Hi Sam,

I had difficulty translating the colors shown in the legend to the colors shown by the maps. For example, we are still evaluating alternative alignments for the parallel trail segments adjacent to the airport (i.e., east or west of Hwy 1), and at the south end of Montara (i.e., along Farallone or Main). The maps do not appear to reflect this fact.

Why is there no coastal edge strand of the coastal trail between Columbia and Capistrano in Princeton (e.g., slide 5)? While current physical constraints may be significant, we should preserve the possibility that the ultimate solution to the shoreline erosion problem (TBD by the Princeton Planning Effort) could provide continuous lateral shoreline access.

What is the alignment of the CT between 2nd and 10th streets in Montara (Slide 8)? I assume along Main St.

What is the "property issue" associated with use of the Strand (Slide 18)?

Thanks,

Steve

Steve,

Appreciate any comments by no later than 10/4/12. Thanks!

Sam

Steve,

Appreciate any feedback on this Draft CA Coastal Trail Conceptual Plan for the Midcoast from Princeton to Pacifica, and any overlap with the Highway 1 Safety and Mobility Improvement Project Phase II. Len has told me he has consulted the Draft document on the website, and discussed with you Airport Road, but I'd like your feedback if there any concerns or suggestions for clarification on this Draft document. Thanks!

Sam

Dear Midcoast Park and Recreation Action Plan Committee,

The Conceptual Plan for the CA Coastal Trail from Princeton to Devils Slide has been posted on the Midcoast Community Council website for downloading in preparation for the 9/11/12 meeting.

Sam Herzberg, Senior Planner

San Mateo County Department of Public Works and Parks

Hi Sam,

The CCT draft and an announcement on the MPRC meeting is on the MCC home page.

Regards,

Len Erickson
