# 1 Executive Summary

Within the scope of the SCALE-UP (User-Centric and Data Driven Solutions for Connected Urban Poles) Project, Work Package 9 – Communication and Dissemination is intended to ensure the widest possible outreach and collaboration with Project results and findings. The activities developed under this Work Package support the communication and dissemination process, by enabling an effective promotion of the Project to the industry, governments, follow-up urban nodes, general public, academia and other relevant stakeholders.

The aim of the Communication Plan is to set clear guidelines of the respective strategies and define its main activities throughout the Project. Its result is a roadmap, which can serve all Project partners to ensure maximum visibility and create synergies beyond the Project consortium. This roadmap is to be updated on a regular basis to serve as the main reference document for any communication or exploitation activities throughout the entire Project.

The main Project activities covered by this deliverable are the development of a SCALE-UP online platform, the design and distribution of the Project's dissemination materials as well as the organisation of a yearly SCALE-UP event.

The Visual Identity Handbook (VIH) offers a practical guide and templates to homogenise all communication activities, both internal and external. It defines the written and visual identity of the Project and sets out requirements for the layout and contents of, among others, written reports, use of logos and the delivery of presentations.

Finally, a list of relevant external events is assembled and a coordinated approach to attending these events is defined. The rationale is to ensure that the SCALE-UP Project partners are informed of upcoming events in due time and their participation is encouraged, so the consortium presents insights, conclusions and challenges to platforms external to the consortium.

## 2 Communication and Dissemination Plan

### 2.1 SCALE-UP Objectives & Methodology

SCALE-UP is an Innovation Action (IA) funded under the Horizon 2020 framework programme of the European Commission (EC).

Although many different solutions have been tested and implemented across Europe, the concept of a scalable, functional, and holistic Smart City has not been made possible to this day. Unfortunately, only very few actions seem to succeed on the long-term in a highly competitive urban mobility arena. The idea behind the SCALE-UP Project is i) to rethink or alternatively rebuild mobility modes old and new, and ii) to define strategies for a simple and insured scaling up of mobility activities. These strategies are to be replicable in a wide range of different urban environments and settings across Europe.

In this context, the Communication & Dissemination Plan aims at ensuring that SCALE-UP i) defines a common communication and dissemination strategy, and ii) targets the right audiences. In doing so, this plan secures the undertaking of well-performing activities within a comprehensive and fixed (but flexible) calendar.

As a result, the Communication & Dissemination Plan will be a reference document for all partners involved in SCALE-UP. It will be regularly updated i) to allow partners to follow the work progress, and ii) to clearly evaluate the communication and dissemination priorities and the efforts to be enhanced.

The Plan follows the REACH methodology (**R**ational means, **E**nabling environment, capacity and ownership, **A**ddressed communication, awareness, prevention, **C**lear strategy and processes, **H**olistic meaning, purpose) to ensure the maximum outreach and impact possible. The effectiveness of this methodology can be assessed using a simple table, where Key Performance Indicators (KPIs) are defined and monitored in detail. Any deviations from the initial baseline can be reported in the final report at the end of the Project and during the annual Project events.

Table 1 – SCALE-UP Communication & Dissemination KPIs

Activity and Criteria	Expected Performance			
	Year 1	Year 2	Year 3	Year 4
Online platform, number of visitors	200/month	250/month	350/month	400/month
Social media, publications	24	40	40	50
Videoclips, number of	0	≥1	0	≥2
Media coverage, number of	≥10	≥20	≥40	≥50
Roll-ups, number of	≥1	≥2	≥3	≥3
Posters, number of	≥1	≥2	≥2	≥3
Newsletter, issues released	≥4	≥8	≥12	≥16
Brochures, number distributed	≥300	≥500	≥700	≥900
Technical publications, number of	≥3	≥6	≥9	≥12
SCALE-UP Events, number of public authorities attending	≥10	≥10	≥15	≥20
SCALE-UP Events, number of planning authorities involved	≥10	≥15	≥20	≥20
SCALE-UP Events, number of transport operators involved	≥5	≥10	≥20	≥30
Number of external Projects contacted	≥5	≥10	≥15	≥20
<b>Readership results</b>	<b>500</b>	<b>800</b>	<b>1000</b>	<b>1200</b>

Furthermore, some general yet ambitious principles are being followed throughout the entirety communication and dissemination work. These principles ensure that all activities do not only reach as many audience recipients as possible but that the information is presented adequately for them and therefore the information is easily accessible and exploitable:

*Table 2 - Communication and dissemination principles*

<b>Principle</b>	<b>Activities</b>
<b>User-Orientation</b>	SCALE-UP Deliverables are designed, produced and circulated within different target groups to ensure any recipient only receives relevant information.
<b>Open</b>	SCALE-UP is open to incorporate external ideas into its dissemination activities. This includes establishing links with other European initiatives and stakeholders and sharing any insights or learnings freely, by rendering them accessible to anyone.
<b>Comprehensive</b>	The declared target of SCALE-UP deliverables is to address all types of Smart City stakeholders as well as the general public. They deliver enough information to allow insights to be exploited directly by anyone and offers all learnings as well as their implications at once.
<b>Adapted</b>	A “smart approach” takes into consideration the specific interests and existing knowledge base of different target groups and to adapt the messages and communication channels accordingly. This ensures that anyone, no matter their familiarity with the topics at hand can easily comprehend and use the Project results.
<b>Global</b>	Although the key target of SCALE-UP are other European cities, a global outreach is desirable and can be achieved by exchanging with non-European initiatives and organisations. This can also help in exporting important insights to less-favoured world areas.

In line with these principles, it is important to keep in mind that almost all information related to the communication as well as the dissemination of Project results consists of encultured knowledge, which means that it contains novel insights while representing a collective endeavour from an organisational point of view. In light of this, any activity should also align with one of two different strategies, which have been identified as appropriate for the SCALE-UP Project: integration for the implementation of functional knowledge acquired during the course of this Project and transfer through exploiting existing knowledge in a new context (Tidd & Bessant, 2009).

Furthermore, considering a process model of knowledge management for innovation, it is subsequently possible to identify some concrete guidelines, which are relevant for the SCALE-UP Project and need to be kept in mind during the design and execution of communication and dissemination activities (Tranfield, Young, Partington, & Bessant, 2006):

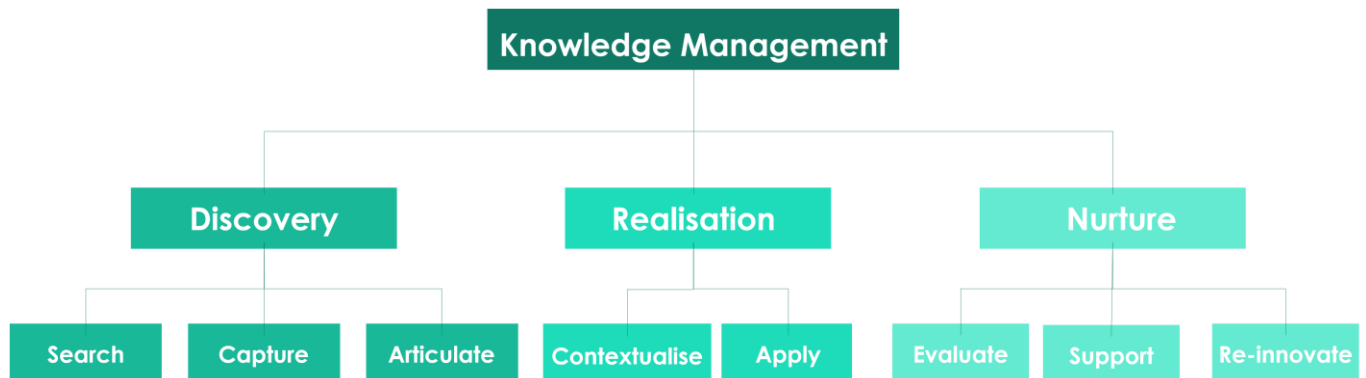

Figure 1 - Knowledge management for innovation

It should also be noted that it is crucial to incorporate megatrends such as sustainability, automation, privacy and IoT into all communication and dissemination activities to ensure a high attractiveness of the content and achieve a good engagement rate.

Finally, since all activities take place in countries with different languages, all content is available in English first, while some more important deliverables, such as some offline materials are to be translated into local languages, namely Dutch, Finnish and Spanish to ensure a widespread circulation of the information.

## 2.2 Communication Plan

Communication activities consist of targeted measures to promote all Project activities and proceedings to the general public and society as a whole. It is supposed to demonstrate how the Project tackles societal challenges and should

therefore be easy to understand for anyone. The activities carried out under this Plan also serve to demonstrate how SCALE-UP has achieved more than other initiatives and how the outcomes of the Project as relevant to citizens' everyday life. Communication activities are usually quite broad and ensure that internal highly-complex and specialised debates or findings are communicated in a straight-forward manner, which attracts as large of an audience as possible to ensure wide recognition and awareness of the Project (European Commission, 2014).

## Communication: Promote your action and results

**Inform, promote and communicate  
your activities and results**

 **Reaching multiple audiences**  
Citizens, the media, stakeholders

 **How?**

- Having a well-designed strategy
- Conveying clear messages
- Using the right media channels

 **When?**  
From the start of the action until the end

 **Why?**

- Engage with stakeholders
- Attract the best experts to your team
- Generate market demand
- Raise awareness of how public money is spent
- Show the success of European collaboration
- **Legal obligation: Article 38.1 of the Grant Agreement**

Figure 2 - Guidance on communication (European Commission)

In order to design the best possible communication strategy, it is first important to define the target audience of SCALE-UP activities and findings as closely as possible. The audience can be easily split into 7 different groups to gather a better overview of the relevant **target audience groups**.

Table 3 - SCALE-UP Communication target audience groups

Target Audience	Stakeholders	Communication Action
<b>Local</b>	City authorities, mobility & traffic departments, environmental departments, smart city agencies, traffic police, local citizens & communities, local environmental & sustainable mobility NGOs, local business organisations	<ol style="list-style-type: none"> <li>1. Social Media Accounts</li> <li>2. Dedicated e-Newsletter</li> <li>3. Project Website</li> <li>4. Project Videoclip</li> <li>5. Project Roll-up &amp; Posters</li> <li>6. Technical Reports &amp; Discussion Papers</li> <li>7. Annual Project Events</li> </ol>
<b>National &amp; Regional</b>	National & regional authorities, mobility & traffic departments, environmental departments, delegations to the EU	<ol style="list-style-type: none"> <li>1. Technical Reports &amp; Discussion Papers</li> <li>2. Annual Project Events</li> </ol>
<b>European</b>	European Commission, TEN-T corridor coordinators, European networks, European Parliament, Committee of the Regions, European Economic and Social Committee, Council of the European union	<ol style="list-style-type: none"> <li>1. Dedicated e-Newsletter</li> <li>2. Technical Reports &amp; Discussion Papers</li> <li>3. Annual Project Events</li> </ol>
<b>Press &amp; Media</b>	National & European press and press agencies, international correspondents, specialised press	<ol style="list-style-type: none"> <li>1. Social Media Accounts</li> <li>2. Dedicated e-Newsletter</li> <li>3. Project Website</li> <li>4. Annual Project Events</li> </ol>
<b>Industry &amp; Operators</b>	Infrastructure builders, service providers and operators, other related industries	<ol style="list-style-type: none"> <li>1. Social Media Accounts</li> <li>2. Dedicated e-Newsletter</li> <li>3. Project Website</li> <li>4. Project Videoclip</li> <li>5. Project Roll-up &amp; Posters</li> <li>6. Project Brochures</li> <li>7. Annual Project Events</li> </ol>
<b>Academia</b>	Academia, research centres, European & national trade	<ol style="list-style-type: none"> <li>1. Dedicated e-Newsletter</li> <li>2. Project Website</li> <li>3. Project Brochures</li> </ol>

