Starting up the PA 800

1. Turn on the computer. Wait until it initializes and you’ve logged on.
2. Turn on the CE itself (large black button on right).
3. Wait 3.3 minutes until the noises stop.
4. Open the 32K software.
5. Choose the detector you’re using by double-clicking on its icon.
6. Get the capillary tips into water vials in the A1:A1 positions by clicking the Home button on the Direct Control window. (if necessary)
