This fair was in a repeat location for us. The weather was overcast, rainy and cold. This was the best flow we have established thus far. The reasons for this is that this is a repeat location and we have had time to iron out kinks. We were short volunteers, which made things a bit tight. This is being addressed with the site partner as we will host 5 more fairs at this location moving forward. We are looking into video tutorials for volunteers so they know what they are getting into before arriving to the event. We had all COVID safety markers in place with each attendee being temperature checked, questioned, hand washed and a mask was required. We had social

distancing markers set up. We switched the blue painters tape for this, which proved much more useful and less expensive. DPI Security did a great job.

What would I do differently...?

1. Come up with a repeat volunteer opportunity and training program for volunteers (virtually).
2. Work on adding more medical services if possible. This is critical right now.
3. Add a few more take home resources for guests (toiletries, dish soap, detergent, etc.)
