Our Vision and Mission

Our Vision: M'Lop Tapang envisions an environment where all children are allowed to grow up in their families feeling safe, healthy and happy; a society where all children are respected and treated equally; a community where all children are given choices about their future.

Our Mission: M'Lop Tapang strives to provide a safe haven for the vulnerable children of Sihanoukville, offering care and support to any child at risk. We offer access to education, reintegration with families, life-skills training, creative and recreational activities, while ensuring protection from all forms of abuse. Our efforts allow underprivileged children to embrace their childhood so they can become responsible adults as well as positive, independent members of society.

Celebrating **M'Lop Tapang's** 20th Anniversary. **Kun** and **Maggie** (Co-Directors) and children with **Long Dimanche**, Deputy Governor of Sihanoukville Province.

Message From our Board

Dear Supporters of M'Lop Tapang,

2023 marked the 20th year of M'Lop Tapang's operations. 2023 was a year of celebration, recognition, and achievement for M'Lop Tapang. Since commencing in 2003, M'Lop Tapang has stayed true to its founding mission of supporting the most vulnerable youth in our community and providing them with the tools, resources, and opportunities to fulfill their potential. Since commencing many thousands of children and their families have benefited from the services provided. As recognition of this fact, our co-founder and Co-director Maggie Eno was recognized by the Cambodian Government and awarded Cambodian Citizenship for her service to the children of Cambodia for over 20 years. The board wholeheartedly congratulates Maggie on this well-deserved achievement.

M'Lop Tapang has been able to consistently achieve the results it sets itself, as a result of the strong partnerships and relationships it creates, nurtures, and values. M'Lop Tapang is a success thanks to these partnerships, such as the citizens and communities of Sihanoukville who value and support M'Lop Tapang's services, in addition, to the Cambodian Government, both local and national who are enabling partners in our service delivery. Finally to our supporters and donors whose partnership and faith and belief in M'Lop Tapang's approach to community development has made all our work possible. To all our partners on behalf of the board, we thank you.

John McGinley
Chairman, M'Lop Tapang Board of Directors

Mr. Martin Reimann

Mr. Yi Moden

In 2023, M'Lop Tapang received Governance & Professional Practices (GPP) recertification from the Cooperation Committee for Cambodia (CCC) for demonstrating Good Governance, Good Resource Management, and Dynamic Program Practices.

GPP certification is voluntary for non-governmental organizations (NGOs) but is a means to demonstrate our commitment to professionalism, accountability, and transparency.

In June 2023, Maggie Eno, M'Lop Tapang's Co-Director and Founding Member, was awarded Khmer citizenship by the Cambodian government for her years of work and effort to improve the lives of vulnerable children and families here in Sihanoukville.

PROGRAM HIGHLIGHTS

M'Lop Tapang continues to provide a holistic range of services to ensure that individualized care meets each child's and family's needs. These service programs are free of charge for the children and families we work with.

Video: [M'Lop Tapang: A Glimpse into our Programs](#)

In 2023, our teams provided services to **6,338** vulnerable children and youths and **4,036** families in the local area.

*Note: all names in the case studies in the following pages have been changed for confidentiality.

OUTREACH & FAMILY STRENGTHENING

M'Lop Tapang's Outreach Team social workers provide support and assistance directly to disadvantaged families in need within the Sihanoukville community. Our approach is always to collaborate with families, aiding them in recognizing challenges to their children's development and working together to find long-term solutions to these issues.

Our social workers provide a variety of family support services, including practical interventions like training, business start-ups, emergency food assistance, psychosocial support, and referrals to other services.

Social workers visit the poorest areas of Sihanoukville.

In 2023:

2,644 children and youths were provided with support services by our Outreach Team. 680 of these were new in 2023.

2,014 families were provided with support services by our Outreach Team. 512 of these were new in 2023.

2,349 emergency food and hygiene packages were provided to vulnerable families.

24 families were assisted with urgent house repairs.

15 families were helped to obtain official birth registration for their children and other government documents.

Working with families to discuss and resolve issues impacting their children's development.

"It was really hard before. Sometimes we had enough to eat, and sometimes we didn't. Our lives are so much better now." – mother of four young children.

30-year-old Sreymom has four children all under 10 years old. Her spouse, the children's father, is currently in prison. This young mother and her children live in a tiny ramshackle house without electricity or running water. Until recently, what little money Sreymom earned was from collecting discarded plastic and metal trash from the riverbanks which she in turn sold to recyclers. When they didn't join their mother in trash scavenging, the children stayed home with the oldest daughter in charge. None of the children had ever attended school.

With the support of M'Lop Tapang's social workers, simple housing repairs have made their home safer, the older children are now attending classes at MT's Education Center and the youngest is in our Baby Care Program. Sreymom has enrolled in one of our vocational training programs to gain employment skills.

FAMILY REINTEGRATION & ALTERNATIVE CARE

M'Lop Tapang strongly believes that the best place for children to grow up is within their own families. This is the reason all the MT teams work so hard to support families.

We also realize that for a variety of reasons, some children are not with their families. Our Transitional Home provides temporary safe shelter for children until a Family Reintegration process can be completed. Foster Care services provide a family-like environment for children unable to be reunited with their immediate families.

A loving family is the best place for a child to grow up.

In 2023:

27 children/youths were provided safe, temporary housing at MT's Transitional Home (TH).

2 new children were placed into our Foster Care program. 13 children who had been placed previously continued to receive follow-up support.

6 children were supported in Kinship Care.

3 children were successfully reintegrated back into their families.

Collaborating with local authorities on family placement assessments.

“In Sihanoukville, I trust M’Lop Tapang very much in providing care and support to children in their Foster Care program, and M’Lop Tapang is the only place here for providing emergency care when children need it.” - Head of Provincial and District Women's and Children's Consultative Committees (WCCC)

When Bopha's mother died shortly after giving birth to her in Sihanoukville's Provincial Hospital, the baby girl was left with no family to care for her. The WCCC contacted M'Lop Tapang to help.

Our Alternative Care team coordinated with the hospital and the Department of Social Affairs, Veterans, and Youth Rehabilitation (DoSVY) to ensure the baby's safety. Bopha resided at MT's Transitional Home for a brief time while we worked on placing her in our Foster Care program.

Bopha's current foster care family adores and cares for her, and they have recently requested legal adoption. Our staff is now working with the family and DoSVY to prepare all the legal documentation required by the courts to proceed with the adoption.

CHILD PROTECTION

Children's rights advocacy, community education, coordination with local authorities, and providing medical, legal, and emotional assistance for victims are the main focuses of M'Lop Tapang's Child Protection services.

In 2023, there was a significant increase in the number of abuse cases handled by our Child Protection team. The number of child victims nearly doubled from the previous year. This increase is due, in part, to improved working relationships with local authorities and a more coordinated referral process.

"Youth Protecting Youth" is the motto of M'Lop Tapang's Kids' Network.

In 2023:

81 child victims of abuse were provided with support.

36 adult victims of abuse were provided with support.

3 youths in conflict with the law received legal support

1,152 children and families received child's rights/protection training.

53 youths actively participated as members of M'Lop Tapang's Kids' Network.

Explaining the court process helps to prepare youth when testifying in court.

"It is so helpful for us to work with M'Lop Tapang in the process of abuse cases. It makes it better for the child and their family." - local police officer

We know that having the active involvement of stakeholders from different sectors and perspectives leads to more effective child protection measures. Our teams put much effort into building relationships with families, police departments, schools, local businesses, and the community in general.

One of the situations our teams worked on in 2023 exemplifies the significance of collaboration to protect children: a local schoolteacher called our team to express her worries. The teacher, who had been previously trained by our Child Protection team on the concept of "Good Touch Bad Touch", had witnessed some inappropriate interactions between another teacher and his female students. Following coordinated investigations with the school and the local police department, the teacher/perpetrator was arrested, tried, and convicted, and is currently serving a two-and-a-half-year sentence in prison.

CHILDSAFE

M'Lop Tapang is very proud to continue being the implementing partner for the [ChildSafe Program](#) for the Sihanoukville area.

Educating and involving the community in the safeguarding of children benefits everyone. Our ChildSafe team proactively reaches out to local schools, neighborhoods, tourists, and local businesses. The team also recruits, trains, certifies, and follows up with individuals who have volunteered to act as community ChildSafe agents.

One of the new tools we use in educating the community is a short video we produced that helps to illustrate the consequences of buying flowers or other trinkets from children on the beaches.

Video: [Think Before You Give!](#)

M'Lop Tapang's Confidential ChildSafe 24-hour Hotline.

In 2023:

263 new community ChildSafe agents were recruited, trained, and certified.

511 children received ChildSafe training.

1,057 children and youths received online safety training

2,228 calls were received on our 24-hour Confidential Hotline

Meeting ChildSafe agents on the beach.

“I became a ChildSafe agent because I wanted to help our society. Now, when I see a child not going to school or a child being neglected, I know to contact M'Lop Tapang's Hotline and report it and they can help.” – Sima, beach vendor and community ChildSafe agent.

Community involvement is crucial in the protection of children. In October, one of our community ChildSafe agents, who is also a local policewoman, called our team. She was concerned about a little six-year-old that she suspected was being sexually abused by the girl's new step-grandfather.

When our Child Protection team met with the little girl and her mother, the girl told our social workers that the perpetrator had threatened to kill her if she said anything. Our team worked together with local government officials and the police department to make sure she received the help she needed. M'Lop Tapang provided counselling, medical care, legal services, transportation to and from the courts, and follow-up support. The offender is currently detained in prison and waiting for trial.

EDUCATION PROGRAMS & SCHOOL REINTEGRATION

M'Lop Tapang's Non-Formal Education (NFE) program assists children and young people from underprivileged families who have never attended school or have missed a lot of school, in catching up on their studies. The goal of the NFE program is to prepare children to successfully reintegrate back into the public school system.

Video: [NFE classes at MT Education Center](#)

The "Back to School program" supports children from low-income families to attend and stay in local public schools.

Every child has the right to education regardless of their financial situations.

In 2023:

651 children attended **Non-formal Education (NFE)** classes at the main Education Center (**261** were new this year)

1,538 children/youths attended local public schools with the support of our "**Back to School**" program (**489** were new this year)

50% of the students in M'Lop Tapang Education Programs are girls.

"I thought my boy would never have the chance to go to school again in his life." – mother of 11-year-old boy.

Born disabled, 11-year-old Bonat uses a wheelchair. He and his impoverished family relocated to Sihanoukville about four years ago while his parents were looking for jobs. Bonat had attended a small government public school in Grade 1 before his family moved to the city. After moving here, his parents sought to enroll him in public school, but none were equipped to accept him.

A local government official who lives near Bonat's family asked M'Lop Tapang for help earlier this year. The young boy is now attending NFE sessions daily at MT's Education Center.

"I am so happy to be here, and I have many friends that I can play with. And the teachers are so nice to me too." - Bonat.

M'Lop Tapang is continuing to make efforts to increase inclusivity, including new ramps and greater facility access for all children and staff. It's great to see that these efforts are paying off.

VOCATIONAL TRAINING PROGRAMS

Vocational training programs offer older youth and young adults a tangible way to improve their lives by providing the opportunity to learn marketable job skills.

M'Lop Tapang's vocational training programs offer supervised hands-on training in the areas of cooking and hospitality, electrics and plumbing, and motorbike repair.

Video: [M'Lop Tapang's Vocational Training Programs](#)

Learning cooking skills at Sandan, M'Lop Tapang's training restaurant.

In 2023:

38 students participated in cooking/hospitality training.

29 students participated in electrics and plumbing training.

46 students participated in motorbike repair training.

Motorbike repair is one of the most popular vocational training programs.

“My family’s life is not easy. Sometimes my mother doesn’t make enough money but now I can help her and the family more. I like my job now; it keeps me busy every day and I can learn new skills. I want to keep learning and saving my money so that I can plan for my future.” - former vocational training student

Like other students in M'Lop Tapang's vocational training programs, Makara comes from a low-income family, had to drop out of school early due to the family's financial situation, and was sporadically working odd jobs as a manual laborer when he could.