	organisations, national professional associations	<ol style="list-style-type: none"> <li>4. Technical Reports &amp; Discussion Papers</li> <li>5. Annual Project Events</li> </ol>
<b>Related R&amp;D Initiatives</b>	European R&D Projects, R&D initiatives at national level	<ol style="list-style-type: none"> <li>1. Project Website</li> <li>2. Technical Reports &amp; Discussion Papers</li> <li>3. Annual Project Events</li> </ol>

Keeping both the target audience groups as well as the general aims of communication activities in mind, the communication plan and its eventual evaluation permit to correctly estimate the overall impact of the entire Project on the general public.

## 2.2.1 SCALE-UP Online Communication Materials

Several different digital communication channels have been created to share information on SCALE-UP and its ongoing activities and resulting insights across the Project's three Urban Nodes. Each of these channels has a slightly different focus, depending on the expected audience of each outlet.

It should be noted that all online communication materials in this Project consist of one-way communication via a mass medium. Although citizens, stakeholders or city workers have the option to communicate via email or via a private direct message on social media with the SCALE-UP team, the idea is to establish a strong presence by publishing information on the SCALE-UP channels. Collaboration with partners or members of the Urban Nodes Platform are envisioned as well.

### 2.2.1.1 SCALE-UP e-Newsletter

A dedicated e-Newsletter is created and maintained, called 'SCALE-UP In Action'. The Newsletter is published to an extensive Mailing List every 3 months and is sent out digitally. It targets some target audience groups specifically as shown in Table 3, but overall, it can be considered of interest for all target audience groups. During the first few weeks and months of the Project, the Newsletter is promoted heavily to receive as many registrations as possible for it.

## SCALE-UP In Action

Newsletter Issue #1-2021

SCALE-UP In Action is the quarterly e-Newsletter of the EU-funded SCALE-UP Innovation Action, sharing news on the progress of the project activities.

### SCALE-UP kick-off meeting held

The very first SCALE-UP Innovation Action meeting has been held digitally in June 2021.

During the three-day event, all consortium partners attended several sessions dedicated to each of the Work Packages as well as the three Urban Nodes and general organisation. Each WP leader had the opportunity to introduce their planned activities and focus.

### First SCALE-UP Activity Announced in Antwerp

A shared fleet of electric bicycles is to be launched across Antwerp Transport Region's mobility junctions.

In order to enable citizens to travel further distances with more comfort, the Transport Region has partnered with the operator Donkey Republic to deploy a large fleet of 1,650 bikes starting in spring 2022.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 955332

[Unsubscribe](#)

Figure 3 - SCALE-UP Newsletter

### 2.2.1.2 SCALE-UP Social Media Accounts

Several social media channels have been established, namely an account on the social network Twitter<sup>1</sup> (SCALE-UP Twitter Page), on the professional social network LinkedIn<sup>2</sup> (SCALE-UP LinkedIn Page) and the video sharing platform YouTube<sup>3</sup> (SCALE-UP YouTube Channel). The later channel also serves in rendering recordings of internal meetings available to WP partners, without publishing them to the wider public. In order to ensure the best possible coordination, a detailed inventory of all consortium partners' social media presence has been created and all accounts have been linked by following each other. It can be found in full in [Annex I: SCALE-UP Consortium Social Media Inventory](#)

These social media outlets are especially well designed to not only publish information for end users and citizens but also to interact with them in a more engaging way.

<sup>1</sup> <https://twitter.com/>

<sup>2</sup> <https://www.linkedin.com/>

<sup>3</sup> <https://www.youtube.com/>

While Twitter and YouTube are more targeted towards the general public, LinkedIn is a good network to interact with cities, industry partners, stakeholders and experts. All channels are to be managed on a regular basis by the WP9 coordination. A member of staff checks for related content of stakeholders or related Projects to engage with and shares, likes or publishes content on a regular basis.

### 2.2.1.3 SCALE-UP Website

To reach a wide range of citizens, a dedicated Project website (SCALE-UP Project Website) has been launched; special attention has been paid to display the structure of the Project and to providing an overall good readability:

1. **Homepage:** The homepage contains a summary of the Project, its main objectives, and some key information as well as an interactive dashboard, which displays the different activities across the Urban Nodes. As on all pages of the website, visitors can also find links to the Project's social media accounts, other pages of the website as well as a form to sign up to the 'SCALE-UP in Action' newsletter.

