

WILDE ANGUS RANCH, LLC

Saturday, March 4, 2023 · 1:00 p.m.
At the Ranch East of Shevlin, MN

WELCOME

Welcome everyone to the 28th Annual Bull and Female Sale. I am happy that so many of the relationships I've built with many of my old friends and several new ones have been the cornerstone and why I have enjoyed the cattle so much. Your friendship and support of the program means a great deal to me and my family.

As you look over the sale offering, I believe you will find a sound set of bulls, females and horses in this sale. Throughout this transition, one of the things that has remained the same, is the sound development of the cattle. They are managed in such a way that they do what cattle are supposed to do, be productive and generate a return for our customers. They are not overdeveloped and even less so than years past, but they look the part and have a strong genetic base.

As I've said many times, when we as people look ahead to eternity, things on this earth will remain, but our salvation is the most important. It is a free gift from God through his son Jesus Christ, that we must believe in him. Romans 10:13 "For whoever shall call on the name of the Lord will be saved".

I hope 2023 treats you well and you have a prosperous New Year. Don't hesitate to call for any reason even if it's just to chat –

Sincerely,
Wayne M. Wilde and Family

Greetings from our Ranch family to Yours –

The 28th Annual Sale is coming quickly. If you had asked me last Spring, I might not have wanted to visit about that given the difficult start to the year we had. I am thankful for all the support, prayers, and assistance so many people have provided to Wilde Angus Ranch and our ranch family. It is because of the relationships, the cattle, our friendships developed, and the love of this industry, we all do what we do. Your support is not lost on us or taken for granted and it is what keeps us going, we are very grateful to you.

Having gone from the worst drought on record to a year later the wettest Spring on record, checking calves in kayaks, and unprecedented water over the entire place, I can honestly say that I am proud of this set of cattle and how well they performed. We did not creep feed again in 2022! Yet, the calves achieved a remarkable result over the entire herd and one that is very realistic, true, and not a highly managed number. Our development of the cattle and focus on genetics allows for the cattle to prove themselves out and should increase your confidence in what you are buying. This cow herd continues to do their job in all environments and produces a very consistent progeny set.

As always, the entire herd has been tested for Johnes, Leukosis, and BVD. We make a considerable investment in trying to ensure that we don't sell our customers problems. All cattle in the sale have been determined to be free of any health problems. They also have the Angus GS 50K and have been parent verified, except where noted. You will find a balanced set of enhanced EPD's focused on multi trait selection.

Our female division will have some outstanding bred females, both registered and commercial. Ryan and Michael Hough will again be consigning their bred heifers that were AI'd to Points West Linchpin, the high selling bull in our 2021 sale. The bull bred females will all be bred by Wilde Angus bulls that were purchased in past sales and are calving ease sires.

It is with gratitude that we thank you for your past business, friendship, advice, and feedback on our product. It means the world that so many of you have entrusted us to be a part of what you do, and we take that very seriously here at Wilde Angus. As a wise man once said, "It is humbling to know that what we do everyday not only impacts us and our family, but it also impacts those around us and their families. Take it seriously and do everything you can to protect it and safeguard it".

We hope you can join us March 4th. Good times are ahead and we are grateful to be able to share that opportunity with each of you. The coffee is always on and we welcome visitors anytime. Should you need assistance of any sort with this sale offering, please call me. I will help in every way I can –

Regards,
Don Abarr & the Wilde Angus Ranch Family

28TH ANNUAL BULL SALE

SATURDAY, MARCH 4, 2023 1:00PM

At the Ranch, Shevlin, Minnesota

OFFERING

**125 Angus Yearling Bulls • 25 Angus Open Heifers
20 Bred Angus Heifers • 125 Commercial Bred Heifers
9 Quarter Horses**

Announcements: From the block will take precedence over the catalog. Buyers unable to attend may send their bids to the Auctioneer, Publication Representatives, Wayne or Don to help with the selection of livestock with a sight unseen guarantee.

Transportation: Delta Airlines serves the Bemidji, Minnesota Airport. There is also a local airstrip near Bagley, Minnesota.

Herd Health: Minnesota is now a TB free state. Cow herd is tested annually for John's Disease, Bovine Leukosis and BVD.

Spring vaccinations: Birth - Inforce 3, Head Start Gel, Spring Turnout - Ultrabac 8, Vista Once SQ, Multimin, Ivermectin Pour On, Prewearing - Ultrabac 8, Vista Once SQ, Multi-min, Weaning - Once PMH IN, Inforce 3, Cydectin Injectable, Vita Charge Drench, Clean Up II.

Terms and Conditions: Cattle will sell under the Terms and Conditions as recommended by the American Angus Association. Terms are cash. Please settle for cattle promptly after the sale.

EPDS and \$Values: If your purchasing decision relies highly on the most current data available, please look up animals of interest on the American Angus Association web page prior to viewing the sale offering.

Additional Performance: Scrotal measurements and 365-day adjusted weights will be available on the day of the sale.

Inspection of Cattle: Cattle can be viewed at the farm on or before the sale.

Liability: All persons attending this sale will do so at their own risk, legal or otherwise, for the safety or the behavior of the animals. The owners and sale staff assume no liability for property loss or accidents that may occur.

Boarding Arrangements: We are not responsible for injured bulls if they are left with us, you do so at your own risk. We encourage you to take out a livestock policy on your sale purchases. **Free delivery April 1-15**, after April 15 there will be a \$5.00 per day per bull charge.

Food and Refreshments: A complimentary lunch will start at 11:00 am.

Retaining 1/3 semen interest in all bulls selling unless noted otherwise.

**\$100 discount per bull
if hauled home day of sale!**

Volume Discount on BULLS ONLY

Starting at 3% on 3 Bulls
4% on 4 Bulls
5% on 5 Bulls
Up to 8% Total

Free delivery April 1-15

VIDEO AUCTION

Animals will be penned outside for viewing. During the sale only the video will be shown of each lot as they sell. Animals will not come in the barn for the auction.

TERMS AND ABBREVIATIONS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted whether the animal has a genotype and the number of progeny and ancestral records included in the analysis.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Maternal

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is more favorable.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

Management

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

Claw Set (Claw), is expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes.

Foot Angle (Angle), is expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth.

Pulmonary arterial pressure EPD (PAP), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

Carcass

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$Value Indexes

\$Value Indexes, reported in dollars per head, are multi-trait economic selection indexes where a higher values suggest more profit when comparing two individuals.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with current production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning.

Cow Energy Value (\$EN), is expressed in dollar savings per cow each year due to lower cow maintenance energy requirements (due to lactation and body size) with a larger number being more favorable.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle and sell on a carcass weight basis.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

Combined Value (\$C), an index, expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

Individual Data

BW: Actual birth weight.

WW: Weaning weight adjusted to 205 days of age.

= Pathfinder®

+ = Embryo Transplant

* = Parents Qualified

NA = —

Actual BW to EPDs

It is important to follow the numbers, but it is more meaningful when you understand the process. At Wilde Angus Ranch, LLC, a calf born on Monday is not touched or processed by our crew until the next morning. This influences the recorded BW, but we believe it is more important for the calf to get colostrum, bond with its mother, and let mothers be mothers rather than record a lower birth weight and interfere with instinct. We are confident this process protects our customer and reflects true events of the ranch life. We do not expect these bulls to sire calves as heavy as they were, due to this process!

Please note not all EPDs are in the catalog, if you want to see them all please go to Angus.org.

SUPERIOR
LIVESTOCK AUCTION

ALL NEW BIDDING PLATFORM

MOBILE BIDDING PHONE BID LINE VIDEO PREVIEWS AUCTION CLERKING
bid.superiorlivestock.com | 800.422.2117

WATCH LIVE ON **dish** CHANNEL 998

VIEWING THE AUCTION

The auction will be broadcast online at Bid.SuperiorLivestock.com and the pre-recorded videos will also be hosted there. You do not need an account just to watch the auction or view videos of the sale offering.

ONLINE BIDDING

Go to Bid.SuperiorLivestock.com for Superior's new online bidding platform. If you have not registered there before you will need to create an account. The first time you register an account you will receive a confirmation e-mail that you must click on. Once you have completed this, select the auction you would like to bid on and click the "Request a Buyer Number" button. The first time you request a buyer number you will be sent a confirmation code via text. Enter that code in the login portal and you will receive a buyer number. This 2-step verification process will only have to be done once and in the future you will be able to simply login and request a buyer number and receive it instantly for any auction. Once you have successfully registered and received a buyer number it will show your name and buyer number on both the video preview page and the online bidding page when you are logged in. If you have an account at LiveAuctions.tv you may skip the registration process and use those login credentials to request a buyer number as LiveAuctions is a division of Superior Livestock. For more details on registering an account and also how to bid, you may watch a tutorial at Bid.SuperiorLivestock.com/how-it-works

TURN IN BIDS OVER THE PHONE

This is Superior's traditional method of buying cattle and is the suggested process for anybody who does not have consistent, high-speed internet. You still must register an account at Bid.SuperiorLivestock.com and request a buyer number. Once you receive a buyer number you will see the bid line phone number. Just watch the auction online and call in at least 2 lots ahead of the lot you are looking to bid on. A Superior Livestock representative will be with you on the phone and will assist you in placing bids.

FOR HELP WITH REGISTRATION OR ANY PART OF THE BIDDING PROCESS PLEASE CALL SUPERIOR AT (800) 422-2117.

Dam's Production: BW 2 @ 89 BR 2 @ 103 WR 1 @ 117

LOT 7

Larger framed bull with power. He is a big, topped bull with plenty of bone. Recommended for cows, despite the 1.0 BW. His dam is an Appearance daughter that is level uddered, big hiped, with loads of capacity. I expect his daughters will look much the same and will be excellent cows.

A big ribeye bull with excellence up and down his maternal pedigree. His maternal brother sold in the 2022 sale to Bryan and Becky Johnston in MT. Out of the great 4070 cow line, his maternal granddam 9084 might be the best cow to have been on this ranch. She produced a number of herd sires. 4070 produced excellent productive daughters many of which made Pathfinder®, and 5283 will make Pathfinder® this year. This is a bull we have liked from the beginning and think you will also sale day.

LOT 9

A really well made, moderate bull of a 14-year-old dam. Not a big numbered bull because of the age in his pedigree, but one of that is really well built, with tons of style and an excellent disposition. He is another one with loads of potential to make great daughters that are backed by the TC Franklin bloodline out the famous Lass cow family. His dam looks like she is seven and in excellent condition. His maternal brother sold in the 2021 sale to Dresel Ranch in MT, with another one selling in the 2022 sale to Alroy and Debbie Lewis, Bagley, MN.

Dam's Production: BW 6 @ 85 BR 6 @ 101 WR 6 @ 102 YR 1 @ 98

This moderate heifer bull that has carcass traits. With a marbling EPD in top 15% and an excellent Energy EPD in the top 10%, he should be the easy keeping kind. This calf weaned to 623 born early April. He is one of the bulls that is high in CEM, Milk, and PAP in the sale as well. His dam is a productive cow that brings a calf home each year.

Balanced bull that should sire moderate BW calves. Rock solid in his structure, has extra rib, smooth shouldered. Excellent disposition on this bull. He should add milk to his daughters and his calves will grow with a \$F in the top 25%. One of the most feed efficient bulls in the sale.

A big thanks to Danny, Matt, Kyle and Dave as they make the Wilde Angus Ranch work on a daily basis!

U-2 COALITION 206C

As a return sire group at Wilde Angus that we really appreciate the correctness and structure of the Coalition offspring. They are not big numbered cattle, but really fit the bill and are excellent performing cattle. This bull out of home raised heifer will be a never worry heifer bull. He really is complete and is very quiet. He ranks in the top 15% in CED, BW and top 5% in Doc, Claw, and Angle. A solid calf to lead the sire group.

Might be a favorite of the Coalitions around here. This bull is an excellent bull with plenty of power. He is big middled, big hipped, and correct in his foot structure. He has excelled weaning at 733# with a WR of 114. He is one of the best numbered Coalition sons I've seen. He is in the top 20% in HP and CW. top 15% in WW, YW, Milk, MH, \$F. top 10% in Doc, \$M, \$W, Angle, and top 5% in SC, Claw. Out of a Stunner daughter and crossed to Coalition, should make for excellent broody females. Recommend keeping the replacements out of this bull.

Out of a first calf heifer, this bull has good extension, extra rib, very good headed and is docile. He maintains a sound structure and stands on a wide base. This bull has carcass, growth, and very good maternal traits. He ranks in the Top 15% in CEM, Claw and CW, in the Top 10% YH and \$C, and the Top 2% in WW and YW. He is a balanced bull.

Out of larger frame cow, 1035 is really balanced in terms of calving ease and performance. A smooth made bull with plenty of rib shape. This bull never quits moving around the development lot and displays great instincts. He ranks high in DOC, CED, BW, WW, YW, \$M, and \$W. He has good carcass genetics and a +274 \$C. Recommended for heifers.

A thick, smooth, well-made bull that can be used on heifers. He ranks in top 25% in CED, DMI, top 15% in HP, top 10% in WW and \$M. He is a bull that has eye appeal and is good on his feet. He traces back to the great 2126 Stockman cow, who is a Pathfinder® and raises excellent calves. Look for this one to sire desirable females that have some grow in them.

Another sleep-all night heifer bull. This bull has good extension, is clean up through his shoulders and neck, and moves freely. His maternal granddam is 9063, # a Pathfinder® Alliance daughter. She had a big middle and was shaped perfectly. The maternal cow power in this pedigree has opportunity to sire replacement females.

LOT 34

The lone Casino Bomber N33 sired bull in the sale, but he is an exceptionally good one. He is a real thick, freight train of a bull that is strong in his top lines, and carries it well through his quarter into his stifle. With a big rear end, you have to appreciate his natural mass and his wide wheel base. His dam is a first calf heifer Coalition daughter that is well made. With a WR of 114, she is off to a fantastic start. This bull is very well balanced in WW, YW, YH, Milk, Claw, Angle, CW, all ranking high. His value indexes have a \$W and \$F in the top 1% and a \$C at +308. He also has excellent carcass data and ranks in top 10% in Angus on Dairy values.

LOT 35

A bull sired by the high seller in the 2020 sale, Wilde's In Focus 6201. We love the 6201 daughters at Wilde Angus. They are well made moderate cattle. This bull has some powerful maternal genetics with the 6201 cow and 9084 Fix It bloodlines. He is well bred and that is reflected in his top 1% CEM ranking. Recommended for cows, it wouldn't be surprising that after the first calf crop, you could use him on heifers. His front is smoothly made and I expect him to sire easy coming calves.

