Re: San Mateo County Harbor District's Pillar Point Harbor Strategy for Dredging, Erosion Control,  
and Dredged Material Reuse

Dear Madeline:

As you know, the Harbor District is committed to exploring alternative locations for placement and reuse of dredged material at Pillar Point Harbor in connection with future harbor dredging episodes. The enclosed Strategy document articulates the District's commitment regarding dredging, erosion control, and dredged material reuse challenges, opportunities, timelines, and locations.

We welcome your comments on the strategy. In this regard, we will contact you to set up a meeting to discuss two priority new projects for which we hope to begin the permit process soon. These are (1) shoreline erosion control along the West (Mavericks) Trail with possible reuse of suitable dredged material from (2) maintenance dredging of the Inner Harbor boat basin. This responds to your thoughtful request for early communication at the project outset to facilitate the process.

Sincerely,

Peter Grenell  
General Manager
