

**JONES ROAD GROUND WATER PLUME SUPERFUND SITE
HARRIS COUNTY, TEXAS**

April 2024

**U.S. ENVIRONMENTAL PROTECTION AGENCY
REGION 6**

U.S. Environmental Protection Agency Superfund Community Involvement Program Mission and Goals

The U. S. Environmental Protection Agency's (EPA) Superfund Community Involvement Program is committed to promoting communication between citizens and the Agency.

Active public involvement is crucial to the success of any public project. EPA's community involvement activities at the Jones Road Ground Water Plume site are designed to:

- Inform the public of the nature of the environmental issues associated with the site.
- Involve the public in the decision-making process that will affect them.
- Involve the public in the responses under consideration to remedy these issues.
- Inform the public of the progress being made to maintain the remedy selected for the site and efforts to redevelop portions of the site and return them to productive use.

Section 1.0

Overview of the Community Involvement Plan

The U. S. Environmental Protection Agency (EPA) developed this Community Involvement Plan to facilitate two-way communication between the community surrounding the Jones Road Ground Water Plume Superfund Site and EPA and to encourage community involvement in site activities. EPA will utilize the community involvement activities outlined in this plan to ensure that residents are continuously informed and provided opportunities to be involved.

This Community Involvement Plan addresses the Jones Road Ground Water Plume Site's relationship to the community and EPA (Section 2.0), provides a background of the community (Section 3.0), presents EPA's community involvement program (Section 4.0), and provides a listing of resources available (Appendices). EPA drew upon several information sources to develop this plan, including community interviews and site files. EPA's Regional Office will oversee the implementation of the community involvement activities outlined in this Plan.

Section 2.0 Site Background and Description

2.1 Site History

The source of contamination associated with the Jones Road Ground Water Plume Site is the former Bell Dry Cleaners facility, which was located within the Cypress Shopping Center at 11600 Jones Road in northwest Harris County, Texas. The Cypress Shopping Center was constructed in 1984, and the Bell facility began dry cleaning operations sometime in 1988. The facility continued operating through May 2002 when the dry-cleaning operations were shut down.

The hazardous substances present at the Site include tetrachloroethylene, also known as perchloroethylene (PCE), and related breakdown products, trichloroethylene (TCE), 1,2-dichloroethylene (DCE), and vinyl chloride (VC).

2.2 Site Description/Location

The Jones Road Ground Water Plume Site is in the northwest portion of Harris County, Texas, outside the city limits of Houston, and approximately one-half mile north of the intersection of Jones Road and Farm to Market (FM) 1960. The coordinates for the site are latitude 29° 56' 31.55" and longitude -95° 35' 02.54".

The area around the Site is characterized by residential, commercial, and light industrial development. Residential development has been active since the 1960s, effectively eliminating wildlife habitat from the area. Jones Road is the principal north-south corridor through the area, and FM 1960 provides a southwest-northeast corridor. Commercial development is dominant along Jones Road with residential and limited commercial development along the side streets.

Water well drilling in the area has been restricted by the Texas Department of Licensing and Regulation.

Cypress Creek is located approximately two miles to the northwest of the site area, Greens Bayou is located to the Northeast approximately 3,000 feet, and White Oak Bayou is located approximately 1.5 miles to the south.

2.3 Site Inspections and Cleanup Activities

The following provides a chronology of key Site activities:

- In 1988, Bell Dry Cleaners began operating at the Cypress Shopping Center.
- In December 2000, during a routine sampling of public water supply wells by the Texas Commission on Environmental Quality (TCEQ), PCE, DCE, and chloromethane, were

detected in Public Water Supply (PWS) Well 1012358 in the Jones Road area. PWS 1012358 supplied water to a gymnastics school and childcare facility with eighteen employees, 90 children in childcare, and 150 to 200 gymnastics students. Follow up water samples were collected by TCEQ and the Texas Department of Health (TDH) and the detection of PCE was confirmed.