3218 is sired by Frey's Appearance, who walked the pasture in 2021 before he was retired. Appearance had excellent feet and was known for siring excellent females. He made Pathfinder® as a sire last year, which was a special accomplishment for an owned bull. We own Appearance with Ridl Angus in North Dakota. Much like his sire, 3218 has great extension, rib, and natural thickness. He is likely to grow into a large frame bull and should make excellent daughters. He ranks in top 5% in CW and \$F. While one of the youngest bulls in the sale, there is real potential in this one.

6071 is another cow bull with very good performance and is exceptionally balanced in his 50K profile. He ranks in the top 25% in 12 of 22 traits. A very good footed bull, with a large frame, big scrotal, and is very balanced. The Windy X Objective Cross should make some very functional females. Ranks in the top 10% in WW, YW, CW, Claw, MW. Three of his maternal sisters are still in the Wilde herd and have raised 6 calves with an average WR of 106.

Dam's Production: BW 4 @ 83 BR 4 @ 99 WR 4 @ 107 YR 2 @ 99

6188 moves really well and was first noticed trudging through a big snow. He is a taller bull with a solid front end, clean sheathed, and is strong topped. His numbers aren't as good as his 1/2 brothers, namely because his granddam is 15 years old. He will outperform his numbers and should sire heavy calves. With the Sandpoint Blackbird 8809 and RB Lady Standard 305-890 in his pedigree, he has some cow power in his blood.

N BAR EMULATION EXT

9UF3 is a herd sire we selected in the 2020 sale from Sinclair Cattle Company. He is a well made bull, not big numbers, with outstanding maternal influence on both sides of his pedigree. He is as close to a modern day EXT but with more length. He is excellent footed, and we believe he will sire excellent daughters that will be highly productive females. Our second round of heifers will start calving again this March.

4031 is a clear cut heifer bull that has outperformed what his old school numbers says he should do. The maternal combination of EXT and Objective in the pedigree should offer some upside. He is a high carcass bull that is moderately framed. He has -2.1 BW, second lowest in the sale offering. He is also in the top 3% in EN and top 15% in DMI, and the bull should be the easy keeping kind. A rancher's bull here.

Out of Pathfinder® cow, a FSF Vance daughter that has an outstanding spread from BW to WW of 90 to 106. This bull has all kinds of thickness, big middled, big topped, and big butted. He is one of the highest ranked \$M bull in the sale ranking in the top 4%. He also ranks in the top 15% in DMI, and top 3% in EN. His ½ brother sold in the 2021 sale to Stan & Mitch Mistic, Puposky, MN.

Another smooth made heifer bull that has some length. He is really clean through his front, good headed, and quiet. He was the lightest bull at weaning, but I kept him because of his potential. He has developed nicely and is now on par with his contemporaries. His maternal brother sold in the 2021 sale to Mo & Pandi Rinaldi, MT. His maternal sister raised on excellent heifer kept in the herd.

Dam is an Armor 6210 daughter and a very consistent performing cow. She has an excellent BW to WR spread and consistently brings home a calf. This bull can be used on heifers with a CED of +12. He is long bodied bull with a super slick front end. He doesn't give up much, and he is a deep bodied bull. He is good in the herd, but he can get nervous 1:1 if handled wrong. The bull is a good one and should sire really nice calves. Ranks is top 15% in CEM, EN, Claw.

Much like his brother, 6080 can also be used on heifers. A bull that is narrower, clean fronted, and long bodied. His granddam is a Pathfinder® and his dam will likely make Pathfinder®. His dam has put three replacement daughters in the herd with an average YR of 104. They make excellent cows and show very good fertility. The EXT influence has some real potential to do good things in most cow herds.

Exquisite is a direct son of EXT out of the Sinclair program in WY. A bull that was later maturing, he has developed into a real attractive bull with power and phenotype. I expect these sons to be similar in their development, type, and kind. It is old school breeding for the true cowman.

The lowest BW bull in the sale with a CED and BW ranking in the top 1% of the breed. This bull came small and did well to make the sale. He is a deep bodied, clean sheathed, big-butted bull. He also ranks in the top 15% in EN and top 20% in \$M. His calves will come easy.

A heifer bull with some growth and performance. Out of Double Dare daughter, this bull has some power, natural thickness, and is sound. A big hind end and a clean sheath complement this bull. He ranks in the top 20% in CED and top 15% in BW. He will give daughters ample milk and they should be quiet.

ANGUS GSSM

Powered by Neogen GeneSeek

FOR ANGUS. BY ANGUS.

Created by Angus Genetics Inc. (AGI) and powered by Neogen GeneSeek, our sale cattle have been tested with the first DNA profile designed specifically for Angus cattle, Angus GSSM.