When he learned about our vocational training programs he very much wanted to learn about motorcycle and bicycle repair. Makara finished the required course materials covered in the training program in early 2023, and our Futures employment services team arranged for him to complete a three-month internship with a local motor repair shop. During his internship, he was paid a small stipend. Makara's work was so impressive that the owner of the shop where he interned brought him on full-time. He is now earning a steady salary and planning for the future. He wants to open his own repair shop someday.

“FUTURES” EMPLOYMENT SERVICES PROGRAM

The Futures program offers a range of services to help individuals in finding and maintaining safe, suitable employment. Through the program, beneficiaries are provided with assessments of their abilities and needs, social assistance, employment training, and technical help (including work readiness preparation, recommendations on being a good employee, staying in jobs, writing CVs, conducting job searches, interview tactics), and links to respectable businesses.

Meeting with clients

In 2023:

575 individuals were directly assisted in securing safe employment.
o 46% percent of these were women.
o After six months, $\geq 80\%$ of people who were put in jobs were still employed.

821 other individuals were provided with employment-related services (helping with CV preparation, arranging interviews, information about job vacancies, etc.).

Meeting with clients

“It is such a good feeling now to be able to earn some money. Now I can buy some things for myself, and I can help my family too to have a better life.” – 16-year-old Kakada

Due to his family’s economic situation, Kakada dropped out of school when he was just 12 years old. With little education and no formal skills, his prospects for the future were bleak.

When he was referred to ‘Futures’ he expressed a keen interest in learning how to cut hair. Using the network of connections they have in the city, the Futures team was able to set Kakada up with an internship at a local barbershop where he learned many skills: hair cutting and styling, coloring and shaving, and proper hygiene practices.

Within a few months of his internship, the owner of the salon was so happy with Kakada’s work that he offered to give him 50% of the fees from the clients he worked on.

He finished his internship in 4 months and the owner of the barbershop has hired him full time. Depending on the number of clients he has, Kakada earns a monthly wage of about \$300 USD.

MEDICAL CARE

Medical services are provided by our doctors and nurses at M'Lop Tapang's Medical Clinic as well as directly in the community during regularly scheduled medical outreach trips.

The focus of our medical services is on prevention, education, assessment, treatment, and referrals.

Video: [Medical services](#)

Seeing patients in M'Lop Tapang's Medical Clinic

In 2023:

34,310 medical services were delivered to children/youths.

1,914 medical services were delivered to adults/caretakers.

593 dental treatments were provided.

487 children and youths received health/dental education.

Providing free dental care.

"I know he would have died without M'Lop Tapang's help. They even worked at nighttime to make sure he got help." – mother of 7-year-old boy

Our clinic's nurses and doctors are experienced in diagnosing and treating dengue fever. With proper treatment, most dengue fever patients recover. Dengue fever is rarely fatal, but in some cases, particularly if left untreated, it can result in serious life-threatening complications.

When he arrived at our clinic, the doctor swiftly diagnosed 7-year-old Makara with dengue fever. He was very unwell and needing hospitalization. He was quickly sent to Sihanoukville Provincial Hospital for further treatment. Our doctors kept track of him after he was hospitalized. Unfortunately, his condition worsened within days. Our team coordinated with the Provincial Hospital to secure an ambulance to take Makara to a Phnom Penh hospital for treatment. As his family is very poor, we made sure there were no costs to Makara's family.

Before recovering, Makara spent over a week in Phnom Penh. Our medical team monitored his condition after he returned to Sihanoukville. We are glad he recovered and is back studying in our education programs.

NUTRITION SUPPORT

Providing children and youth with nutritious meals.

Video: [Lunchtime at M'Lop Tapang](#)

BABY CARE PROGRAM AT MT'S MAIN CENTER

M'Lop Tapang's Baby Care Program, overseen by our medical team, is available to children under five who have been diagnosed with severe malnutrition and/or neglect. It is hosted in a special area of our Main Center. Children are most commonly referred to the program by social workers from our Outreach and Child Protection teams.

Under the supervision of trained childcare providers, the infants and toddlers in this program benefit from a range of daily activities created to meet their medical, nutritional, and developmental needs.

Video: [M'Lop Tapang's Baby Care Program](#)

Nutritional support is an important part of the program.

