About Our Report

In this report, unless otherwise indicated, “Guess” refers to Guess? Inc., Guess? Canada and/or Guess? Europe (collectively “Guess”). The operations of our subsidiary entities not included in this report are not included here. Please see About Our Report on page 89.
A Message from our CEO, Carlos Alberini

Dear GUESS stakeholder,

I hope this message finds all of you safe and healthy. Over the past 18 months, we all have been tested in ways we could not have imagined in our lifetimes. Along with the COVID-19 health crisis, together we have faced global economic challenges, social justice concerns and political turmoil in many parts of the world.

At GUESS, throughout this difficult time, we have focused on the things we could control and I have been immensely proud of our team and our GUESS family that proudly rose to every challenge and excelled at every turn. Our associates have accomplished the unimaginable, managing the Company well, developing exciting new collections and transforming the business into a more efficient and digital model. During this challenging time, our teams displayed their trademark passion, courage and unwavering commitment to our shared purpose and mission. I want to thank every GUESS associate in our stores, distribution centers, showrooms and headquarters all over the world. It has been inspiring to witness your relentless dedication to our customers, to our Company’s future, to each other and to the communities where we live, work and serve. Your love for our Company and our brand humbles me.

Early in 2020, as we watched the dire COVID situation begin to unfold, it was clear we had to take swift action to protect our Company’s stability and future. This included numerous store closures, painful layoffs, furloughs and progressive pay reductions, to mention a few of the tough actions we needed to take. We are pleased to say that, as we adapted our organization to address the economic realities of the pandemic, we built a stronger foundation for the future.

As the pandemic progressed, our focus remained on our people, customers and communities. We launched #InThisTogether, our campaign to provide hope and inspire people to take meaningful actions during the crisis. Among other outreach activities, we donated funds, clothing and masks in Europe, Asia and the U.S., hosted a blood drive at our Los Angeles campus and launched a campaign to raise awareness about the power blood donations have to save lives.

At GUESS, we believe in justice, equality, and community. Last year, as a result of the increased calls for social and racial justice in the U.S., we directed our Council on Diversity & Inclusion to conduct a business review of how we can better serve our associates and our communities that come from historically marginalized groups. We also issued a statement about solidarity, initiated meaningful relationships with local Black community groups, facilitated donations and declared Juneteenth an annual Company holiday—you can learn more about our efforts in the Diversity and Inclusion section of this report. We believe it is time to build a more loving, respectful, unified world and we are committed to doing our part.

Furthermore, during this challenging year we continued to make solid progress toward our sustainability objectives and we remain fully committed to our three main goals I shared with you in the past:

1. Operating With Integrity,
2. Empowering Our People, and
3. Protecting Our Environment.

While store closures delayed a few of our initiatives, such as expanding RESOURCED, which is our customer recycling program, I am pleased with what we have achieved in other areas. For instance, we developed Science Based Targets for climate action that will lead GUESS to a low-carbon future. We also expanded SMART GUESS, our eco collection offerings, with more denim options meeting our eco guidelines and more opportunities for customers to help us make the world a better place.

The severe impact of the pandemic in the world has only strengthened my belief in conscious capitalism—in which capitalism serves as a powerful force for good that elevates humanity and the environment. In this, our fourth global sustainability report, we highlight some of the key areas we are focusing on, in order to address the needs of all GUESS stakeholders, from our own operations to our supply chain. I am very proud of this approach and of our strong sustainability reporting, which incorporates tested metrics, transparent disclosures, respected standards and external assurance.

This report also marks the completion of our 2016 – 2021 sustainability strategy and introduces our new strategy for the future, VISION GUESS. We drew from our sustainability materiality assessment to develop VISION GUESS, prioritizing critically important topics like diversity and inclusion and deeper partnerships with suppliers on urgent issues such as climate change, sustainable materials and social responsibility in the supply chain. We plan to continue our sustainability journey with ambitious, purpose-driven commitments that focus on actions to address the vital need for change in our industry and the transformation of our business for good. This means investing in sustainable made and lasting fashion, using innovation to protect the environment and driving our continued evolution to a truly sustainable Company with the drive and commitment of our talented teams worldwide.

We have entered a critical decade of action to regenerate environmental resources and address climate change. VISION GUESS provides the roadmap for us to do our part in helping solve some of the world’s most pressing issues. As we look to the future, I am highly confident in our GUESS family. At GUESS, every decision we make and action we take, are with the long term in mind. We are very resilient and adaptable and we are committed to operating our business in a way that ensures this generation can experience this beautiful world as we know it—or better yet, as we dream it. I extend my gratitude to our incredible associates, our valued vendor partners and our licensees, our shareholders, our customers and the communities we serve. We thank you all for sharing this sustainability journey with us and we look forward to keeping you updated on our progress.

Carlos Alberini
Chief Executive Officer and Director, GUESS, Inc.
GUESS was established in 1981 by the Marciano brothers, who left the South of France in pursuit of the American Dream. Inspired by European influence, the Marciano’s redefined denim, quickly growing the company’s jeans and other products into a well-known symbol of a young, sexy, adventurous lifestyle. The GUESS brand, which has been consistent over the years, invites people to dream, and inspires customers to feel confident and passionate about themselves and their future.

Through the decades, the company has built on its strong founding values to expand with new concepts and brands. For instance, the Marciano brand for trendsetting women and men was launched in 2004. The next decade, GUESS launched a series of brands, GUESS Originals, GUESS Jeans U.S.A, and GUESS Vintage, inspired by GUESS’ heritage, but reinterpreted for the younger generation. Most recently, in 2020 GUESS launched GUESS Active, designed for high performance, comfort, and fashionable athleisure style.

Today, GUESS is still located in Southern California—headquartered in Los Angeles—and is a truly global lifestyle brand with a full range of denim, apparel, and accessories offered in approximately 100 countries around the world.

We design and market our apparel under numerous trademarks, including GUESS, GUESS?, GUESS U.S.A, GUESS Jeans, GUESS and Triangle Design, Marciano, Question Mark and Triangle Design, a stylized G and a stylized M, GUESS Kids, Baby GUESS, YES, Co., O by GUESS (GBG), and GUESS by MARCIANO (Guess Americas only).

Our lines include full collections of clothing, including jeans, pants, skirts, dresses, activewear, shorts, blouses, shirts, jackets, knitwear, intimates apparel, and kids apparel. We also distribute a broad range of products that complement our apparel lines, including eyewear, watches, handbags, footwear, outerwear, swimwear, fragrance, jewelry, and other fashion accessories. Products are designed and sourced at the Guess Europe headquarters, or may be designed at our Los Angeles headquarters or by selectively granted manufacturing licensees.

As of January 30, 2021, as reported in its annual financial statement, the company directly operated 1,046 retail stores in the Americas, Europe and Asia. The company’s partners and distributors operated 524 additional retail stores worldwide. Guess?, Inc. is listed on the New York Stock Exchange (NYSE: GES).

In 1981, as now, all of us at GUESS are united by a set of shared values that guide our day-to-day actions and operations.
“After such a difficult year for everyone all around the world, it’s been really important for us at GUESS to inspire hope through our art, our fashion and partnerships. We want our clothes to provoke a sense of celebration. We aim to get people excited not just about the product, but about their own creative expression. Personally, I am really excited about the continued growth of the GUESS Vintage line, as it reflects the GUESS roots of the 1980s and 1990s while nodding to a more sustainable present and circular future. At GUESS, our clothes mean something, and they last for more than just a moment, for multiple generations. GUESS is a family, and I am proud to reflect our core values in our fashion.”

Paul Marciano
Co-Founder and Chief Creative Officer, Guess?, Inc.

“This year we celebrate 40 years at GUESS! As we look back, there is one thing that never changes—it is all about the GUESS family. The world’s most concerning issues—like climate change—concern our family at GUESS, and everyone all around the world. There is no time to waste, and there is no time like the present! That is why we at GUESS are making real change, right now—for our world and our future!”

Nicolai Marciano
Director, Brand Partnerships, Guess?, Inc.

“At GUESS we are responsible for the products we make and place in the global markets. We all know that these products must be more and more sustainable. Our eco SMART GUESS collections continue to grow thanks to the contribution and commitment of all our teams, who have embraced this conscious approach and evolution as a top priority. I am proud of the incredible leap forward we were able to make in such a short time. Our products are increasingly made from recycled, organic and responsibly sourced materials and we are working to continuously raise the standard for what ‘sustainability’ means at GUESS.”

Our Business Model

Brands

GUESS is a global, diversified lifestyle brand. Our brand is sexy, young, and adventurous. It drives fashionable, distinct product designs that underpin our reputation and customer loyalty.

Read more about our brands and stores on page 9

People and Culture

Since our founding, we have been a company that welcomes all, both within our operations and in our supply chain. Today, with an inclusive culture and a commitment to empowering our people, we provide opportunities for about 11,000 associates around the world. From our innovative product designers and developers working behind the scenes, to our dynamic retail store associates—we are committed to making sure their diverse voices are valued, ideas are elevated, and excellence is rewarded.

Read more about Empowering Our People: Pages 38 to 67

Design

Our apparel products are manufactured by a network of contracted suppliers around the world. We retain responsibility for the sourcing and quality control of raw materials used in our apparel products. We mostly engage suppliers through “package purchases,” providing them with clothing designs and raw material specifications. We also review and select supplier offerings as needed to help round out our product portfolio. In some cases, we require suppliers to purchase fabric from preferred mills. Suppliers procure the raw materials, and manufacture and deliver the finished product to our distribution centers.

During this reporting period, we made a number of refinements to our supply chain practices. We consolidated the global vendor count, and streamlined and simplified global operation processes, resulting in greater efficiencies for the business. GUESS Europe distribution centers also earned official certification in sustainability standards such as the Global Recycling Standard, Organic Cotton Standard, and more.

Read more around how we collaborate with our global supply chain partners on social responsibility topics: Pages 60 to 67

Global Sourcing and Supply Chain

A number of distribution centers service our major markets. Our manufacturing supply chain, logistics and distribution channels are built upon long-term supplier relationships that help us achieve efficient and timely delivery of our products.

We use multiple distribution channels including direct-to-consumer, wholesale and licensing arrangements to sell our products, allowing us agility in rapidly changing markets. Our 306,000 square-foot facility in Louisville, Kentucky services our U.S. stores and is owned by Guess?, Inc. We also directly operate a major distribution center in Canada. In addition, we contract third parties to operate distribution warehouses in China, Italy, Poland, South Korea, and The Netherlands.

Logistics and Distribution

Licensees and Joint Ventures*

We selectively expand our product offerings and global markets through trademark licensing arrangements and joint ventures. These international licenses, distribution agreements, and business partnerships allow for the sale of our branded products in major department stores and upscale specialty retail stores, and design and raw material specifications are aligned to those required of suppliers.

Wholesale Distribution

We sell through domestic and international wholesale distribution channels as well as licensee-operated retail stores and concessions.

Direct-to-consumer Channels

Our brand’s direct-to-consumer network is made up of both directly operated bricks and mortar retail stores and e-commerce.

Customers

GUESS customers make us who we are and are at the center of everything we do. This includes creating an enjoyable and seamless shopping experience, whether in store, online, or with our mobile app. And whether their fashion tastes lean sophisticated, trendy, streetwear, or vintage, our customers can choose from designs that provide uncompromising quality and detail backed by exceptional customer service and a commitment to customer safety.

Read more about how we engage with our customers on sustainability on pages 20 to 29

Retail and E-commerce

**Data pertaining to licensees and joint ventures not directly operated by GUESS is not included in the scope of this report**

As a global, diversified fashion company and brand, we operate in fast-moving global markets, serving the style-conscious consumer through the iconic GUESS brand image. But the impact of our value chain is more far-reaching, and we recognize the people who contribute to our business throughout the supply chain, from raw materials to fabric mills to the final product.
Our Sustainability Plan and Progress

Our sustainability approach was formed by considering the interests of our diverse stakeholders, the factors contributing to the sustainable growth of our business, and by several sustainability reporting and disclosure platforms. These include the Global Reporting Initiative (GRI) Standards, as well as the SASB Apparel, Accessories & Footwear Sustainability Accounting Standard and the SASB Multiline and Specialty Retailers & Distributors Sustainability Accounting Standard. The United Nations Sustainable Development Goals (UN SDGs) were also considered in developing our sustainability plan, with SDGs highlighted throughout this report. For details about how this report adheres to the GRI and SASB Standards, please see the Content Index on page 93. Just as these platforms influence our overall sustainability strategy, they also guide our environmental, social, and governance disclosures.

Contributing to the UN SDGs

We are committed to the UN SDGs: 17 ambitious goals developed by the United Nations in 2015 to address the world’s most pressing challenges and build a more sustainable future by 2030. Our 2021 goals have contributed to the SDGs and driven our efforts to empower GUESS and build a more sustainable future by 2030. Our 2021 goals have contributed to 10 of the SDGs that reflect our material sustainability topics.

Our World, Our Brand 2021 Goals

Since we launched our first sustainability strategy in 2016, sustainability at GUESS has continued to evolve, becoming integrated into the core of the business and contributing even more to our collective success. Our sustainability work—Operating With Integrity, Empowering Our People, and Protecting Our Environment throughout our operations and supply chain—creates growth opportunities for our associates, our suppliers, our company, and the communities we serve. This current strategy comes to an end this year, in FY2021, so in this report we will focus on the performance against these commitments, reflect on what we have achieved and set out even greater ambitions for what comes next.

Awards and Recognition

We don’t pursue sustainability performance for the accolades, but we are pleased when our hard work is recognized. The GUESS FY2018 – 2019 Sustainability Report, Evolution! Change for Good, earned the following awards:

Winner
Innovation in Reporting
Corporate Register Reporting Awards 2020

Goal Status

We’ve worked hard to achieve our 2021 goals and are incredibly proud to share the progress we’ve made. Here, we’ve provided a summary snapshot of the status of our Sustainability Plan and the progress made against our goals. More detailed information can be found throughout the report.

In progress: We’ve made good progress against the goal, but still have some work to do to ensure global success**.

Achieved: We have proudly achieved our goal for 2021.

Almost there: We’re nearly there and are on track to achieve in the next 12 months.

Ongoing: We’ve implemented changes but our work here is ongoing as new information or opportunities come into the business (e.g., training, engagement or reviewing policies).

Achieved: We have proudly achieved our goal for 2021.

Our previous goals were to achieve 25% sustainable materials, and would have required the combination of unlike datasets.

*Progress against some of our goals has been delayed due to the pandemic, and where we still have work to do we have reflected this in our new VISION GUESS strategy.

Rooted in our heritage but fueled by a new energy.

We’re creating iconic GUESS fashion with a focus on sustainability — made by a family of empowered people, with minimal waste.

Upholding the same GUESS DNA: this is our world.

But we are dreaming bigger: this is our future.

Introducing VISION GUESS – Our New Sustainability Plan

With even more ambitious commitments and goals, VISION GUESS will move our journey forward over the next decade so that we are a business and brand that integrates sustainability within our operations and value chain, promotes diversity and inclusivity as a value and culture within our global workforce and supply chain and creates fashion that contributes to a climate positive, circular economy.

Throughout this report in Operating With Integrity, Empowering Our People, and Protecting Our Environment, we provide a view into how our current sustainability work will be carried forward under the new strategy, building on the strengths of our achievements over the past five years and creating a brighter future for our stakeholders, our company, and the apparel industry. We anticipate sharing our progress toward VISION GUESS in future sustainability reports.

CLEAR ABOUT REAL CHANGE

We are making real, bold changes in sustainability at GUESS, with a commitment to integrity in how we communicate our progress.

ALIVE WITH DIVERSE VOICES AND IDEAS

We welcome everyone everywhere—diversity makes us GUESS, so we want to ensure every voice, across the globe, has a place in our workforce and our communications.

CONNECTED WITH OUR SUPPLIERS

We are everyone in our supply chain—we are all part of GUESS. We work with our global partners on training and supporting best-in-class practices at all levels.

CREATING WITH SUSTAINABLE MATERIALS

We will continue to use more organic, recycled, and responsibly sourced materials. GUESS is working to ensure that all plastic-based materials are recycled.

OPTIMIZING FASHION WITH MINIMAL WASTE

We are introducing new product designs and ideas around how we make and sell, to be more sustainable and waste less, reimagining fashion.

PART OF THE CLIMATE SOLUTION

We take the climate crisis seriously, and have set ambitious targets to reduce carbon emissions at GUESS and in our supply chain.
### OUR WORLD

**Upholding the same GUESS DNA: this is our world**

From the very beginning, GUESS has been built on a foundation of doing the right thing, doing it in our own unique and creative way, and doing it as a family. This is who we are and this will never change, only improve—because this is how we can make progress for everyone.

Engaging in touch with our stakeholders is second nature at GUESS. Our investors, our suppliers, our industry peers, the communities we serve, the non-governmental organizations we partner with, the media, and government agencies are all valuable external stakeholders.

We consider our customers and associates to be valuable internal stakeholders due to their close interactions with our brands and our company. Across all these important stakeholder groups, we regularly seek their input to better understand what matters most to them and to strengthen our approach.
Customized Communications

All GUESS stakeholders are critical to our business success, but each has a different level of interest when it comes to engaging with us and influencing our sustainability journey. Some prefer regular contact and opportunities to provide their perspectives on issues of importance, whether through surveys, focus groups, interviews, social media, or other direct communications. Others prefer to be kept informed through product communications, sustainability reports, and our website. Within specific stakeholder groups, too, we use different communications platforms to keep in touch. For instance, our core customers are style-conscious consumers in three primary groups—Heritage, Millennials, and Generation Z—and each group engages with us through different media. We engage, collect feedback, and share information with different stakeholders in different ways, making sure we keep up with our stakeholders’ changing perspectives.

Our FY2020 – 2021 engagement platforms for each stakeholder group, along with the topics they raised, are summarized below.

Our FY2020 – 2021 sustainability report provides an update on our progress toward our sustainability goals. The report covers our efforts in areas such as climate change, water stewardship, and waste reduction. It also highlights our commitment to responsible sourcing and our efforts to improve the social and environmental impact of our supply chain. The report is available on our website, and we encourage you to read it to learn more about our sustainability journey.
Sustainability Materiality Assessment

In FY2021, we conducted a sustainability materiality assessment to identify, update, and prioritize sustainability topics, and to guide our approach to the new GUESS sustainability strategy. Stakeholders evaluated and prioritized topics related to the sustainable practices and growth of our business, and offered ideas for increasing our positive impact.

Our Approach

As with our previous sustainability materiality assessments, the process was guided by the Global Reporting Initiative (GRI) Reporting Principles. We also considered the Sustainability Accounting Standards Board (SASB) Conceptual Framework and relevant SASB Standards in identifying topics for inclusion in the assessment. It built upon the previous assessments conducted for our previous three sustainability reports, while introducing seven new topics for our stakeholders to consider. The FY2021 sustainability materiality assessment included desk research of peers, macro trends, sustainability industry standards, and investor sustainability assessments. We also surveyed internal and external stakeholders, with over 900 employees from our three key GUESS regions completing the survey, along with 20 external stakeholders representing licensees and vendors, as well as NGOs and academia. We applied weightings to help balance the results between internal and external voices. A series of interviews with GUESS regional and global leadership provided additional insights and perspectives, and results of the assessment were reviewed by our Chief Executive Officer as well as our Sustainability Steering Committee.

Material Sustainability Topics

This analysis guided the development of VISION GUESS, our new sustainability plan. The sustainability materiality assessment results also identified emerging trends and topics to be considered in the future—and we will continue monitoring to determine where we should take action. The following topics are important to stakeholders and significant to our business, with some changes since the FY2018 – 2019 Sustainability Report:

Priority Topics
- Human rights and labor relations
- Health, safety, and wellbeing
- Diversity, inclusion, and equal opportunities
- Business ethics and responsible marketing
- Supply chain management and transparency
- Management of customer data privacy and security
- Use of sustainable and recycled materials
- Employee engagement and training
- Energy efficiency and greenhouse gas emissions

Significant Topics
- Chemicals management
- Use of packaging and packaging materials
- Waste in manufacturing and operations
- Water stewardship
- Circular products and business models
- Sustainability governance and business integration
- Climate change and risk governance
- Environmental impact of products across their lifecycle
- Biodiversity and wildlife protection

Topics to be Monitored and Managed Internally
- Advocacy, stakeholder engagement, and collaboration
- Community impact and partnerships

Significance of GUESS social, environmental and economic impacts
Continued Evolution in Material Sustainability Topics

The sustainability materiality assessment identified topics that are significant to stakeholders and our business, including some changes since our previous assessment in FY2019. Key changes in the list of significant topics from FY2019 to FY2021 are shown below. Our FY2021 sustainability materiality matrix (see page 22) shows all topics assessed and their relative significance to our stakeholders and our business.

<table>
<thead>
<tr>
<th>Topic</th>
<th>Change</th>
<th>Reason for Change</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business ethics</td>
<td>Changed to “business ethics and responsible marketing” and moved from significant to high priority</td>
<td>Responsible marketing was specifically highlighted by peers and key indices.</td>
</tr>
<tr>
<td>Climate resiliency</td>
<td>Changed to “climate change and risk governance”</td>
<td>Risk and governance in climate resiliency are seen as a key issue, especially by indices.</td>
</tr>
<tr>
<td>Supply chain management and transparency</td>
<td>Added to list of significant sustainability topics</td>
<td>Transparency is elevated across competitors and fashion standards.</td>
</tr>
<tr>
<td>Sustainability governance and business integration</td>
<td>Added to list of significant sustainability topics</td>
<td>We are integrating sustainability (environmental, social, and governance topics) into our business through leadership and governance structures (e.g., incentives and compensation).</td>
</tr>
<tr>
<td>Advocacy, stakeholder engagement and collaboration</td>
<td>Added to list of significant sustainability topics</td>
<td>Advocacy through communications and lobbying, as well as stakeholder engagement and industry collaboration, are common issues raised by peers and standards.</td>
</tr>
<tr>
<td>Waste (e.g., corporate and manufacturing waste, packaging waste)</td>
<td>Split as two separate issues: “waste in manufacturing and operations” and “use of packaging and packaging materials.”</td>
<td>Most competitors make a distinction between these issues, and they take on different importance levels for stakeholders.</td>
</tr>
<tr>
<td>Biodiversity and wildlife conservation</td>
<td>Added to list of significant sustainability topics</td>
<td>This issue is rising in prominence and highlighted by sustainable fashion standards.</td>
</tr>
<tr>
<td>Sourcing sustainable materials (e.g., innovative materials, sustainable agriculture, deforestation, etc.)</td>
<td>Changed to “use of sustainable and recycled materials”</td>
<td>The title of this topic has been renamed to better define the objective. Unless otherwise noted, this name change did not result in a change of definition and therefore did not alter the comparability of data year over year.</td>
</tr>
<tr>
<td>Product circularity and take-back (e.g., product quality, durability, reparability, reuse, recycling)</td>
<td>Changed to “circular products and business models”</td>
<td>Product circularity is a broad concept that starts with product design, but requires new business processes, in addition to “take-back,” to be fully achieved. Changing from take-back to business model reflects this systems-change approach.</td>
</tr>
<tr>
<td>Reducing the environmental impact of products across their lifecycle</td>
<td>Added to list of significant sustainability topics</td>
<td>Having a lifecycle view of environmental impacts of products is strongly valued across frameworks.</td>
</tr>
<tr>
<td>Talent management (e.g., associate engagement, retention, training and professional development, benefits)</td>
<td>Changed to “employee engagement and training”</td>
<td>“Talent management” is a broad category that needs additional specificity.</td>
</tr>
<tr>
<td>Health, safety and wellbeing</td>
<td>Added to list of high priority sustainability topics</td>
<td>Health and safety has been elevated by COVID-19 and is an issue currently under scrutiny.</td>
</tr>
<tr>
<td>Diversity and inclusion</td>
<td>Changed to “diversity, inclusion, and equal opportunities” and moved from significant to high priority</td>
<td>Issues such as no discrimination, equal opportunities, and equal pay gap are trending and receiving increasing prominence.</td>
</tr>
<tr>
<td>Community giving and partnership</td>
<td>Changed to “community impact and partnerships”</td>
<td>This change reflects our shift from an output approach toward an outcome approach.</td>
</tr>
<tr>
<td>Management of customer data privacy and security</td>
<td>Moved from significant to high priority</td>
<td>This change is priority due to the increase of digital transactions over the past 12 months.</td>
</tr>
</tbody>
</table>

Alignment with Enterprise Risk Management

Risks identified through the sustainability materiality assessment are incorporated into the GUESS overall enterprise risk management approach and are subject to internal audit procedures, depending on the level of risk assessed. Our Internal Audit team conducts an annual global risk assessment encompassing all of the organization’s business functions. The global risk assessment considers likelihood and impact as a basis for risk management in addition to inherent risk and residual risk. Results of the risk assessment are communicated to the Board of Directors, Audit Committee, Senior Management, and external financial auditors, and are used to identify areas of the organization that will be audited for the upcoming year.

2019 Significant Topics

Key Actions to Address Concerns

| Human rights and labor relations | — Developed new supplier training |
| — Rolled out new vendor scorecard to evaluate supply chain for social responsibility |
| — Continued worker grievance program in key sourcing country |
| Sourcing sustainable materials | — Continued responsible sourcing policies for commonly used materials |
| — Provided training to product design and development teams in SMART GUESS criteria and certifications |
| — 12% environmentally preferred materials in global portfolio |
| — 15% of cotton sourced as Better Cotton |
| Energy efficiency and GHG emissions | — Met goal of reducing GHG emissions from direct operations by over 15% since our FY2019 baseline |
| — Received approval on our Science-Based Targets (SBTs) by the Science Based Targets Initiative |
| — Initiated roadmap to meet new SBTs by 2020 |
| Talent management | — Increased number of associates participating in training by 50% from FY2020 to FY2021 |
| — Increased number of training topics covered by 96% from FY2020 to FY2021 |
| — Added Training Tuesday, monthly Master Class, and more interactive learning |
| — Provided additional associate resources and engagement to support wellbeing and safety during the pandemic |

2020 Key Actions to Address Concerns

Key Actions to Address Concerns in FY2020 – 2021

| Human rights and labor relations | — Developed new supplier training |
| — Rolled out new vendor scorecard to evaluate supply chain for social responsibility |
| — Continued worker grievance program in key sourcing country |
| Sourcing sustainable materials | — Continued responsible sourcing policies for commonly used materials |

2019 Significant Topics

Key Actions to Address Concerns

| Diversity and inclusion | — Renewed commitment to ensure gender pay parity |
| — Increased female representation on Board of Directors to 33% |
| — Forged new partnerships with organizations strengthening black communities |
| — Launched GUESS Europe Diversity Council, began diversity and inclusion training |
| Product circularity and take-back | — Fulfilled our 2020 commitment to a Circular Fashion System with Global Fashion Agenda |
| — Continued RESOURCED take-back program |
| — Trained denim designers on circularity for GUESS Jeans Redesign project |
| Waste | — Launched corporate recycling program across 90% of headquarter campuses |
| — Increased waste diversion at distribution centers |
| — Improved product packaging to help minimize waste |
| Water stewardship | — Partnered with vendors in developing denim made with water-saving denim technologies to reduce water and chemical use |
| — Continued responsible sourcing policies for commonly used materials |
| — Provided training to product design and development teams in SMART GUESS criteria and certifications |
| — Increased female representation on Board of Directors to 33% |
| — Provided additional associate resources and engagement to support wellbeing and safety during the pandemic |
| Climate resiliency | — Reviewed compensation to ensure gender pay parity |
| — Increased female representation on Board of Directors to 33% |
| — Forged new partnerships with organizations strengthening black communities |
| — Launched GUESS Europe Diversity Council, began diversity and inclusion training |
| Product circularity and take-back | — Fulfilled our 2020 commitment to a Circular Fashion System with Global Fashion Agenda |

2019 Topics to be Monitored, Managed Internally

Key Actions to Address Concerns

| Customer data privacy and security | Continued robust customer data protection and privacy practices, informed by our “secure by design” approach to prioritize data security measures before implementing a new business practice |
| Community giving and partnerships | Supported communities hard hit by the COVID-19 crisis, such as by partnering with organizations to donate funds, clothing, and personal protective equipment, and to host a blood drive and promote blood donation |
Customer Satisfaction and Engagement

GUESS customers make us who we are. From our humble beginnings in 1981, to our current status as an iconic global brand, we have placed our customers at the center of everything we do.

This includes creating an enjoyable and seamless shopping experience, whether in store, online, or with our mobile app. And whether their fashion tastes lean towards sophisticated, trendy, streetwear, or vintage, our customers can choose from designs that provide uncompromising quality and detail backed by exceptional customer service and a commitment to customer safety.

Communicating Product Sustainability

Pocket flashers—the removable tags placed on the back pocket of pants or jeans—provide an easy way for customers to learn about the sustainable features of our eco products. Our SMART GUESS jeans, for instance, include recycled paper pocket flashers that speak to what is special about the fabric, its water saving production methods, use of responsible manmade cellulosic fibers, or other attributes. Some of our clothing also includes sewn-in, embroidered, or printed labeling to identify more sustainable products. For our eco jewelry collections, we include a label on the 100% recycled pouch and insert a Forest Stewardship Council-certified paper card to identify the use of recycled materials in the jewelry itself.

We also continue encouraging customers to make more sustainable choices by bringing us their old clothing for recycling. RESOURCED, our clothing take-back program, is in all U.S. stores, but further expansion choices by bringing us their old clothing for recycling. RESOURCED, our clothing take-back program, is in all U.S. stores, but further expansion was put on hold due to the pandemic. Our GUESS Vintage line also promotes sustainability through product buy-back and resale, allowing customers to support circular fashion while enjoying classic GUESS looks.

GUESS FY2020 – 2021 SUSTAINABILITY REPORT

ENGAGING OUR STAKEHOLDERS

Customer Satisfaction

We use various channels to listen to our customers and tailor our products and services to their needs. GUESS takes customer feedback very seriously, and continues creating more channels for customers to engage with us at their convenience.

GUESS Customer Care

On our website, customers can submit comments through our OpinionLab software, request a call back, or chat with us online. We also solicit feedback with every order confirmation email. Since 2019, the GUESS Customer Care Better Business Bureau rating has held steady at an A+, reflecting the variety and quality of our customer feedback platforms.

GUESS Loyalty Program

Our GUESS List loyalty program uses multiple channels to engage and update customers on the latest events, products and services. We also reward customers with points for purchases in store, online or with our mobile app, making it easier to shop and connect with the brand. In the U.S. and Canada, customers can accumulate points across GUESS brands and spend them at the store of their choice. We perform industry benchmarking and internal audit reviews on this program to ensure that we provide a best-in-class experience for our members.

Sustainable is Sexy

Getting word out to customers about our eco denim collection has included a multifaceted communications campaign, from product labeling and tags to videos, in-store displays and windows, and exclusive giveaways. Events at our European retail stores in six countries invited customers to learn more about our more sustainable denim offerings, receive a GUESS-branded backpack made of recycled paper, and earn the chance to have their favorite pair of old jeans renewed by a GUESS stylist.

Retail and Pop-Up Events

Retail events take place at select stores to showcase product releases, special initiatives, and collaborative partnerships to help create memorable customer experiences. For customers who can’t make it in person, the events are live-streamed worldwide on social media. We also host special pop-up events in unique spaces.

GUESS Mobile App

With the GUESS Mobile App in the U.S., customers can chat with a stylist while shopping, receive personal recommendations based on their likes and dislikes, track orders, become a member of the GUESS List loyalty program, or talk to a Customer Care representative.

Social Media

The GUESS Social Media platforms provide a direct line to our customers; providing a convenient place to connect with the brand, get answers to questions, provide feedback, and be part of the greater GUESS community. It’s also where customers come to get inspired as we share style ideas. During 2020, the GUESS social channels became a community for our followers when community was needed more than ever. Reaching more than 14 million people around the world with relatable content, the core of our focus was providing our followers with more than just fashion during such difficult times. In the past year, we’ve launched four new franchises on our YouTube channel, releasing new videos every week. We also launched a brand new Instagram page solely for the GUESS Originals customer and revamped our TikTok channel, with a new generation of engaged fans in mind.

Eco is the Smart Choice

To raise awareness about our more sustainable eco collections, we launched a multifaceted communications campaign to introduce customers to the eco SMART GUESS denim collection, which uses innovative fibers like LENZING® ECOVERO™, made from certified renewable wood sources in a process that generates up to 50% fewer GHGs and uses less water usage compared to generic viscose. Through a dedicated e-commerce section for SMART GUESS, a digital maker, social media push, press release, editorial publications, internal communications, and other measures, we reached customers with our messages of more sustainable fashion.

ECOVERO™ is a registered trademark of Lenzing AG.

We also continue encouraging customers to make more sustainable choices by bringing us their old clothing for recycling. RESOURCED, our clothing take-back program, is in all U.S. stores, but further expansion was put on hold due to the pandemic. Our GUESS Vintage line also promotes sustainability through product buy-back and resale, allowing customers to support circular fashion while enjoying classic GUESS looks.

**Stakeholder Engagement — What’s Next?**

Continuing to invite feedback, ideas, and concerns from our investors, customers, associates, and many other stakeholders is central to our sustainability journey. As part of VISION GUESS, we are taking our engagement approach a step further. We have committed to regularly engaging our customers and communicating the importance of “care and longevity,” as well as apparel recycling, through our advertising, marketing, and communications. We also aim to annually train our teams on circular and sustainable design to advance and encourage innovations in sustainable product development, which will not only increase their own awareness and engagement, but also give us additional opportunities to promote sustainable fashion choices among our customers. Of course, sustainability in the fashion industry will continue to be a collaborative effort, and we look forward to partnering with peers, suppliers, industry coalitions, and other stakeholders to support our collective progress.

Honesty and integrity are cornerstones of ethical behavior at GUESS—and ethical conduct is foundational to our company. Everywhere we operate, and at all times, we strive to do what is right. Of course, we also work to continuously improve and evolve. This involves regularly monitoring and measuring our performance, collaborating with stakeholders throughout the value chain, and reporting our progress openly and transparently. We recognize that trust and dependability are essential to the lasting, productive, and mutually rewarding relationships we enjoy with our associates, suppliers, and other partners.
Good Governance and Ethics

Commitments – Good governance and ethics

Goals

Strengthen sustainability oversight at Board level

Achieved

FY2020 – 2021 Achievements
Further engaged with the Board of Directors and Nominating and Governance Committee on Environmental, Social, and Governance (ESG) priorities, risks, and opportunities

Sustainable Development Goals
The content in this section supports the United Nations Sustainable Development Goal #16 to promote just, peaceful and inclusive societies. Specifically, we address Target 16.6 to develop effective, accountable and transparent institutions at all levels.

Code of Ethics
Everywhere we operate globally, we conduct our business ethically and with integrity. Every Guess?, Inc. director, officer, and associate is held to our Code of Ethics. And every facet of our business is guided by the Code of Ethics. It guides how we operate both internally and externally with suppliers and business partners, and is used globally with minor regional differences. The Code of Ethics is explained to all new associates upon joining the company and each is expected to read it promptly and begin applying its guidance immediately. By clearly articulating our expectations on topics such as personal responsibility, conflicts of interest, confidentiality, treatment of employees, and many others, the Code of Ethics emphasizes a standard of ethical conduct that must permeate all business dealings and relationships.