Each marker is intentionally chosen from the Angus genome to drive the Angus breed into the future. It offers maximum accuracy for genomically enhanced EPDs at great value. Testing heifer and bull calves ultimately allows you to reap the benefits of faster genetic gain in your commercial herd. With Angus GS, it's all about you, our customer.

LOT 83

This is the power bull of the sire group. His dam is a really broody Appearance daughter out of the Pathfinder® cow, Forever Lady 3112. There is power up and down the maternal side of the pedigree. This bull will be a larger framed bull with loads of depth, a strong top line, and some size. He ranks in the top 15% in WW, CW, and MW. His \$F is in the top 20% of the breed. His calves should have real growth.

A huge THANK YOU to Linda, Sonny and the crew for the sale day meal!!

A 79# BW bull that has a good birth to weaning spread. This bull is good headed, super docile, and should add milk to daughters. He also ranks in the top 10% in CED, BW as well as the top 2% in CEM. You won't have to worry at night with this one.

Sired by 229F, this is a power cow bull. He is a tank, born at 107# with tremendous length and depth of body. He is one of the youngest bulls in the sale and had real performance with a WR at 122. He will be a very good footed bull with some size and muscle throughout. His dam is an Armor daughter that has put her last four sons in the bull sale. Past 1/2 brothers have sold to Mike Rogstad, Bismarck, ND and another to Sletten Ranch in MT. This bull also has very good beef on dairy values. He ranks in the Top 5% in \$F. The 229F dam, the 155Y cow, is regarded as a top cow in the Peak Dot herd in Canada and is the reason we selected him as a herd sire.

A really balanced power bull out of the Elba 2101 Pathfinder® dam. This bull is much like his 1/2 brothers, he is a larger frame, deep bodied bull that can track with the best of them. He has eye appeal in his type and kind. His never miss dam is rock solid at 11 years old. This could be a hidden gem in the sale. He has 3 maternal sisters retained in the herd at the ranch.

A really quiet and smoothly made bull that is the 2nd youngest in the sale. His dam is known for moderating BW and a very good disposition. This bull ranks in the top 10% in DOC and top 2% in CEM. Previous 1/2 brothers have sold to Ron Lund, Warroad, MN and Melissa Gibson in Cambridge, MN. He should sire nice calves and sought after daughters. He traces back to the great Forever Lady 98 who was a foundation cow in this herd.

This bull is well made with length, good depth, big quartered, and plenty of muscle in his backside. A clean fronted and tight sheathed bull. His dam is the 1/2 sister of the Lot 89 bull. She has a long influential line of maternal genetics and is a Diamond 247 daughter. Another opportunity here to breed for really nice replacement females.

A cow bull with some growth. This a good carcass bull with his CW, MARB, and \$W in the top 25% of the breed. 9009 is a long bull with a narrower top than his brothers. He has tight sheath and tracks well. He is a good footed bull that has all of his value indexes within the top 30% of the breed. He is a CAB bull with a +283 \$C.

This bull has a long line of productivity from the Stockman cow family on the maternal side. His Appearance sired dam is the type of cow we strive to breed. 9104 has extension, a deep middle and really thick in his hind quarters. He ranks in the top 25% in \$M and \$W. He has good balanced traits throughout.

9188 is a cow bull out of Bullseye 1510 daughter. He is a leg down bull with a big hip, deep middle, and a strong quarter. For his frame size, this bull will be a meat wagon who tracks well. He is a low EN bull which coincides with his DMI being in the top 15%. Other rankings: top 10% in HP and \$M.

Born at 84#, this is a heifer bull per his genomics. His dam is a FSF Vance daughter that has raised two calves averaging 75# at birth. He is much like his brothers, deep middled, long, and big butted. The sire group is consistent in it make up and I expect these 1/2 brothers to sire nice calves.

A young bull out of VAR Rocky sired dam that traces back to the Charisma U691 cow. This bull has performance on the hoof as well as his Angus GS profile. He has 12 traits in the top 25% of the breed, the most notable of which is the \$M in the top 3%. This bull is moderate framed, clean fronted and will have a strong top, big middle, and have plenty of bone. His feet are very good. He is a CAB bull.

His granddam was a Pathfinder® for Shady Ash Angus and his dam is an Aberdeen 759 daughter. His sire is Connealy Spur son purchased from Jallo Angus in ND. This bull is rugged, has some size and depth, and should provide some power to his offspring. He has a big middle, solid topline, the kind of length we like to see, and a big hind end. He will add Milk to daughters that need it. Ranks in the top 10% in \$M. Recommended for cows.

A complete cow bull sired by No Doubt 10F. This guy has phenomenal numbers and a phenotype to match. He traces back to the Forever Lady cow family that has been a foundational line here at Wilde Angus. This bull is moderately framed, has a deep body, and is young with lots of style. He moves very well and will have a strong topline. Recommended for cows despite his top 20% in CED. He is a long spined bull. Ranks in top 25% in both foot scores, and top 1% in CEM.

