

ONE BUTTON BENNY

by Alan Windram and Chloe Holwill-Hunter

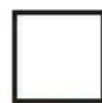

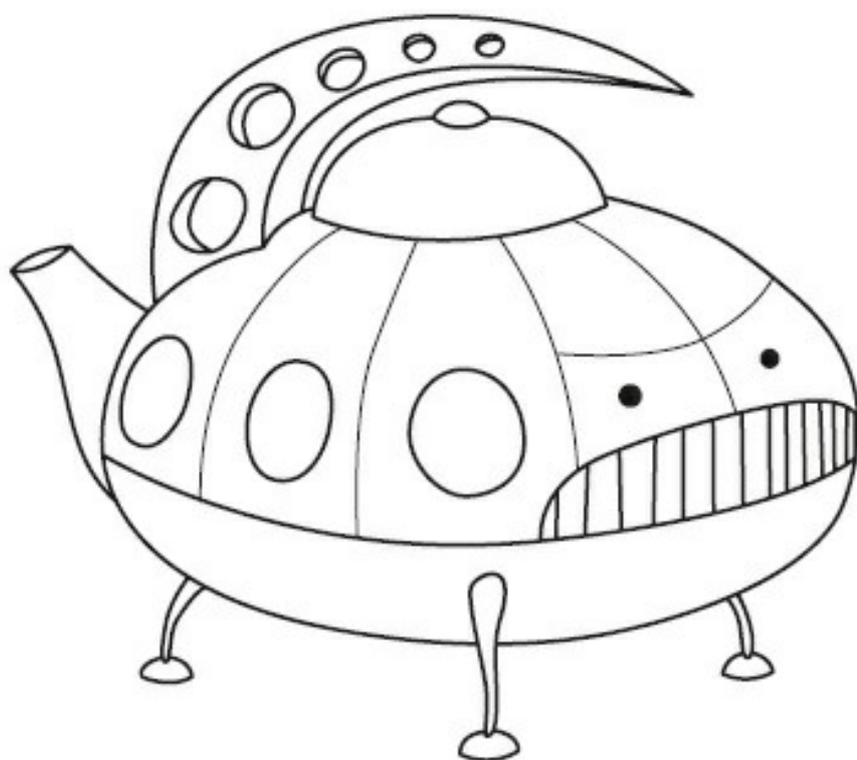

- > The robots in the story can press their buttons and make things happen, like blowing bubbles, or playing music. If you built a robot, what would it do? What would it look like? Can you draw it here?

- > What would a button on your tummy say? Write it on this button.

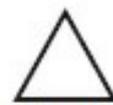

- > The robots live in a world that is very grey. Can you decorate the spaceship with a pattern and lots of colour? You could try using these shapes in your design.

Square

Circle

Triangle

Rectangle

- > To help build up the courage to press his button, Benny has decided to give himself a countdown. Can you help Benny count down from 10? Fill in the missing numbers and then when you reach 0, draw the special laser beams that come from Benny's fingers!

10 8 7 5 3 2 0

- The collectors are hairy and scary. Can you match these other pairs of rhyming words by drawing lines between them?

Red

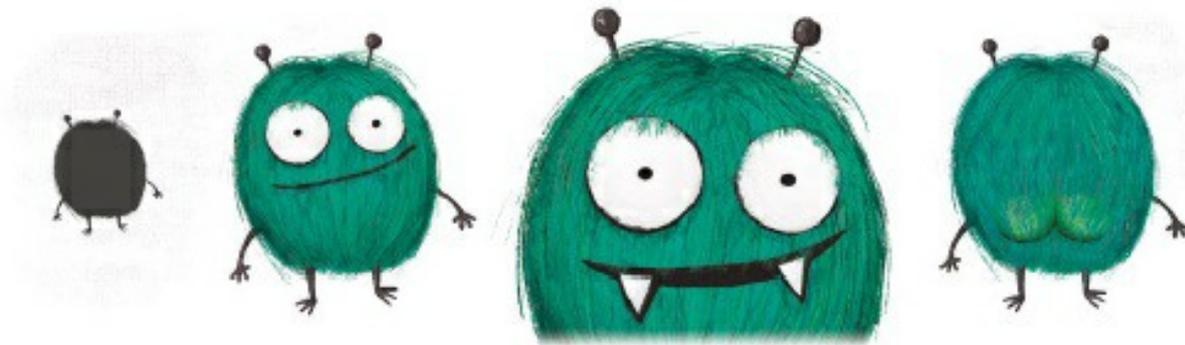

Vest

Zoom

Bed

Best

Boom

- Count the number of little, round orange buttons on this robot. Use your magnetic numbers and put this number on your whiteboard. Now count all the big, square orange buttons. Put this number on your whiteboard. Can you add the two numbers together?

Can you make up more ways from the story to add numbers together on your whiteboard?

➤ Look in the book. Can you find the...

empty
biscuit jar?

wallpaper?

party hat?

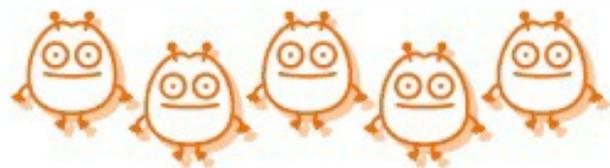

You can watch **Alan Windram** reading this story in a film on our website and join in with a special activity.
