

## **Fold-Down Table Mat Spacer Installation Option**

**Tools needed:** Phillips screwdriver or a powered screwdriver/drill

If you would prefer to leave your fold-down table mat in place when the table is in the stowed position, you can install the provided spacer strips behind the strip of wood that your table hinge is secured to. These strips (both must be utilized) provide the necessary spacing to permit your table to close with the mat in place. Check out our 3-minute installation video for step-by-step instructions to install the spacers.

### **Instructional Video:**

Open your phone's camera app, then hold the phone over this QR code (as if you are taking a photo of it). A link to the video should show up on your phone's screen. If it doesn't, you can also find the video by typing the following into a web browser such as Google Chrome or Microsoft Edge:
