

TUNNEL WASHER

HIGH THROUGHPUT REPEATABLE WASHES

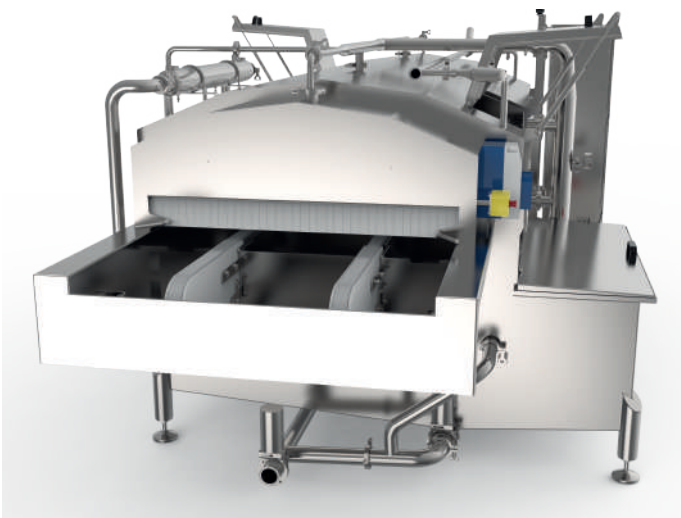

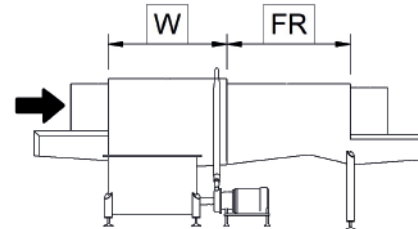

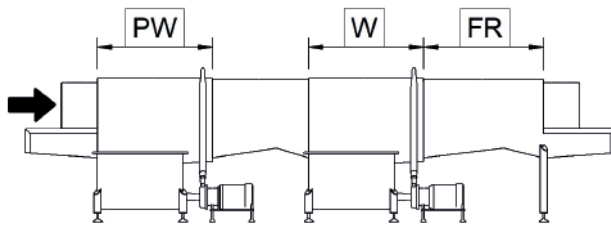

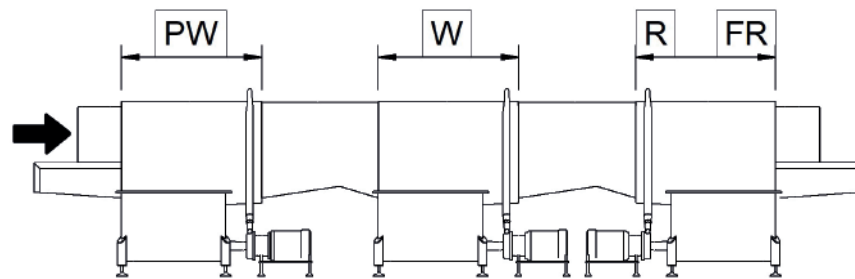

Our classic tunnel washer is specifically designed to accommodate a high volume of trays, molds, block molds, and pans. It boasts the capability to handle up to 1 500 items per hour, all while efficiently reducing chemical usage and wash cycle times. The Interface (HMI) enables quick and convenient adjustments to parameters and settings.

- 3 to 5 adjustable section (Prewash, wash, rinse, disinfection)
- Drying section (optional)
- Reduce chemicals and water usage
- Automated process
- Tubular heat exchanger (water or steam)
- Steam sparger
