ACE NY Statement on NYP A Bill Passing the Senate

The Renewable Energy Industry Continues to Oppose Bills Allowing NYP A and Utilities to Own Power Generation

June 1, 2022, Albany, NY – Alliance for Clean Energy NY (ACE NY) opposes the bill passed today by the NY Senate, S.6453-C/A.1466-D, which grants the New York Power Authority (NYP A) unlimited ability to purchase, construct, and operate renewable energy projects, without any competitive cost controls. The bill also requires that all power generation owned by NYP A be renewable by 2030; that State buildings receive power from NYP A by 2030; and that all electricity used by municipal buildings be provided by NYP A if electricity costs are below utility rates.

ACE NY has the following statement:

Anne Reynolds, Executive Director of ACE NY stated, “The renewable energy industry is sorely disappointed that this bill passed the NY Senate. There are barriers to wind and solar projects getting built in New York, but this bill doesn’t solve them. NYP A should be focused on the needed upgrades to the transmission grid to enable the interconnection and delivery of clean energy -- that is the right role for NYP A. NYP A has the authority already to buy clean energy from new wind and solar energy projects and provide that to its customers, and that would be another helpful role for NYP A. Setting NYP A and private clean energy developers on an unfair playing field is just simply not going to help us reach our clean energy goals.”

ACE NY also opposes S.9426 / A.10484, which would give regulated utilities in New York State the right to own and operate large-scale renewable electricity generation projects, which they are currently not allowed to do. Time and again New York has decided that it protects ratepayers to have separate companies owning the power plants and owning the wires. But S.9426/A.10484, would allow utilities to operate renewable energy, upending NY’s plan for meeting its climate goals. This bill will not overcome barriers to renewable development and instead will create an uneven playing field for renewable energy companies in NYS. Please see ACE NY Oppose Memo.
About the Alliance for Clean Energy New York: The Alliance for Clean Energy New York (ACE NY) is a broad coalition dedicated to promoting clean energy, energy efficiency, a healthy environment, and a strong economy for the Empire State, and is New York’s premier advocate for the rapid adoption of renewable energy and energy efficiency technologies.