- In June 2001, a Phase I Environmental Site Assessment was performed at the Bell Dry Cleaners (located at 11600 Jones Road), and leakage was discovered from a dry-cleaning machine into the storm drains. PCE and vinyl chloride were detected also in groundwater and soil samples collected from the Site of the Bell Dry Cleaners facility during the assessment.
- On March 11, 2002, TCEQ requested Bell Dry Cleaners perform emergency response actions; these actions included installation of carbon filtration system on PWS Well 1012358 and sampling of other local wells.
- During March and April 2002, TCEQ collected samples from 43 drinking water supply wells and found concentrations of PCE in groundwater samples in some of these wells, with the highest concentration of 128 ppb. As a result, filtration systems were placed on an additional eight wells. Several businesses within the area, in addition to Bell Dry Cleaners, were found to use chlorinated solvents.
- In May 2002, the Bell Dry Cleaners closed.
- On September 10, 2002, TCEQ submitted to EPA a Focused Site Inspection of the Jones Road Ground Water Plume, and on November 1, 2002, TCEQ submitted to EPA a Hazard Ranking System package for the Site. Groundwater sampling activities and evaluation of the need for additional filtration systems continued.
- In January 2003, the Texas Department of Licensing and Regulation designated a boundary of a restricted water well drilling area.
- On April 30, 2003, EPA proposed the Jones Road Ground Water Plume Site to the National Priorities List (NPL) of Superfund sites. The NPL is the EPA's list of uncontrolled or abandoned hazardous waste sites identified for long-term cleanup action due to the potential risks posed to human health and the environment by hazardous contaminants. The Site was officially placed on the NPL on September 29, 2003.
- In May 2006, Harris County established a "No New Wells" area, preventing the drilling of domestic wells into the contaminated groundwater plume or aquifer.
- In 2008, the U. S. Environmental Protection Agency (EPA) conducted a time-critical removal action that included the installation of a waterline and connections to homes and

businesses at the Site. Construction of the waterline began in January 2008 and was completed in November 2008. A total of 144 service connections were completed. The waterline is serviced by the White Oak Bend Municipal Utility District.

- Between August 2003 and September 2010, TCEQ completed a remedial investigation/feasibility study for the Site.
- In July 2009, the EPA and the property owner signed a Settlement Agreement.
- On September 23, 2010, EPA signed a Record of Decision (ROD) for the Site; the selected remedy as described in the ROD was “In-Situ Enhancements to Pump and Treat”.
- Between October 27, 2011 and November 17, 2011, EPA plugged and abandoned the water wells of customers who were connected to the waterline installed by EPA in 2008.
- In August 2014, EPA published the Optimization Review for the Jones Road Superfund Site which recommended the prioritization of source mitigation of the vapor-phase contaminants of the two soil zones and bioremediation of the shallow groundwater contamination before evaluating the need for additional action to contain the migration of groundwater contaminants in the deeper aquifer.
- In January 2016, EPA began bioremediation injections at the source area to address shallow groundwater contamination.
- A supplemental remedial investigation/feasibility study was completed by EPA in 2017, and on September 29, 2017, EPA signed an amendment to the ROD to address mitigation of two soil vapor sources identified for the Site.
- In March 2018, EPA conducted additional bio-remediation injections in the hot spot areas to address shallow groundwater contamination.
- In May 2018, EPA installed indoor exhaust systems in three of the suites in the Cypress Shopping Center to remove chemical contaminants that migrated into the building from the soils below.
- In July 2019, the Soil Vapor Extraction system began operations and continues to operate to date.
- In September 2023, EPA completed additional bio-remediation injections in the hot spot areas to address shallow groundwater contamination.

Section 3.0 Community Background

3.1 Community Profile

EPA has generated a summary report based on the U. S. EPA Environmental Justice Screen for a 1-mile radius around the Site. This summary report indicates the total population within that 1-mile radius is 12,484, with a population density (per square mile) of 3,976.

