	Did the hospital post a 300 Shoppable Services List?
Price Estimator Tool (PET)	Did the hospital post a link to a functional price estimator tool?
PET Provides Cash Price	If the hospital has a price estimator tool, does it provide cash prices for items or services that are accessible by an uninsured person?

If a hospital was found to have both a complete machine-readable file of standard charges, and either a 300 Shoppable Services List or PET that provided a cash price, it was found to be COMPLIANT.

Included in the following compliance data is a link to each hospital's original source file, as well as a file converted to a user-friendly comma separated values (csv) format for hospitals that posted in a JSON format. The converted files have been zipped or g-zipped and can be uncompressed using commonly available tools.