Sustainability Governance
Our Sustainability and Corporate Social Responsibility Team works to ensure that environmental and social responsibility is embedded into decision-making processes across the company. This global team is made up of directors and senior managers in the U.S., Europe, and Asia reporting to our Vice President, Internal Audit and Corporate Social Responsibility, who administratively reports to our Chief Executive Officer and directly reports to the Board of Directors’ Audit Committee. This organizational structure—in which the people responsible for internal auditing and sustainability performance tracking report directly to the Board of Directors—provides for additional independence among our auditors and our sustainability team. Our is one of the few sustainability programs reporting into the internal audit function, and we believe it strengthens our approach and the integrity of our data.

The GUESS Sustainability Steering Committee reviews our sustainability plans, identifies priority risks and opportunities, and monitors progress against our commitments and goals. The Committee, which meets one to two times each year, and additionally as needed, is led by our Chief Executive Officer, is joined by our Chief Financial Officer and our global Executive leadership, and includes Corporate Social Responsibility, Product Development, Supply Chain, Finance, Retail and E-Commerce, Logistics, Internal Audit, Inventory, Human Resources, Legal, and Advertising. Committee members are responsible for integrating sustainability into the operations of their respective departments.

In addition, regional sustainability committees support implementation of our sustainability strategy and goals at the local level. For more information on our management approach to various sustainability topics, please visit sustainability.guess.com.

Conscious Capitalism is a way of doing business that reflects where we are in the human journey, the state of the world, and the potential for business to make a positive impact. Conscious leadership reflects service to the company’s purpose, the people the business touches, and the planet we all share:

It is our purpose at GUESS to inspire our customers to feel confident and passionate about their style and their future... At GUESS, we dare to dream!

We believe that conscious businesses will help evolve our world so people can prosper, creativity can flourish, and all of us can enjoy greater harmony.

Governance and Ethics — What’s Next?
During our previous sustainability reporting period, we strengthened sustainability oversight at the Board of Directors level. To further demonstrate our commitment to sustainability as well as diversity and inclusion, we have committed to incorporating such ESG priorities into GUESS our company’s annual review and compensation structure.
Transparency and Verification

Commitments

– Transparency and verification

Goals

Obtain third-party assurance of non-financial data to increase stakeholder confidence in our reporting

Achieved

FY2020 – 2021 Achievements

Rigorous internal auditing program developed and applied for our sustainability metrics and performance data

Obtained external assurance for our FY2016 – 2017, FY2018 – 2019, and FY2020 – 2021 sustainability reports and our greenhouse gas (GHG) inventory reported to CDP annually

Complete, accurate, and balanced sustainability reporting is a fundamental commitment at GUESS. Each year, we engage a third party to review our greenhouse gas inventory, which is included in our sustainability report and other related reporting avenues, such as CDP. In addition, we have engaged KPMG LLP, beginning with our first sustainability report for calendar year 2015, to perform assurance procedures. FY2020 and 2021 marks the first time we have obtained reasonable assurance indicating that our report was prepared in accordance with GRI and SASB Standards. This is an even more rigorous review than the limited assurance we accomplished for our past three sustainability reports. Please see our Independent Accountants’ Report on page 91 and our Content Index on pages 1 for more information.

We strive to be an industry leader in transparency through our continued membership of the Global Reporting Initiative’s GOLD Community our membership on the SASB Advisory Group for the Consumer Sector, and our commitment to achieving third party assurance for sustainability reporting. GUESS is the first fashion company to subject its sustainability report to reasonable assurance procedures to help ensure the accuracy and integrity of this report.

GUESS Sustainability Assurance Framework

In keeping with our commitment to continuous improvement and transparency in reporting, in 2020 we undertook a significant internal auditing process that provides more robust sustainability reporting and even greater confidence in our performance data. This practice, which is recommended by Global Reporting Initiative (GRI) Standards to enhance overall report integrity and credibility, now underpins our reporting. Our rigorous auditing and testing approach enables us to continue providing GUESS stakeholders with verified, quantified, and reliable assessments of our sustainability performance that they can trust.

Our first step was to create a comprehensive internal sustainability reporting framework, the GUESS Sustainability Assurance Framework, that identified all the key performance indicators (KPIs) needed to provide a complete accounting of our sustainability performance. We also took this opportunity to link internal GUESS KPIs with disclosures and metrics in the GRI Standards and industry relevant standards developed by the Sustainability Accounting Standards Board (SASB): Apparel, Accessories & Footwear Sustainability Accounting Standard, and the Multiline and Specialty Retailers & Distributors Sustainability Accounting Standard.

A team of internal sustainability specialists and internal auditing experts collaborated on the framework to make sure it includes the most relevant and holistic metrics and indicators. This approach leveraged the knowledge and expertise of our sustainability team and that of our internal auditors, while also drawing from well-established internal auditing methodologies. The resulting framework includes nearly 100 indicators, disclosures, and metrics that are disclosed throughout this report.
Next, we conducted internal testing of the sustainability KPIs and other disclosures to verify them before including the data in our sustainability report and obtaining third-party assurance. Sustainability team members calculated the KPIs, and the internal auditing team tested the KPIs to verify that all KPIs are complete, correctly obtained, thorough, accurate, and include the relevant supporting documentation to confirm the calculations. For some KPIs, such as those related to product composition and certifications, as well as supplier monitoring, we went a step further, verifying in detail the database used to record our vendor monitoring, and conducting additional tests on a randomly selected sample of the information in the database, in line with the auditing best practices.

Any identified discrepancy was shared with the team member who calculated the KPI for clarification or correction. All testing was documented and provided to KPMG, our external assurance provider, for their examination of the FY2020 – 2021 sustainability report. This is our first report for which the metrics and disclosures have been thoroughly tested using our new internal framework and for which we have obtained reasonable assurance from KPMG, our external assurance providers.

We look forward to using this internal and external auditing process for other sustainability reports in the coming years.

In addition, we hope to share our knowledge with peers and encourage its adoption as a best practice for sustainability reporting. Already, as a result of key findings identified during this project, we were able to significantly contribute to SASB’s review on the sustainable materials disclosure for our industry. We are proud that our work will contribute to improved environmental, social, and governance data quality for the apparel industry and beyond.

Security and Safety
Protecting our customers’ personal and financial data, as well as their health, is of critical importance to GUESS. We maintain strong data security processes and infrastructure, as well as ensuring health and safety checks of our products.

Secure by Design – Our Approach to Data Protection and Privacy
Over the past 3 to 4 years, the global focus on cybersecurity and data protection has increased dramatically, as companies find additional ways to safeguard digital data. Globally, we have upgraded to the Palo Alto firewall in addition to upgrading cybersecurity tools to protect and secure customer data and information.

Across our operations, our security systems are data-centric, with security protocol, policies, and infrastructure in place to address the multiple channels where data now exists. This means addressing potential security challenges and regulations so we are ready with the right security measures. And while we update our data security rules, policies, and technology when we anticipate a need for increased measures, our underlying philosophy and commitment have not changed: prioritizing the protection of customer and company data. Our GUESS Security Policies are always subject to review and modifications to ensure alignment with best practice.

For every global region where we operate, we also stay abreast of relevant regional regulation, such as the EU General Data Protection Regulation (GDPR) and California Consumer Protection Act (CCPA). Going forward, we will continue to closely monitor emerging cybersecurity risks, available security technologies, and legislation to ensure the customer, associate, and company data handled by GUESS remains safe and protected.

Product Compliance, Communication and Safety
As part of our quality control program, it is our policy to conduct quality, health and safety inspections for all product styles throughout the supply chain: from raw materials and prototype testing to contractor manufacturing and distribution centers. We also perform random, in-line quality control checks during and after production, as well as before distribution. This strict protocol not only maintains the quality and reputation of our products, but ensures the safety and satisfaction of our customers.

For more about safer chemicals in our supply chain, see Protecting Our Environment.

In addition to robust quality checks, we also take great care to ensure compliance with marketing regulations in every region in which we operate. In North America, while we have not experienced any formal incidents by local body enforcement, on occasion a product may have potential issues related to specific state requirements. If there is any question related to compliance, we err on the side of caution and immediately recall the product as needed.
Since our founding, we have been a company that welcomes all, both within our own operations and in our supply chain. Today, with an inclusive culture and a commitment to Empowering Our People, we provide opportunities for about 11,000 associates around the world. From our innovative product designers and developers working behind the scenes to our dynamic retail store associates—and everyone in between—we are committed to making sure their diverse voices are valued, ideas are elevated, and excellence is rewarded.

But GUESS is more than our direct workforce. We’re also the people who contribute to our business throughout the supply chain, from raw materials to fabric mills to the final product. We value the work they do and recognize that, together, each and every one of us plays an important role in our shared success. To that end, we collaborate with our global supply chain partners to help them maintain the best labor practices and inspire the positive changes that will move fashion forward.

practices for diversity

Launched Diversity
and Inclusion Council
in Europe in late
2019 (FY2020)
However, implementation plans to
launch in Guess Asia were delayed
due to the pandemic

Sustainable Development Goals
The content in this section supports United Nations Sustainable Development Goal #5 to achieve gender equality and empower all women and girls. The specific target addressed is 5.5, which aims to ensure full participation in leadership and decision-making. We are working to develop equity and opportunities for women in leadership within our supply chain.

The content in this section also supports United Nations Sustainable Development Goal #8, which aims to promote inclusive and sustainable economic growth, employment, and decent work. Specifically, we address Target 8.5 to achieve full employment and decent work for all women and men, including for young people and persons with disabilities, and equal pay for work of equal value.
Increasing Our Focus on Ethnic Diversity

We added specificity to our ethnicity tracking beginning in FY2020 to reflect the continued importance of diversity and inclusion and its value to our organization. And, we believe that publicly sharing this data is an important piece of our overall efforts to maintain diversity and inclusion and improve diverse representation in a few key areas. For instance, while our global organization is quite diverse, we have opportunities to increase the number of Black and Indigenous executive leaders. We will continue to refine our diversity and inclusion metrics as needed to make sure they remain meaningful as we work to foster an inclusive workplace where all GUESS associates thrive. The right metrics can help us prioritize actions, assign accountability, and measure the impact of various initiatives.

We are also leveraging external events such as Black History Month, to continue engaging all associates in the celebration of our diverse organization. For instance, in early 2021, we issued daily communications featuring Black leaders and innovators, and launched a video for The World Stage, a Los Angeles-based non-profit that celebrates and preserves African American music and art. In addition, we’ve continued more direct outreach with organizations that support Black community members, and cultivated closer relationships with organizations that specialize in recruiting Black employees.

Our longstanding commitment to diversity and inclusion comes to life each day as we work together to maintain a fair and inclusive workplace.

Our aim is for all GUESS associates to feel comfortable and safe bringing their authentic selves to work and contributing fully to our shared success.

Building on the example set by the Marciano brothers and their belief that a diverse organization is a strong and creative one, we have embedded diversity and inclusion principles and practices throughout the company. Over nearly 40 years, this has created a rich, vibrant culture that respects—and benefits from—different personal attributes, backgrounds, ideas, and perspectives. Today, diversity is a key facet of our company-wide culture, informing our values, recruiting, talent development, and associate advancement, among other operations.

Addressing Racial Justice & Disparity

When calls for racial and social justice intensified in the wake of the killings of George Floyd and others in the U.S. in 2020, the Diversity & Inclusion Council guided the company in taking several steps. GUESS issued a social media community response in solidarity with the Black Lives Matter movement. We also coordinated with the GUESS Foundation to donate to 91 national and local Black community groups, such as the NAACP, the Unequa, Center, and The World Stage—with a pledge to donate 1 million over the next 5 years. The Unequa Center is a multi-use, organizing, meeting, and event space, and The World Stage is an educational and performance art space, both located in Leimert Park Village, the heart of Los Angeles’ Black cultural community. As part of its Community Advocacy series on the GUESS YouTube channel, we also produced a video for The World Stage, highlighting its history and unique story as racefully inclusive jazz club in Los Angeles. We conducted a business review, analyzing how we can implement more rigorous practices for inclusion throughout the business. In 2020 we communicated to employees and our social media community regarding the significance of Juneteenth, employees and our social media community response in solidarity with the Black Lives Matter movement. We also coordinated with the GUESS Foundation to donate 250,000 to organizations striving for racial justice.

We also coordinated with the GUESS Foundation to donate 250,000 to organizations striving for racial justice.

Gender Parity in Pay

Our sustainability materiality assessment identified diversity and inclusion as a priority topic, and during this reporting period we have tracked a new metric: the ratio of female pay to that of male pay (for Guess U.S. only). For our corporate and retail locations in FY2021, we were pleased to see that we achieved gender parity. We will continue to monitor gender parity at all locations, particularly the distribution center, as part of our commitment to equal pay for equal work.

Guess U.S. has reported its wage data by gender in alignment with other human resources disclosure for this global region. Our corporate category includes corporate associates working at our global headquarters in Los Angeles and our showroom in New York. Our distribution center category includes those working at our distribution center in Louisville, Kentucky, and our retail category spans all retail across the United States.

* Defined by the United Nations as ratios between 97% – 103%.

Cultivating Diversity, Equity, and Belonging through Focused Councils

In part because we have always valued diversity as a core, defining characteristic of our company, we did not formalize our diversity and inclusion efforts under a single group or committee until recently. Prompted by our sustainability commitment on this topic, in 2018 we launched our corporate Diversity & Inclusion Council, and evolved further in 2019 (our FY2020) with the launch of our Guess Europe Diversity & Inclusion Council. Both of these groups are becoming integrated throughout our business, where they help foster a workplace in which employees enjoy a sense of community, belonging, and opportunity for dialogue. The work of the councils also supports our company-wide commitment to the principles of Conscious Capitalism, provides an additional level of coordination and structure in our diversity and inclusion practices, and enhances our focus on diversity and inclusion at the highest levels, including presentations to the Guess, Inc. Board of Directors. For more on Conscious Capitalism, see Operating With Integrity.

With the help of the two councils, our diversity and inclusion efforts focus on inclusive leadership, employee training, and a work environment that promotes growth and opportunity for all. Initiatives include training for associates and managers, community support through GUESS Foundation and GUESS Cares, greater diversity in advertising and marketing, training and compliance programs in our supply chain, and celebrations of multicultural and inclusive holidays or other days of observance. For example, in FY2021, Guess U.S. participated in the United Nations International Day for the Elimination of Violence against Women. We developed a video and distributed a newsletter to associates, offering concrete ways to get involved in ending domestic violence, with helpline information for anyone needing immediate assistance.

The Guess Europe Diversity & Inclusion Council has completed a valuable set of planning and research exercises to develop its overall strategy and goals in preparation for launching specific initiatives to support employee engagement, implementation of the Conscious Capitalism principles, and others. Among these planning activities was a review of the different diversity and inclusion rules and cultures in various countries across Europe, as well as a compilation of the many internal initiatives already underway in our many European locations. Understanding this baseline and adopting a careful and thorough approach to our strategy will be key to developing a consistent identity across all of our geographic locations in Europe and paving the way for success in future diversity and inclusion activities. Key areas of focus will include potential updates to policies and marketing, as well as associate interviewing and onboarding, performance appraisals and benefits, growth opportunities, and satisfaction.

Exploring the World of GUESS through Food and Culture

This monthly partnership between GUESS Cares and GUESS Café at our Los Angeles headquarters celebrates cuisines from around the world that reflect our diverse group of associates. The popular “culture tastings” have featured cuisines from China, Greece, and Spain, as well as holiday dishes from traditions around the world so participants can interact with the global influences of their peers. The World of GUESS Food and Culture program was suspended due to the pandemic, but will return when it is once again safe for associates to work at our Los Angeles campus.

*Temporary* refers to seasonal workers and interns hired for specified amount of time. *Full* Time refers to associates that work a full week using country-specific definitions of full-time or full-time equivalent.
Reflecting Our Diverse Customers

We recognize that our customers are diverse, representing more than 100 countries, many cultures, and at least three generations. But while we work with diverse celebrities of different ethnic backgrounds, shapes, sizes, and ages; feature diverse models online; offer diverse brands and collections; and engage in diverse partnerships, we also have identified opportunities for improvement, such as minority representation in major advertising campaigns. Addressing this and other challenges guides our diversity and inclusion aspirations for the future.

Diversity and Inclusion — What’s Next?

With our Diversity & Inclusion Councils now well-established, we can focus even more closely on areas where we can continue strengthening our approach. For instance, Guess Europe is considering a program of diversity and inclusion ambassadors to further enhance employee engagement. In the U.S., we are developing additional training for leadership. Additional aspirations are detailed in VISION GUESS:

Connect diversity and inclusion results with annual review and compensation

Deliver 100% employee and inclusion training and accountability, starting from the top

Expand Diversity & Inclusion Councils and action plans to expand to key business partners

Work toward gender parity and increase ethnic diversity in executive leadership positions (VP+) to reflect the communities we serve

Detailed plans to address these are being developed, and we anticipate sharing their progress in future sustainability reports.
Attracting, Developing and Retaining Top Talent

Sustainable Development Goals

The content in this section supports the United Nations Sustainable Development Goal #3, which aims to ensure healthy lives and promote wellbeing. Specifically, we address Target 3.3 to fight communicable diseases (i.e., COVID-19) and Target 3.4, which in part focuses on promoting mental health.

Around the world, all of us at GUESS work in keeping with our values, which include belief, hope, and destiny, among others. These values also guide our approach to attracting, developing, and retaining our talented team members. GUESS associates are empowered to drive their careers, with the company providing resources, training, and opportunities to advance and build a rewarding career within the GUESS community. We also maintain an early career development and associate recognition program to build early career engagement and success. In addition, our competitive benefits offerings help us attract and retain the best talent.