Ethnicity	Population
White alone	27%
Hispanic or Latino	46%
Black or African American alone	15%
American Indian alone	0%
Asian, alone	8%
Pacific Islander alone	0%
Two or More Races	3%

3.2 History of Community Involvement

Recent community involvement activities performed for the Site include:

- Community meeting on August 10, 2017
- Community meeting on April 8, 2018
- Fact sheet issued in April 2019
- Community door to door to inquire about adding residents to the MUD Waterline connections on July 29th – 31st, 2019.
- Fact sheet issued in August 2019
- Community door to door to inquire about adding residents to the MUD Waterline connections on November 4th – 6th, 2019.
- Community meeting on November 7, 2019
- Fact sheet issues in May 2020
- Community meeting on February 27, 2023

3.3 Key Community Concerns

Information acquired during the November 2023 community meeting indicated that some of the main concerns for the community were if both aquifers were contaminated, will the aquifers mix, how far has the testing gone down and at what depth, are there filters that can remove the contaminant, what type of cancer is occurring do to this Site, what are the range of chemicals at this Site.

3.4 Summary of Communication Needs

To ensure that community concerns are identified and are provided an appropriate response, community visits will be initiated by the EPA Community Involvement Coordinator. Fact sheets summarizing Site activities will also be produced to provide the community the most current information on the Site. An internet website has been established to assist in providing information to the community. EPA will also maintain a toll-free number available to the community to allow immediate access to the Site EPA Project Manager and Community Involvement Coordinator.

Section 4.0

EPA's Community Involvement Program

The overall goal of EPA's community involvement program is to promote two-way communication between citizens and the EPA and to provide opportunities for meaningful and active involvement by the community in the cleanup process. EPA will implement the community involvement activities described below. The following plan is based on community concerns described earlier.

4.1 The Plan

Issue 1: Keeping the public informed and up to date.

Activity 1A: Designate an EPA Community Involvement Coordinator (CIC).

- Objective: To provide a primary liaison between the community and the EPA, and to ensure prompt, accurate, and consistent responses and information dissemination about the site. In those instances where EPA's CIC may be unable to provide adequate information (such as on technical issues), inquiries will be directed to the appropriate EPA contact.
- Method: EPA will designate an EPA CIC to handle site inquiries and serve as a point of contact for community members. The CIC is appointed by the Region 6 headquarters. Jason McKinney is the EPA CIC assigned to the site. He will work closely with Lauren Guidry-Leach, EPA's Remedial Project Manager for the site.
- Timing: The current CIC was designated in August 2017.

Activity 1B: Prepare and distribute site fact sheets and technical summaries.

- Objective: To provide citizens with current, accurate, easy-to-read, and easy-understand information about the Jones Road Ground Water Plume Superfund Site.
- Method: Fact sheets will be mailed to all parties on the site mailing list. In addition, copies will be available at the information repository.
- Timing: EPA will prepare and distribute fact sheets as needed depending on site activities and community needs.

Activity 1C: Involve students, parents, teachers through area schools.

- Objective: To educate faculty, students and their parents about the site, to invite and address their concerns regarding it, and to caution students about the site.
- Method: Address school faculty and students through visits and presentations to classroom, faculty, school assembly, or other meetings or events. Additionally, communicate with parents through take-home materials provided to the students and/or by attending and participating in PTA meetings or events.
- Timing: As community concern warrants or at least every year until the site is closed out.

Activity 1D: Provide a toll-free “800 number” for the community to contact EPA.

- Objective: To enable citizens to get the latest information available when they want it, rather than having to wait for a meeting or a fact sheet, and without incurring any cost.
- Method: EPA will activate the 800 number and publish it periodically in the local papers and in all fact sheets.
- Timing: The line is currently operational (1-800-533-3508).

Activity 1E: Maintain a mailing list for the Site.