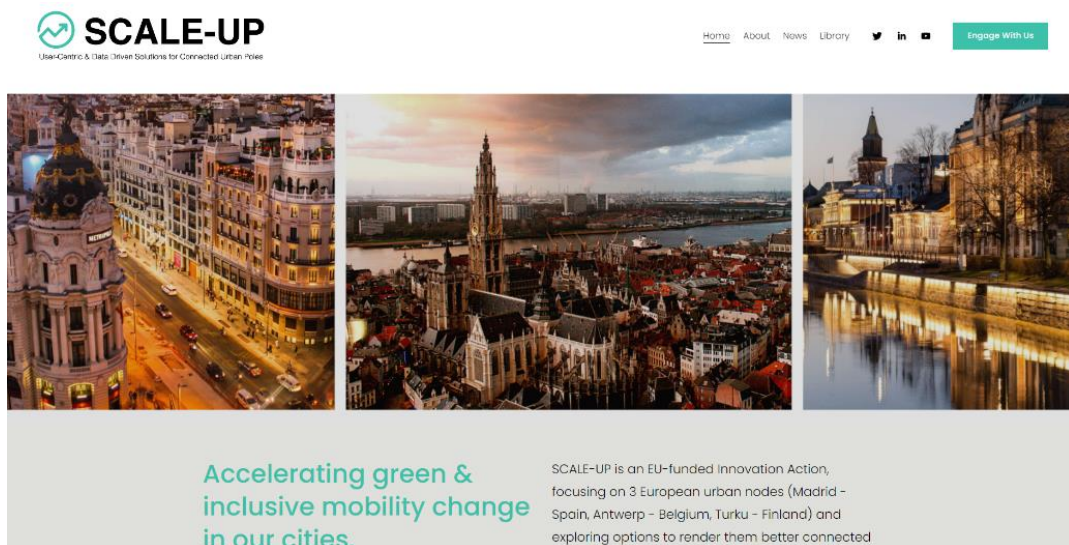

Figure 4 - SCALE-UP Website homepage introduction & social media links

Sign up to receive our quarterly newsletter "SCALE-UP In Action" and be the first to receive updates on our work & hear of upcoming events and milestones.

SCALE-UP

2021 © SCALE-UP ALL RIGHTS RESERVED.

This project has received funding from the European Union's horizon 2020 research and innovation programme under grant agreement No. 955332

Figure 5 - SCALE-UP Website newsletter registration form & social media links

**2. About:** On the top of the About page, several questions (What? Where? When?) are answered and key information, such as the duration and the support received from the European Commission, are displayed. All Work Packages as well as the general Project structure are introduced and at the bottom of the page, all consortium partners are represented with their logos and links to their respective websites.

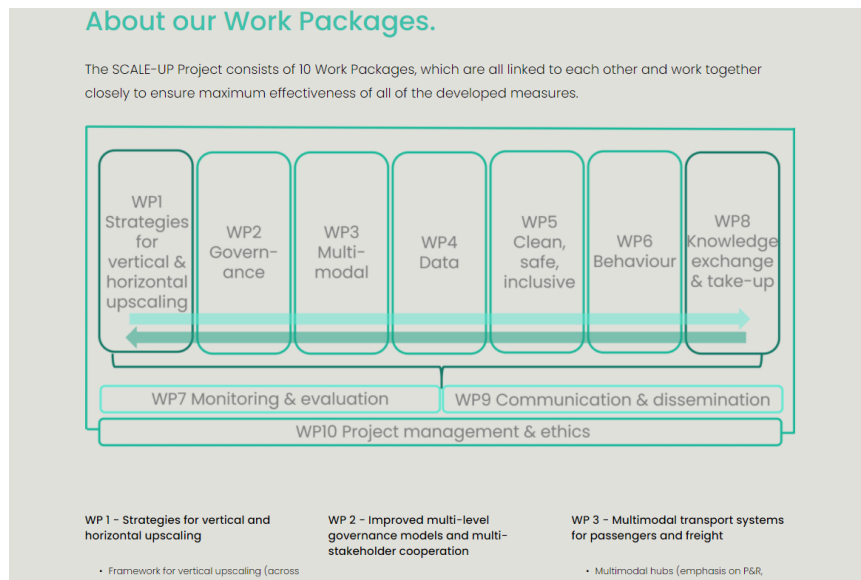

Figure 6 - SCALE-UP Website work package structure

## 23 partners – a diverse consortium.

Our consortium consists of a wide range of different partners – ranging from city and regional councils via universities to commercial partners and non-profit organisations from 5 different European countries: Finland (4 partners), the Netherlands (1 partner), Germany (1 partner), Belgium (10 partners) and Spain (7 partners).

Take a look at the complete list of partners and their respective websites:

Figure 7 - SCALE-UP Website consortium presentation

**3. News:** The news page contains a built-in blog, in which the consortium can publish its own news articles, reports on any ongoing activities. It can contain announcements, calls for collaboration or minutes to large consortium meetings. Eventually, the blog can also serve as an archive.

## Latest updates.

**SCALE-UP Urban Node Antwerp**

2021 • 16/06/2021

**SCALE-UP Kick-Off Meeting starts off**

Figure 8 - SCALE-UP Website news blog

## Meeting starts off Project on a good note

Over a course of three consecutive days, the SCALE-UP partners came together digitally for the project's kick-off meeting. During each of the sessions, the representatives and leaders presented their organisations, municipalities and Work Packages.

**Day 1** focused especially on an introduction of the Project and its organisational structure and timeline. Info sessions lead by the coordinator, [ETRA](#) were complimented by ice-breaking

Figure 9 - SCALE-UP Website news blog entry

**4. Library:** The Project's library contains any documents that might be of interest for the consortium partners or citizens. It mirrors news articles in other news outlets, printable materials such as flyers or brochures, videos and any deliverable which is released publicly. It serves as the principal and focal information point for partners inside and outside the Project and documents the work progress with exemplary transparency for the general public.

### Welcome to the SCALE-UP Library.

In our Library, you can find any and all materials you might need or be interested in relating to the SCALE-UP Project. Following an open data sharing approach, we render all of our deliverables accessible for free to you. Here you can find communication materials such as brochures, posters, videos and flyers as well as pieces of news such as press articles and research deliverables such as papers, publications or event proceedings. Once they have been published, we upload them to grant you quick and easy access.

