Research Analyst
Full-time/Internship (In-person/remote)

Company Description

OP Crypto is a $50mm+ venture fund dedicated to supporting early stage (pre-seed and seed) projects across the Web 3.0 space, including DeFi, Metaverse/GameFi, DAOs, and infrastructure layers. We're backed by top tier institutional players such as Huobi, Bybit, Galaxy Vision Hill, Digital Currency Group, and Republic, in addition to many notable crypto-native angels. The team has extensive experience in the crypto space as both investors and power users. Our General Partner David Gan led project incubation at Huobi Labs and overseas investment at Huobi Capital for the last three years, bringing projects such as Polkadot, Terra, and Algorand to the APAC market.

Responsibilities

You will be working directly with Research Lead and the General Partner of the firm

- Develop a personalized research process that involves qualitative and quantitative analysis to identify the latest industry trends, market changes, and new innovations across blockchain industry
- Produce original research with reasoning through the emerging trends in the space and identifying non-obvious opportunities for deployment of capital
- Provide critical feedback and resources to our deal team and portfolio companies
- Due diligence investment opportunities, produce investment memos and present to the research and deal team
- Maintain the repository of relevant project files, research reports, presentations, etc.

Requirements

- Undergraduate degree or above from globally renowned universities; technical background (e.g. computer science, electrical engineering) preferred
- Solid understanding of crypto-economics and blockchain technologies generally, ability to understand some technical aspects of DeFi/Blockchain projects and whitepapers preferred
- Sharp analytical mind with a killer instinct to identify thematic trends in the market
- Able to explain complex concepts in simple terms to a non-technical audience
- Obsession with the future of blockchain technology, web3, and low-level protocol development
- An open-minded research approach and genuine intellectual curiosity

Application

- The team culture is collegial and unique. You will have access to the top minds in the blockchain industry. If you are interested, please send your resume with the subject line "[Research Analyst Application] Name-School-Major-Graduation Year" to **career@opcrypto.vc**