- Objective: To facilitate the distribution of site-specific information to everyone who needs or wants to be kept informed about the site.
- Method: EPA had created a mailing list that includes all residences adjacent to the site, in known or suspected paths of migration, or those otherwise affected by the site. EPA will also solicit interested parties via fact sheets, newspaper articles, public meetings, public availabilities, etc.
- Timing: EPA will review/revise the mailing list periodically to keep it current.

Activity 1F: Establish and maintain Information Repositories.

- Objective: To provide a convenient location where residents can go to read and copy official documents and other pertinent information about the site and EPA activities.

- Method: The repository is a reference collection of site information containing the Administrative Record file, other site-specific information, the Community Involvement Plan, information about the Technical Assistance Grant program, and the general Superfund process. The Community Involvement Coordinator will work with a local contact to establish the local repository. This repository will be accessible to the physically challenged, will have copier facilities, and will be available to residents during normal business hours and at least some evening and/or weekend hours.
- Timing: EPA established the local information repository at the Northwest Branch Harris County Library, 11355 Regency Green Drive, Cypress, Texas, 77429. EPA will add new documents as they become available.

Activity 1G: Provide Site and Superfund information on the Internet.

- Objective: To provide key resources for searching and listing both general and specific information about Superfund and hazardous waste issues.
- Method:
 - A Site Status Summary for this site can be found at <https://cumulis.epa.gov/supercpad/cursites/csitinfo.cfm?id=0605460>.
 - Information about EPA and Superfund can be found at:
 - EPA Headquarters: <http://www.epa.gov>
 - EPA Region 6: <https://www.epa.gov/aboutepa/epa-region-6-south-central>
 - The Proposed Plan and the Record of Decision (ROD) for the site will be on the EPA internet website.
- Timing: Site Status Summaries are periodically updated.

Activity 1H: Provide Technical Assistance Grant (TAG) information.

- Objective: To provide resources for community groups to hire technical advisors who can assist them in interpreting technical information about the site.
- Method: EPA will provide information about the TAG program at public meetings and in site fact sheets. EPA will also provide briefing sessions to interested groups if so requested. EPA will provide TAG applications to qualified groups and will aid the group in completing the application.
- Timing: EPA will continue to promote TAGs until one is awarded.

Activity 1I: Establish and maintain the Administrative Record.

- Objective: To provide residents with a paper trail of all documents, resources, etc. used by the Remedial Project Manager and Site Team in reaching all decisions about the site and its cleanup.
- Method: EPA will provide at least two sets of the Administrative Record for the site, one in the EPA Region 6 offices located at 1445 Ross Avenue, Dallas, Texas 75202 and one located in the local information repository.
- Timing: The Administrative Record will open as soon as site investigation began and remains open until the last ROD is signed.

Issue 2: Provide adequate and meaningful opportunities for community involvement.

Activity 2A: Hold public meetings.

- Objective: To update the community on site developments and address community questions, concerns, ideas and comments.
- Method: EPA will schedule, prepare for, and attend all announced meetings. EPA will provide at least two weeks' notice of the scheduled meeting. The Remedial Project Manager, Community Involvement Coordinator, and other appropriate EPA staff will attend.
- Timing: A public meeting is required during the Proposed Plan comment period. EPA will hold other public meetings as appropriate. There has been 2 public meeting so far. The last public meeting was held on February 27, 2023, and the one prior to that was held on November 7, 2019.

Activity 2B: Encourage formation of a Community Advisory Group (CAG).

- Objective: To provide citizens with a meaningful way to become actively involved, and to provide the Site Team with a viable means of learning citizen concerns and attitudes.
- Method: EPA will encourage the formation of a CAG and provide support as appropriate to facilitate its formation. If formed, EPA will provide administrative support but will not be an active member.
- Timing: EPA will respond to any requests for help to form a CAG. As necessary, EPA will promote CAGs regularly throughout the Superfund process until one is formed.

