

Critical Areas within Parallel Trail

Len Erickson – February 13, 2013

Within the major segments used to identify the parallel trail are sections which are critical in terms of use and safety for Midcoast residents. It is important to insure that these areas will receive first priority in trail implementation planning.

Montara – Moss Beach Carlos St. – 14th St.

This section crosses a ravine and traverses three streets (Carlos, 16th, 14th) that enter Highway 1. The trail needs to provide a continuous path safely removed from the Highway.

Miramar – Coronado Medio – El Granada School

This section provides an effective connection between El Granada School and Miramar.
