

Clarity Omnibus Survey

September 2024

clarity+campaign(labs)

Methodology

The September 2024 Clarity Omnibus Survey was conducted from September 19th-24th via national online public opinion panels and 1000 respondents were matched to the voter file. The margin of error of this poll is +/-1.78% at a 95% confidence interval.

Attention checks were employed in the survey and respondents who failed attention check questions were removed from the sample.

Responses are weighted to a national universe of likely 2024 general election voters using factors including age, gender, race, education, and geography.

Mobilization Issue

National Issues

Climate Priority

These are some of the most urgent crises facing our country and should be addressed now.

Addressing environmental problems is a priority, but other issues are more important right now.

Environmental concerns have been exaggerated and should not be a priority.

Our **Climate Change Priority Model** predicts attitudes toward climate change for registered voters nationally. [Learn more.](#)

National Issues

Fiscal Progressive

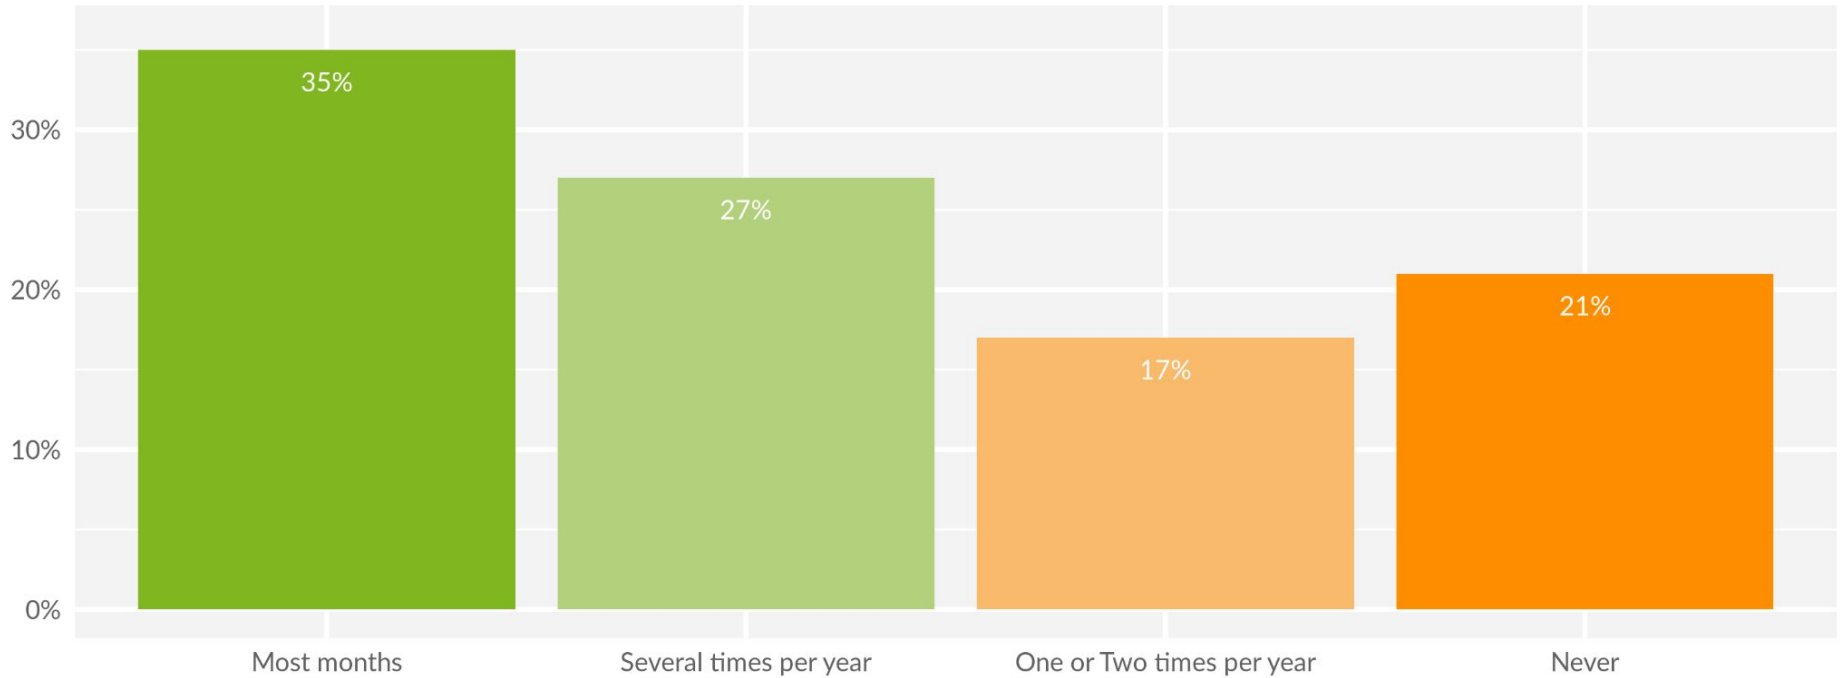

Our **Fiscal Progressive Model** predicts attitudes toward raising taxes to balance the budget among registered voters nationally. [Learn more.](#)
