

## Region K Population and Municipal Demand Projection Revision Memo

To Texas Water Development Board Staff \_\_\_\_\_ Page 1  
CC John Burke, Lauri Gillam, File  
Subject **Requested Population and Municipal Demand Projection Revisions**

From Jaime Burke  
Date January 10, 2018

The Region K Regional Water Planning Group and the Region K Population and Water Demand Committee have spent the last year reviewing the draft municipal projections from the TWDB and coordinating with the municipal WUGs in the region to determine appropriate revisions for the TWDB staff to consider. At the January 10, 2018 Region K meeting, the Region K RWPG approved to request the following revisions to the draft municipal projections, for consideration by the TWDB staff.

### **Municipal Population and Demand Projection Requested Revisions:**

Many of the following requested revisions involve changing the base GPCD for a WUG from the city-boundary GPCD to the utility-boundary GPCD. The documentation to support these revisions includes the following:

On June 30<sup>th</sup>, TWDB staff sent an email containing historical population and GPCD estimates for Utility WUGs. The email explained that “The base GPCDs used to calculate draft water demand projections were carried over from the 2017 State Water Plan, which were based on city boundaries. The historical GPCDs provided in the attached table were developed using utility population and water use data from the WUS and estimated based on utility service area boundaries. Therefore, you will see some differences between the base GPCDs in the draft projections and historical GPCD estimates in many WUGs.” The email went on to state that “This information can be potentially used as supporting documentation/data to justify changes to the draft population or the base GPCDs in the draft projections.”

1. **Bastrop County** – No population revisions; requesting revision to base GPCD for City of Bastrop.
  - a. **Bastrop** – Request that demand projections use 2011 utility-boundary GPCD as base GPCD. Demands have been recalculated incorporating TWDB-provided water efficiency savings by decade.

DRAFT	BASE	DRAFT	2020	2030	2040	2050	2060	2070

- g. **Meadowlakes MUD** - Request decrease to population in 2030-2070, based on expected build-out conditions. Mike Williams, Public Works Director, said they are currently at 90% buildout, and will reach 100% buildout early in the 2020 decade. Moved balance to County-Other. Revised demands reflected – no change to base GPCD.

6. **Gillespie County** – no revisions requested

7. **Hays County** – Requesting revision to population for Austin, County-Other, Dripping Springs WSC, and West Travis County Public Utility Agency; requesting revision to base GPCD for Austin and West Travis County Public Utility Agency

- a. **Austin** – Request increases to Austin population projections based on their submitted City Demographer's projections. A portion of those increases is requested for inclusion in the Hays County portion of Austin.

Request that demand projections use 2011 utility-boundary GPCD as base GPCD. Demands have been recalculated based on the increased population and the revised base GPCD incorporating TWDB-provided water efficiency savings by decade.

Austin has submitted a formal revision request to the RWPG. It has been included in this request as supporting documentation. See Austin under Travis County and Williamson County for similar requests.

- c. **Dripping Springs WSC** – Request increase to population based on the following input from the WSC: Currently in our CCN (as of 30 Apr 2017), DSWSC has 1810 meters totaling 2400 LUE's, which we consider a population equal to 7,200. At this rate plus taking in the pending projects and contracted projects, population to increase from 11,000 in 2020 to 44,000 in 2070. Dripping Springs WSC obtains a portion of their water supply from WTCPUA, so their numbers are coordinated with WTCPUA. Additional information is provided as supporting documentation. Demand increases reflective of increased population – no base GPCD change.

- d. **West Travis County PUA** - Request decrease to population for 2030-2070. WUG provided overall numbers, including retail and wholesale, by county (Hays and Travis). Dripping Springs WSC requested increases, and is served by WTCPUA as a wholesale customer. Region K coordinated with WTCPUA regarding splits and retail/wholesale. Draft projections for Hays County were too high, so requesting to decrease. Additional information is provided as supporting documentation.

Request that demand projections use 2011 utility-boundary GPCD as base GPCD. Demands have been recalculated based on the decreased population and the revised base GPCD incorporating TWDB-provided water efficiency savings by decade.

See West Travis County PUA under Travis County for similar request.

Requesting sub-WUG to County-Other (Aqua Texas – Rivercrest). Region K has included population and demand projections broken out from County-Other. Also acknowledging that TWDB staff have developed population and demand projections for Rough Hollow in Travis County CRU and Sweetwater CRU, and Region K is not requesting any revisions to those numbers.

