

Type 1 Medications

(Secure prescription form required)

Buprenorphine

- BuTrans
- Vetergesic

Butalbital Preparations

- Fiorinal
- Fiorinal C ¼ & C ½
- Teva-Tecnal C ¼ & C ½

Butorphanol

- Apo-Butorphanol
- Dolorex
- Torbutrol
- Torbugesic

Codeine

Applies to prescription status, codeine-containing oral liquids.

- pms-Acetaminophen with Codeine Elixir
- Calmylin ACE
- Coactifed
- Dimetane C Expectorant
- Dimetapp C
- Robitussin AC
- Teva-Cotridin Expectorant
- Teva-Cotridin
- Codeine Phosphate Syrup
- Linctus Codeine Blanc

Dextropropoxyphene

Esketamine

- Spravato

Fentanyl/Sufentanil/Alfentanil

- Alfentanil Injection
- Duragesic Patches
- Sufentanil Citrate Injection

Hydrocodone-Dihydrocodeinone

- Diemtane Expectorant DC
- PDP Hydrocodone
-

Hydromorphone-

Dihydromorphinone

- Dilaudid
- Hydromorph Contin

Ketamine*

- Ketalar
- Ketalean
- Ketaset
- Narketan

Meperidine - Pethidine

- Meperidine HCl Injection

Methadone

Only authorized physicians may prescribe methadone for opioid use disorder. Visit the CPSA OAT Program page for more information. Authorization of physicians is not required when methadone is prescribed for pain.

- Metadol
- Methadose

Morphine

- Doloral
- Kadian
- M-Eslon
- Morphine Epidural
- Morphine Sulfate SR
- MS Contin
- Statex

Normethadone

- Cophylac

Oxycodone

- Oxy.IR
- OxyNEO
- Supeudol
- Targin
- Teva-Oxycocet/Oxycodan

Pentazocine

Tapentadol

- Nucynta IR/Extended Release

Note: Trade names are included as examples only. This list is not exhaustive for all marketed products containing a monitored drug.

Amphetamines

- Dexedrine
- Adderall
- Vyvanse

Antibiotics

- Amikacin
- Amoxi-Clav
- Amoxicillin
- Ampicillin
- Azithromycin
- Aztreonam
- Bacitracin
- Besifloxacin
- Cefaclor
- Cefadroxil
- Cefazolin
- Cefepime
- Cefixime
- Cefotaxime
- Cefoxitin
- Cefprozil
- Ceftazidime
- Ceftobiprole
- Ceftol-Tazo
- Ceftriaxone
- Cefuroxime
- Cephalexin
- Chloramphenicol
- Ciprofloxacin
- Clarithromycin
- Clindamycin
- Cloxacillin
- Colistin
- Dactinomycin
- Dapsone
- Daptomycin
- Doxycycline
- Ertapenem
- Erythromycin
- Ethambutol
- Fidaxomicin
- Fosfomicin
- Framycetin
- Fusidic Acid
- Gatifloxacin
- Gentamicin
- Gramicidin - Neomycin
- Gramicidin - Polymyxin B
- Grepafloxacin
- Imipenem
- Levofloxacin
- Lincomycin
- Linezolid

- Meropenem
- Metronidazole
- Minocycline
- Moxifloxacin
- Mupirocin
- Neomycin
- Nitrofurantoin
- Norfloxacin
- Ofloxacin
- Ozenoxacin
- Paromomycin
- Penicillin
- Pip-Tazo
- Polymyxin B
- Pyrazinamide
- Rifabutin
- Rifampin
- Rifaximin
- Smx-Tmp
- Spiramycin
- Streptomycin
- Sulfacetamide
- Sulfadiazine
- Tetracycline
- Tigecycline
- Tobramycin
- Trimethoprim
- Vancomycin

Benzodiazepines & Benzodiazepine-like (Z-Drugs)

- Alprazolam
- Bromazepam
- Chlordiazepoxide HCL
- Clobazam
- Clonazepam
- Clorazepate
- Diazepam
- Eszopiclone
- Flurazepam HCl
- Lorazepam
- Midazolam
- Nitrazepam
- Oxazepam
- Temazepam
- Triazolam
- Zaleplon
- Zolpidem Tartrate
- Zopiclone

Buprenorphine/Naloxone

- Act-Buprenorphine/Naloxone
- Probuphine
- Sublocade
- Suboxone

Codeine

Some codeine products are Type 1 medications.

- Codeine Contin
- Acetaminophen with Codeine #1,2,3,4 (Atasol, Lenoltec, Tylenol)

Gabapentin

- Neurontin
- JAMP- Gabapentin
- RAN-Gabapentin

Methylphenidate

- Methylphenidate IR/ SR/ER
- Ritalin
- Biphentin
- Concerta
- Foquest

Pregabalin

- Lyrica
- Apo-Pregabalin
- Teva- Pregabalin

Tramadol

- Apo-Tramadol/Acet
- Durela
- Ralivia
- Tridural
- Ultram

Type 2
