BRANDS

EXPORT CANNABIS DIVISION

OVERVIEW.

Avant Brands Inc. is a Kelowna-based company which cultivates premium quality cannabis in purpose-built indoor facilities. Avant has five licensed and operational cultivation facilities and approximately 200 employees. The company sells across three primary distribution channels: Domestic Recreational, Export and Medical. Avant cannabis is marketed and sold under its trademarked brands: BLK MKT, Flowr, Tenzo, Cognōscente, Treehugger and GreenTec. Avant is a publicly traded corporation, listed on the Toronto Stock Exchange (TSX: 'AVNT'). Avant is currently generating approximately \$33 million in annual sales.* In September 2023, the Globe & Mail ranked Avant 49th on its list of the 425 fastest growing companies in Canada.

Avant's reputation for cultivating the finest quality cannabis flower is ideally suited for pursuing international markets. Accordingly, the Company has been exporting cannabis flower since 2021, generating 33 export shipments with an aggregate value of \$18 million. The Company's primary export markets are Israel, Australia and Germany. Avant's three largest facilities hold GACP and ICANN-GAP certifications from the IQC (Institute for Quality & Control) in Israel. These facilities serve as the Company's export hubs – shipping bulk premium flower to international clients while maintaining rigorous regulatory and environmental controls.

Sungrown.
Organic.
Craft.
Eco-friendly.

Avant has trademarked its flagship BLK MKT™ brand in various international markets (e.g. Israel, Australia, Germany) facilitating trademark licensing deals with key partners.

PREMIUM HANDCRAFTED FLOWER.

Superior genetics
& unique, exotic cultivars

Large, robust & aesthetically
appealing flower

Highly visible and abundant
trichome crystals

Complex and aromatic
terpene profiles

Flushed to ensure a
smooth and cleaner burn

Absence of seeds,
stem & excessive leaf

Optimal moisture and
humidity control

Delicately handled &
packaged by hand

CULTIVATION.

INDOOR ADVANTAGE

Indoor cannabis consistently outperforms alternative cultivation models to produce the highest quality cannabis flower. Our incremental revenue per gram associated with producing such product offset the higher costs associated with indoor growing. This facilitates some of the highest average selling prices and gross margins in the sector.

ADVANCED ENVIRONMENTAL CONTROLS

Adaptive fertigation & environmental management maximize yield, quality, and ensure complete control over temperature, humidity and CO2 levels. Extensive oversight and controls built into our fertigation and environment systems help ensure optimal production.

PURPOSE BUILT

Each of our facilities features specialized lighting systems, best-in-class equipment and optimal energy efficiency. We build our facilities with one purpose: to produce the highest quality products in the legal market.

CULTIVATION.

EXPERIENCED CULTIVATION TEAM

Our seasoned cultivation teams have decades of combined experience and have earned a reputation for consistently producing exceptional cannabis.

EXCLUSIVE CULTIVARS

The importance of genetics cannot be overstated. Avant has acquired a diverse portfolio of ~75 cultivars, including numerous unique and rare exotic strains. Furthermore, the company utilizes in-house tissue culture technology to help maintain genetic integrity over time.

HANG-DRIED, HAND-TRIMMED & HAND-PACKAGED

Meticulous post-harvest techniques are used to optimize moisture, cannabinoid and terpene profiles, coupled with a meticulous approach to packaging, allow us to deliver a first-rate customer experience.

QUALITY ASSURANCE.

QUALIFIED QA PERSONNEL

All Avant facilities have dedicated Quality Assurance and Sanitation teams led by highly experienced QA professionals. Moreover, all Quality Assurance Persons (QAP's) are approved by Health Canada.

STANDARD OPERATING PROCESSES (SOP'S)

Avant facilities utilize highly detailed SOP's to help provide optimal control and consistency over all cultivation, processing, packaging, testing and sanitation processes.

MULTIPLE AUDITS

All Avant facilities are audited by Health Canada and the Canada Revenue Agency (CRA). In addition, Avant's three largest facilities undergo 3rd party audits by NSF on behalf of the Institute for Quality and Control (IQC). As a result, these facilities hold GACP and ICANN-GAP certifications to facilitate international cannabis exports.

EXPORT FLOWER.

Avant flower is carefully sorted and packaged into 1KG ALU-PET bags for export to our international clients. We work closely with our logistics partners to ensure that the product is well protected in transit. This includes multiple measures to control and monitor temperatures during the air freight process.