Reaching Out to Talented, Diverse Students

Our quest for top talent begins at schools. In 2020, Guess U.S. joined forces with Gyr! Wonder, which fosters a professional pipeline for the next generation of Black female leaders. This partnership will give promising students the chance to explore career opportunities at Guess U.S. We are also expanding our collaborations with historically black colleges and universities for outreach to black students and invite them to participate in programs like our summer internship program. The Guess U.S. internship program is a 10-week, full-time experience at our Los Angeles headquarters. It was scaled back in 2020 due to the pandemic, but we look forward to expanding the program as soon as it is safe to do so. These internships offer undergraduate students a first-hand look at the world of fashion, along with opportunities to build experience and develop marketable skills. Interns work closely with mentors at our headquarters offices and also participate in educational and social activities such as focus groups, discussion panels field trips, and workshops. The program has led to job offers at Guess U.S. for a number of participants.

Leading Benefits

Our benefits package represents a wide range of services and offerings that play an important role in attracting and retaining talent, supporting associate health and wellbeing, and increasing satisfaction. Benefits vary by country, of course, but in the U.S. we offer a variety of benefits to both full-time and eligible part-time associates. These include medical, dental, and vision coverage; flexible spending accounts; retirement savings plans; and in some cases, bonus and associate stock purchasing plans. We also offer life and accident insurance, disability coverage and associate assistance programs. In Canada, Europe and China, benefits are country- or province-specific and include health care, life and disability insurance, and critical Illness coverage, among others. In Korea, benefits include coverage of medical check-ups, NP (National Pension), EI (Employment Insurance), Workers’ Compensation Insurance, and a retirement gratuity system.

Promoting Wellbeing

The Guess U.S incentive-based wellness program has helped associates achieve their personal wellness goals through a variety of on and offline opportunities for a healthy lifestyle. Associates can earn points for health-related activities like gym visits, nutrition seminars, meditation classes, and biometric screenings. We also make it more convenient for associates to participate in physical activities through our dedicated walking groups, gym at our headquarters campus, and classes like cycling and yoga.

Supporting Our Associates During the Pandemic

To help associates cope with the many challenges of the pandemic, and to keep our associates safe, we implemented a host of new health and wellness measures. Guess?, Inc. created a global Covid Emergency Response Committee to prepare for the pandemic, including making work from home arrangements as well as creating a central repository for health and safety resources and information. Our Health & Safety Hotline and email address—created to help associates through the pandemic—answered questions and provided customized, one-on-one advice. The hotline stayed busy advising associates on staying safe, answering questions about COVID symptoms, and helping associates take appropriate measures after possible exposures. Available 24/7, the hotline became a critical resource for communicating with our associates.

Early in 2020, we also began a twice-weekly series of health and safety emails covering topics like proper handwashing, mask reminders, social distancing, and how to safely care for sick family members, as well as practical tips on working from home, setting up a computer, and establishing a daily routine. These communications later expanded to daily emails about mental health, overall wellness, self-care, and related topics. We included daily positive messages and links to interesting articles or talks, as a way to help associates stay in touch with the company, with their colleagues, and with positive news. At our largest, directly operated distribution center in Kentucky, where work resumed throughout the pandemic, we also enacted strict health and safety measures and introduced staggered scheduling. While we experienced higher than normal absentee rates in FY2021, no cases of COVID contracted at the office were identified.
Associate Training and Development

Sustainable Development Goals
The content in this section supports the United Nations Sustainable Development Goal #4 to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all. Specifically, we address target 4.4 in the various ways we help develop and enhance skills training for employment.

Throughout our organization, we are committed to providing training and development opportunities at multiple levels, meeting the learning needs of associates along their career journeys. An array of leadership and training opportunities—including instructor-led virtual and classroom courses, app-based e-learning, and external seminars—support various career stages. Our flexible learning management system also enables virtual and software-led training, which has allowed us to continue providing training safely during the pandemic. For younger generations of employees, we have begun offering micro-learning, or short snippets of information that associates can connect with quickly, reinforced generations of employees, we have begun offering micro-learning, or short snippets of information that associates can connect with quickly, reinforced.

From the earliest years of their career to retirement, GUESS associates benefit from a wide variety of training to support development. Each GUESS region customizes its training for their associates and their operations, all designed to give our associates the resources and skills they need to advance and achieve their career goals. For example, GUESS offers training on IT policy and security globally, as well as language classes (Rosetta Stone classes in various languages are available for Guess US associates, while Guess Europe focuses on English Language specifically). Some of our training programs include:

Corporate Training

- The Management Development Program provides essential leadership skills, including communication, coaching, conflict resolution and team building. During FY2020 – 2021, 45 U.S. managers participated in the six-month development program.

- Training Tuesday, a new initiative by Guess U.S., grew out of our various efforts to keep employees engaged, healthy, and productive during the pandemic in 2020. The Training Tuesday series offered a wide range of short courses designed to help us all stay connected during the pandemic and bridge the physical distance for those working remotely. Programs include short courses on goal setting, emotional intelligence, giving effective feedback, resilience and other timely topics.

- Train The Trainer (TTT) is a program for selected employees in Guess Europe to receive a comprehensive training on specific topics such as communication skills, leadership skills, conflict management and emotional intelligence, and is combined with curriculum on becoming an effective trainer. After this TTT training, the employees are then tasked to teach their new area of specialty, in coordination with the central training team, to a larger audience of corporate employees.

Retail Training

- The District Training Manager Program (US & Canada) / Store Manager Training Program (Guess Europe) recognizes store managers with a passion for training and the ability to deliver exceptional results in-store. These managers receive continuous development in leadership to support their role of onboarding and training new managers in their districts.

- The Future Leaders Program aims to develop high-potential sales associates in the U.S. for succession into management. The program draws from the existing strengths among the store team to encourage internal promotions, and ultimately improve the customer retail experience. In FY2020 – 2021, 30.4% of those who participated in the Future Leader Program were promoted as a result of this program.

Increasing Training Opportunities

</tbody>
</table>

*The number of available courses shows a decrease because we hosted fewer individual sessions when trainers could not travel to conduct sessions during COVID lockdowns. Nonetheless, we were able to reach more people with virtual training during 2020.

Field Training

- The Master Class, a monthly program, was launched in 2020. This popular series covered loyalty, loss prevention, customer experience, and other topics of interest to our employees in the field. Masterclass training topics were reinforced through monthly managers’ meetings to turn concepts into actions in each store.

- Interactive Mobile E-learnings—Through the Hub, a mobile communications and information sharing platform, we launched many interactive e-learning opportunities in 2020. The app provides content, tests knowledge, tracks usage, allows associates to comment on each other’s posts, increases engagement by assigning badges, and provides other interactivity, which was valuable during the pandemic.

Talent Development — What’s Next?
Future GUESS talent development initiatives include enhancing the learning management system to make it more engaging and interactive. This could also include more video, as well as gamification options, badgeing, and other interactive features. We also hope to offer more “pull content”—available to associates when and where they choose to access—through a library of education opportunities. In addition, we plan to provide more video content for retail store associates.

Eventually, our learning opportunities will be packaged into the GUESS University program, which will provide associates with even more convenience in finding the right education programs for their career interests, while also delivering more robust data about our training progress.
Engaging and Educating on Sustainability

Commitments

- Increase learning opportunities for associates
- Volunteer and invest in our communities
- Engage customers on sustainability

Goals

100% of product teams educated on sustainability and designing for circularity

100% of North America stores engaged on sustainability

FY2020 – 2021 Achievements

Developed video-based sustainable products training for store associates

Created a weekly and monthly training series and virtual and interactive e-learning opportunities during the pandemic

Over 75 retail store associates in Guess US and Canada participated in the Green Ambassador education program

Over 150 corporate associates in design, development and production were educated on sustainable design, materials and sourcing

Sustainable Development Goals

The content in this section also supports the United Nations Sustainable Development Goal #4, which aims to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all. Specifically, we address large 4.4 to develop skill transfer for employment.

Note: Because many of our training programs included in-person, instructor-led sessions and store associates complete their training in the stores, the 2020 pandemic delayed our progress on this goal. We shifted content to virtual platforms, but still were not able to deliver as much training as planned. The in-store Green Ambassador program was launched in 2019, but put on hold during 2020 due to temporary store closures and community lockdowns.
Sustainability Education and Engagement

For many GUESS customers, our store associates are a valued source of information about our products, including the sustainability features of our collections. That’s why we are working to make sure in-store team members have the latest information about the materials and production processes that go into our SMART GUESS and other more sustainable clothing and accessories.

Sharing Knowledge About Our Sustainable Products

A series of interactive training modules and videos developed by our product development and training experts for store associates in 2019 cover topics like eco-denim. The videos are part of the onboarding process for store associates, who must achieve a 100% pass rate and verify their sustainable product knowledge. The learning continues with about three product knowledge videos per GUESS brand each month, featuring GUESS buyers and designers. Although video development was halted during the 2020 pandemic, it resumed in 2021 and the videos remain available for store associates to become familiar with our work on product sustainability.

Sustainability Education and Engagement

Since 2016, GUESS has supported sustainability education at the Fashion Institute for Design and Merchandising (FIDM) near our global headquarters in Los Angeles. Through the partnerships office, GUESS sponsors courses on sustainability and fashion at no cost to the students—who are selected to participate based on a competitive application process. Over the years, GUESS has sponsored over 8 classes for over 100 students, covering topics such as zero waste pattern making, innovative materials, responsible denim production, and lifecycle assessment.

During FY2020 – 2021, Guess U.S. sponsored two classes directly related to the GUESS commitment to circular fashion. In 2020, FIDM developed the first GUESS prototype for our partnership with Jeans Redesign (see page 76 for more), helping to share their key learnings and understanding with our teams, and are now completing the same type of project for non-denim. At the end of each course, students present their findings, and often create a fashion show, in a shared learning experience between the students, corporate associates and leadership.

Additional product knowledge training covers more in-depth discussions of GUESS sustainability goals and requirements, SMART GUESS initiatives, evaluating new material for sustainability, organic cotton, bio-based fibers, traceability, chain of custody, and sustainable material certification. These modules are designed for product development teams in the U.S. and Europe, so they can incorporate the information into all stages of product design, from research and development through the entire supply chain.

First offered in late 2020, the virtual modules have continued in 2021.

Green Ambassadors

This signature engagement program for retail store associates includes a dedicated network of internal sustainability ambassadors who learn even more details about our eco collections and SMART GUESS products so they can raise awareness among colleagues and customers. At the end of FY2020, associates representing more than 40 stores were Green Ambassadors, committed to sharing their enthusiasm and knowledge about GUESS product sustainability and our RESOURCED garment recycling program. The program was paused during the pandemic and we hope to resume it in the future.

Associate Engagement

Another way we encourage a focus on sustainability across our organization is through the Associate Engagement Program, which began in 2016. This includes sustainability learning and growth opportunities through vendor presentations, educational events, and volunteering and opportunities. In FY2020 – 2021, many activities were canceled due to the pandemic, but associates still had a chance to participate in key activities beforehand.

Sustainability Education — What’s Next?

We will continue creating and delivering product knowledge training to store associates and product developers. This will become even more important as we continue to advance our use of sustainable raw materials and production methods. We also look forward to resuming our popular Associate Engagement Program as soon as our team members can safely gather in groups, and are implementing virtual opportunities for learning in the interim. As part of VISION GUESS, we have established a goal to regularly engage our customers and communicate the importance of garment “care and rewear.” We plan to do this through our advertising, marketing, and communications, encouraging customers to make sustainable choices in their daily lives.
For almost 27 years, the GUESS Foundation has pursued social, health, and educational opportunities that enhance wellbeing, development, protection, and assistance among men, women, and children in our shared global environment. The Foundation is deeply embedded in our company and our culture, as we contribute to organizations and programs that bring about positive social change, equality, and opportunity. In FY2020 – 2021, the GUESS Foundation contributed more than $1.5 million to over 15 nonprofit organizations in North America and Europe. These include, among many others, UNICEF, Direct Relief, Carousel of Hope, The World Stage, and the LA Regional Foodbank. In Europe, the Foundation supports organizations such as Fundación Ana Bella in Spain and D.i.Re in Italy that work to support women victims of domestic violence.

GUESS Cares is the organizing platform for our associate volunteer program. Established in 1996 in the United States and Canada to give our employees a chance to give back, GUESS Cares coordinates volunteering activities in the local communities where we live and work, usually one activity each month, including hands-on volunteering, fundraising, and collecting and distributing goods to people in need. Volunteering activities vary by location, but always reflect the diversity of important issues our team members care about and give them a chance to build stronger connections with each other and with the greater community.

Supply Chain

Social Responsibility

Commitments

- Partner with supply chain facilities on continuous improvement
- Increase supply chain transparency

Goals

Strengthen vendor training and factory worker grievance program

Publish multi-tiered supplier map

FY2020 – 2021 Achievements

Grievance program continued for a few key suppliers in China

Expanded supplier training in FY2020

New vendor scorecard rolled out in FY2021 to evaluate supply chain for social responsibility

100% of Tier 1 supplier factories assessed

Published list of key Tier 1 and Tier 2 suppliers

Visit sustainability.guess.com for more information

Sustainable Development Goals

The content in this section supports the United Nations Sustainable Development Goal # 8 to promote sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all. Specifically, we address target 8.5 and 8.7 focusing on the protection of labor rights and promotion of safe and secure working environments for all workers, including migrant workers, in particular women migrants, and those in precarious employment. We are also committed to taking continued measures to make sure there is no forced or child labor in our supply chain.
From growing and processing raw materials, to spinning fibers into fabric, to producing our clothing and accessories, we represent everyone along our supply chain. This is both an opportunity and responsibility for us to help drive positive change in the fashion industry. That’s why, as a global, iconic company, we apply our scale, resources, and expertise to help our supplier partners implement best-in-class practices each step of the way.

Our Approach—Promoting Industry Improvements
The fashion industry supply chain has been improving working conditions, human rights, health and safety, work hours, and wages over the years. But ongoing improvements, training, and monitoring are still necessary. For more than a decade, our supply chain social responsibility program has reflected our strong commitment to help suppliers implement best practices in safe and fair labor and achieve meaningful improvements in the lives of their workers.

Our program highlights four areas—factory approvals, supplier training and education, factory monitoring, and remediation when necessary. Together, our emphasis on supplier engagement and collaboration with other brands helps to support and protect apparel industry workers.

Conformity and Collaboration
All GUESS suppliers must sign and agree to our Supplier Code of Conduct, which details our requirements for human rights, health and safety, labor, ethics and decent work, payment, and administration. Our Supplier Code of Conduct is publicly available at sustainability.guess.com in the “Reports and Resources” section. We also require factories to provide evidence of their social compliance record with audit reports and certificates issued by peer companies, third-party audit and certification bodies, or multi-stakeholder organizations. Throughout our ongoing relationship with suppliers, we ensure continued conformity through our focus on education, monitoring, and remediation.

We also embrace the concept of equal partnership, as promoted by the Sustainable Apparel Coalition (SAC), which emphasizes working toward collective goals with respect for all in the supply chain. In this spirit, GUESS has partnered with hundreds of suppliers over the years and monitored 3,500 factories since our program started to support continued improvements in social and labor practices. Today, our supply chain social compliance program has become a significant asset, constantly evolving and expanding with new requirements and training each year.

Protecting Workers through Responsible Sourcing
In addition to improving transparency, training and oversight in our supply chain, our raw material sourcing policies and initiatives help to protect workers and communities by encouraging the use of raw materials produced with higher environmental and social standards. For more, please see our Responsible Cotton Sourcing Policy and Responsible Sourcing Policy on Manmade Cellulosic Fabrics available on sustainability.guess.com.

Supplier Chain Overview
Most of our apparel is designed at GUESS, then our suppliers produce and deliver the finished items to our distribution centers worldwide. GUESS does not own any manufacturing facilities and we source our apparel, bags, accessories, footwear, jewelry from hundreds of supplier factories. We do business both with vendors through a commercial relationship with GUESS, as well as with factory suppliers owned or subcontracted by those vendors, and a vendor may work with more than one factory. Collectively, these represent our Tier 1 suppliers. The global nature of our supply chain enables GUESS to drive efficiency and quickly respond to changes in customer demand. In addition, we focus on building in our supplier relationships, which improves management of sustainability challenges, reduces risk for GUESS, and supports transparency and traceability through the extended supply chain. As of this report publication, for the first time, GUESS has published a list of key suppliers available on sustainability.guess.com.

Improving Supply Chain Social Responsibility

Supplier Education and Knowledge Sharing
Training factory personnel helps to increase their awareness and understanding of the GUESS Supplier Code of Conduct, with the goal of preventing social and environmental missteps. By taking a proactive educational approach, we can help suppliers recognize their areas for improvement, identify root causes of any non-compliance issues, and build compliance capacity. We provide two main types of supplier training and education:

1. One-on-one training for every new supplier at onboarding. This introduces them to our social compliance program and details our requirements and expectations.

2. Continued onsite training for established suppliers. This training addresses specific practices at the factory level, with the aim of getting the best performance from suppliers throughout our relationship.

In keeping with our desire to engage rather than continuously monitor suppliers, we expand and update training based on supplier needs and feedback.

We also believe it is valuable for suppliers to meet each other in an educational setting. As members of the GUESS supply chain, they are part of a team contributing to our shared success, so we bring various suppliers together for opportunities to openly discuss their challenges, experiences, and solutions with each other. Over time, this best practice can help improve practices across the fashion industry supply chain.

Although the pandemic halted all in-person training that was planned for 2020, we conducted one-on-one trainings for all vendors on-boarded during this period.

In FY2020*, GUESS completed supplier factory training in 3 key sourcing areas Turkey, Vietnam, and India, reaching 163 representatives from 80 suppliers or factories.

* All FY2021 trainings postponed due to COVID-19
Supplier Factory Monitoring and Assessment

Transparency throughout our supply chain is central to our approach. We value trust and relationship building with our suppliers; however, monitoring also remains an important part of the social compliance process. Experienced factory auditors conduct supplier assessments at least once each year to evaluate status and identify any areas needing improvement, including both social and environmental issues.

