This fair was in a repeat location for us. It was a beautiful, sunny day. We had the intake stationing and process nailed for this location. The officers do a great job making sure everyone is social distancing and the intake staff do a great job keeping things moving, safely. We had adequate

volunteers this time, which helps tremendously. We had all volunteers sign up through our web sign up link, which made communication much more efficient prior to the event with all volunteers. We had volunteers conduct Covid screen prior to coming (google form) which saved a lot of time checking them in. We had all COVID safety markers in place with each attendee being temperature checked, questioned, hand washed and a mask was required. We had social distancing markers set up. We added a few more set up volunteer slots and staggered the times a little better, which helped as well. All in all, it was a great event.

What would I do differently...?

1. Try to video the volunteer stations at the next event to insert in the sign up sheet for all to see prior to coming.
2. Work on adding more medical services if possible. This is critical right now.
3. Add a few more take-home resources for guests (toiletries, dish soap, detergent, etc.)