LOT 118

Born at 82#, his dam is a Black Granite daughter that has had consecutive calves at 84#. 9069 is a leg down bull in a thick package. He is really smooth made through the shoulders and has a deep body. He is balanced across the maternal traits and should sire nice females. He has a nice sheath and stands on good feet. He will be the easy keeping kind of bull.

Sired by Herbster Origin 886, this leg down heifer bull is out of a Bismarck 5682 daughter that is 12 years old. She has raised many sons for the sale. Jason Ulrich from Malta, MT got a 1/2 brother in the 2019 sale and Oak Hill Farms from Henning purchased one in the 2021 sale. He is a deep bodied, tight sheathed bull that tracks very well. He ranks in the top 15% in RE and \$M. He should also be a low maintenance type of bull.

BW: 79 WW: 630 WR: 102

Sired by Exquisite, who is a direct son of EXT. This bull was born at 79#. Recommending him for cows the first year, but he likely will prove to be useful on heifers. His dam is a high producing commercial cow that raises a nice calf each year. He is bull with length, depth of body, and a clean sheath.

We are offering a few commercial bulls without papers. The parentage on the sires is complete and accurate. The dams are good cows without papers or have not been parent verified. With each passing year, we will have fewer of these in the sale offering, but believe they are sound, functional bulls.

Breeding Info: AI to Deer Valley Optimum on 6/20/22, confirmed AI bred. Due 3/29

A moderate, very feminine female sired by Traction 2196. She is a long bodied, angular female. Her Angus Valley dam has raised several calves that have made the sale, including a 1/2 brother in the 2021 sale that was a very good calf and weaned at 840#. Optimum is considered the most prominent Growth Fund son to date and is a calving ease specialist.

The registered bred heifers were selected out of the Wilde Angus Ranch replacement females. The entire group was bred, handled, and managed exactly in the same way as our ranch females. They were Ultrasounded in late August and will be rechecked just prior to the sale to confirm pregnancy.

Breeding Info: Pasture exposed GDAR Load Up 1320 and Bobcat Emerald, due mid April

This female is as wide and deep as you will see a bred heifer and sired by Deer Valley Growth Fund. It is probably not appropriate to call her a tank, but she is one. A smaller framed heifer that has some muscle throughout. She is good headed and has eye appeal. She has good growth numbers in WW, YW and is in the Top 1% in Milk. She is a high \$M female ranking in the Top 10%. A maternal brother sells as Lot 85.

Breeding Info: AI to Wilde's Bomber 3137 on 6/20/22, due 3/29
 This Manager daughter is out of a birth weight dominant female who is known for long, heavy calves. This heifer was born at 118# unassisted. She has tremendous length and depth of body. She is very clean fronted and has a feminine look. The mating to 3137 should be an exciting one and moderate the BW on the calf, but still have plenty of capacity and a great phenotype. A maternal brother sold to Jeff and Nancy Francis in the 2021 sale.

Breeding Info: Pasture exposed to Whitestone Cash 9157 and Herbster Foster 9046, due mid April
 A feminine 10F daughter with good capacity, length and depth of body. She should be a very good uttered female that has balanced maternal traits. She stands on good feet and moves well. She is another female that could have larger birth weight calves given her length and the propensity of the cow family to do so. This is a large RE heifer and in the Top 2% in CW. Her calves will have substance.

A front pasture kind of heifer out of the great 5242 cow and sired by Wilde's Bomber 3137. A smooth made, very feminine headed female with great length, lines, and a near perfect structure. She has the genetic potential to be outstanding. She is a light birth weight heifer that will be very fertile and have a great udder. Her maternal sister raised the Lot 22 bull. Don't let the old school numbers fool you, this heifer has immense potential.

9155 is sired by Captivation 877 and is a long, smooth made female with an excellent phenotype. She has angularity and plenty of capacity. She is docile and is always front and center. She will likely be a lead cow someday. Her young dam is off to a great start with her calves having a WR of 2 @ 106. Her EPD's rank her in the Top 15% in HP, Claw, and Angle. Every value index is in the Top 40%, she is a very balanced female.

This heifer has an excellent EPD profile and a better Angus GS ranking in the Top 25% in 12 traits. She has high carcass traits and a low birth weight with an excellent CEM ranking in the Top 15%. Sired by Whitestone Foster, she will have enough frame and bone to handle tough environments. She also ranks in the Top 15% in \$F and \$B and in the Top 10% for \$W.

This smooth made female sired by 069 is another attractive female that has very high maternal breeding. She traces back to the Ms Fix It 4090 cow that was a Armor daughter out of the 4070 cow. She has maternal power and is the maternal sister to the great Ms Fix It 9084. This heifer has all six of her value indexes in the Top 40% of the breed. She is a balanced bred female.

This Frey's Appearance daughter is a deep bodied female with a real feminine front and good lines. She is a lengthy heifer that is big hipped and has a solid top line. Her dam is a young cow that has been a consistent cow. This is another heifer that is very quiet and will have adequate milk ranking in the Top 20%. There are lots of breeding options in this heifer with the outcross pedigree she holds.