In 2020 (our FY2021), to comply with the COVID restrictions imposed by different countries, we applied special extensions and flexibility to our audit schedule. Even so, we maintained complete assessment of the active supply chain by the end of FY2021.

Audits and Assessments

The GRI and SASB standards view factory monitoring differently. We previously reported in alignment with the GRI standards, which uses the term “assessment” to describe the factory monitoring process, although our previous sustainability reports used the common term “audits” to describe these activities. The related GRI metric includes the number of assessments performed during the reporting period. The SASB standards use the word “audit” and also track completion differently. The difference between the two standards means that if we conduct an audit in the final month(s) of the previous fiscal year and assess the results in the current fiscal year, the number is included for GRI, but not for SASB. In addition, if GUESS does not use a supplier again in the new fiscal year, it is still counted as an active supplier under SASB. Following the GRI Standards, 100% of our supply chain tier 1 factories were assessed during FY2020 – 2021. Using the SASB metric, it would appear GUESS assessed 55% and 52% of factories in FY2020 and FY2021, respectively.

SASB metric, it would appear GUESS assessed 55% and 52% of factories in FY2020 and FY2021, respectively.

Supplier factories and 258 assessments were conducted for 246 supplier factories, respectively. Of these, most assessments were conducted by peer auditors, while others were carried out by accredited external auditors appointed by GUESS, and a small percentage were conducted by internal GUESS auditors. More than one-third of assessments were conducted by third-party auditors approved by certification organizations such as WRAP, SA8000 Standard, and Seri.Co.

Assessment Findings

In FY2020 and FY2021, 354 assessments were conducted for 329 supplier factories and 258 assessments were conducted for 246 supplier factories, respectively. Of these, most assessments were conducted by peer auditors, while others were carried out by accredited external auditors appointed by GUESS, and a small percentage were conducted by internal GUESS auditors. More than one-third of assessments were conducted by third-party auditors approved by certification organizations such as WRAP, SA8000 Standard, and Seri.Co.

A sewer for GUESS at a supplier facility in Bangladesh.

Vendor Scorecard

In FY2021, we rolled out a new tool for evaluating our supply chain at the supplier factory level. With more than 50 key performance indicators, this comprehensive vendor scorecard covers social responsibility, environmental management, innovation, and other topics. The tool includes historical results, corrective action plan outcomes, participation in GUESS training, productivity, and other measures so we can readily assess supplier performance and improvement over time.

Amplifying Worker Voices

Since 2018, we have maintained a supply chain worker grievance program for a few key supplier factories in China, a key sourcing country, that allows workers to report concerns anonymously. Our local non-governmental organization (NGO) partner then completes an internal review to assess the concern. Validated concerns are reported to factory management and to GUESS. We then connect with factory management to better understand and resolve the issue. As trust in the grievance program has grown over the years, factory managers recognize its value to help them improve. Our plans to expand the program to Vietnam and India—key sourcing countries where an NGO is available to support the process—were postponed due to the pandemic. We intend to be able to safely launch grievance mechanisms in these countries soon.

Assessment Findings

In FY2020 and FY2021, 329 supplier factories and 258 assessments were conducted for 246 supplier factories, respectively. Of these, most assessments were conducted by peer auditors, while others were carried out by accredited external auditors appointed by GUESS, and a small percentage were conducted by internal GUESS auditors. More than one-third of assessments were conducted by third-party auditors approved by certification organizations such as WRAP, SA8000 Standard, and Seri.Co.

Supply Chain Social Responsibility — What’s Next?

Among all our supply chain social responsibility programs, we see the greatest positive results from our factory training. This is one reason we continually assess our suppliers’ operations to determine which topics need additional training and then expand the program to meet those needs. We plan to expand our supplier training program to make it more timely in select key sourcing regions and to include convenient digital or virtual training solutions as well.

To advance our work in circular fashion, we plan to implement an integrated supplier impact program. This would involve piloting a new approach with key vendors with the necessary capabilities to support our most ambitious circular and sustainable fashion initiatives.

Since 2015, we have been members of the Sustainable Apparel Coalition (SAC), an industry alliance that brings together peers to advance sustainable production. Going forward, we plan to leverage the SAC Facility Social Labor Module (FSLM), which allows facilities to assess the social and labor conditions for their workers, helping ensure they’re creating safe and fair working conditions. In an effort to support industry alignment on this important topic, we will also explore ways to expand regional grievance mechanisms.

In the GUESS FY2018 – 2019 Sustainability Report, GUESS announced its intention to expand its social compliance program to its Tier 2 suppliers. We planned to launch this program and FSLM at the beginning of FY2021, but it was delayed due to the COVID pandemic. Managing the performance of our Tier 2 facilities is important for us to protect workers in our supply chain, and is also a requirement through our membership with the Sustainable Apparel Coalition. Within this new reporting period we aim to pilot Tier 2 factory assessments with strategic partners, with a focus on denim laundries and fabric mills. We will also expand the GUESS training program to include Tier 2 suppliers and address their specific needs.

On additional operations are detailed in VISION GUESS, which includes a commitment to value everyone in our supply chain by extending our diversity and inclusion focus to our supply chain and increasing training for factory owners in key regions.

* We previously reported assessment findings in four groups: (1) Environment, Health and Safety; (2) Labor, Ethics, and Decent Work; (3) Payment and Administrative; and (4) Human Rights.

Priority Issue Rate and Priority Corrective Action Plans

Helping Our Suppliers Address Common Issues – In FY2020, 96%, and in FY2021, 94% of the assessments of the directly sourced suppliers detected some issues. The three issues most commonly identified during assessments of GUESS suppliers were health and safety, wages and benefits, and hours of work, with hours and wages being closely linked. Overwhelmingly, the identified issues were more related to procedures and paperwork, rather than issues that could threaten worker safety, compensation, or wellbeing. We update our requirements annually, or as needed to align with changing country regulations, and provide outreach and training to suppliers to make sure they understand and can comply with the new requirements. Even so, the increased stringency of new requirements can lead to non-compliance findings as suppliers adjust their processes to comply. In FY2020, GUESS did not permanently terminate our relationship with any suppliers for non-compliance, and we prioritized helping our suppliers to address the common issues.

Health and safety – GUESS suppliers manage health and safety well, including maintaining safe buildings and work environments and providing their workers with appropriate personal protective equipment (PPE) like masks, metal mesh gloves, protective shoes, and hearing protection where required. Despite this, our assessments still find issues because workers are expected to comply with the health and safety requirements in every workplace task, and their practices are sometimes inconsistent. We stress the importance of ongoing safety training to make sure suppliers maintain a high degree of compliance among their workers.

Wages and benefits – When assessments uncover working hours non-compliances with a GUESS supplier, we collaborate with them to understand their workers’ needs. Often, we learn that workers have asked for more hours so they can earn more money. To help them address this challenge, we encourage factory managers to explore additional options for incentivizing and rewarding workers—emphasizing efficiency and productivity over number of hours. Improving workspace organization and workflow can increase factory productivity in less time, which then frees up funds to provide workers with premiums for efficiency, number of pieces finished, and quality. This approach boosts overall productivity without reducing worker income.

HOURS OF WORK – The GUESS Supplier Code of Conduct provides suppliers with some flexibility to set work hours appropriate to their needs, up to a maximum of 60 hours per week and a maximum of 6 days per week. Each GUESS supplier must comply with our limits or with those set by the country where they operate, whichever is stricter. In cases where individual country limits vary from our own, our assessments sometimes find compliance issues.

Social Compliance Show-Stoppers

Occasionally our assessments and other supplier interactions identify significant and urgent concerns that cannot be remediated. When these “show-stoppers” are identified, GUESS either ceases work with a supplier factory pending investigation, or terminates the onboarding process for a new supplier. In FY2020 – 2021, we did not have to eliminate any supplier factories from our supply chain due to show-stopper non-compliances. However, in FY2021 we eliminated 1 supplier (0.4% of assessed suppliers in FY2021) from our supply chain due to a bias on sourcing from the geographical area where the supplier was located.

Show-stopper findings significantly declined during the FY2020 – 2021 reporting year. This can be associated with changes in the supply chain that had a positive effect on the number of critical issues found. In particular, GUESS consolidated its vendor base and increased the focus on quality. The company also enhanced supplier dialogue and upfront specifications through a pre-screen process, as a result of SMART GUESS production requirements and as a supplier accountability. For more about changes to our supply chain, see Our Business Model on pages 10-11

Regulatory Oversight

For the past seven years, we have been using the comprehensive GUESS Conflict Mineral Policy to support the Dodd-Frank Wall Street Reform and Consumer Protection Act on conflict minerals. While GUESS does not directly source any conflict minerals and, in most cases is many tiers removed from these mining activities, we continue to clearly articulate our expectations of suppliers. Suppliers are encouraged to support industry efforts to enhance transparency and traceability in the supply chain.

Since 2006, Guess U.S. has conducted security audits of its overseas factories as part of our Customs-Trade Partnership Against Terrorism (C-TPAT) program. The audits are conducted in cooperation with U.S. Customs and Border Protection, an agency of the Department of Homeland Security, to further improve security measures throughout the supply chain.

1. Use of forced, prison, indentured or bonded labor, including human trafficking and slavery
2. Use of child labor
3. Corporal punishment, mental or physical disciplinary actions
4. Harassment of workers, including sexual harassment
5. Discrimination of any kind
6. Unsafe working or living conditions
7. Workers are not paid
8. Unethical conduct
OUR APPROACH

The majority of the environmental impacts associated with our products occur in our supply chain. Growing cotton, for instance, requires a lot of water and has traditionally also used fertilizers, pesticides, and herbicides. Polyester is made from non-renewable petroleum products, and production of manmade cellulosics in the past has sometimes come at the risk of forests and biodiversity.

At GUESS, we are committed to responsibly sourcing these and other raw materials as well as developing more sustainable products, such as laundering our denim with less water, fewer dyes, and fewer chemicals, while remaining true to the fashion looks our customers love. In addition, we use a precautionary approach, meaning we strive to protect the environment even in the absence of scientific certainty or regulatory requirements.
Ensuring Product Responsibility

- Increase use of responsible materials
- Promote circular fashion

Goals FY2020 – 2021

- 10% certified sustainable materials
  - Achieved
- 20% of cotton sourced as Better Cotton
  - In Progress

Achieve our 2020 Commitment to Circular Fashion with the Global Fashion Agenda

- Launched RESOURCED, our customer take-back program and expanded internationally* delayed due to COVID-19
- Trained our product and design teams in circular fashion
- Continued GUESS Vintage product line to promote circular fashion through resale in stores and online

Sustainable Development Goals

The content in this section supports the United Nations Sustainable Development Goal #12 to ensure sustainable consumption and production patterns. Specific targets addressed include 12.2 and 12.3 to encourage the efficient use of natural resources as well as waste reduction and reuse.

The content in this section also supports the United Nations Sustainable Development Goal #15 to protect life on land, including protecting, restoring, and promoting sustainable use of forests and halting biodiversity loss, among others. Specific targets addressed include 15.3 to end deforestation and restore degraded forests and 15.5 to protect biodiversity.
Our Approach to Sustainable Materials and Products

Making more sustainable products for GUESS customers begins with careful design and raw material selection in keeping with the SMART GUESs eco materials sourcing guide. We also focus on chain of custody, certifications, and the traceability of fibers through the supply chain so we can ensure their integrity in our finished products. As more sustainable fabrics and processing technologies emerge, we evaluate them for potential use by our suppliers. We also assess emerging approaches to make sure the fibers or fabrics they produce align with the well-known GUESs brand and our customers’ high expectations for fit and fashion.

In general, we are selective about the sustainable product initiatives we pursue so that we can embrace each one fully, apply it correctly, and include many partners to achieve the best result in our finished products. Lifecycle analyses have shown that fiber and fabric production make up about half of a GUESS apparel’s environmental impact. To that end, we have been working with our vendors to incorporate more sustainable materials and practices. And as our sustainable materials efforts have expanded and matured over time, we have begun shifting our focus from fibers to process. This includes, among other measures, helping suppliers adopt new technologies that allow them to use less water, fewer chemicals, and less energy.

Sustainable Sourcing Policies and Practices

Our responsible sourcing policies are designed to increase visibility into the supply chain, from raw materials to product manufacturing.

Responsible Cotton — The GUESs Responsible Sourcing Policy on Cotton aims to increase procurement of preferred cotton sources while working to improve traceability and keep prohibited cotton sources from entering our supply chain. Our preferred cotton options include sourcing Better Cotton through the Better Cotton Initiative (BCI), organic cotton, and other alternatives to conventional cotton (e.g., recycled cotton). BCI takes a holistic approach to sustainable cotton production by working with farmers on environmental, social, and economic practices. We also favor organic cotton, which uses fewer chemicals and supports biodiversity, as well as recycled cotton sources.

Cellulosics — Cellulosics include rayon, tencel, modal, and lyocell. We look for rayon/viscose, modal, and lyocell fabrics, which have been linked to the destruction of Ancient and Endangered Forests. According to Canopy, these are intact forest landscapes, naturally rare forest types and those made rare by human activity, and/or other forests that are ecologically critical for the protection of biodiversity. We’re also increasing the amount of manmade cellulose materials we procure from sustainably managed forests, closed loop systems, and innovative material sources by partnering with leading companies, suppliers, and organizations.

* Data calculated on 95% of Apparel and Accessories merchandise purchased by Guess US, Guess Canada, Guess Europe and Greater China
** Includes Alpaca fiber, Cashmere, Linen, Merino Wool, Virgin Wool, Wool, Recycled Wool, Other Hair
*** Any part, fiber or wool from the Angora rabbit was removed from our supply chain in FY2020

GUESs FY2020 – FY2021 Sustainability Report Protecting Our Environment

Our products feature various natural and manmade materials. The three materials used most for GUESs apparel and accessories are:

1. Cotton, which is in demand and our logo tops 60.2%.
2. Cellulosics, such as rayon, tencel, modal and lyocell 47.5%.
3. Synthetic fibers, such as polyester, nylon and spandex 28.3%.

To reduce our environmental impact, we focus on chain of custody, certifications, and the traceability of fibers through the supply chain so we can ensure their integrity in our finished products. As more sustainable fabrics and processing technologies emerge, we evaluate them for potential use by our suppliers. We also assess emerging approaches to make sure the fibers or fabrics they produce align with the well-known GUESs brand and our customers’ high expectations for fit and fashion.

In general, we are selective about the sustainable product initiatives we pursue so that we can embrace each one fully, apply it correctly, and include many partners to achieve the best result in our finished products. Lifecycle analyses have shown that fiber and fabric production make up about half of a GUESs apparel’s environmental impact. To that end, we have been working with our vendors to incorporate more sustainable materials and practices. And as our sustainable materials efforts have expanded and matured over time, we have begun shifting our focus from fibers to process. This includes, among other measures, helping suppliers adopt new technologies that allow them to use less water, fewer chemicals, and less energy.

Sustainable Sourcing Policies and Practices

Our responsible sourcing policies are designed to increase visibility into the supply chain, from raw materials to product manufacturing.

Responsible Cotton — The GUESs Responsible Sourcing Policy on Cotton aims to increase procurement of preferred cotton sources while working to improve traceability and keep prohibited cotton sources from entering our supply chain. Our preferred cotton options include sourcing Better Cotton through the Better Cotton Initiative (BCI), organic cotton, and other alternatives to conventional cotton (e.g., recycled cotton). BCI takes a holistic approach to sustainable cotton production by working with farmers on environmental, social, and economic practices. We also favor organic cotton, which uses fewer chemicals and supports biodiversity, as well as recycled cotton sources.

Cellulosics — Cellulosics include rayon, tencel, modal, and lyocell. We look for rayon/viscose, modal, and lyocell fabrics, which have been linked to the destruction of Ancient and Endangered Forests. According to Canopy, these are intact forest landscapes, naturally rare forest types and those made rare by human activity, and/or other forests that are ecologically critical for the protection of biodiversity. We’re also increasing the amount of manmade cellulose materials we procure from sustainably managed forests, closed loop systems, and innovative material sources by partnering with leading companies, suppliers, and organizations.

In partnership with Canopy, GUESs has committed to tracking and disclosing the origins of our viscose materials. Through the Canopy Style initiative, we worked with key mills in the GUESs supply chain to trace their manmade cellulose fibers upstream and identify the sources. Then we compared those mills with the Canopy Hot Button Report, which matches viscose providers with their forest management practices, including concerns such as using peat land or burning in endangered forests. Sourcing responsible manmade cellulose supports healthy ecosystems and biodiversity.

Animal Health and Welfare — We aim to protect the wellbeing of any animals in our supply chain through the GUESs Animal Welfare Policy. GUESs suppliers are prohibited from using any:

- Fur (including but not limited to mink, fox, lamb, raccoon, rabbit, and dog)
- Angora fiber (hair or wool from Angora rabbit)
- Mohair (Angora goat hair)
- Exotic leather (other parts from vulnerable, endangered, or wild-caught species)

The use of down is permitted if it has been certified to the Responsible Down Standard (RDS). The following materials are permitted with caution:

- Leather (from cow, pig, lamb, or sheep, with Leather Working Group-certified facilities preferred)
- Wool (wool certified to the Responsible Wool Standard is preferred if available and wool from muleing shearing is to be avoided)
- Other animal hair or as a byproduct of the meat industry

Achieving our Sustainable Sourcing Goals

In FY2021, our target for environmentally preferred materials was 10%. From FY2020 – 2021, we increased our environmentally preferred materials by over 10% and exceeded our goal by reaching 11%.

For cotton sourced with the Better Cotton Initiative (BCI), our target was to achieve 20%, which we did not meet, sourcing 13% of our cotton as BCI in FY2021.

GUESs FY2020 – FY2021 Sustainability Report Protecting Our Environment

Our responsible sourcing policies are designed to increase visibility into the supply chain, from raw materials to product manufacturing.

