\* Represent list of road projects in the Mid-Coast area for the 2016 construction season.

\*\* Cape Seal – an application of asphaltic emulsion (road oil), immediately followed by an application of small rocks called “chips” to the roadway surface – followed by a slurry seal (a mixture of asphaltic emulsion and sand sized aggregate) approximately one week later to the road surface.

Slurry Seal - a mixture of asphaltic emulsion and sand sized aggregate applied to the existing roadway surface.

\*\*\* The truncated domes shall be gray in color, where handicap accessible ramps are to be installed.

**Green Infrastructure Projects:**

<b>Project Description</b>	<b>Status</b>	<b>Anticipated Timing</b>
Carlos Street Green Infrastructure Project (from California Avenue to Virginia Avenue)	In 2015, the County completed road improvements in the Seal Cove area of Moss Beach, including installation of low impact development (LID) features for storm water, such as vegetated swales, to conform to the Provision C.3 requirements of the Municipal Regional Stormwater Permit (MRP). However, not all required volume of stormwater runoff could be treated at the Project site. This project will install bioretention basins to treat the equivalent of the remainder for the stormwater runoff volume under the Provision C.3 Alternative In-Lieu Site provision.	Completion in Fall/Winter 2016
Maintenance of BMPs at 17 locations that contribute storm runoff to the Fitzgerald Marine Reserve Area of Special Biological Significance (ASBS)	From 2012 to 2014, the Department of Public Works (DPW) installed and constructed BMPs (e.g., vegetated swales, bioretention features, catch basin filters) in Montara, Moss Beach, and Seal Cove. These BMPs will require ongoing maintenance. The following website has information about the ASBS: <a href="http://smchealth.org/asbs">http://smchealth.org/asbs</a>	Ongoing
Mitigation (invasive plant removal) at 8 previous channel maintenance locations (PLN2009-00276)	<p>In 2015, DPW conducted channel maintenance at the following locations:</p> <ul style="list-style-type: none"> <li>• Montara Creek at George Street, Montara</li> <li>• Montara Creek at Harte Street, Montara</li> <li>• Dean Creek at Sunshine Valley Road, Moss Beach</li> <li>• San Vicente Creek at Etheldore Street, Moss Beach</li> <li>• San Vicente Creek at Cypress Ave, Moss Beach</li> <li>• Tributary to Pillar Point Harbor at Sonora Avenue, El Granada</li> <li>• Tributary to Half Moon Bay at Obispo Road and Avenue Portola, El Granada</li> <li>• Tributary to Half Moon Bay at Obispo Road, El Granada</li> </ul> <p>Per the approved Habitat Mitigation and Monitoring Plan, biannual invasive plant removal in May and September is required at each location through 2020.</p>	Ongoing
