COVID-19 Patient Priorities

1. **ECONOMIC BURDEN**
   Understand how the costs of care and cost of living have impacted patients and families.

2. **WIDENING OF HEALTH INEQUITIES**
   Recognize how social determinants of health and social risks have impacted access to timely, quality care.

3. **LONG COVID**
   Learn more about the symptoms, challenges, and support needs related to long COVID.

4. **CARE DISRUPTION**
   Investigate the impact of care delays and disruptions on patient outcomes.

5. **TRUST & MISINFORMATION**
   Identify trusted sources for health information and tips for combatting misinformation.

HOW YOU CAN HELP

**PARTNER WITH US**
We want to work with researchers or organizations interested in advancing any of the patient priorities. We welcome the opportunity to:

- Co-design a patient-centered project
- Integrate patient and caregiver insights in your work
- Share your research findings with patient and caregiver communities

**JOIN OUR LEARNING COMMUNITY**
We love to learn from people who are both working on or interested in these priority areas. Sign up at PatientInsightInstitute.org.

**FUND OUR WORK**
We appreciate any support to advance Patient Insight Institute’s work and our patient-centered research agenda.

THE COVID-19 LEARNING COMMUNITY is a passionate group of patients, caregivers and patient advocates who are working with researchers to develop a research agenda focused on the COVID-19 pandemic and its impact on patient and caregiver quality of life. We are partially funded through a Patient-Centered Outcomes Research Institute (PCORI) Eugene Washington PCORI Engagement Award (EASC-COVID-00362).

THE PATIENT INSIGHT INSTITUTE was built by Patient Advocate Foundation to generate patient-centered evidence and integrate patient and caregiver perspectives into research projects—giving voice to those who have been historically under-represented. Learn more about our projects at PatientInsightInstitute.org.