- Responsible Cotton — The GUESs Responsible Sourcing Policy on Cotton aims to increase procurement of preferred cotton sources while working to improve traceability and keep prohibited cotton sources from entering our supply chain. Our preferred cotton options include sourcing Better Cotton through the Better Cotton Initiative (BCI), organic cotton, and other alternatives to conventional cotton (e.g., recycled cotton). BCI takes a holistic approach to sustainable cotton production by working with farmers on environmental, social, and economic practices. We also favor organic cotton, which uses fewer chemicals and supports biodiversity, as well as recycled cotton sources.

- Cellulosics — Cellulosics include rayon, tencel, modal, and lyocell. We look for rayon/viscose, modal, and lyocell fabrics, which have been linked to the destruction of Ancient and Endangered Forests. According to Canopy, these are intact forest landscapes, naturally rare forest types and those made rare by human activity, and/or other forests that are ecologically critical for the protection of biodiversity. We’re also increasing the amount of manmade cellulose materials we procure from sustainably managed forests, closed loop systems, and innovative material sources by partnering with leading companies, suppliers, and organizations.

- Animal Health and Welfare — We aim to protect the wellbeing of any animals in our supply chain through the GUESs Animal Welfare Policy. GUESs suppliers are prohibited from using any:

  - Fur (including but not limited to mink, fox, lamb, raccoon, rabbit, and dog)
  - Angora fiber (hair or wool from Angora rabbit)
  - Mohair (Angora goat hair)
  - Exotic leather (other parts from vulnerable, endangered, or wild-caught species)

- The use of down is permitted if it has been certified to the Responsible Down Standard (RDS). The following materials are permitted with caution:

  - Leather (from cow, pig, lamb, or sheep, with Leather Working Group-certified facilities preferred)
  - Wool (wool certified to the Responsible Wool Standard is preferred if available and wool from muleing shearing is to be avoided)
  - Other animal hair or as a byproduct of the meat industry
Ensuring Traceability

Our eco-fashion SMART GUESS products are made with more sustainable raw materials, water-saving technology, alternatives to traditional chemicals or dyes, and less waste. Many of them also include raw materials that have been certified to a third-party sustainability standard and can be traced from the raw material source to our finished garment. This is important because it has been common in the apparel industry to mix fibers from many sources when weaving a fabric, making it hard to ensure sustainable practices were followed.

For all certifications, we maintain a list of approved suppliers and the integrity of our sustainable sourcing practices by obtaining a valid supplier plant-level certificate prior to placing the production order, as well as a transaction certificate tied to the relevant GUESS purchase order. This allows us to confidently trace materials from production through final product delivery, ensuring fibers are correctly managed from a sustainability point of view.

For some certified products, such as the manmade cellulosics developed by Lyocell, Modal, or LENZING Wood-Based Cellulosics – TENCEL™, recycled cotton, alternative fibers, and sustainability certifications, we work to raise awareness and encourage others to apply for these certifications, providing additional support and education so they can achieve certification.

We have also switched to recycled packaging for our jewelry, including leather, as well as the sustainable production methods required for these certifications, providing additional support and education so they can achieve certification.

Likewise, the SMART GUESS Guide for Accessories & Footwear specifies raw materials requirements, such as certified organic cotton or linen, certified recycled or organic polyester, and recycled or regenerated leather, as well as the sustainable production methods required for SMART GUESS luggage, bags, wallets, belts, scarves, gloves, and hats. These include cleaner dye processes, digital print processes, water-based glues, and other processes.

SMART GUESS denim contains at least 20% certified sustainable materials and uses production methods with reduced environmental impact.

30% average water savings per denim garment in eco collection.

SMART GUESS non-denim products contain 20%–100% certified sustainable materials.

In FY2021, 16% of our non-denim and 21% of our denim followed our SMART GUESS guidelines.* For more information on our SMART GUESS denim production methods, see page 80.

* GUESS marine, apparel only.

GUESS Eco Product Development Guides

Making sure that our product designers and developers understand our commitments and requirements for sustainable materials is the starting point for our eco collections of clothing, accessories, and footwear. Our SMART GUESS Materials Sourcing Guide for apparel provides the necessary guidance for Design, Product Development, Fabric R&D, and Production teams to develop items that reflect the GUESS brand and our sustainability goals, and helps them determine which products can be manufactured according to SMART GUESS requirements. The guide documents not only the sustainable materials and required third-party certifications, but also the eco-conscious production methods used by key suppliers and the marketing restrictions that apply to our SMART GUESS apparel. It supports sustainable product development, as well as our goal of educating 100% of our product and design teams on circularity and sustainability.

Innovating for Sustainable Jewelry

In recent years, we have made several improvements to our jewelry collections in response to customer interests and in keeping with our sustainability aspirations. These included moving from varied metals to stainless steel, from water plating to ion plating, and from non-branded crystals to luxury crystals. In late 2020, we built on this by launching a jewelry sustainability project to evaluate the sustainability implications and benefits of changing plating technology for our jewelry products. In partnership with lifecycle analysis experts at Quantis, we determined that nearly half (48%) of our jewelry’s environmental impact comes from the raw materials and production phase, mostly due to energy used during manufacturing. To help address this impact, GUESS has identified that by switching from water plating to ion plating, which uses no water or chemicals during production, we reduce our product’s carbon footprint by 27% and its ecotoxicity impact on freshwater by 82%. As a result of this analysis, GUESS is now producing all of its jewelry with ion plating finishing.

We have also switched to recycled packaging for our jewelry, including recycled PET polybags and gift boxes made from Forest Stewardship Council-certified mixed paper sources.

While GUESS is moving ahead with eco-jewelry, sustainable change is not without its challenges. Sources of leftover stainless steel are finite, for instance, and recycling the steel often requires remelting and casting it into a new shape, which uses energy, creates emissions, and invalidates the environmental benefits we would normally gain with recycling. To help address this impact, GUESS has identified that by switching from water plating to ion plating, which uses no water or chemicals during production, we reduce our product’s carbon footprint by 27% and its ecotoxicity impact on freshwater by 82%. As a result of this analysis, GUESS is now producing all of its jewelry with ion plating finishing.

Sustainable Shoes and Accessories

In Europe, our first collections of sustainable footwear and accessories will be delivered later in 2021, with the aim of offering one sustainable footwear option for each style. GUESS Europe is working toward a SMART GUESS version of each style of men’s and women’s shoes. Instead of nylon, the shoes will include recycled polyester or recycled polyurethane. We will also make sure that suppliers manage and track the shoe production process carefully through the supply chain with the appropriate chain of custody, certification body, scope certification, and transaction certificates.

Sustainable Materials — What’s Next?

With our raw material sustainability guidelines, SMART GUESS requirements, and certifications in place for our own design practices and our suppliers’ factories, we anticipate exploring more innovative approaches to save even more water, reduce chemicals, and use less energy. These and many other initiatives will help drive progress toward our VISION GUESS strategy and goals, which include:

• At least one-third of our global materials portfolio will be environmentally preferred materials or certified sustainable.

• We will eliminate oil-based materials, shifting to 100% recycled or biobased polyester.
Toward Circular Fashion

Across the apparel industry, most products sold today involve just one consumer transaction. When that product is no longer wanted or useful, it is often discarded. Across our own organization, the business case for circularity is also clear: the materials used in our supply chain represent the biggest part of our environmental footprint. Sourcing more sustainable materials and implementing a circular approach that keeps materials in use reduces our footprint. By investing in, applying, sharing, and scaling circular business models, we can help our industry shift from the current linear model to a circular approach where value is maximized in the clothing lifecycle. In FY2020 and in FY2021, through its textile recycling and reuse partnerships, as well as its customer take back program, GUESS diverted 31,374 and 27,670 kgs from landfill, respectively.

In 2019, GUESS joined the Ellen MacArthur Foundation’s Jeans Redesign project, which brings together key players from across the fashion industry to put the circular economy into action. The project uses the principles of a circular economy to ensure positive impacts for the environment, society, and the health of people working in the fashion industry. To achieve the Jeans Redesign guidelines, all materials have to be responsibly sourced, durable, compostable, traceable, reusable, and recyclable. While the principles of circularity present some challenges for a brand like GUESS, which embodies a specific look, reflects fashion trends, and includes attention to design details, our first Jeans Redesign product is available Summer 2021.

We love designing new fashion, but many of our customers also love classic GUESS clothing, including some of our earliest and most iconic designs. In 2019, Guess U.S. offered a number of authenticated vintage GUESS items sourced worldwide. In FY2020 and FY2021, we continued expanding our GUESS Vintage offerings to meet customer needs and contribute to circular fashion, without using any additional raw materials. We anticipate expanding GUESS Vintage online to customers in Europe as well.

Our Growing Take-Back Program, RESOURCED
We encourage customers to bring in their unwanted clothing and shoes—from any brand—to any GUESS store in the U.S. for recycling. Our signature take-back program, known as RESOURCED, allows for garment and shoe recycling through our continued partnership with I:Collect (I:CO®). This innovative collaboration means that the apparel and footwear we collect can be efficiently sorted, reused, and recycled, rather than disposed in a landfill, supporting our commitment to circular fashion. The program is currently available in 100% of U.S. stores. We had planned to expand RESOURCED to our European stores in 2020, but have delayed due to the pandemic. Maintaining and expanding our product take-back program is just one way we contribute to our Global Fashion Agenda’s 2020 Circular Fashion System Commitment. For more about RESOURCED, check out our video on the GUESS YouTube channel and at www.guess.com/Resourced.

We will continue to put circular design principles into action and contribute to a world where clothes are valued and never considered waste.

GUESS Vintage
We love designing new fashion, but many of our customers also love classic GUESS clothing, including some of our earliest and most iconic designs. In 2019, Guess U.S. offered a number of authenticated vintage GUESS items sourced worldwide. In FY2020 and FY2021, we continued expanding our GUESS Vintage offerings to meet customer needs and contribute to circular fashion, without using any additional raw materials. We anticipate expanding GUESS Vintage online to customers in Europe as well.

OPTIMIZING FASHION WITH MINIMAL WASTE
Circular Fashion — What’s Next?
We will continue working with the Ellen MacArthur Foundation’s Make Fashion Circular initiative and others to identify new products for the Jeans Redesign project, beyond our first product in Summer 2021, and make ongoing progress in circular fashion. A number of new VISION GUESS goals will help drive our progress forward:

– Circular product design available for every major category.
– Circular or more sustainable systems and models will be an increasingly significant part of our business.
Commitments

- Adopt water-saving denim technology
- Manage environmental impacts in our supply chain

Goals

25%

of GUESS denim to meet eco SMART GUESS guidelines

Almost there

100%

of key GUESS laundries* to complete the Higg FEM Survey

Almost there

Sustainable Development Goals

The content in this section supports the United Nations Sustainable Development Goal #6: ensure availability and sustainable management of water and sanitation for all. Specific targets addressed include 6.3, 6.4, and 6.8 to improve water quality, increase water efficiency, and help communities with water management.

FY2020 – 2021 Achievements

21%*

of GUESS denim meets our eco SMART GUESS guidelines

*GUESS mainline, apparel only

75%

of key GUESS laundries completed the Higg FEM Survey during FY2021

48%

of GUESS directly sourced suppliers by volume completed the Higg FEM Survey during FY2021

*Key denim laundries are facilities where raw denim is washed, treated, and converted into final products, and meet a minimum volume threshold. During FY2020-2021, there were six key denim laundries.
Throughout its lifecycle, a single pair of jeans uses 7,000 liters of water, from the water used in growing the cotton to producing the denim, and to customer care and washing. Denim production also has historically released a lot of chemicals into the wastewater discharged from factories. We work to minimize both water quantity and quality impacts by supporting our suppliers in adopting water-efficient technology and using safer chemicals, as well as by communicating with our customers about sustainability.

**On the Way to Water-Free Denim GUESS Off-Water Blue**

Some of our suppliers have the ability to dye denim a deep blue with no water. Known as “Dry Indigo” and communicated to our customers as “Off-Water Blue,” the process uses an indigo foam in a specialized machine. Introduced in our Fall 2020 GUESS 1YC and Men collections, we plan to expand Off-Water Blue products to other collections as well.

**e-flow** technology is a new way being used by some GUESS suppliers to reduce water and chemicals in the finishing process. The technology introduces air into an electro flow reactor and subjects garments to electrochemical shocks that create nano bubbles and a flow of wet air. Developed by Jeanologia, a-flow essentially breaks up a garment’s surface, resulting in a soft, high-quality feel and reduced shrinkage. The process needs very little water and produces zero discharge.

GUESS requires suppliers to provide our GUESS Apparel Performance and GUESS Accessories Performance Manuals in addition to our GUESS Apparel Performance Manuals in addition to our eco SMART GUESS products.

**On the Way to Water-Free Denim**

The LRSM has been developed in accordance with the strictest standards found in any of the countries where we operate. All product requirements and compliance with the GUESS LRSM are covered in our factory vendor agreement, which is updated and managed in collaboration with our Legal Department, and all vendors receive complete documentation and have been asked to confirm their full understanding. Compliance with the LRSM is required by written affirmation as well as by testing, either on the finished product or on the raw material. Testing activities are conducted by third-party accredited testing laboratories. Products or raw materials that do not pass testing may be accepted with contingencies to be reserved or reordered, or rejected depending on its adherence to legal requirements.

**Environmental Impact Measurement (EIM) Scoring**

EIM software was developed for the garment industry to provide launderers and finishers with a tool to help them incorporate more sustainable processes. Developed by Jeanologia, which also provides supplier training, the EIM platform allows laundry factory managers to enter information about the factory, the brand—such as GUESS—the wash formula, the machines, and production practices. Based on this input, the software calculates an environmental impact score that measures water, chemicals, and energy consumption as well as workers’ health. The EIM score is coded by performance, enabling factories and our company to benchmark the product by its social and environmental impact.

**Municipal Water Withdrawal (millions of liters)**

**Customer Garment Care**

Customer laundry habits are one of the most water-intensive phases in the denim lifecycle. To promote environmentally conscious behavior, we provide a denim garment care guide describing actions that reduce water and energy use while maintaining product durability. We also share best practices for laundering GUESS products at home through online instruction, store associate training, and informational garment care labels.

**What’s Next?**

We are looking into safe mineral-based dyeing processes for GUESS laundries, and evaluating anti-bacterial finishings that would allow customers to wash our garments less frequently at home. Now that our key suppliers are familiar with the Higg FEM Survey, we will begin asking them to submit verified Higg FEM data for water, emissions, and chemicals, which will provide us with added confidence in their sustainability performance. We have also established a goal as part of VISION GUESS that key vendor per category will have ZDHC certification for chemical safety.
Reducing Waste in Our Operations

While our largest environmental impacts remain in the GUESS supply chain, we are committed to increasing recycling and reducing the waste sent to landfill from our offices, stores, distribution centers, and other operations.

Recycling at Our Corporate Headquarters

Since we launched our corporate recycling program across our headquarters campuses in early 2019, we have continued to increase recycling rates with the help of ongoing communication, education, visual recycling aids, and convenient recycling bins to make it even easier for associates to practice good waste management.

At our Los Angeles global headquarters cafeterias*, associates earn cash points for using reusable plates, and we have greatly reduced plastic plate and to-go container waste since launching the program in 2019. Similarly, the Guess Europe headquarters has switched from plastic to paper cups in all cafeterias, coffee areas, and water stations, and the cafeteria is now using recycled and recyclable food-based forks and knives instead of plastic. In the main cafeteria and canteen, all glasses, dishes, cutlery, and trays are reusable and nothing is disposable.

Improving Our Product Packaging

The packaging customers take with them from our stores—including bags, boxes for wallets and shoes, jewelry pouches, and accessory inserts—is a primary contributor to the waste generated in our stores around the world. We use reusable totes for our GUESS stores, as well as recyclable paper bags for Marciano, GBG, and GUESS Factory stores, and in FY2021 implemented a comprehensive sustainable accessory packaging initiative. Polyvinyl Chloride (PVC), a common packaging material, is prohibited from guess packaging. And as of the Fall/Winter 2020 collections, the steel bands around shipments so these waste materials can be easily separated and recycled.

Reducing Waste from Offices, Stores, and Distribution Centers

At the majority of our retail stores, waste is managed through centralized management systems offered by shopping malls, which typically include recycling. However, waste management practices at non-centralized mall locations are not being tracked, and this represents a continued opportunity for improvement.

Several of our distribution centers have increased their waste diversion efforts by recycling the corrugated cartons received from vendors, as well as clothing hangers. In Europe, where GUESS distribution centers are owned and operated by a third party, they are improving how they manage paper, cardboard, packaging, wood pallets, and metal from the steel bands around shipments so these waste materials can be easily separated and recycled.

Responsible Paper Use – Guess Europe

Several initiatives help our offices reduce the amount of paper used. The Guess Europe corporate office accounting team has continued its paper-free payment process and expanded it to additional country offices throughout Europe. Established in FY2013, the process now saves over 2 million sheets of paper each year, as of FY2020–2021.

PrintReleaf, an innovative program to offset the impacts of paper consumption through certified global reforestation partners, has been an ongoing initiative for about 5 years. Initiated at two Guess Europe locations in Switzerland, we have since expanded PrintReleaf to all EU countries. As of FY 2020, 45% trees have been planted to offset unavoidable paper use at our European locations.

GUESS Responsible Packaging Policy

In FY2020, GUESS implemented a new responsible packaging policy for accessories, handbags, footwear, fragrance, and cosmetics. Designed to help reduce (plastic) packaging overall, ensure packaging is recyclable and/or contains certified recycled content, and explore options for reuse. The policy has been implemented globally, adopted by our handbag, jewelry and accessory lines that are sourced by GUESS and by our largest licensee business partners. Developed to meet customer inquiries about packaging sustainability, the comprehensive policy covers air bag fillers, dust bags, jewelry boxes, polybags, hangtags, and other forms of packaging.