With a pedigree that combines the RB Lady Standard 305-890 and the WhispPines Lucy 7007 blood, this heifer ranks in the Top 30% in CEM. This smoothly made heifer has the eye appeal in her side profile, as well as from the front. She has a larger frame with a long body. She will look very nice when she comes off summer grass after breeding season.

BW: 94 WW: 582 WR: 104

Dam's Production: BW 3 @ 86 BR 3 @ 106 WR 3 @ 101

This heifer is sired by 3137 Weigh Up. Her granddam was a Pathfinder® Itasca daughter raising 9 calves at 93# with a WR of 9 @ 108. This heifer's 8201 dam was the last daughter from that cow. 2123 will have some frame and be a larger cow and have calves that should have some grow in them. She ranks in the Top 25% in \$F.

The light birth weight heifer should continue on and have easy coming calves. Sired by 1484 Linchpin, this heifer has a longer body and a big middle. She will be a moderate framed female much like her dam. The maternal traits in this female are excellent on both sides of her pedigree. The Mary 1484 and Rachel 1049 are both Pathfinder® cows and well represented in this sale. Lot 163 is the progeny of 0225 maternal sister.

Dam's Production: BW 3 @ 80 BR 3 @ 99 WR 3 @ 101 YR 1 @ 108

This heifer reflects the old school breeding from Executive. She is a long made female with a clean front and attractive frame size. She has a maternal influence in her breeding and stems back to the dam that also raised the dam of Lot 26, they are maternal sisters out of Lass 1151. This heifer will be the low maintenance kind and just raise calves.

COMMERCIAL BRED HEIFERS

1-20 • GREEN TAGS

BREEDING INFO: Heifer bull due starting April 1 – May 15, ultrasounded in September, and reexamined by Dr. Bob Burgess prior to the sale.

A fancy group of ranch raised commercial heifers that were purchased for use in our embryo program. Originally from the GDAR program in Montana, these heifers were bred here and spent the summer on grass with a calving ease heifer bull. These girls will make excellent cows. They have been given all the same health protocol as our heifers this past fall. They have been repoured with Cydectin and have received both the Scour Bos 9 and Sour Bos 4 shots. Heifers will weigh 1250 – 1325 come sale day. Bangs vaccinated.

1-45 • PURPLE TAGS

BREEDING INFO: AI bred to EB New Addition, due March 10, 2023. There will likely be several calves on the ground by sale day.

These AI'd heifers were sired by Wilde Angus bulls and purchased from the Johnston's in Montana as heifer calves. They were developed and bred in Nebraska by Tim, Cody, and Cal, which is the crew that did an excellent job feeding our cows last winter. They were moved back to Wilde Angus in early December and have been here for the winter. This is a set of heifers that will also be very good cows. They are extremely quiet and are easy handling cattle. They have been bred, raised, and developed the right way. Bangs Vaccinated.

1-30 • BLUE TAGS

BREEDING INFO: AI bred to Points West Linchpin 1484, due April 15, 2023.

This fancy set of Black Angus heifers were consigned by Ryan and Michael Hough. They have been developing these heifers and brought this group to Wilde Angus to be bred late last spring. Linchpin has a -2.1 BW and +15 CED and his calves come easy. All heifers were ultrasounded on October 14, received Triangle 10 and Scour Bos 9 vaccines. They are Bangs Vaccinated, are on a complete mineral program. They will receive their booster shots and be poured with Clean Up II prior to sale day. **Contact Ryan 701-388-1887 • Michael 218-329-0322**

1-60 • RED TAGS

BREEDING INFO: BULL Bred due April 1st, calving for 60 days.

These bull bred Angus Heifers were exposed to Wilde's Bragging Rights 8152 (CED +15, BW -1.4), Wilde's Powder Keg 8029 (CED +9, BW -.2), BHF Growth Fund H07 (CED +10, BW +.3). All heifers were ultrasounded on October 14, received Triangle 10 and Scour Bos 9 vaccines. They are Bangs Vaccinated, are on a complete mineral program. They will receive their booster shots and be poured with Clean Up II prior to sale day. **Contact Ryan 701-388-1887 • Michael 218-329-0322**

LOT A

A young, started mare with some of the greatest Quarter Horse genetics anywhere. This mare is cowy, has been used here at the ranch to gather cattle and has had a little time with the rope. Whether you are looking for a ranch horse or more specifically one to use in the arena this mare should excel in whatever discipline you choose. Her pedigree is stacked with cutting, reining, and working cow horse greats including Peppy San Badger, Freckles Playboy, Travalena, Smart Little Lena, and Doc O'Lena. Bred to work and excel with the heart to do it and a temperament quiet enough to make a kids horse. A full sister was sold in the 2022 Sale to Don Abarr and is used here on the Ranch on a regular basis.

