GRADE: 10
Lesson 2

TIME:
One class period

LESSON FOCUS:
Parenting Attitudes, Decisions and Adjustments

STATE STANDARD:
11.5 The student will express his or her own attitude toward parenting.

DESCRIPTIVE STATEMENT:
This centers on the student's own opinions about parenthood - possible reasons for becoming a parent, realistic role expectations for parenthood and parental responsibilities. It also includes discussion of the responsibilities of parents who have children with characteristics that may be displeasing to the parent(s). Students will demonstrate the skills needed to utilize positive mental health practices in parenthood.

STATE STANDARD:
11.8 The student will identify parenthood options in terms of questions to be answered and decisions to be made.

DESCRIPTIVE STATEMENT:
Discussion includes readiness to be a parent; family planning issues and spacing of children choices resulting from infertility, genetic factors, and birth defects; and expenses associated with parenthood. Discussion also includes the positive aspects of parenting for the individual and for society.

STATE STANDARD:
11.13 The student will calculate the personal considerations and financial costs of childbearing.

DESCRIPTIVE STATEMENT:
This includes the following considerations: the economic costs of raising a child, including the expenses of medical care before and after pregnancy; the costs of educating a child; the social considerations, including the investment of time and energy needed for quality child care; and the opportunity considerations, such as staying home to care for a child rather than pursuing an education or a career. This is balanced with discussion regarding the rewards of having children.
STATE STANDARD:

11.11 The student will describe the adjustments family members face in the postnatal period.

DESCRIPTION STATEMENT:

Adjustments to be considered include how the baby’s needs affect other family members and their schedules. Consideration is given to the expectations of relatives and to adult needs for privacy, recreation, and time with other children. The issue of sibling rivalry is also discussed.

LEARNING TARGET:

I can identify and describe responsible attitudes and approaches to parenting decisions.

KEY TERMS:

- Parenthood/parenting
- Positive mental health
- Baby blues
- Mood disorders
- Bipolar
- Anxiety
- Postpartum psychosis
- Family Planning
- Infertility
- Ovulation disorder
- Pregnancy-induced hypertension
- Prenatal care
- Low birth weight
- Postnatal period
- Psychological adjustments

MATERIALS NEEDED:

- LCD Projector
- PowerPoint
- Placemat Consensus worksheet
- 4A’s Protocol handout
- Concentration game cards

Videos and Links:

- TLC Video (to 4:43): https://www.youtube.com/watch?v=xu4x2s4ulpI

Grade 10 Lesson 2
• Kahoot sign in and project on LCD projector so kids can get code.
  o If not already registered, teacher must sign up for a FREE Kahoot account before the lesson.
  o Go to getkahoot.com and go to Get My Free account. Go to “find kahoots” and search for this lesson Kahoots (the Kahoot link will be found within the PowerPoint presentation).
    Click on the link and it will take you to the Kahoot sign it page.
  o Kahoot quiz (if unable to access the online version)

LINK (activate prior knowledge/lesson intro.)

Open the PowerPoint presentation- The lesson will be taught using the presentation with the lesson strategies, video directions and activities embedded within the PowerPoint.

1. Lesson introduction: Slide 1 – Introduce the lesson and learning target.
2. Bell Ringer: The questions on slide 2 can be used as a quick Think/Pair/Share activity to get them thinking about the topic of what it takes to have a child. Use the script in the notes of the PowerPoint.
3. Lesson introduction: Slide 2 – Introduce the lesson and learning target.
4. Introduce the concept of what the costs are to having a child with this video (Slide 3):
   https://www.youtube.com/watch?v=xu4x2s4ulpl
   Click on the link on the slide to begin the video. As students view the video, have them complete a 4 A’s Protocol (see attached sheet). Once completed, have students share in a whole-class discussion.

ENGAGE AND EXPLAIN (direct instruction/guided practice):

• Take students through slides 4-10. Use the script in the notes section of the PowerPoint.

ACTIVE LEARNING (collaborative learning/work):

Slide 11- KAHOOT GAME- this will serve as a review of the previous slides.

The students will log in to the Kahoot website and enter the code to play (a new code will show up each time you play the game.) The name of the Kahoot is FAMILY LIFE 10TH GRADE LESSON 2. The directions for pulling up the Kahoot are on slide 11. Kahoot in quiz format has 10 questions, two on each printout.

Following Kahoot game, read script in notes section of PowerPoint for slide 12.

ENGAGE AND EXPLAIN (direct instruction/guided practice):

1. Have students participate in a Think-Pair-Share to brainstorm the following prior to showing slide 13: What are the risk factors which increase stress during pregnancy and in early parenthood?
2. Review slide 13 using the script in the notes section of the PowerPoint. Particular emphasis should be placed on HOW to maintain positive mental health in the face of some of the challenges listed on the slide. Have students provide some suggestions for how to do so throughout the discussion.
3. Use the notes in the script of the PowerPoint to review slides 14-17.
ACTIVE LEARNING (collaborative learning/work)/REFLECTION (individual work)

Slide 18- Group work- Placemat consensus:

Put the students into groups of 3 or 4. Give each group a Placemat Consensus handout and have them write their understanding of the topic in the square directly in front of them for 20 seconds. Have them rotate the paper so a new square is in front of them. Repeat until each person in the group has written in each square. You can go around 2 times if necessary. Have them discuss the answers they came up with as a group. Have them assign one person to share out 1 of the areas to the class.

LESSON CLOSURE:

Concentration game as a review using slide 19, students will work in teams of 3-4 to play as teacher facilitates the game.

INSTRUCTIONAL STRATEGIES

Think/Pair/Share
a. Step 1: Think individually think about the following (1-3 minutes):
   • What information do you need to solve the problem?
   • What information do you already know?
   • What tools and strategies could you use?
   • What questions do you need to ask your group?
b. Step 2: Pair with a partner, jot down ideas to help you get started with the problem (1-3 Minutes).
   You may use any of the tools provided in the classroom.
c. Step 3: Share, take turns sharing ideas in a larger group (1-3 minutes.)

As students watch the video, they should record on their 4 A’s Protocol sheet the following:
• What assumptions do you hear from the narrator?
• What do you agree with?
• With which ideas would you argue?
• What actions are necessary in parenting?
Four A’s Text Protocol
Costs to having a child video

1. What **assumptions** do you hear from the narrator?

2. What do you **agree** with?

3. With which ideas would you **argue**?

4. What **actions** are necessary in parenting?