What’s more, for about 70% of GUESS products that are packaged with anti-mold desiccant, we have begun using an innovative, organic plant based anti-mold desiccant, we have begun using an innovative, organic plant anti-mold desiccant. The Guess Europe corporate office accounting team has continued its paper-free payment process and expanded it to additional country offices throughout Europe. Established in FY2013, the process now saves over 2 million sheets of paper each year, as of FY2020–2021.

In FY2020, GUESS implemented a new responsible packaging policy for accessories, handbags, footwear, fragrance, and cosmetics. Designed to help reduce (plastic) packaging overall, ensure packaging is recyclable and/or contains certified recycled content, and explore options for reuse. The policy has been implemented globally, adopted by our handbag, jewelry and accessory lines that are sourced by GUESS and by our largest licensee business partners. Developed to meet customer inquiries about packaging sustainability, the comprehensive policy covers air bag fillers, dust bags, jewelry boxes, polybags, hangtags, and other forms of packaging.

Reducing Waste — What’s Next?

We anticipate building on our successful rollout of sustainable packaging for accessories and jewelry to expand this approach to other parts of the business. VISION GUESS includes the commitment to ensure that our product and ecommerce packaging will be made with recyclable and recycled materials.
Reducing Greenhouse Gas Emissions

Commitments

- Reduce Scope 1 and 2 emissions
- Transition to Science Based Targets, including Scope 3 targets

Goals

15% reduction in GHG emissions from direct operations

Achieved

Transition to Science Based Targets for Scope 1, 2, and 3

Almost there

FY2020 – 2021 Achievements

Achieved over 15% GHG emissions reduction per square foot since our FY2016 baseline

Received SBTi approval for our 2030 Science Based Targets

Sustainable Development Goals

The content in this section supports the United Nations Sustainable Development Goal #13 to take urgent action to combat climate change and its impacts. Specific targets addressed include 13.2 and 13.3 to develop climate change strategies and improve education and capacity to suit any climate.
Reducing Greenhouse Gas Emissions

Taking Action on Climate

Although we publish our sustainability report every 2 years, we assess our climate-related risks annually. This includes measuring our carbon footprint, setting reduction targets—and as of 2021, Science Based Targets—and reporting progress against those targets in this report, through CDP, and through other channels.

Meeting Our Carbon Footprint Goals

We are pleased that we reached our 2021 goal, a 15% reduction in GHG emissions from our direct operations on a per-square-foot basis. In FY2020, our total Scope 1 and 2 greenhouse gas (GHG) emissions for GUESS* operations were 43,001 metric tons of carbon dioxide equivalent (MTCO2e), and we achieved a 12% reduction of GHG per square foot.**

In FY2021, we exceeded our 15% goal to achieve a 29% reduction in GHG emissions from our direct operations on a per-square-foot basis. However, we are aware that some of this is due to COVID-related temporary store closures during the year, which disproportionately affected our energy use data for FY2021 (calendar year 2020). We estimated the impact of temporary store closures from COVID on reductions in our retail revenue during FY2021. After accounting for this impact, our reduction in GHG emissions from our direct operations on a per-square-foot basis is estimated to have been 18% from our FY2016 baseline, still achieving our 15% reduction goal.

We started calculating our Scope 3 carbon footprint several years ago during the FY2018 – 2019 reporting period. This includes waste data for our Los Angeles headquarters, U.S. Distribution Center, and global inbound and outbound transportation. We also began focusing on reducing carbon emissions at key supplier mills, with assistance from a global inbound and outbound transportation. We also began focusing on data for our Los Angeles headquarters, U.S. Distribution Center, and our total Scope 1 and 2 greenhouse gas (GHG) emissions for GUESS* operations was 303,763 metric tons.*** We will achieve our Scope 3 Science Based Targets by making even smarter raw material choices, developing more sustainable product designs, and increasing the durability of our products. We also anticipate working with our key vendors to make sure they have energy efficiency or renewable energy plans in place.

CDP

For 2019 and 2020, GUESS submitted annual survey responses to CDP, formally the Carbon Disclosure Project. The first year, we received an ‘A’ score—and earned a ‘B’ the following year, partly due to more stringent scoring related to impact measurement in the supply chain and because our Science Based Targets had not yet been approved. Since the last CDP report, our Science Based Targets have been approved and we have made progress on developing our roadmap for achieving them. We continue to strive for excellence in impact and reporting, both in this sustainability report and in our CDP responses. To that end, GUESS annually engages a third-party provider to provide limited assurance on our greenhouse gas inventory, further verifying its completeness and accuracy.

For FY2020-2021 CDP reporting GUESS engaged third-party provider LucidWorks to provide assurance on our GHG inventory.

Energy Efficiency

The ongoing LED lighting upgrades at GUESS stores, distribution centers, and headquarters continue. Since we began this energy efficiency initiative in FY2017, over 50 stores in North America and Europe have been retrofitted or opened with LED lighting systems.

Setting Science Based Targets

Our new Science Based Targets were approved in FY2021, representing the next step in doing our part to address climate change. We are committing to a 50% reduction of absolute Scope 1 and 2 emissions, and a 30% reduction in absolute Scope 3 emissions by 2030, toward a 1.5-degree trajectory. We will work to achieve the Scope 1 and 2 targets through a combination of store energy efficiency changes and renewable energy agreements.

As required to implement our approved Science Based Targets, GUESS also calculated its Scope 3 emissions for purchased products and services. In FY2021, GUESS Scope 3 GHG emissions were 303,763 metric tons.*** We will achieve our Scope 3 Science Based Targets by making even smarter raw material choices, developing more sustainable product designs, and increasing the durability of our products. We also anticipate working with our key vendors to make sure they have energy efficiency or renewable energy plans in place.

Reducing Greenhouse Gas Emissions — What’s Next?

Now that our Science Based Targets have been approved, we will continue implementing a variety of energy efficiency and renewable energy strategies to meet them. These are detailed in several goals as part of VISION GUESS:

– Announce roadmap to achieve SBTs.
– Reduce Scope 1 + 2 (corporate) emissions by 50%.
– Reduce Scope 3 (supply chain) emissions by 30% by 2030.

* We hired third-party greenhouse gas accounting specialists to collect and assess our direct operating results from utilities and/ or energy supplier invoices. Where these reports were unavailable, estimates were created based on reports or invoices from other buildings comparable in size and energy consumption. The estimation technique was used for approximately 10% of natural gas and 35% of electric power consumption globally. GUESS does not sell energy, nor does it make any direct purchases of renewable energy sources. Therefore, while we report some renewable energy assets within our existing grid energy mix, we are unable to claim this renewable energy as attributed to GUESS under the Scope 3 Guidance from the GHG Protocol.

** To calculate our greenhouse gas (GHG) inventory, we used the Greenhouse Gas Protocol Corporate Accounting Standard (“GHG Protocol”), published by the World Business Council for Sustainable Development (WBCSD) and the World Resources Institute (WRI). Our analyses were conducted by third-party auditors or certified corporate offices, distribution centers in retail facilities, facilities of which we have operational control, and includes both direct (Scope 1) and indirect (Scope 2) emissions. The composition of GUESS energy consumption is in alignment with GHG Protocol standards. **

*GHG’s carbon footprint is calculated in its scope 3 footprint in alignment with the WRI/WBCSD GHG Protocol – Corporate Value Chain (Scope 3) Accounting and Reporting Standard. GHG’s inventory is calculated by a hybrid approach as accepted by the Science Based Targets Initiative (SBT), where non-manufacturing categories are reported with a hybrid approach and non-material categories are calculated with further precision. GHG also utilizes the Apparel and Footwear Sector Science-Based Targets Guidance as a supplement for calculating and assessing materiality of various scope 3 categories.
This report and the GRI metrics and disclosures, have been prepared in accordance with the GRI Standards: Core option. The SASB disclosures have been prepared in accordance with the SASB Apparel, Accessories & Footwear Sustainability Accounting Standard or the SASB Multiline and Specialty Retailers & Distributors Sustainability Accounting Standard. The supplemental key metrics have been prepared in accordance with our internally developed GUESS criteria.

Our contributions to the United Nations Sustainable Development Goals (UN SDGs) are also addressed. The Supplemental Key Metrics and Criteria, the GRI Content Index, and the SASB Index detail the GUESS key performance indicators as well as the material metrics included in the report, along with their locations.

Our report content was further guided by our sustainability materiality assessment completed in late 2020 and early 2021, which identified those topics that are important to both our stakeholders and to the sustainable growth of our business.

We are also committed to transparently reporting our progress against our sustainability goals and these well-known sustainability standards and tools, and to achieving third-party assurance. We believe these added measures provide GUESS stakeholders with added confidence in the quality, completeness, and accuracy of our reports.

For the purposes of this sustainability report, GUESS business operations are grouped into the following segments: Guess U.S., Guess Canada, Guess Europe, and Guess Asia. Any reference to “GUESS” means a reference collectively to Guess U.S., Guess Canada, and Guess Europe, unless otherwise indicated. For example, our subsidiaries in Greater China (Guess Asia) are also included throughout the report in the following sections: “Operating With Integrity”, “Diversity and Inclusion”, “Supply Chain Social Responsibility”, “GUESS Product Materials Overview”, “Higg FEM Index”, and “Reducing Greenhouse Gas Emissions.” In “Reducing Greenhouse Gas Emissions” and “Diversity and Inclusion”, our subsidiaries in Korea and Japan are also included.

Data presented in this report includes the entities that are consolidated for financial reporting purposes, with a few exceptions for certain KPIs, including:

— Joint ventures (JVs) not directly managed by GUESS are generally excluded, primarily due to our limited influence on their operations, with the exception of JVs in Portugal and Canary Islands that are included in the section “Reducing Greenhouse Gas Emissions”.
— Our JV in Russia is included because it is operated by GUESS. Per the SASB requirement, we have included 100% of this JV’s data in our metrics, rather than make adjustments for minority interests.
— Joint ventures (JVs) not directly managed by GUESS are generally excluded, primarily due to our limited influence on their operations, with the exception of JVs in Portugal and Canary Islands that are included in the section “Reducing Greenhouse Gas Emissions”.

The content of this report includes topics significant to GUESS stakeholders and the sustainable growth of the company, as well as the size, number of associates, and overall impact of our largest business units based on revenue. The scope of this sustainability report covers corporate offices, distribution centers, warehouses, and retail stores directly owned and operated by GUESS in the United States (Guess U.S.) and its subsidiaries in Canada (Guess Canada) and Europe (Guess Europe), unless otherwise indicated. Data for licensee operations, third parties to which GUESS grants the right to manufacture, distribute, or sell GUESS branded items are not included in this report.

We have selected this scope based on the availability and assurability of the data. We continue to increase the scope of our coverage over time.

We take responsibility for the completeness, accuracy, and validity of the metrics and disclosures contained in this report and included in the Supplemental Key Metrics and Criteria table, the GRI Content Index, and the SASB Index. Management is responsible for the collection, quantification, and presentation of the sustainability disclosures and for the selection of the criteria, which we believe provide an objective basis for measuring and reporting on the sustainability disclosures. Measurement of certain disclosures includes estimates and assumptions that are subject to inherent measurement uncertainty resulting for example from accuracy and precision of conversion and other factors. The selection by management of different but acceptable measurement methods, input data, or assumptions may have resulted in materially different amounts or metrics being reported.

Our internal audit team has reviewed our FY2020 – 2021 metrics and data for completeness and accuracy, including the methodology and calculations. The GUESS internal audit team operates under an Internal Audit Charter approved by the Board of Directors Audit Committee that defines the internal audit team’s purpose, as well as its authority, responsibility, and independent position within the organization. In addition, KPMG LLP performed an examination of this report, subjecting the report to reasonable assurance procedures in verifying its accordance with the GRI Core option, the GRI metrics, the SASB metrics, and supplemental metrics as disclosed. Senior executives, in particular the CEO and CFO, are involved in seeking external assurance. Please see page 91 for the Independent Accountants’ Report.
Reporting Changes or Restatements
If material reporting errors are discovered in previous reports, or there are significant changes to our business, we will transparently disclose any necessary corrections or restatements. The following restatements have been made for the GUESS FY 2018-2019 Sustainability Report:

- GRI 414-2 - Supplier Social Assessment

Independent Accountants’ Report

The Board of Directors and Management
Guess?, Inc.

We have examined management of Guess?, Inc.’s assertion that the Guess?, Inc. Fiscal Year 2020–2021 Sustainability Report for the fiscal years ended February 1, 2020 and January 30, 2021 (the “Sustainability Report”) contains all the required elements of the Global Reporting Initiative Sustainability Reporting Standards (the “GRI Standards – Core option”) and that the metrics and disclosures, as identified in the GRI Content Index on pages 93 – 97 of the Sustainability Report (the “GRI metrics”), are presented in accordance with the GRI Standards. We have also examined management of Guess?, Inc.’s assertion that the metrics included in the Sustainability Report, as identified in the SASB Index on pages 98–103 of the Sustainability Report (the “SASB metrics”), are presented in accordance with the SASB Apparel, Accessories & Footwear Sustainability Accounting Standard or the SASB Multiline and Specialty Retailers & Distributors Sustainability Accounting Standard, as applicable. In addition, we have examined management of Guess?, Inc.’s assertion that the supplemental key metrics included on page 92 of the Sustainability Report (the “supplemental key metrics”) are presented in accordance with the criteria as defined in the Supplemental Key Metrics and Criteria table on page 92 of the Sustainability Report.

Guess?, Inc.’s management is responsible for its assertions. Our responsibility is to express an opinion on management’s assertions based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether management’s assertions are fairly stated, in all material respects. An examination involves performing procedures to obtain evidence about management’s assertions. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of management’s assertions, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

The preparation of the Sustainability Report requires Guess?, Inc.’s management to interpret the criteria, make determinations as to the relevancy of information to be included, and make estimates and assumptions that affect the reported information. Measurement of certain metrics includes estimates and assumptions that are subject to inherent measurement uncertainty. Obtaining sufficient, appropriate evidence to support our opinion does not reduce the inherent uncertainty in the metrics. The selection by management of different but acceptable measurement methods, input data, or assumptions may have resulted in materially different amounts or metrics being reported.

Our examination was limited to the reporting principles of the GRI Standards – Core option, the GRI metrics, the SASB metrics, and the supplemental key metrics for the fiscal years ended February 1, 2020 and January 30, 2021 included in the Sustainability Report. All other information presented within the Sustainability Report was not examined by us, and accordingly, we do not express an opinion on such information. For certain metrics and disclosures included in the Sustainability Report, information for previous fiscal years was presented to provide comparative information and only certain of those metrics and disclosures were historically reviewed by us. Such information should be read in conjunction with the respective Guess?, Inc. Fiscal Year 2016–2017 Sustainability Report or Guess?, Inc. Fiscal Year 2018–2019 Sustainability Report. Additionally, the Sustainability Report includes prospective information such as ambitions, strategy, plans, and expectations. Inherent to prospective information, the actual future results are uncertain. We do not express an opinion or any form of assurance on the assumptions and achievability of prospective information in the Sustainability Report.

In our opinion, management’s assertions that the Sustainability Report contains all the required elements of the GRI Standards – Core option and that the GRI metrics are presented in accordance with the GRI Standards, that the SASB metrics are presented in accordance with the SASB Apparel, Accessories & Footwear Sustainability Accounting Standard or the SASB Multiline and Specialty Retailers & Distributors Sustainability Accounting Standard, as applicable, and that the supplemental key metrics are presented in accordance with the criteria as defined in the Supplemental Key Metrics and Criteria table on page 92 of the Sustainability Report, are fairly stated, in all material respects.

Boston, Massachusetts

### Discussion and Analysis

**Environmental Impacts in the Supply Chain**

- **Quantitative Percentage of Tier 1 supplier facilities and (2) supplier facilities beyond Tier 1 in compliance with wastewater discharge permits and/or contractual agreement**
  - Percentage (%): CG-AA-430a.1
  - Please refer to Product Responsibility>Water and Chemical Management> Our Approach to Safe Chemicals.

**Management of Chemicals in Products**

- **Quantitative Percentage of Tier 1 supplier factories**
  - Percentage (%): CG-AA-430a.2
  - Please refer to Product Responsibility>Water and Chemical Management> Our Approach to Safe Chemicals as well as Product Responsibility>Designing Sustainable Products.

**Environmental Injuries in the Supply Chain**

- **Quantitative Percentage of Tier 1 supplier factory Higg Index Facility Environmental Module completion rate, based on number of supplier factories:**
  - 
  - FY2020 FY2021: 9% 12%
  - (2) GUESS has not yet started to track the completion rate of its Tier 2 suppliers. For more information, please visit “Tracking Supplier Sustainability for Ongoing Improvement”.

**Labor Conditions in the Supply Chain**

- **Quantitative Percentage of Tier 1 supplier facilities and (2) supplier facilities beyond Tier 1 that have been audited to a labor code of conduct, (3) percentage of total audits conducted by a third-party auditor**
  - Percentage (%): CG-AA-430b.1
  - For full information on GUESS’ overall supply chain social responsibility program, which includes supplier factory assessments and meetings in addition to supplier audits, and covers 100% of GUESS supplier factories, please visit Improving Supply Chain Social Responsibility.

- **Quantitative Priority non-conformance rate and associated corrective action rate for suppliers’ labor code**
  - Rate: CG-AA-430b.2
  - 6.9% in FY2020 and 6.4% in FY2021 of GUESS supplier factories were found to have priority issues of non-conformance, of which 100% were required to implement corrective action plans.

**Activity metric**

- **Number of Tier 1 suppliers**
  - FY2020: 438
  - FY2021: 358

**Raw Materials Sourcing**

- **Percentage of raw materials third-party certified to an environmental and/or social sustainability standard, by standard**
  - Percentage (%): CG-AA-440a.2
  - Please refer to Supply Chain Responsibility>Assess Supply Chain risks available on page 72.