LOT B

A three-year-old gelding out of the most prolific mare here at Wilde Angus. TR Miss CD has excelled as a ranch horse, in the cutting pen, but even more so as a broodmare. Her offspring are hard-working, easy riding, cowy and very catty on their feet. This gelding is following suit, he has some great moves, is easy to ride, willing to learn quick, and has been used to gather and move cattle out in the real-world conditions. His pedigree is stacked with cutting and reining greats including the all-time leading sire, Grays Starlight, with offspring earning over \$10 million. Doc Bar and Peppy San Badger are both on the dam and sire's side of this pedigree, stacking great dominant genetics that are the foundation of the working Quarter Horse.

---	---	---

A classy, looking red road mare who is exceptionally smooth and quick on her feet, and she has the natural bred in cow sense. She has been ridden outside and used to gather and move cattle and should be great in the arena or on the ranch. Her maternal grandsire was our Playin In The Pudden, who was a favorite by all whether on his back or as our Stallion. The maternal granddam, Rowdy Barred Song was one of the very first to be sired by Mr Joes Song, best known for his huge stop and calf roping. The cross between Travastar and the Playin In The Pudden daughters sure seems to work. They are quick to learn, want to please, naturally athletic and are destined to EXCEL in whatever discipline you choose.

The last of the TR Miss CD offspring is this little 2021 born mare. A pedigree that combines Doc Bar with Peppy San Badger who was the 1977 NCHA Futurity winner and has since sired offspring with earnings of more than \$25 million. Peppy San Badger remains the PATRIARCH of dominant bloodlines in the cutting, reining, and reined cow horse industries and has sired tremendous ranch horses. Doc Bar was bred to be a running horse, but instead excelled on the halter and his offspring have dominated the cutting horse industry with their cow sense, athleticism, and graceful moves. Numerous maternal siblings have been some of the best ranch horses to walk this place. Do not miss your chance to have a piece of CD's final legacy thru her daughter sired by Travastar.

Smart Little Lena, Peppy San Badger, Freckles Playboy, Doc O'Lena are the foundation bloodlines of this young mare. She is quiet, quick, and very solid with the potential to shine. This young mare's pedigree has NCHA Lifetime Earnings of over \$1.75 million directly. There is greatness in this mare with the willingness to learn and the ability to excel both in and out of the arena. The sire of these horses is Travastar, who is a stout, smooth riding, cowy, and easy to handle stallion that is sure leaving his mark. We have sold offspring sired by Travastar to North Dakota, Oklahoma, Arkansas, and Wyoming.

H **2021 Gelding**
 Birth Date: 2021 Commercial

A quiet, easy-going gelding that is colored up, is a big mover and sure can cover the ground. He hales from the Famous Twitchell Ranch of Jordan, Montana. This gelding should make a great working ranch horse or a roping horse. His brother was the high selling horse in the 2022 Wilde Angus Sale to Mike Rogstad of Bismarck, ND.

I **2021 Gelding**
 Birth Date: 2021 Commercial

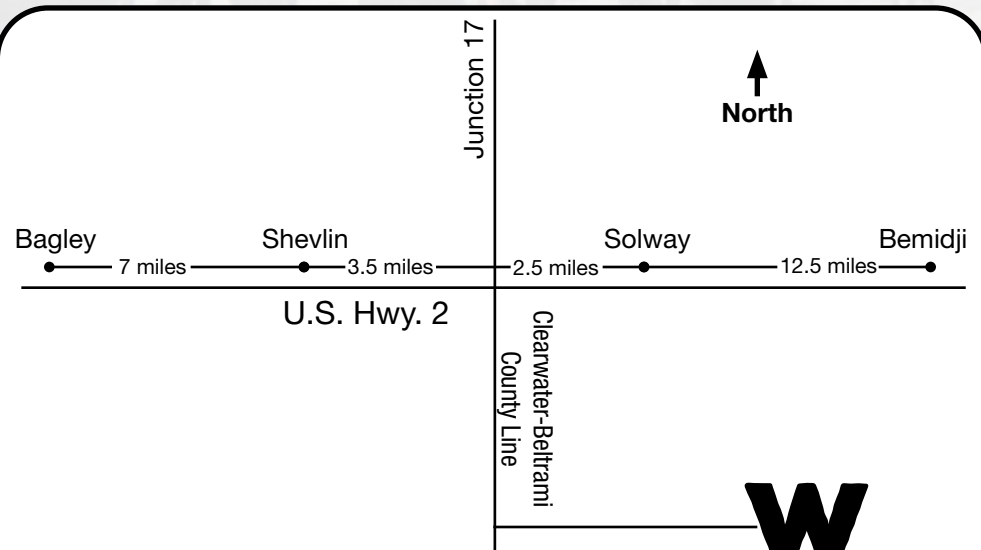

Another gelding that comes to us from the great Twitchell Ranch of Jordan, MT. This gelding does have an old injury on his neck, we have had not issues with this, just wanted you to be aware of it. He is quiet and should make a great ranch horse.
