PIZZA

To guide you to better food choices for our planet, we have teamed up with Klimato to present climate labels on all retail menus during COP26. Klimato uses climate data from lifecycle assessments to calculate the carbon footprint of meals served during the Summit. The Klimato climate label indicates whether a dish has a Low, Medium or High carbon footprint.

PIZZA
Made with Carr's Scottish flour and Mara seaweed.

SCOTTISH FIELD MUSHROOM
tomato and herb sauce with button mushrooms, vegan cheese and kale

SMOKED CHICKEN
tomato and herb sauce, spiced Scottish chicken, and rosemary with Scottish buffalo mozzarella

SCOTTISH BUFFALO MOZZARELLA
tomato and herb sauce

GRANT’S OF SPEYSIDE VEGETARIAN HAGGIS
tomato and herb sauce with haggis, onion and thyme, with vegan cheese

GRANTS OF SPEYSIDE BLACK PUDDING
tomato and herb sauce with black pudding and Scottish mozzarella cheese

Today, an average meal has a carbon footprint of 1.7 kg CO2e in the UK. According to the WWF, we need to get this number down below 0.5 kg CO2e to reach the goals defined in the Paris Agreement. By including climate labels on our menus, we aim to make it easier to achieve this goal - together.