**Energy Management in Retail & Distribution**

- **Total energy consumed, percentage grid electricity, percentage renewable, gigajoules (GJ), Percentage (%)**
  - FY2020 FY2021: 9% 12%
  - (2) GUESS has not yet started tracking compliance of its Tier 2 facilities.

- **Gigajoules (GJ), Percentage (%)**
  - FY2020 FY2021: 9% 12%
  - (2) GUESS has not yet started tracking compliance of its Tier 2 facilities.

- **Energy consumption for global retail and directly owned and operated distribution centers disclosed below:**
  - FY2020 FY2021: 93.3% 93.5%
  - (3) While we are located in areas where renewable energy is present as part of the local grid, we do not currently have contracted renewable energy in our energy mix and are therefore unable to claim renewable energy as attributed to GUESS under the Scope 2 Guidance of the GHG Protocol. GUESS is evaluating its renewable energy strategy as part of achieving its science-based target.
Data Security

Discussion and Analysis
Description of approach to identifying and addressing data security risks
Please refer to the GUESS FY2020 – 2021 Sustainability Report Operating With integrity > Security and Safety section.

Quantitative
1] Number of data breaches, (2) percentage involving personally identifiable information (PII), (3) number of customers affected
Number, Percentage (%)
CG-MR-230a.1
GUESS is committed to assuring the protection of personal information of our customers, and taking care to implement best practices and follow the regulatory safeguards within each country we operate. To learn more about our general data security program, refer to page 26 of the Sustainability Report. Any financially material disclosure on this matter would be included in our Form 10-K.

Labor Practices

Quantitative
(1) Average hourly wage and (2) percentage of in-store employees earning minimum wage, by country (USD)

(1) Average hourly wage for retail and distribution center employees, by country (USD)

Region 1 (US & Canada) 22% 15% 78% 85%
Region 2 (Europe) 38% 10% 62% 95%
Region 3 (Asia) 4% 7% 98% 95%

(1) Voluntary and (2) involuntary turnover rate for in-store employees

Retail is an industry that experiences large turn over, in part because retail associates tend to be younger in age and are a more dynamic workforce group that is open to frequent relocation and transition as a result of career exploration. The U.S. National Retail Federation (NRF) states that average retail turnover is 60%. GUESS performed slightly better than this average as indicated below.

(1) Voluntary Turnover 36%
(2) Involuntary Turnover 12%

We rely on reporting from store managers in the determination of the voluntary or involuntary terminations.

NRF data source: https://www.dailypay.com/blog/employee-turnover-rates-in-retail/
Our Commitment to diversity and inclusion (D&I) is a core value, and is fundamental to the way we do business. We appreciate and understand the importance of creating an environment in which all of our employees feel valued, included and empowered, and we strive to ensure that our workforce is reflective of the communities in which we live and work. Guess?, Inc. is an equal opportunity employer that operates without regard to age, ancestry, arrest record, citizenship, race or color, marital or parental status, military discharge status, national origin, pregnancy, religion, sex, sexual orientation, gender identity, sex hormone activity, or physical or mental disability, or medical condition unrelated to the individual’s ability to perform the job. Any financially material losses as a result of legal proceedings associated with employment discrimination would be disclosed in SEC reporting documents. For more information about GUESS’ commitment to diversity and inclusion, refer to pages 40-49 of the GUESS FY2020 – 2021 Sustainability Report.

Appendix - GRI Topic Supplemental Management Approach

PRIORITY TOPICS

1. Human Rights and Labar Relations

As a global brand, we source our apparel from hundreds of supplier factories in approximately 25 countries. GUESS does not own any manufacturing facilities and therefore does not have direct visibility over all of the workers in the manufacturing process. It is imperative that we work with suppliers to ensure that the workers in our supply chain are treated with dignity, paid fairly, and provided with safe workspaces. Boundary & Involvement: Workers at our Tier 1 supplier factories (those from which GUESS directly buys) are covered by our social compliance program. However, full visibility of supplier operations, particularly Tier 2 and 3 vendors (such as fabric mills, spinners, weavers, etc.) remains a challenge given the indirect nature of our relationship and limited market influence on these pages 43-48.

2. Health, Safety and Well-Being

As a result of a company-wide survey to assess the most important topics for our business, health and safety in FY21 emerged as a top priority. This came as a result of a survey that was completed during the pandemic, during which the health and safety of our entire organization - as well as our customers - became a significant area of importance. Emotional, mental and physical health of our associates are also important to the well-being, community, and productivity of our workforce. Boundary & Involvement: Directly owned operations at corporate, retail and distribution, where the company must take precaution to ensure a safe working environment, particularly during Covid Reporting Limitations: None Management Approach: See page 51 Evaluation & Improvement: The hotel stayed busy during the pandemic, and we adjusted our resources available depending on the need. For example, once associates were settled working from home, in addition to the medical health resources and safety precautions, we also added communications to address additional needs as identified, such as mental health, overall wellness, self-care, and related topics. We included daily positive messages and links to interesting articles or talks, as a way to help associates stay in touch with the company and their colleagues. For the Kentucky Distribution Center which stayed in operation throughout the pandemic as an essential service, we implemented staggered schedule, regular testing and contact tracing, with no work-related Covid-incidents identified. Specific Requirements Adherence to Occupational Health and Safety guidance, as well as the guidance of the CDC in the US, and local health and safety regulation for all of our localities around the world.

3. Business Ethics and Responsible Marketing (previously labelled as Business Ethics)

Ethics and sustainability topics for our business and stakeholder, health and safety in FY21 emerged as a top priority. This came as a result of a survey that was completed during the pandemic, during which the health and safety of our entire organization - as well as our customers - became a significant area of importance. Emotional, mental and physical health of our associates are also important to the well-being, community, and productivity of our workforce. Boundary & Involvement: Directly owned operations at corporate, retail and distribution, where the company must take precaution to ensure a safe working environment, particularly during Covid Reporting Limitations: None Management Approach: See page 51 Evaluation & Improvement: The hotel stayed busy during the pandemic, and we adjusted our resources available depending on the need. For example, once associates were settled working from home, in addition to the medical health resources and safety precautions, we also added communications to address additional needs as identified, such as mental health, overall wellness, self-care, and related topics. We included daily positive messages and links to interesting articles or talks, as a way to help associates stay in touch with the company and their colleagues. For the Kentucky Distribution Center which stayed in operation throughout the pandemic as an essential service, we implemented staggered schedule, regular testing and contact tracing, with no work-related Covid-incidents identified. Specific Requirements Adherence to Occupational Health and Safety guidance, as well as the guidance of the CDC in the US, and local health and safety regulation for all of our localities around the world.

5. Energy efficiency and greenhouse gas emissions (previously reported as Energy & Climate)

Climate change is one of society’s most important challenges and we know that we must play our part in reducing greenhouse gas emissions. Energy consumption as a retailer is directly linked to climate change, and also offers cost savings if reduced. Reporting GES emissions may become a regulatory requirement in the future, and the ability as a business to operate and compete with the expectations of a low carbon economy is also important to our business and our stakeholders. Topic Boundary and Exclusions: Related to climate regulation in the future, and the ability as a business to operate and compete with the expectations of a low carbon economy is also important to our business and our stakeholders. Topic Boundary and Exclusions: Related to climate regulation in the future, and the ability as a business to operate and compete with the expectations of a low carbon economy is also important to our business and our stakeholders. Topic Boundary and Exclusions: Related to climate regulation in the future, and the ability as a business to operate and compete with the expectations of a low carbon economy is also important to our business and our stakeholders.
Improvement: We will continue to evaluate and improve our management approach to ensure we are staying current with the latest trends and key elements of sustainability. For every global region where we operate, we also stay abreast of relevant regional regulation, such as the EU General Data Protection Regulation (GDPR) and California Consumer Privacy Act (CCPA). Going forward, we will continue closely monitoring emerging cybersecurity risks, available security technologies, and legislation to ensure the customer, associates, and company data handled by GUESS remains safe and protected. Specific Requirements Adherence to employee regulations as relevant by region.

7. Use of sustainable and recycled materials

(prioritously Sourcing Sustainable Materials)

See page page 72, for details on sustainable and recycled materials. GUESS designs select fabric for our apparel products. We use fabric choice, vendor communication and, in some cases, mill communication, to indirectly influence our supply chain. We have already surpassed our raw material production occurs outside our business: Limitations of Reporting GUESS is not yet able to track and report on non-core fabric materials, such as the linings or embellishments used in our apparel production, nor are we able to fully disclose the full materials of our footwear beyond the main core body materials.

Management Approach: See Pages 72-75: Evaluation & Improvement: We implement policies and initiatives starting with highest priority issue areas. We track improvements both qualitatively and quantitatively in biennial sustainability reporting as well as benchmarking with peers. For our FY21 goals, we have achieved our goal and exceeded 10% environmentally preferred materials globally; however, we only reached 13% of our 20% goal of better cotton procurement. We attribute this to our mis on our BCI goals change to our internal operations as it relates to global production, and have improved our overall sustainable material sourcing, training and accountability system globally. Our global internal audit project, GUESS Sustainability Assurance Framework® has also helped to reinforce the importance of certification management with the team. GUESS Europe distribution centers also earned official certification in sustainable production standards such as the Global Recycling Standard, Organic Cotton Standard, and more, and GUESS US and Canada will soon follow suit, which enhances our ability to effective manage and communicate our sustainable material sourcing. Certifications for materials or other evidence of traceability systems are required for styles to be counted toward our certified sustainable materials goal.

10. Chemicals Management

GUESS uses chemicals in our manufacturing processes, the use in manufacturing that could pose harm to the health of workers or the environment are properly monitored and managed. Boundary & Involvement: We have direct influence over our internal, day to day corporate activities. The GUESS sustainability program for our products, seeing this as a fundamental responsibility to our customers. External chemical testing in our supply chain is not under our direct influence. Specific Requirements: Required supplier certifications for our raw materials. The policy has been implemented globally, adopted by our management approach to ensure we are staying current with the latest trends and key elements of sustainability. For every global region where we operate, we also stay abreast of relevant regional regulation, such as the EU General Data Protection Regulation (GDPR) and California Consumer Privacy Act (CCPA). Going forward, we will continue closely monitoring emerging cybersecurity risks, available security technologies, and legislation to ensure the customer, associates, and company data handled by GUESS remains safe and protected. Specific Requirements Adherence to employee regulations as relevant by region.

11. Use of Packaging and Packaging Materials

Responsible packaging and materials occur both inbound from suppliers and to external packaging; wholesale and ecommerce customers. We have a strategic approach to packaging and materials to use more innovative solutions that are better for the environment and create less waste. Boundary & Involvement: We are directly responsible for the packaging of our ecommerce shipments and materials to consumers. Reporting Limitations: Currently we do not have full visibility into our apparel, handling and footwear license packaging data, nor do we have ability to fully track all inbound packaging from suppliers. Management Approach: In FY2020, Guess, Inc. implemented a new responsible packaging policy for accessories, handbag, footwear, fragrance, and cosmetics. Designed to help reduce plastic and use of packaging overall, and to ensure packaging is recyclable and/or contains certified recycled content, the policy was implemented globally, adopted by our handbag, jewelry and accessory lines that are sourced by GUESS and by our largest license business partners. Evaluation & Improvement: We are currently implementing a reporting protocol program for our products, seeing this as a fundamental responsibility to our customers. External chemical testing in our supply chain is not under our direct influence. The GUESS brand was founded on denim, a fabric reliant on water from natural and managed; we are now focused on implementing our responsible packaging policy, which we see as an opportunity to implement best practices at the retail level for products we sell. We also ensure that all unbranded or unused GUESS products are responsibly disposed of. We will use the Higg Index Environmental Brand Module scores on related topics and our associated improvement plan. Specific Requirements: None.

13. Water Stewardship

The GUESS brand was founded on denim, a fabric reliant on water from natural and managed; we are now focused on implementing our responsible packaging policy, which we see as an opportunity to implement best practices at the retail level for products we sell. We also ensure that all unbranded or unused GUESS products are responsibly disposed of. We will use the Higg Index Environmental Brand Module scores on related topics and our associated improvement plan. Specific Requirements: None.

15. Sustainability Governance and Business Integration

Environmental, social and governance (ESG) factors of business are showing evidence of having impact on a company’s financial performance. GUESS has a targeted, strategic approach to reduce our products’ impact on water, material sourcing and production, and downstream in consumer product use. With the global rise in production and consumption of apparel, we aim to do our part to extend the lifecycle of clothing, increase re-use and recycling and divert product from landfill. Boundary & Involvement: Most product waste occurs external to our organization. For example, fabric waste in supplier factories and post-consumer waste at the end of a product’s life. However, it should be noted that we have limited, indirect influence over our customer’s decisions on what to do with products at end of life. GUESS has partnered with a textile recycler to manage waste as an end of life initiative at our own manufacturing operations. We have a targeted, strategic approach to reduce our products’ impact on water, material sourcing and production, and downstream in consumer product use. With the global rise in production and consumption of apparel, we aim to do our part to extend the lifecycle of clothing, increase re-use and recycling and divert product from landfill.
16. Climate Change and Risk Governance (previously climate resiliency)

As a global brand, our operations are subject to interruptions due to extreme weather events. Climate change is a risk to all markets, and does have implications for the apparel industry, for example, if extreme weather begins to disrupt the typical cotton growing seasons and geographic locations. In some cases changing weather patterns could also affect consumer purchasing behavior. Developing our commitment to foster climate resilience is imperative for the well-being of our business operations as the climate continues to change. Boundary & Involvement: Climate scientists agree that increasing global temperatures will likely result in more extreme weather patterns. Although the occurrence of such individual events is hard to predict in advance, we can keep several scenarios in mind for preparation. Extreme weather events could have an impact on both our operations and supply chain practices upstream, particularly beyond Tier 1 supplier factories with which we have only indirect relationships.

Management Approach:

- GUESS owns and operates retail and warehouse spaces.
- Our projects for climate resiliency apply only to our directly-owned, and operated retail and warehouse spaces.
- Reporting Requirements: See pages 86–87 for our greenhouse gas inventory management and emission reduction goals to transition to a low carbon economy. Additionally, the global flexibility and diversity of our operations and supply chain helps to mitigate risks of changing weather patterns in any particular region. We also anticipate reporting with the Task Force on Climate-related Financial Disclosure (TCFD) in the coming year which will further advance our climate planning and risk management capabilities.
- Evaluation & Improvement: The CDP Climate Survey serves as a good industry benchmark for our climate risk and resilience efforts. We have scored above industry average and aim for continuous improvement.
- Reporting Requirements: The U.S. SEC has expanded guidance on human capital disclosure which is reflected in our annual report, the FY21 GUESS Form 10-K. Some local governments where we operate also require ESG-related data as well.

18. Reducing Environmental Impacts of Products Across the Lifecycle

The production of GUESS products throughout its supply chain inherently impacts the environment—from the raw material sourcing to fabric production to dye process and cut and sew. For example, cotton is known to be a water-intensive material and dams a water-intensive crop, while polyester is known to have negative impacts downstream with microfiber shedding. As part of its overall sustainability program, GUESS aims to continuously improve and reduce the environmental impacts of its product throughout product lifecycle. Boundary & Involvement: GUESS has limited ability to direct suppliers to adopt certain production practices that will reduce the environmental impact, such as increased requirements for its eco SMART GUESS products. GUESS does have more direct control on its material selection. Reporting Limitation: Supply chain practices upstream, particularly beyond Tier 1 supplier factories with which we have only indirect relationships. Management Approach: See pages 72–81 Evaluation & Improvement: See pages 72–81; additionally, we also anticipate working with our key vendors to make sure they have energy efficiency or renewable energy plans in place, as part of our Scope 3 (supply chain) Science-Based Targets for greenhouse gas emissions. Reporting Requirements: None.

TOPICS TO BE MONITORED AND MANAGED INTERNALLY

19. Advocacy, stakeholder engagement and collaboration

To leverage industry best practice tools and guidance and maximize our sustainable development and impact, GUESS participates in several externally-managed sustainability programs in collaboration with industry peers, experts and other stakeholders. Boundary & Involvement: This is a topic on which GUESS has direct control and ability to report.

Reporting Limitation: The overall impact and specifics of our industry partners are best learned directly through inquiry with those partners.

Management Approach: See pages 28–29 Evaluation & Improvement: Depending on topics identified through our sustainability materiality assessment and our sustainability plan, we identify new partnerships as needed to gap-fill where GUESS cannot act alone. For example in FY21, GUESS officially joined Textile Exchange to ensure best practices and alignment with its sustainable materials certification, as well as joining Ellen MacArthur Foundation’s Make Fashion Circular Initiative to collaborate with industry on promoting circular fashion. Reporting Requirements: Requirements as indicated by our partners for continued membership such as Sustainable Apparel Coalition, Jeans Redesign and more.

20. Community Impact and Partnership

Our role in the global fashion community gives us the opportunity to promote responsible fashion, raise awareness of important social issues and facilitate positive social change in our communities. Boundary & Involvement: Local communities are external to our organization and something over which we have indirect influence through partnerships, fundraising, or volunteering efforts. Local communities in areas in which we source are also a part of this category, and are addressed through other topic-specific initiatives identified in the management approach.

Reporting Limitation: Reported in qualitative nature as per the results of our GRI Sustainability Materiality Assessment Management Approach:

Integrating existing philanthropic and volunteer activities with overall sustainability plan efforts related to education and engagement. Local communities of our supply chain operations are also considered as part of the management of Social Supply Chain Assessments, Environmental Impacts of Supply Chain and Water Evaluation & Improvement: Our longstanding relationship with many local partners, the cultivation of ESG “give back to the community” mindset and corporate culture helps make a positive impact. For our employee GUESS Cares initiative, we have developed KPIs to enhance measurement and reporting of our program’s impact from year to year. We have also introduced more opportunities as related to the topics identified in our management approach, such as our partnerships with the World Stage and Homeless Industries that are both related to issues of social justice and inclusion in our community.

Reporting Requirements: None.
