Re: Subcommittee Recommendation
Streets Surveys for the MidCoast

Dear President Lempert:

The Department of Public Works has worked long and hard to produce the Montara street improvement projects for 5 th - 8 th and 11 th - 14 th streets.

The MidCoast Community Council subcommittee worked closely with Mr. Cullen and his department to finalize these two projects. As complicated as the process has been, we feel the citizens have now been heard, and the Community will benefit from these improvements. The process is now developed and each succeeding project should move along efficiently.

The MidCoast Community Council subcommittee asks that the Board examine the work of the Department and approve their recommendations as presented.

Very truly yours,

April Vargas
Chair, Streets Subcommittee

James Marsh
Chair, MidCoast Community Council