In 2023:

29 children benefited from this program (11 girls/18 boys). 11 of these children were new to the program this year.

Play and stimulation for infants and toddlers.

“My baby is so much better now. At Baby Care I can see my baby eats good nutrition and has toys and other babies to play with. He is safe here too.” – street working caregiver.

11-month-old Bopha is one of the newest children to join the Baby Care Program. She is the only child of very young, very low-income parents. Sadly, her mother left the family when Bopha was just 3 months old and since that time the little girl has been raised by her father and paternal grandmother.

When her grandmother first brought her to our Medical Clinic, Bopha displayed gross edema on her face and limbs, a distended abdomen, very sparse hair, and dry skin. She was also very lethargic. These are all classic signs of Kwashiorkor, a severe form of acute malnutrition.

Bopha’s health has improved greatly since being in the Baby Care Program. Her edema and fluid retention have resolved, and she is much more active and playful. Our Outreach Team follows up with the family at their home to reinforce child health care info as well as provide emergency food and hygiene support.

SPORTS PROGRAM

“I never thought I could play football and have a chance to join a team to play against other teams. I enjoy playing so much, it's a lot of fun, and I have more friends.” – 13-year-old girl.

In 2023:

483 children and youths participated in organized sports program activities.

ARTS PROGRAM

M'Lop Tapang provides a range of arts and sports for children and youth in our programs.

“My mother was surprised to see me perform on stage because she never thought I could do that. When I saw many people watching me I felt like I was an actor in a movie. Before I started I felt so nervous but when I got on stage and performed, the nervousness was gone and I felt so proud of myself.” – 14 year old boy

In 2023:

409 children and youths participated in organized arts program activities.

Video: [M'Lop Tapang's Arts Program](#)

Video: [Performance at MT's 20th Anniversary Celebrations](#)

DRUGS & ALCOHOL HARM REDUCTION SERVICES

Drugs and Alcohol Harm Reduction focus on prevention, harm reduction, and relapse prevention services.

The team assists people with substance addiction difficulties by providing support directly in the community, at 'Pteah Romchang' (MT's Rehab and Detox Center), and at the nearby prison. Awareness education is provided in local neighborhoods, through MT programs, as well as in public schools.

Building relationships with community members that struggle with addiction issues.

In 2023:

114 known drug-using youths/caretakers received regular harm reduction services and support.

53 parents/caretakers with alcohol addiction issues received individual and group support.

31 individuals benefited from services through 'Pteah Romchang', MT's 24-hour detox/rehab center.

661 children/youths received drug awareness/education sessions.

622 inmates in the local prison provided relapse prevention support.

50 clients (31 female/19 male) in Keo Pos (government drugs center) were provided with scheduled support.

Providing awareness education to children and youth in the community.

“If Pteah Romchang wasn’t here for me to stay at when I was released from prison, I would be living on the streets again.” – 19-year-old Sophal

Sophal has not had an easy life. Our teams have known him for many years, going back to when he was just a youngster of 10 and hanging around on the streets, sniffing glue, and getting into all sorts of trouble. Both of his parents had passed away by the time he was 14. When he was 17, he was arrested for drug offenses and sentenced to two years in prison.

When he was released from prison in 2023, he opted to enter Pteah Romchang, MT's Drugs and Alcohol Detox and Rehab Center. After successfully completing the program, “Futures”, our employment services program, helped Sophal to secure employment at a local shop. His new job offers a basic salary but importantly, also provides accommodation and meals. Our teams are continuing to follow up with Sophal but for now, he seems to be doing well and loves his new job.

SPECIAL NEEDS PROGRAM

MT's Special Needs Program works with children with learning, social, behavioral, and communication challenges and their families.

Most program activities take place in designated classrooms at our Education Center. For children/youth who due to distance or severe physical challenges cannot attend classes at our Education Center, the Special Needs team members conduct regularly scheduled visits and follow up with them at their homes.

Video: [Overview of M'Lop Tapang's Special Needs Program](#)

Read more: [M'Lop Tapang's Special Needs Program: Parent's Perspective Survey.](#)

Individual teaching in the Special Needs Program.