Figure 10 - SCALE-UP Website library introduction

**5. Engagement:** The final page contains a form to sign up for the 'SCALE-UP In Action' Newsletter as well as a form to register to become a part of the Urban Nodes Platform. Visitors can also contact the consortium using a contact form, where they can directly submit any question they might have.

In order to support, complement and top the digital communication tools off, three videoclips are produced during the lifecycle of the Project, which are published on all outlets and embedded on the SCALE-UP website.

## 2.3 SCALE-UP Offline Communication Materials

Apart from the digital communication channels, several different materials for offline activities need to be designed, published, printed and distributed. The purpose of these materials consists in complementing real-life activities or meetings and draw attention to the Project's objectives as well as provide the reader with a comprehensive overview. Their challenge lies in viewers needing to grasp the concept of SCALE-UP at a glance while still understanding the underlying complexities of the Project.

### 2.3.1.1 SCALE-UP Roll-ups & Posters

Over the course of the entire Project, three roll-ups and posters will be created in regular intervals, promoting the Project's objectives and already achieved milestones and ad-hoc achievements. They are distributed among all Project partners, while some partners who participate in most events or host real-life activities open to the general public receive a higher number of materials. Roll-ups are especially useful to represent the Project in external events or during activities which are open to the general public, such as city festivals or mobility weeks. Posters on the other hand can also be hung up in public transport vehicles, offices open to the general public or distributed among partners. Both roll-ups and posters need an attractive and appealing design, which aligns with the branding described within the VIH.

### 2.3.1.2 SCALE-UP Brochures

During the entirety of the Project, 900 brochures will be printed and distributed, especially during events and on-site promotion of the Project, which are suitable for all target audience groups with a special focus on industry players & operators as well as academia. They document the most important objectives and promote achieved milestones. Since the brochures, differently from roll-ups or posters, contain more space for texts, infographics and tables, they can convey more detailed information and serve in illustrating the SCALE-UP activities, objectives and goals. Therefore, they

are especially interesting for target audience groups who are specialised or in settings where the SCALE-UP staff cannot exchange personally in detail with the audience.

## 2.4 SCALE-UP Events

Four Project events take place, once a year, and serve in exchanging within the consortium, presenting the progress made and help by including key stakeholders and gathering their feedback. Two of the events act also as events for the Urban Nodes Platform and involve experts from across Europe.

During the drafting and publication of the deliverable, the COVID-19 pandemic still heavily influences public life in Europe and it is therefore not clear whether the events can be held in person or virtually using a programme for videocalls. Although the former is more desirable as it enables participants to exchange in a more active and direct way, the organisation of a digital event is also possible.

Both the attendance as well as the hosting of own events offers a great opportunity to engage deeper into interpersonal communication, which goes both ways: feedback from stakeholders as well as citizens can help improving the Project while spreading information on the Project in a more selective and personal way.

## 2.5 Communication Editorial Calendar

All these actions can be summarised in one comprehensive editorial calendar, covering the upcoming 12 months. This editorial calendar should be revised yearly to plan all activities for the following 12 months until the end of the Project. It details potential publishing dates for news articles, newsletters, social media posts or events:

Table 4 - SCALE-UP Communication editorial calendar 1

Year	2021							2022					
Month	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun
Project month	M1	M2	M3	M4	M5	M6	M7	M8	M9	M10	M11	M12	M13
News blog	1	2	2	2	2	2	2	2	2	2	2	2	2
Newsletter			×			×			×			×	
LinkedIn	1	2	2	2	2	2	2	2	2	2	2	2	2
Twitter (own)	2	2	2	2	2	2	2	2	2	2	2	2	2

Twitter (external)	1	2	2	2	2	2	2	2	2	2	2	2	2
YouTube	1	1	1							1			
Offline materials						×							
Event									×				

The number of releases and in the case of Twitter the sharing of other accounts' contents has been predefined.

## 2.6 Dissemination Plan

Differently from communication work, dissemination activities focus rather on the coordinated distribution and the release of results and conclusions of the Project to potential users. These activities aim at promoting and spreading awareness and at enabling other stakeholders, public, academic and commercial, to make direct use of the findings for their work and services. The goal of dissemination is the exploitation of the Projects' results (European Commission, 2019).

**Dissemination:**  
**Make your results public**

**Open Science: knowledge and results (free of charge) for others to use**

 **Only to scientists?**  
Not only but also to others that can learn from the results: authorities, industry, policymakers, sectors of interest, civil society

 **How?**  
Publishing your results on:

- Scientific magazines
- Scientific and/or targeted conferences
- Databases

 **When?**  
At any time, and as soon as the action has results

 **Why?**

- Maximise results' impact
- Allow other researchers to go a step forward
- Contribute to the advancement of the state of the art
- Make scientific results a common good
- **Legal obligation: Article 29 of the Grant Agreement**

Figure 11 - Guidance on dissemination (European Commission)

Although many of the tools and activities in the previous section are also going to be used for dissemination of Project results (e.g., the library page on the SCALE-UP website or the off- and online materials), some WP9 activities are solely focused on dissemination.

The main target of the Dissemination Plan is to enable other stakeholders or urban nodes by providing them with any relevant information to act as follow-up cities and adopt, modify and implement as many of the tested measures as possible. The final goal is to simply the scaling-up of urban mobility measures across Europe and offer a viable and effective measure for any municipality.

## 2.7 SCALE-UP Urban Nodes Platform

One of these activities is the operation and maintenance of the SCALE-UP Urban Nodes Platform in collaboration with WP8 partners, which enables key stakeholders to gather insight into the Project progress, give their feedback and discuss on different tools developed by SCALE-UP. The platform is open to any industry or public body who is interested in reviewing and potentially implementing one of the SCALE-UP measures. Members are invited to share their view of the measures and propose modifications or raise concerns, ensuring that the SCALE-UP measures are taken up by as many follow-up cities as possible across Europe.

