Who We Are

- WBF is a non-profit organisation founded in 2019.
- **Mission:** To bridge the gaps between academia and industry by encouraging collaboration and innovation.
- **Vision:** To connect stakeholders from diverse backgrounds to ensure the successful development and commercialisation of biological products.
- **Objectives:** Provide a global platform for multi-stakeholders to showcase their latest products and innovative technologies during the Annual World BioProtection Summit & Awards.

What We Do

Science & Innovation

Focusing on the development of next-generation formulation and delivery systems – to fill the gaps in the market created by removal of toxic pesticides, consumer demand for organic foods, and sustainable agriculture.

Industry & Academia

Providing a world-class platform to connect academia and industry for novel innovation, encouraging collaboration, commercialisation, presence and credibility in biocontrol across world markets.

Investment & Growth

Offering InvestorReady Sessions to innovators, entrepreneurs and SMEs, enhancing opportunities to raise investment while creating more general investor interest in the sector.

Biocontrol SME Connect

Connecting SMEs to other SMEs for business and collaboration, and expansion into new markets.

Product Recognition

Recognising innovation and talent, raising awareness of novel innovations and highlighting important advances in the biocontrol sector.

Regulatory Reforms

Leading regulatory reform for biopesticides in the UK post-Brexit, removing obstacles to commercialising novel products more quickly and cost effectively.

Launch: Biocontrol Industry White Paper 2022

Biopesticide Regulatory Reform in the UK and beyond

Bringing **Biopesticide** Regulatory Reform to UK Parliament

Jubilee Room, House of Commons, Parliament,
Palace of Westminster, London SW1

5 September, 2023 | 11 am – 13 pm

Supporters of Regulatory Reform

The WBFF Research Foundation

Fostering Collaboration and Innovation in Bioprotection.

The WBFF Research Foundation aims to promote protection research and innovation for sustainable development, healthy ecosystems, and improved livelihood protection.

It will initially focus on identifying microbial solutions in agriculture and the environment, serving as a knowledge hub for academia, industry, and government stakeholders.
