# 31463H Personal and Business Finance – marking grid

#### General marking guidance

- All learners must receive the same treatment. Examiners must mark the first learner in exactly the same way as they mark the last.
- Marking grids should be applied positively. Learners must be rewarded for what they have shown they can do, rather than be penalised for omissions.
- Examiners should mark according to the marking grid, not according to their perception of where the grade boundaries may lie.
- All marks on the marking grid should be used appropriately.
- All the marks on the marking grid are designed to be awarded. Examiners should always award full marks if deserved. Examiners should also be prepared to award zero marks, if the learner's response is not rewardable according to the marking grid.
- Where judgement is required, a marking grid will provide the principles by which marks will be awarded.
- When examiners are in doubt regarding the application of the marking grid to a learner's response, a senior examiner should be consulted.

### Specific marking guidance

The marking grids have been designed to assess learner work holistically. Rows in the grids identify the assessment focus / outcome being targeted. When using a marking grid, the 'best fit' approach should be used.

- Examiners should first make a holistic judgement on which band most closely matches the learner's response and place it within that band. Learners will be placed in the band that best describes their answer.
- The mark awarded within the band will be decided based on the quality of the answer, in response to the assessment focus / outcome and will be modified according to how securely all bullet points are displayed at that band.
- Marks will be awarded towards the top or bottom of that band, depending on how they have evidenced each of the descriptor bullet points.

14	<ul> <li>Comfychair has proportionally higher gross profit and net profit figures although Bella's Bean Bags has proportionally lowed running costs (16% compared to 14% for Comfychair)</li> <li>Comfychair turns stock over more slowly. However, Bella's Bean Bags might not always be able to meet demand which could be reducing sales and profits.</li> <li>Comfychair collects payments from debtors quicker and takes longer to pay for materials which helps cash flow.</li> <li>Comfychair is established and can negotiate better trading terms. Bella's Bean Bags pays creditors too quickly so could delay this and use the money more effectively in the business. This affects cash flow and liquidity. Could be because Arabella is trying to build a reputation for Bella's Bean Bags so she can negotiate better terms of trade</li> <li>Bella's Bean Bags' liquid capital ratio is better than Comfychair's which means Bella's Bean Bags are able to meet their liabilities more easily than Comfychair</li> </ul>	12
