HOW DOES IT WORK?

Using the latest technology in ultrasound cavitation and radio frequency. Our amazing body contouring machines use 4 steps to create slimmer figures and beautiful bbl's!

- BodySlim360 rotating cavitation device to break down the fat
- Cavitation to liquidise the fat
- Radio frequency to tighten the skin
- Vacuum Suction to rid the body of the fat by guiding it into the lymphatic system while also contouring the body.

EARNING POTENTIAL

The Non Surgical Body Contouring Market will be worth 10.4 billion by 2027 according to new research! So becoming apart of this ever growing industry will ensure you are ahead of the game and building your business before anyone else. In the whole of the Nottinghamshire and Derbyshire area there are only 8 people who do this treatment at the moment so the earning potential is HUGE! OUR JOURNEY

Our CEO and Founder Kelsey Hughes started over 2 years ago working from the summer house at the end of the garden. Within the first year she couldn't fit all the clients in and the business was growing rapidly so she opened her first clinic. Within the first month the clinic had to be opened 7 days a week and within 5 months clinic number 2 was open! Now nearly 3 years later she has 3 clinics and a constant flow of regular clients 7 days a week. Today, we take immense pride in extending this opportunity to entrepreneurs across the UK, thanks to our revolutionary technology and unwavering support.