## 2.8 External Events

Finally, a number of external events have been identified and a participation of WP9 in these events for cross-fertilisation purposes has to be considered:

*Table 5 - List of external events 01*

Date	Name	Location
16/09 – 22/09/2021	European Mobility Week	Online
17/09/2021	International Conference on Transport and Smart Cities	Frankfurt (Germany)
11/10 – 15/10/2021	ITS World Congress	Hamburg (Germany)
20/10 – 21/10/2021	CIVITAS Forum	Aachen (Germany) / Online

## 2.9 Scientific publications

To directly support exploitation and disseminate towards companies, academia and specialist press, a total of twelve technical reports and discussion papers will be produced. They are published over the entire duration of the Project, and they contain the most interesting achievements and technical findings. These papers and reports establish an active academic discussion concerning urban mobility solutions and their implementation as well as their scalability across the European continent and beyond. They allow for further in-dept research and the exploration of subjects, which might only crystallise as important or innovative during the Project implementation.

- **Discussion papers** are articles which focus on delivering a summary of applicable objections and appropriate conclusions drawn from the Project through quantitative depiction of a specified topic. Their main aim is to understand a given topic more fully for a committee or commission's review.

- **Technical papers** are scientific documents, which convey information about technical research in an objective and fact-based manner, and in addition hold the potential to be published in peer-reviewed scientific magazines.

While discussion papers serve more as a platform for scientific dialogue and speculation, it is especially the technical reports that can help to maximise the impact on the scientific community at large. They are better equipped to contribute actively to the ongoing discourses around urban mobility solutions and lay out evidence to support hypotheses and quantify observations. In order to maximise their impact, the consortium will approach the publishing houses of different scientific journals as well as apply for the submission of technical papers at conferences or events. A good way to establish the consortium as a reliable and high-quality research unit, the authors of papers can apply for a peer review, which adds to the legitimisation of the publication. Peer reviewed articles are more likely to be published more frequently than regular papers or reports.

## 3 Visual Identity Handbook

This Visual Identity Handbook (VIH) serves to align the layout and presentation of all Project activities. It aims at creating a unique branding by which the SCALE-UP Project can be identified by at a glance and supports the entire consortium in developing and following a harmonised communication strategy. It comprises of templates for documents, presentations, website pages, the newsletter and the overall tone of both communication and dissemination activities. It further sets out requirements, guidelines and standards for written reports, the use of logos and the delivery of presentations.

All of the materials included in this VIH adhere to the philosophy of minimal design, which means that all of them are easily adaptable and can be integrated into other Projects', cities' or events' communication without being disruptive.

### 3.1 Colours and Fonts

The SCALE-UP Project has a distinct Project colour, which are used and repeated across all materials, deliverables and presentations associated with the Project. The selected colour is a turquoise one with the colour code #40C1AC.

Figure 12 - SCALE-UP Project colour

For any kind of written deliverable, the font Century Gothic is used, which is based on simple geometric shapes and is easy to read quickly and even from a larger distance.

Century Gothic

ABCDEFGHIJKLM  
NOPQRSTUVWXYZ  
abcdefghijklm  
nopqrstuvwxyz  
1234567890

Figure 13 - SCALE-UP Project font

## 3.2 Logos

Two different logos have been developed and transferred also into different colours. The symbol of the logo is based on three main principles, which represent the SCALE-UP philosophy at a glance:

- *Upward lightning*: Representing energetic up-scaling of solutions, development and innovation.
- *Circle*: Stands for a holistic approach and circular (sustainable) mobility solutions.
- *Turquoise*: The clear contrast offers dynamics and clarity, while being distinct from other logos. It also highlights the ecological character of the Project.

One version of the logo is a so-called favicon, which consists simply of the logo without any text and can be used for social media channels or to watermark documents.

Figure 14 - SCALE-UP Favicon logos

Furthermore, a second set of logos had been created, which also displays the full name of the Project and is more suitable to add branding to presentations, websites or other official deliverables of the consortium.

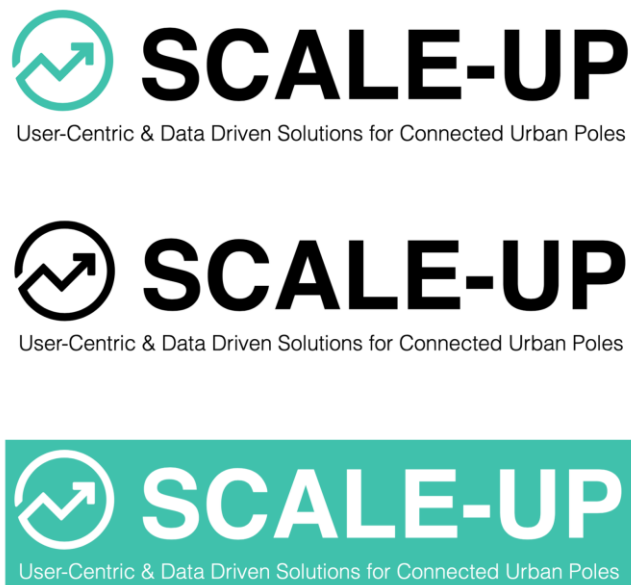

Figure 15 - SCALE-UP Logos

### 3.3 Written Report Template

All the written reports produced within the SCALE-UP Project follow the same unified formatting in order to easily identify the origin of any document. In particular, a template with a unified SCALE-UP format has been created and circulated among all of the consortium partners. The current document also follows this format.

Although *Annex II: SCALE-UP Written Report Template* contains the full template, the following figures document the most important and striking layout details.