In 2023:

91 children and youths received services through the Special Needs Program (7 new this year)

Working with children at their homes in the community.

“I used to feel hopeless before. He is my only grandchild. I used to be shy to tell people about him because he is so different from other children. He never talked before and was out of control. After joining M’Lop Tapang, I have more hope now. Now he can even sing a little song with me and is much calmer.” - Grandmother, and primary caregiver, of a student in the program.

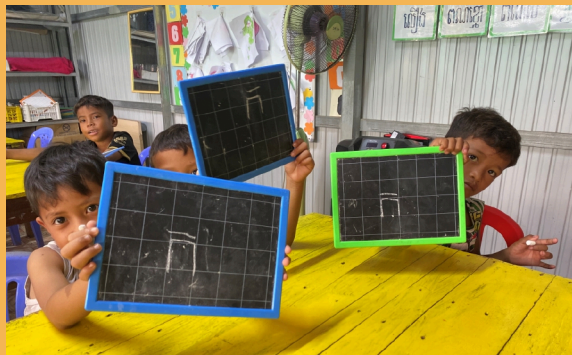

9-year-old Veasna, who has autism, has been attending classes three times a week with M’Lop Tapang’s Special Needs Program for the last two years. One-to-one time with the teachers in the program has helped him to increase his ability to focus as well as make noticeable improvements in his speech. Veasna’s single-parent mother works at a local factory. His grandmother is the main care provider during the daytime. The days that Veasna spends at our center also provide a bit of a break for his grandmother and afford her time to do other things.

COMMUNITY EDUCATION CENTER

Phum Sam Bram (Village 35) is a slum community in Sihanoukville near the deep-sea port and train station. The Community Center provides educational, recreational, and social services to children and families in the surrounding area.

Video: [M'Lop Tapang's Community Education Center](#)

Read more: [M'Lop Tapang's Community Education Center Baby Care Program: Parent's Perspective Survey](#)

Classroom at our Community Center.

In 2023:

154 attended Non-Formal Education (NFE) classes.

115 joined recreational activities.

179 children received nutritional support.

26 infants and toddlers benefited from the Day Care Program.

Providing healthy meals for neighborhood children.

“My little brother and sister and I like to come here because my mother works every day cleaning fish and my father works on a fishing boat, so when I get home from school during the day, no one is there.” – 14-year-old Sinat

14-year-old Sinat lives in the Phum Sam Bram neighborhood with her parents and two younger siblings, a 12-year-old brother and a 7-year-old sister. Like many people in the area, her parents earn a meager living working in the fishing sector. They live in a small, rented house perched precariously over the water by the port.

Sinat is supported by MT's Back to School program to attend classes at a local school, but as she is just in Grade 3, school is only half days. Her younger siblings attend the non-formal education classes at our Community Center every day.

With their parents working, the center provides a safe place for the children to be during the daytime, supervised play and activities, classroom learning opportunities, and a hot nutritious meal daily.

ENVIRONMENTAL RESPONSIBILITY

M'Lop Tapang believes that a clean and healthy environment is crucial to ensuring children's overall well-being and development and is committed to promoting green practices and fostering a culture of environmental responsibility.

