Welcome to LEAF, an arboretum ("tree museum") that is home to over 800 trees!

Get in touch with nature! Stand quietly and write down some of the...

Colors you see:
________________________________________________________________________
________________________________________________________________________

Sounds you hear:
________________________________________________________________________
________________________________________________________________________

Look up at the clouds! What do you see? Do the cloud shapes remind you of things you've seen before, like animals or people? Without taking your eyes off the clouds, start drawing in the space below. Don’t look at the paper and don’t lift your pencil or pen. The drawing you create might surprise you!

Walk, look, listen, explore, and record your discoveries!
As you walk, try to find:

- A squirrel or chipmunk
- A tree with rough bark
- A tree with smooth bark
- A tree with berries or flowers
- Animal tracks
- A tree that is shorter than you are
- The tallest tree you can see
- A pinecone
- A bird
- A spider’s web
- A tree TOO BIG to hug

(make measure trees by wrapping your arms around their trunks!)

- A twig shaped like the letter Y
- A tree with twisty roots

Move like a tree! Stretch tall like the trunk, twist like the roots, sway in the wind, and flutter to the ground like an autumn leaf!

Our mission is to create educational opportunities and outdoor experiences for our community.
