

Resume

Luc Dini

Graduated Engineer in Aeronautics, skilled in radars, hyperfrequency, missiles and space (ISAE-ENSICA 1984).

Luc Dini is a former auditor of the IHEDN-CHEAr (Institut des Hautes Etudes de Défense Nationale- session armement économie de défense) 44th session at the French Ecole Militaire (SN44) and of IHEDN Economic Intelligence Session (2017). LTC armament (in DGA citizen reserve).

Emerite member of Association Aéronautique de France (3AF)- co chair of the 3AF International Conference on IAMD – chairman of the 3AF SIGMA2 Technical Commission on UAP.

Experience: 37 years in aeronautics, space and defense

Luc Dini is a former military engineer who started his career in the French MOD DGA, where he had conducted R&D and experimentation programs including flight tests for Missile Defense and Ballistic Missiles countermeasures. He also coordinated DGA activities on signatures and stealth phenomenology. During that time he had served one year as a firing officer in the French Air Force on Crotale SAMs battery.

Luc Dini had participated to international cooperations and export projects, including scientific cooperation with the US SDIO and the Air Force Geophysics Laboratory on high atmosphere radiation physics.

He then joined the aerospace defense industry domain in 1991, where he had conducted advanced studies on antimissile systems, international large export projects on Air Defense systems, Electronic Warfare and Battlefield surveillance. He then has been working on Air and Missile Defense since 2005.

As a member of Association Aéronautique et Astronautique de France (3AF), he has been co-chairman of the International IAMD Conference since 2008. He represented 3AF in different international events on Missile Defense in Russia (Missile Defense Conference- cooperation or confrontation), USA (Missile defense Exhibition at NATO summit in Chicago) in 2012 and worked with the Atlantic Council US on innovating cooperation themes. He has been chairing NATO Study Groups. He is also member of the NDIA Multinational BMD conference International Program Committee since 2006 (previously supported by the AIAA).

Luc Dini has delivered many papers and international conferences on Missile Defense over the past 25 years with a specific interest into European and transatlantic cooperations. As part of AACHEAR (IHEDN/ CHEAr think tank) and 3AF, he has also conducted studies on international matters and strategy and participated as an expert to wargames on BMD and Deterrence with the London King's College and the UK Shrivenham war school research department on strategy.

Luc Dini is chairing the 3AF Technical Commission SIGMA2 studying the Phenomenology of Unidentified Aerial Phenomena (UAP) since 2013. He took part to different conferences and events on ball lightning, UAP CNES CAIPAN event, briefing to Institut National des Hautes Etudes et Techniques (INHEST) and to the UFO documentary, Flying objects a secret of State. He is a member of the college of experts of CNES/ GEIPAN.
