# Acrylic Art Care & Installation

CARE
Your Acrylic Art should only need occasional gentle dusting with a non-abrasive cloth. To remove any dirt or streaks, use a small amount of mild soap with water and rub gently with a clean, soft cloth. Follow up with a clean, damp cloth and dry by blotting with a soft cloth. Never use any products that contain ammonia or alcohol as they will damage the acrylic. Novus #1 Cleaner can be used for cleaning acrylic to a beautiful glossy shine.

Proper storage is a key factor in minimizing the possibility of warping or edge curling. Store your art flat until ready to hang. Standing or leaning your art for long periods of time prior to hanging may cause art to cold form or take the shape of the uneven surface.

NOTE: Do not use paper towels or other rough materials. Never get the back of your Acrylic wet.

INSTALL French Cleat System
Step 1: Use a level to place the unattached French Cleat in the desired position. Using a pencil, mark two holes on the wall. Drill pilot holes in the center of each circle and insert wall anchors. We recommend a 3/16" drill bit.
Step 2: With the sharp point away from the wall and pointed upwards, mount the French Cleat to the wall using the two 1/8" screws.
Step 3: Hang the French Cleat attached to your product onto the bottom half mounted to the wall. Your Acrylic Art now locked firmly in position.

INSTALL Stainless Posts
Your Acrylic Art comes with four pre-drilled holes for Stainless Post assembly

Step 1: Using a level, place your Acrylic Art against the wall in the desired location and trace the four holes with a pencil.
Step 2: Drill pilot holes in the center of each circle and insert wall anchors. We recommend a 3/16" drill bit.
Step 3: Using a Philips screwdriver, insert the included screws through the Stainless Post barrels and into the wall anchors.
Step 4: Place your Acrylic Art against the Stainless Post barrels and insert the Stainless screw caps through the hole in the barrels. Hand tighten to secure the art piece.