Requesting revisions to population for Austin, County-Other, Lakeway MUD, Leander, Manville WSC, Oak Shores Water System, Pflugerville, Sunset Valley, Travis County WCID 17, Travis County WCID Point Venture, Wells Branch MUD, and West Travis County Public Utility Agency.

Requesting revisions to the base GPCD for Austin, Barton Creek West WSC, Barton Creek WSC, Cottonwood Creek MUD 1, Hurst Creek MUD, Jonestown WSC, Lakeway MUD, Leander, Shady Hollow MUD, Sunset Valley, Travis County MUD 10, Travis County MUD 2, Travis County MUD 4, Travis County WCID 10, Travis County WCID 19, Travis County WCID Point Venture, Wells Branch MUD, and West Travis County Public Utility Agency.

- a. **Aqua Texas- Rivercrest** (sub-WUG to County-Other) – Sub-WUG has been broken out of County-Other and we have used historical data to estimate population and demands, assuming buildout conditions. Used water efficiency savings similar to Oak Shores Water System.

- b. **Austin** – Request increases to Austin population projections based on their submitted City Demographer's projections. A majority of those increases is requested for inclusion in the Travis County portion of Austin. A portion of County-Other has been moved under Austin as part of the requested revision, based on those that are retail customers of Austin.

Request that demand projections use 2011 utility-boundary GPCD as base GPCD. Demands have been recalculated based on the increased population and the revised base GPCD incorporating TWDB-provided water efficiency savings by decade.

Austin has submitted a formal revision request to the RWPG. It has been included in this request as supporting documentation. See Austin under Hays County and Williamson County for similar requests.

- I. **Oak Shores Water System** - Request revision to population, based on information provided by WUG and TCEQ Drinking Water Watch database. Buildout should occur in 2030 decade after 55 more homes are built. WUG thought demands are a little low, and should be 150 AF in 2020 and 170 AF in 2030 and beyond. Population and demands revised to reflect request, starting with current population, incorporating TWDB-provided water efficiency savings by decade.

- x. **Travis County WCID Point Venture** – Request to increase population numbers in 2020 and 2030. 2015 TWDB population estimate was 786. Adding close to 50 residents per year = 1,036 population in 2020. Adjusted 2030 population slightly upwards, then no change to draft 2040 – 2070 numbers. Request decrease base GPCD to 228, based on 2015 historical GPCD number, as WUG was comfortable with 2015 population number reported. Demands have been recalculated incorporating revised population and TWDB-provided water efficiency savings by decade.

- y. **Wells Branch MUD** – Request increase to population, based on information submitted by WUG. Current Data: No. of SF residential connections = 2,912, Population = 8,736; No. of apartment units = 4,435, Population = 11,087. Total population = 19,823 between Travis and Williamson Counties. Total Water Consumption for Oct. 2015-Sept. 2016 (gallons) = 450,764,000. Average/Mo. = 37.5 mil gallons. The District is almost completely built-out.

Limited remaining commercial and institutional construction, but very little land available for growth after that. Request to reduce GPCD to reflect revised population based on 2011 historical water use. Population and GPCD modified to reflect request. Also see Williamson County.

- z. **West Travis County PUA** - Request increase to population. WUG provided overall numbers, including retail and wholesale, by county (Hays and Travis). Region K coordinated with WTCPUA regarding splits and retail/wholesale. Draft projections for Travis County were too low, so requesting to increase. Additional information is provided as supporting documentation.

Request that demand projections use 2011 utility-boundary GPCD as base GPCD. Demands have been recalculated based on the increased population and the revised base GPCD incorporating TWDB-provided water efficiency savings by decade.

See West Travis County PUA under Hays County for similar request.

**13. Wharton County** – No population revisions; requesting revision to base GPCD for County-Other

- a. **County-Other, Wharton** – Request that demand projections use 2011 utility-boundary GPCD as base GPCD, to be consistent with Region P request. Demands have been recalculated based on the increased population and the revised base GPCD incorporating TWDB-provided water efficiency savings by decade.

**14. Williamson County** – Requesting population revisions to Austin and County-Other; requesting revisions to base GPCD for Austin and Wells Branch MUD.

- a. **Austin** - Request to increase population. Region K County-Other population in Williamson County is nearly all retail customers of City of Austin. Request to move 97% of County-Other population under Austin. Demands have been recalculated based on the increased population and the revised base GPCD incorporating TWDB-provided water efficiency savings by decade. Also see Travis, Hays counties.