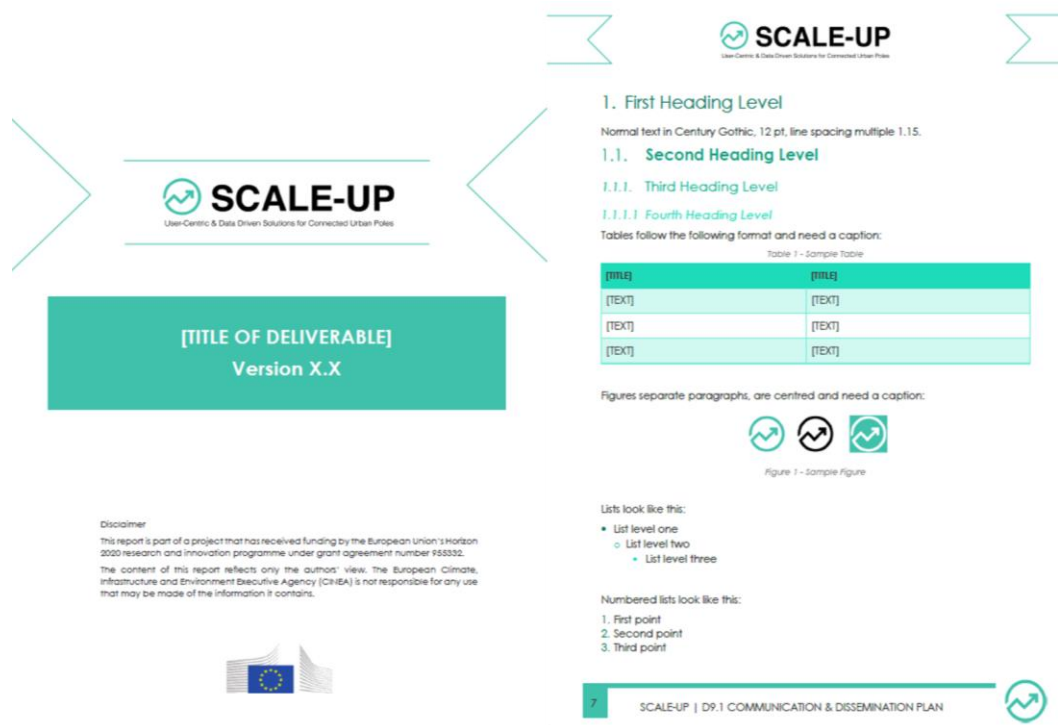

Figure 16 - SCALE-UP Written report template page 1 & 7

## 3.4 Presentation Template

When delivering presentations at conferences, international events or for internal WP meetings, all consortium partners should make use of a PowerPoint template to represent the SCALE-UP Project in a consistent and professional manner. The slides consist of various different layouts, spanning from those displaying only text or pictures over various graphs and table samples to complex infographics, illustrating objectives, timelines, figures and data. These slides can be filled with relevant outputs of the Project and have been branded with the SCALE-UP logo and colours. Furthermore, the presentation has received a special and individualised touch through custom icons and infographics, which set it apart from other presentation layouts. Although the complete PowerPoint template is included in *Annex III: Presentation Template*, the following figures illustrate the different slide functionalities available.