Activity 2C: Make informal visits to community.

- Objective: To help keep community members informed about the site, while providing EPA with feedback about site activities and the community's opinions.
- Method: EPA will establish a presence in the community through informal, often unscheduled visits to talk spontaneously with local residents.
- Timing: Throughout the entire Superfund process.

Activity 2D: Solicit comments during a Public Comment Period.

- Objective: To give community members an opportunity to review and comment on various EPA documents, especially the Proposed Plan. This provides the citizens with meaningful involvement in the process and provides the Site Team with valuable information for use in making decisions.
- Method: EPA will announce each comment period separately. Announcements will appear in local newspapers and EPA fact sheets; they will include details on duration, how to make comments, where to submit comments, etc. EPA may solicit comments on the following information/draft documents: draft CIP, draft summary of test results (not individual tests) and initial interpretation, preliminary findings on the RI and a list of possible remedies likely to be considered, preliminary findings of the FS and a brief summary of the leading contender for the proposed remedy, and preliminary plans for implementation and construction.
- Timing: Comment periods will be announced as appropriate. A comment period is required in conjunction with the announcement of the Proposed Plan and will last a minimum of 30 days. The comment period will be established once the proposed plan has been drafted.

Activity 2E: Prepare and issue a Responsiveness Summary.

- Objective: To summarize comments received during comment periods, to document how the EPA has considered those comments during the decision-making process, and to provide responses to major comments.
- Method: EPA prepared a Responsiveness Summary as a section of the Record of Decision. The Responsiveness Summary included four sections: 1. Overview; 2. Background on Community Involvement; 3. Summary of comments received and Agency responses; 4. Remedial Design/Remedial Action concerns. All information, both technical and nontechnical, was conveyed in a manner that is easily understood.

- Timing: EPA issued the Responsiveness Summary as part of the Record of Decision.

Activity 2F: Revise the Community Involvement Plan (CIP).

- Objective: To identify and address community needs, issues, or concerns regarding the site or the cleanup remedy that are not currently addressed in this CIP.
- Method: The Revised CIP will update the information presented in the previous version of the CIP.
- Timing: EPA will revise the CIP as community concern warrants or at least every three years until the site is closed out.

Activity 3A: Provide Technical Assistance Services for Communities (TASC) information.

- Objective: A headquarters contracting mechanism that provides a resource for independent, non-advocacy educational and technical assistance to a community affected by hazardous waste sites regulated by CERCLA and RCRA. This contract service is provided to communities so they can more effectively participate in the hazardous waste cleanup process in a more expedited manner.
- Method: EPA will provide information about the TASC program at public meetings and in site fact sheets as applicable. EPA will also provide briefing sessions to interested groups if so requested. EPA will provide information on TASC contract information to qualified groups and will aid the applicant group in completing the Statement of Work for the contract application.
- Timing: As needed

4.2 Time Frame Summary for Community Involvement Activities

ACTIVITY	TIME FRAME
Designate an EPA Community Involvement Coordinator (CIC)	Completed
Prepare and distribute site fact sheets and technical summaries	As needed, at least two yearly
Involve students, parents, teachers through area schools	As needed, at least annually
Provide a toll-free "800 number" for the community to contact EPA	Currently in operation
Maintain a mailing list for the Site	Ongoing
Establish and maintain Information Repositories	Established, update as needed
Provide Site and Superfund information on the Internet	Currently available; update as needed
Provide Technical Assistance Grant (TAG) information	Ongoing
Establish and maintain the Administrative Record	Established, update as needed
Conduct special events	As needed
Hold community/public meetings	As needed
Encourage formation of a Community Advisory Group (CAG)	Ongoing
Make informal visits to community	As needed
Solicit comments during a Public Comment Period	As needed and required
Prepare and issue a Responsiveness Summary	Following public comment periods
Revise the Community Involvement Plan (CIP)	As needed, at least every 3 years
