<u>Voters Have Great Faith in Their Community Election Leaders; Republicans Skeptical of Other Communities, State Election Leaders</u>

*   Voters have high confidence in the people running elections in their own community but they have considerably less confidence in people running elections in other communities.

        Voters were asked to rate on a one to ten scale their confidence in how fairly four different groups of people will do their jobs in the upcoming election.   The higher the score, the greater the confidence of fairness.

        8.6   Poll workers in your local community
        8.5   Clerks that run the polling places in your local community
        7.0   Clerks that run the polling places in other communities

Democratic and Independent voters gave scores above 7.0 to all four groups. Republican voters gave high scores to their local workers and local clerks.