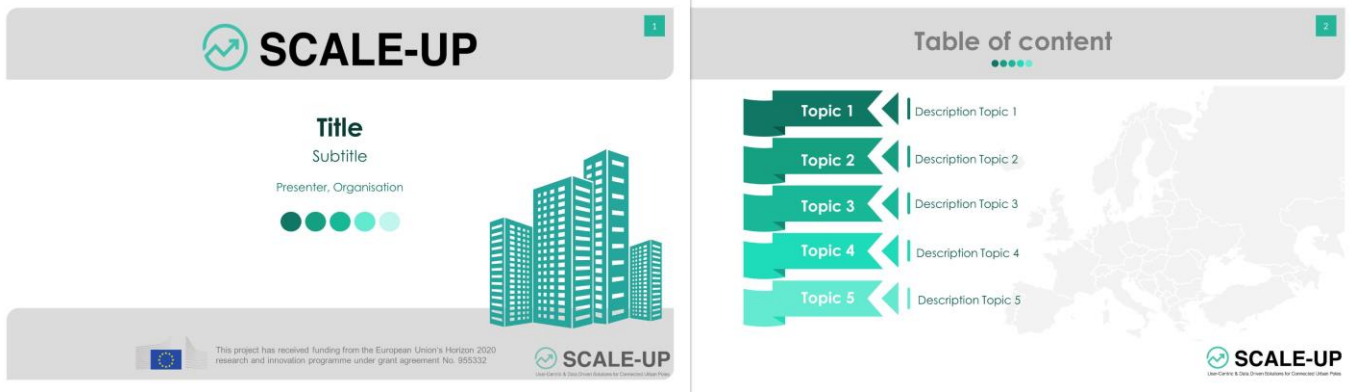

Figure 17 - SCALE-UP Presentations template slides 1 & 2

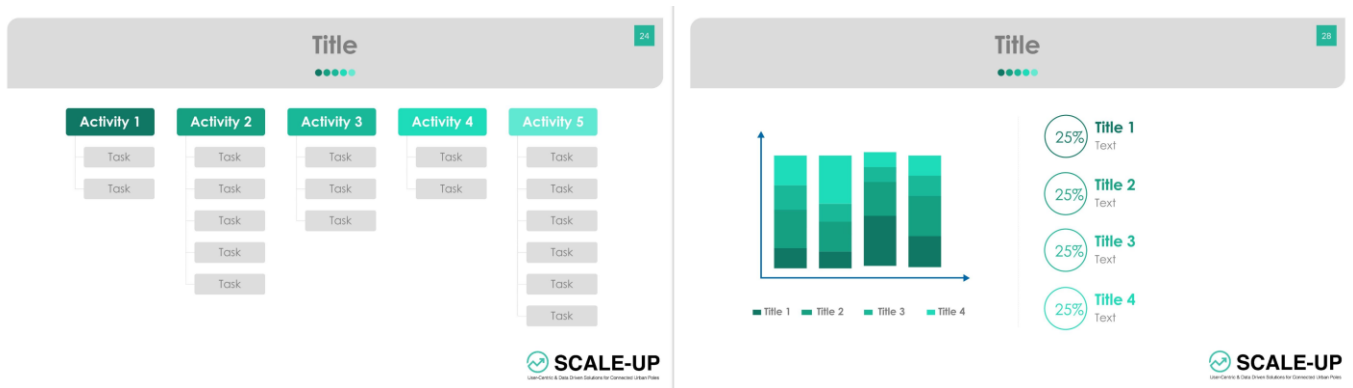

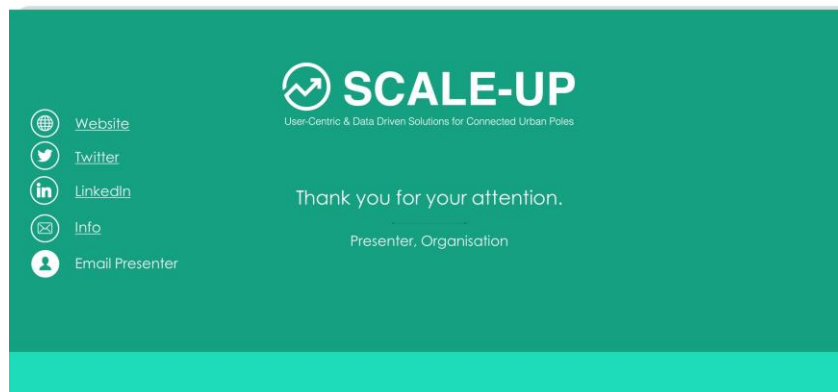

Figure 18 - SCALE-UP Presentations template slides 24 & 28

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 955332

Figure 19 - SCALE-UP Presentations template slide 65

## 4 Conclusions

The SCALE-UP communication and dissemination tools and materials represent a key element in the development of the Project's overall strategy. The tools defined and mentioned in this document are to be developed under the Project brand identity and follow all guidelines defined in section 2.1. These tools contain a wide range of graphic and visual elements, which are to be further enhanced as the urban mobility measures are implemented over time.

Another concern is the language of the materials – while the online communication tools are available mostly in English, with some Dutch, Finnish or Spanish information available, the offline materials will need to be translated into the respective local language of each Urban Node. This ensures that citizens in the participating cities can understand all activities and actively partake in the Project.

The entire SCALE-UP consortium is expected to contribute during the production, development and dissemination of the communication and dissemination tools on the base of the Project description of action.

All tools, as well as calendars, are to be updated on a regular basis, but at least yearly to ensure that activities for the following 12 months are always clear and planned to ensure that all relevant partners can take part in them.

A final report will be published at the end of the Project to document all changes or modifications made and report on the implementation of the Project activities. In this report, the effectiveness of all activities is compared to the original list of KPIs and their success is measured with quantitative datapoints.

## 8 Annex III: SCALE-UP Presentation Template

The presentation template includes the following slide types:

- Slide 1:** Title slide with SCALE-UP logo, title, subtitle, presenter/organization, and a building illustration.
- Slide 2:** Table of content with a list of 5 topics and their descriptions, accompanied by a map of Europe.
- Slide 3:** About Us slide featuring a collage of urban scenes.
- Slide 4:** A large image slide with the text "SCALE-UP OUR APPROACH" and "SCALE-UP USER-CENTRIC & DATA DRIVEN SOLUTIONS FOR CONNECTED URBAN POLES".
- Slide 5:** Another large image slide with the text "About Us" and an illustration of people using a scooter and bicycle.
- Slide 6:** A slide with a cityscape illustration and the text "SCALE-UP TITLE".
- Slide 7:** A slide with a flowchart showing a sequence of milestones and activities.
- Slide 8:** A slide with a progress bar chart showing four activities with varying completion levels.
- Slide 9:** A slide with a Gantt chart showing task durations across a year (Jan to Dec).
- Slide 10:** A slide with a table showing a comparison of 5 runners across 5 tasks.
- Slide 11:** A slide with a table showing 4 facts across 4 columns.
- Slide 12:** A slide with a staircase diagram showing 4 steps.
- Slide 13:** A slide with three activity boxes labeled Activity 1, Activity 2, and Activity 3.

The infographic templates are arranged in a 5x4 grid. Each template includes a title, a subtitle, and a main visualization area. The visualizations include:

- Row 1:** A circular process diagram with 6 segments; a process flow with 'Start', 'Process', and 'End' steps; a horizontal sequence of 5 points; and a circular flow diagram with 4 nodes.
- Row 2:** A pyramid chart with 4 levels; a circular flow diagram with 4 nodes; a Venn diagram with 3 overlapping circles labeled 'ELEMENT ONE', 'ELEMENT TWO', and 'ELEMENT THREE'; and a horizontal flow diagram with 3 steps.
- Row 3:** A 4-step process flow with numbered steps; a 5-step process flow with numbered steps; a lightbulb icon with 3 numbered points; and a list of 4 items next to a bar chart showing 50%.
- Row 4:** A list of 7 items with corresponding results; a 6-step process flow with numbered steps; a bar chart showing 45%, 65%, and 35% values; and a circular flow diagram with 6 nodes.

Each template also features the SCALE-UP logo and a small 'SCALE-UP' text element in the bottom right corner.
