OK. Everything is tentative at this point, and I can't be specific about timelines, but here's what we're cogitating on:

Pillar Point Harbor

- West trail and parking lot erosion control/repair
- Johnson Pier below-deck utility line replacement, etc.
- Recreational fishing pier jetty rip rap repair
- Fish-buyers building painting
- Boat launch ramp maintenance dredging
- Boat launch ramp roadway slurry seal
- Perched Beach bulkhead and expanded beach access EIR
- New administration office alternative (non-perched beach) sites examination (all in the inner harbor)
- Surfers Beach erosion control planning
