**Background:**

The Music Managers Forum in the United States (MMF-US) is the largest community of professional artist managers in the United States. MMF-US provides a platform to connect, enhance, and reinforce the expertise and professionalism of music managers, as well as to educate and effect change for the betterment of managers and their artists. While many up and coming managers cannot easily have their voices heard or their views recognized, the MMF-US plays a vital role in educating artists and managers and ensuring that the industry evolves fairly and profitably for artists and their businesses. It is the goal of the MMF-US to make sure artists and their representatives are connected in a network as the industry continues to evolve, MMF-US endeavors to help its members to stay ahead of the curve.

The MMF-US has been instrumental in building awareness, supporting policy change to improve artist recognition and compensation, and holding those who account to artists responsible by improving royalty growth and accountings, exploring solutions to data challenges, and encouraging innovation in the music ecosystem.

Key missions are:

- Education and Training
- Access to Finance
- Fairness and Transparency
- Plurality and Diversity

The MMF-US is also one chapter in a larger global network of the IMMF (International Music Managers Forum, with members across Latin America,
Asia Pacific and Europe) -- Being involved in a larger global network with the ability to connect to artist managers across various business opportunities globally, share information on a worldwide basis, and collectively speak with one voice in areas of importance, such as with streaming services and other platforms, can vastly benefit the businesses and careers of managers and their artists.