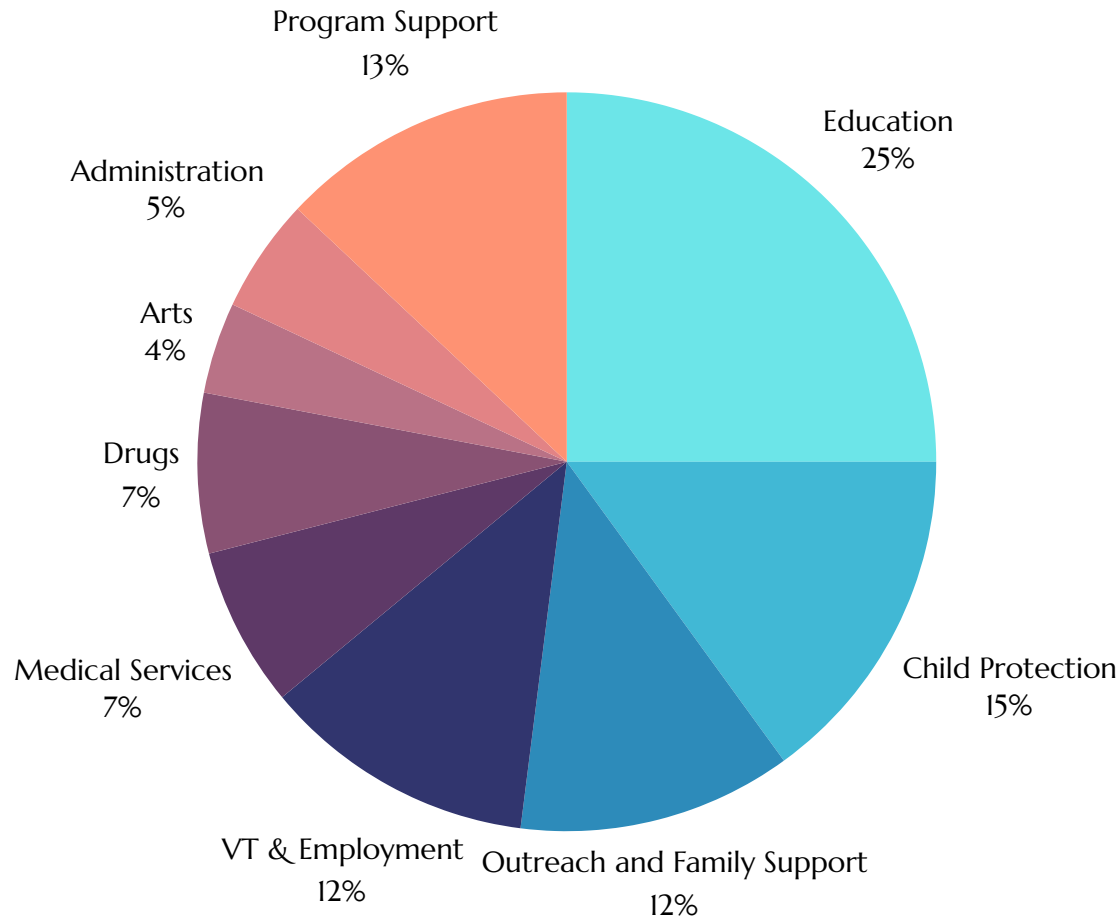

Our teams continue to provide education to the children and families we work with about the importance of taking care of our planet. Color-coded recycling bins at our centers encourage students to put into practice what they have learned, as do neighborhood and beach clean-up days. An updated Green Policy ensures that our staff adheres to best practices. Community awareness is raised through such efforts as our ongoing "Child Rights" series of videos shared on social media.

An exciting new step in 2023 we were able to take, in collaboration with our partner at TONTOTON, has been the introduction of new desks for our classrooms that have been made from recycled ocean-bound single-use plastics.

Video: ["Child Rights News" Series - Environment](#)

FINANCE & EXPENSES

2023 Expenses: **\$2,116,597.59**

An external audit of 2023 finances is scheduled for mid-2024. Official results of that audit will be available on request when completed.

WORKING PARTNERSHIPS & NETWORKS

Our gratitude to the many government agencies and departments that make our work possible, including the Ministry of Interior, the Ministry of Social Affairs, Veterans and Youth Rehabilitation (MoSVY), the Ministry of Health, the Ministry of Labour and Vocational Training, and the Directorate General of Prisons.

At the local level, we would like to thank H.E. Kuoch Chamroeun, the Provincial Governor of Sihanoukville, the Sihanoukville Department of Social Affairs, the Office of Social Affairs, Veterans and Youth Rehabilitation (OSVY), Provincial and District Women's and Children's Consultative Committees (WCCC) and Commune Committees for Women and Children (CCWC).

We would also like to express our appreciation to the many national and international organizations that we partnered with including 3PC (the Partnership Program for the Protection of Children), GHR Foundation partners network in Cambodia, APLE Cambodia, ECPAT International, ISF Cambodia, School of Health and Society at the University of Salford (Salford, UK), and TONTOTON.

WE COULDN'T
HAVE DONE IT
WITHOUT YOUR
SUPPORT.
THANK YOU
